For continuous monitoring of the spending, a new mechanism is in order—some kind of inspector-generalship acting for the taxpayers. The Government Accounting Office, an arm of Congress, has in the past been useful—when called upon—in pointing out where the waste is and how to get rid of it. Perhaps a permanent monitoring unit could be established within it. Or in the White House Office of Management and the Budget, where it would be more independent of Congress.

On the other side of the defense ledger, this administration must, in the name of humanity, eventually face the issue of limiting destructive systems—of not building them at all, of imposing ceilings on their numbers, even reducing them—in agreement with the Soviet Union.

As to our friends, pressures will have to be kept on them to share, more generously, the great burden carried by Americans to protect the common interests of the free world. The United States has the nuclear problem in hand. Its allies could make the greatest contribution to conventional forces—Europeans on their ground, Japan in its coastal waters.

Finally, Reagan and his team must recognize that the threat of force, by itself, does not constitute a policy for the secure and civilized conduct of international affairs.

Nearly half a year into his administration, Reagan has nothing that can be called a foreign policy, apart from bluster and gunrattling. These, and his embrace of tyrants—on condition only that they be anti-Soviet—have projected abroad a questionable moral base for the way Americans should behave in the world community.

S. 917—THE VETERANS' DISABILITY COMPENSATION, HOUSING, AND MEMORIAL BENEFITS AMENDMENTS OF 1981

● Mr. STAFFORD. Mr. President, I rise in strong support of S. 917, the Veterans' Disability Compensation, Housing, and Memorial Benefits amendments of 1981. I am pleased to join in sponsoring this bill which includes the important provision to increase the rates of disability and indemnity compensation for disabled veterans and their survivors and dependents.

Through the years, Congress has from time to time provided for increases in monthly benefits for cost-of-living advances. Inflation continues, and it is important that this Congress make needed adjustments in veterans' disability compensation for disabled veterans and to increase the rates of dependency and indemnity compensation for their surviving spouses and children. The cost-of-living increase contained in S. 917 is 11.2 percent, which is the same increase provided to social security and VA pension beneficiaries which became effective June 1, 1981.

The service-connected disabled veterans have made tremendous sacrifices for the Nation. There is no way they can be fully compensated, but a grateful Nation can make sure that benefits provided by the Congress can be adjusted as living costs increase. This we are attempting to accomplish in the bill being considered today.

The bill also proposes to increase the maximum automobile allowance for veterans who have suffered the service-connected loss or loss of use of one or both feet or hands or service-connected blindness. Since the effective date of the last increase, the Consumer Price Index for new automobiles has increased over 21 percent, and the proposed amendment increasing the automobile allowance to $5,000 would help insure that this benefit keeps up with inflation.

On June 2, 1981, I joined with Senator THURMOND in introducing S. 1297 to amend current law to increase the compensation payable to veterans who have lost or lost the use of both upper extremities as a result of service-connected disability. Our bill provided for an advance for these particular severely handicapped veterans one full step in their present statutory award category of compensation. We are informed that 125 veterans have suffered service-connected loss of both upper extremities and 357 veterans have lost the use of both upper extremities as a result of service-connected injuries.

The Senate Veterans' Affairs Committee agreed to the provisions of our bill, S. 1297, and included the provisions of Senator THURMOND's and my bill in S. 917 now before the Senate. We feel that the law should recognize the different degrees of loss of function when considering compensation rates for bilateral upper and lower extremity losses.

On March 24, 1981, this Senator together with the junior Senator from Vermont (Mr. LEAHY), introduced S. 779 to authorize the Veterans' Administration to furnish memorial headstones or markers to commemorate veterans who, by choice, are buried at sea, who donate their bodies to science, or who are cremated and have their ashes scattered without interment. A similar bill to our S. 779 has passed in the House of Representatives.

Our Senate Committee on Veterans' Affairs has included the intent of our S. 779 in the bill we are now considering.

The Administrator would be authorized to furnish appropriate memorial headstones or markers for those veterans whose remains were buried at sea, whether by choice or otherwise, those veterans whose remains were donated to science and those veterans whose remains were cremated without interment of any portion of the ashes. The Administrator is authorized to furnish such memorials for placement in a national cemetery area reserved for such purposes, or in any private, local, or State cemetery. The law is amended directing the Administrator to set aside suitable areas in national cemeteries to honor the memory of such veterans and those who are missing in action.

Present law provides for commemoration of those whose remains cannot be interred, in national cemeteries. Our bill would expand the program by authorizing such commemoration in local, private, and State cemeteries.

Increasing numbers of veterans desire that their remains be donated to science or to have their remains cremated, and the ashes scattered. Even though their remains are not interred, their service to their country should be memorialized. Those who choose an alternative to burial should not be denied recognition of their sacrifice and service.

S. 917 contains a number of additional provisions beneficial to our veteran population. It is of considerable significance that the members of our Senate Committee on Veterans' Affairs under the capable leadership of its chairman, ALAN SIMPSON, continues to diligently work in behalf of all veterans in meeting their needs and in fulfilling the Nation's obli-

gation to those who have given so much to the country.●

THE LAND AND WATER CONSERVATION FUND WINS A ROUND

● Mr. BIDEN. Mr. President, periodically this year I have expressed my concern over the future of both the Federal and State shares of the land and water conservation fund (LWCF). Until yesterday afternoon, I have not been optimistic given the administration's requested spending level which is 91 percent lower than that proposed in January by then President Jimmy Carter.

In addition, Interior Secretary James Watt has sought to terminate the fund's State assistance grant program. The administration's initiative is particularly disheartening when one considers how this program is funded. Receipts from Outer Continental Shelf oil and gas leasing—not income tax revenues—are the LWCF funding source. This is important since the depletion of one natural resource funds the preservation of others. Next year, it is estimated that $8.5 billion will be realized by the Federal Government from OCS leasing—perhaps even more given Interior Secretary Watt's recently announced accelerated leasing schedule.

Yesterday afternoon, the Senate Appropriations Committee adopted an amendment offered by Senator JOHNSTON appropriating $201.620 million from the land and water conservation fund for fiscal year 1982: $100 million would be allocated to the States; $99 million would be used by the National Park Service, the Fish and Wildlife Service, the Forest Service, and the Bureau of Land Management for Federal projects; and $2 million would be used for administrative expenses.

I understand the difficulty which the Appropriations Committee finds itself this year. But the land and water conservation fund has been too important an incentive for Federal, State, and local governments to protect threatened natural resources and provide adequate recreational opportunities to allow the fate which Secretary Watt has proposed for it to occur.

The importance of the land and water conservation fund was apparent to the 21 other Senators who joined with me in a letter to the Interior Appropriations Subcommittee urging continued funding for both the Federal and State LWCF programs. While I was disappointed with last week's 6-to-8 vote loss in the subcommittee, I was hopeful that the vote could be reversed at the full committee level.

The $201 million which the committee has now included for the land and water conservation fund in the fiscal year 1982 Interior Appropriations is fiscally prudent. It represents a 61-percent cut from President Carter's budget submission. I am hopeful that the Senate will resist any attempt to reduce or strike either the Federal or State share of the LWCF when the Interior appropriations bill is debated—perhaps as early as next week.

To appropriate as the committee did yesterday, 2.4 percent of the anticipated $8.5 billion in OSC receipts for continuation of the LWCF's Federal, State, and local partnership is a decision which, I am convinced, an overwhelming majority of Americans support.

Mr. President, I ask that the projected State-by-State allocations which will result if yesterday's action is enacted be printed in the RECORD at this point.

The information follows:

Projected fiscal year 1982 LWOF State allocation

State:	*Allocation*
Alabama	$1,676,388.07
Alaska	868,348.08
American Samoa	9,955.38
Arizona	1,392,592.23
Arkansas	1,222,727.45

●

SETTLEMENT OF SALT LAKE CITY, UTAH

● Mr. SYMMS. Mr. President, I would like to urge you and my colleagues to share in the celebration of July 24, 1847, the day Mormon pioneers first settled in Salt Lake City.

The Mormon story is one of heroism and sacrifice which has been deeply etched in our frontier history. The pioneers who settled the regions of Idaho and Utah in search of religious freedom displayed an independent spirit, a strong belief in God, their families, and the country. Their determination led them through the hardest of times.

One of the most inspiring aspects of the Mormon faith is the strong emphasis on individual initiative and private solutions. Members of the community are exemplified for providing for one another's needs without asking government help. They believe the surest helping hand is at the end of their own sleeve.

That unique blend of cooperation, individual initiative, belief in God, and striving for excellence is the very essence of the pioneer spirit. It is a collection of the very qualities which have been at the heart of American greatness.

These industrious pioneers and their descendants have made and continue to make invaluable contributions to our American way of life. I praise their achievements and their dedication to the traditional American values of morality and family life and to the principles held by the Founding Fathers of this great Nation.

Mr. President, I ask that several articles be printed in the RECORD.

The articles follow:

WESTWARD THE SAINTS: THE NINETEENTH-CENTURY MORMON MIGRATION

(By Glen M. Leonard)

The April sun at daybreak cast long, lonesome shadows across William Grant's hometown village, Willenhall, Staffordshire, in England. A 28-year-old convert of sixteen years, he clutched the coronet that had won him prominence in the brass band, checked his pockets for hard-earned savings, and turned toward Liverpool and the ship that would take him, his wife, and their three children to Zion.

"I took one long look Back, . . . Thousands of Circumstances Crowding my mind of things in the past," he wrote, "but they were soon forgotten in thoughts for the great future. Some 9000 Miles of Travel was here before us."

William would live out his life in American Fork, Utah, a bandleader, choirmaster, music store owner, and part-time farmer. When he arrived in 1866, he owned only the belongings he had packed into a small cart in Willenhall. "Economy was the motto," he remembered. "We denied Ourselves all Luxury and barely took the Necessaries of life." [1] They had not even been able to afford cooking utensils for the ocean voyage. Like thousands and tens of thousands of Latter-day Saints who repeated the process between 1840 and the end of the century, William Grant sacrificed property, friends, family, and familiar surroundings because of his faith in the principle of the gathering.

William Grant, who lived a quiet, unpretentious life, had nevertheless participated in a heroic event. He and other of the pioneering generation have been remembered and honored by succeeding generations as examples of inspiring faith and perseverance. Twenty-fourth of July parades, Promised Valley pageants, pioneer societies and museums, statues, trail markers, and other commemorations properly celebrate the drama of the crossing and, to some extent, romanticize these events.

Part of this overstatement is regrettable; sometimes we lose sight of human dimensions through the mists of grandeur. But the fact remains that participants in Latter-day Saint migrations emerged from the experience tried and tested as a people. Nothing can detract from the sheer fact of their achievement—the numbers involved, the organization required, and the dedicated effort it took.

Footnotes at end of article.

THOUSANDS CAME

No one knows exactly how many Latter-day Saints migrated during the half-century that the gathering was encouraged by Church leaders. But at least 85,000 members, perhaps half again that many if children and independent immigrants are counted, sailed from Liverpool during that time. Another twenty thousand headed for Utah from American towns and cities.[2]

The international movement began from England in 1840, and twelve years later from Scandinavia. By the 1860s the United Kingdom still supplied around sixty percent of all those leaving Europe, but decreased to less than half as other nations began sending more. Scandinavia, with relatively few converts, still accounted for about a third of the total Mormon migration.

MODEL ORGANIZATION

Historians of the American West have called the Latter-day Saint migration one of history's best-organized mass movements, a model of discipline, organization, orderliness, and cooperation.[3] Setting the pattern for migration was the revelation given through Brigham Young near Council Bluffs, Iowa, in January 1847:

"Let the companies be organized with captains of hundreds, captains of fifties, and captains of tens, with a president and his two counselors at their head, under the direction of the Twelve Apostles.

"And this shall be our covenant—that we will walk in all the ordinances of the Lord." (D&C 136:3–4.)

Jane Rio Pearce captured the essence of the schedule aboard a Latter-day Saint immigrant ship in 1851:

"A bugle sounds every morning to let us know it is 6 o'clock, when all who think proper, arise. At 7:30 it sounds again for morning prayer, after which, breakfast. We then make beds, etc. We employ ourselves during the day according to our inclinations. Sometimes a few musical ones get together and have a few tunes. Sometimes get together and gossip and so the day passes. When we have rough weather we have enough to do to keep on our feet and laugh at those who are not so clever as ourselves! But we are most of us getting our sea legs as the sailors say." [4]

Members on each ship (and later in wagon companies) were organized into wards or branches; a missionary returning home was often the presiding officer. Regular religious services were held, and prayers in each ward at nine concluded the day.

The shepherding influence of the Church organization during the wearying journey accomplished two purposes: it gave the uneasy traveler a feeling of security and trained him to be obedient to his leaders. Bishops and branch presidents counseled the uncertain and encouraged the homesick or seasick. They performed marriages and buried the dead; before childbirth they pronounced blessings on the mothers-to-be. Jane Pearce, for one, found her shipboard branch president "a really sincere servant of God. His name is William Gibson, a native of Bonny Scotland, and his office is to watch over us as a pastor, to counsel, exort, reprove if necessary. In short to see that all our doings are in accordance wtih our profession as Saints of the Most High God." [5]

Sometimes the organization was even more detailed. Even on the plains, handcart pioneer Henry J. Harrison reported a Sunday afternoon visit from his home teacher who "came around to Know how Your standing was in the Church." During an 1862 ocean voyage, William Wood was assigned by branch president Francis M. Lyman to look after the temporal needs of four women, two of whom were traveling with children, and an elderly man. This traveling home teacher commented,

"It was remarkable how quick the people settled down to the requirements of those who were selected as bishops over the respective wards. I do not think the same number of people being non-Mormons would have settled down to such order. Nothing but the Spirit of the Lord would produce such harmony." [6]

UNITY THROUGH FAITH

Order established among these Latter-day Saints from all walks of life and every economic circumstance was one of the achievements of the migration. Another was the unity of their common motivation. The migration was a physical act expressing and confirming faith. To "gather out of Babylon" meant to the nineteenth century Latter-day Saint both a spirtual separation from worldliness (a meaning that has survived to our day) and a geographical refuge in Zion, a central gathering place.

We see this process beginning as early as 1831 when the Colesville Branch, for one, migrated en masse from western New York, first to Ohio and then to Missouri. Other members joined them in building new Latter-day Saint communities. Driven from those temporary harbors, the Saints of the late 1830s sought a new home in western Illinois. To Nauvoo came the first European emigrants in 1840. Then, in 1846 began the famous evacuation and trek across Iowa to Winter Quarters, Kanesville, and other staging grounds that became the launching points for Utah.

Thus, in some sense, the Church had always been an organization on the move. And those pre-1846 migrations built the leaders who made the exodus to the West successful. Zion's Camp, led by Joseph Smith from Kirtland to Missouri in 1834, had tested several faithful elders who gave important spiritual and temporal leadership on the westward trek: Brigham Young, Heber C. Kimball, Orson Pratt, Wilford Woodruff, Parley P. Pratt, Orson Hyde, and George A. Smith. A few years later Brigham Young, as a senior member of the Twelve, had helped direct the sorrowful winter march out of Far West and northern Miissouri. He had been determined then that poverty would not force a sincere Saint to stay behind, and that same determination flowered in the 1850s into the Perpetual Emigrating Fund.

PERPETUAL EMIGRATING FUND

The Perpetual Emigrating Fund was a hand stretched out to those without sufficient resources to pay their passage. The needy Saints borrowed from the PFF with a promise to repay as soon as possible after reaching Salt Lake City. A revolving fund, its success was based upon the constant flow of the funds available to it. It began in 1849 and received periodic transfusions with money contributed by Saints in both Europe and the States. These additional contributions were essential, for gradually over the years the unpaid debt to the fund increased, until by 1880 the debt plus interest had reached $1.6 million.

During that year of jubilee, the Church's fiftieth anniversary, President John Taylor announced a cancellation of debt against those unable to repay. Bishops were instructed to judge the merit of each case, forgive the poor, and collect from others.

Even the immigrants who were able to finance their own removal benefited indirectly from the PEF, for it served as a general emigration agency. Its agents chartered ships at Liverpool, met each boat in America—at New Orleans (the early port) or, after 1855, New York, Philadelphia, or Boston. PEF agents helped the travelers pass official inspection, find temporary lodging, and transfer to river boats for the 700-mile trip up the Mississippi and another 500 miles up the Missouri. They found trains and other overland transportation to the frontier stations in Iowa and Nebraska. At these last staging stops, PEF employees organized wagon companies for the final, dusty leg of the journey.

For the peak years of European migration in the 1850s, a less expensive method was devised. A First Presidency letter announced the plan in 1855: "Let all the Saints, who can, gather up for Zion, and come while the way is open before them; let the poor also come, whether they receive aid or not from the Fund; let them come on foot, with handcarts or wheelbarrows; let them gird up their loins and walk through, and nothing shall hinder or stay them." [7] Between 1856 and 1860 PEF monies were available only for the handcart pioneers, about a third of the immigrants to Utah during that period.

For the next nine years after 1860 another system helped immigration. Each spring the First Presidency issued a call to stakes asking for an allotment of teams and men to meet the immigrants at the railroad terminal. The teamsters (nearly 2,400 of them in that decade) served without pay—as missionaries—and altogether assisted more than twenty thousand Saints. After 1869, the railroad made travel easier.

DEDICATION AND SACRIFICE

The flexibility of the arrangements to meet varied circumstances only stressed the urgency of the gathering. The Saints knew they were participating in a great event, possibly the greatest adventure of their lives, and the experience of a nine-thousand-mile trip across an ocean and three-fourths of a continent is vividly recorded in hundreds of diaries—heart-warming evidence of the human drama of the trek. In many of these journal accounts, the routines of daily life aboard ship and on the trail are remembered only in sketchy entries. Except for the uncertainties of a new experience, or the threat of ocean storms, emigrants had little to fear on the Atlantic. The record of safety at sea was reassuring, and Mormon groups were healthier and better fed than regular emigrants. The greatest trial of the overland journey was the discomfort of travel. "Do not expect me to describe our road, as they call it," Jane Pearce wrote. "It is a perfect succession of hills, valleys, bogs, mud-holes, log bridges, quagmires, with stumps of trees a foot above the water mud, so that without the utmost care the wagons would be overturned. Ten times a day, 'Oh for the Tram Roads of Old England.' We each day hope that we shall have better traveling but as yet our changes have only been from bad to worse." [8]

Illness, accident, and other physical discomforts were always a possibility. The first days out of Liverpool on a sailing boat or steamer, seasickness was a common reaction; some people remained bedridden for the entire ocean crossing. At New Orleans and upriver, fevers, cholera, and dysentery attacked weary travelers. Death, especially for children and the elderly, was a feared consequence, but agents tried to schedule an early European departure to avoid the most serious seasons for these dreaded killers.

Accidents also injured and sometimes killed travelers. William Wood watched a man fall from the tongue of his wagon and saw both front and back wheels pass over his head. But, said William, "he got up without help and shook the sand out of his curley hair. No injury was sustained, probably to the fact that it occurred in a sandy place. It was to me a marvelous escape." [9]

No all were so lucky. Makeshift doctoring, prayers and strong wills did not alwavs bring relief from suffering and fatigue. "This day at 2:30, Sister Kempton died," Jane recorded. "She came with us from London and was in her usual state of good health until two days ago. Aunt Bateman and I laid her out and sewed her body up in a sheet. She was buried by the brethren at sunset on the summit of a small hill, where there are five other graves." [10]

Footnotes at end of article.

Thus, the journey that expressed their faith also tested their faith. Jane Charters Robinson and her sister Helen had left home against their father's wishes but with the blessings of their converted stepmother. As they approached St. Louis, Jane wrote, "My feelings are very peculiar in seeing so many new places and in being so very far from Home." Helen, worried how she would find her friends in the Salt Lake Valley, was depressed for a time, but "we had morning and evening prayer and it made us feel better and more content." [11]

Arrival at a destination, bone-weary from months on the road, brought thanksgiving: "Joy. Joy. Here was to us a paradise indeed," William Grant wrote of his arrival in Salt Lake City. Jane Pearce summarized her feelings as she emerged from Emigration Canyon by quoting Milton's Paradise Lost: "'These are Thy glorious works, Parent of Good, in wisdom has Thou made them all.'" She added, "I seemed to forget all the hardships of our long journey."

So, too, were most other arriving pioneers able to forget the seasickness, dust, tiring walks, rattlesnakes, wolves, dreary diets, discomfort, and misfortunes of travel. William Wood rejoiced: "Indeed I have not the language to express the gratitude of a thankful heart to the Almighty," [12]

SINGING SAINTS

Gratitude was an attitude common among the gathered Saints. They had traveled at God's bidding and had enjoyed his care. The assistance of the Church organization, daily prayers, frequent meetings, and shared experiences, kept spirits high. And so did singing, an act of community worship. Jonathan Pyrah, who was working his passage across the Atlantic in 1881, said the hymns caused his "heart to over flow as they were Hymns which we used to sing at home. . . . While I am writing this Journal," he continued, "there is a meeting begun and opened with prayer and singing. Now let us rejoice in the day of salvation the ship seems to Bow its noble head to the tune and ever[y] word." [13]

Music preached the gathering: "Ye Saints Who Dwell on Europe's Shore," "Come, Come, Ye Saints," "Oh Babylon, Oh Babylon, We Bid Thee Farewell" (now entitled "Ye Elders of Israel"), "I Long to Breathe the Mountain Air," "Israel, Israel, God is Calling," "High on the Mountain Top," "Farewell, My Native Land, Farewell," "O, Ye Mountains High," and other numbers.

Harvey Cluff, one of those who rescued the stranded handcart pioneers of 1856, recalled that "the youthful of both sexes were [soon] singing the songs of Zion around the campfires," and commented, "Herein lies the secret or cause of the success which the Latter-day Saints have had in coming out from Babylon, and crossing the plains into a wilderness." [14] Singing was an appropriate expression of their shared faith.

TEMPERING REALISM

This faith in the bounties and blessings of the Promised Land was tempered by cautious realism. Naturally mission magazines in Europe painted positive images of New World opportunities. Sidney Rigdon's description of the first Zion, in Missouri, had also glowed. But spokesmen for the Church warned against unrealistic expectations.

As early as January 1841, the First Presidency cautioned immigrants to Nauvoo: "We would wish the Saints to understand that, when they come here they must not expect perfection, or that all will be harmony, peace, and love; if they indulge these ideas, they will undoubtedly be deceived, for here there are persons . . . who, although they feel a great attachment to the cause of truth, have their prejudicies of education, and, consequently, it requires some time before these things can be overcome. . . . Therefore, let those who come up to this place be determined to keep the commandments of God, and not be discouraged by those things we have enumerated, and then they will be prospered." (History of the Church, 4:272–73.) Eliza R. Snow put the same idea into verse in her "Word to the Saints Who are Gathering":

Think not when you gather to Zion,
Your troubles and trials are through,
That nothing but comfort and pleasure
Are waiting in Zion for you:
No, no, 'tis designed as a furnace,
All substance, all textures to try—
To burn all the "wood, hay, and stubble,"
The gold from the dross purify.
(Hymns, no. 21.)

The gospel net had inevitably gathered some who would succumb to discouragement. Scattered along the trail were casualties of spiritual infirmities as decimating as the physical. Occasionally an excommunication dealt out the ultimate ecclesiastical judgment, more often, firm but loving correction brought the errant back into fellowship. Some, tiring of the trip, stopped to rest and never regained the desire to press forward to the final resting place. In Council Bluffs and other nearby areas of western Iowa and eastern Nebraska, small communities of disaffected members grew; similarly, dropouts disappeared into the mainstream of America at other staging areas along the Mormon Trail from Europe to the Salt Lake Valley.

In 1869, the transcontinental railroad eased the challenge of the trip and reduced the total travel time from Europe to twenty-seven days. The magnitude of the test they faced was greatly reduced, making the achievements of the 1847–69 pioneers loom even larger. Unintentionally, perhaps, the pioneers have become the very models of perfection they were warned they would not find universally in the Latter-day Saint communities.

LEGACY OF OBEDIENCE

Yet they deserve our honor, not for perfection but for their striving for perfection. Those who crossed the plains became later pioneers in far-flung Mormon communities—in southern Utah, northern Arizona, Mexico, and Canada, passing a double test as the truest of the true. To have inched through Hole-in-the-Rock to Blanding or over the rim of the Great Basin to Dixie, or to have started over in the refuge communities beyond United States borders, gave an enhanced luster to the legacy. Members of the Mormon Battalion and their families continued to remember their special experience in reunions that celebrated the great feat of the long march. Handcart pioneers similarly claimed a special place in the pioneer hall of honor. The early winter of 1856 had claimed 200 of their number—the worst disaster in the history of western migration—yet the five companies that year and five more through 1860 brought nearly three thousand European immigrants to Utah. No wonder descendants remember these sacrifices with grateful humility. Historians of the Church have noted that Saints were refined by three processes: conversion, persecution, and migration. Those Saints who endured them all could wear a crown of three-fold glory.

Of necessity, pioneering took on new meanings for later generations. Gradually the gathering passed into history. European members in the 1890s were encouraged to postpone migration, and then by the 1920s to stay in their homelands. Zion was driving its reinforcing stakes into the soils of nations everywhere and the Utah settlements were full. No longer would they need additional immigrants to give the Church a stable temporal base of operations for a headquarters.

Even though migration ended, the purposes of gathering did not. The Saints had gathered to Kirtland, Jackson County, Far West, and Nauvoo to build temples. Salt Lake City and other western communities became temple-centered congregations. The first members could realize their spiritual dreams only by moving closer to the places where the ordinances were available—by literally gathering out of Babylon to find Zion.

Later generations, in stakes with access to temples all around the world, would find a heightened spiritual meaning in gathering. Without leaving their homelands, they could express the same determination to abandon the evils of Babylon for the holiness of Zion. Today, for example, we sing "Come Let Us Anew, Our Journey Pursue," with the fervor of the Saints heading through the Hole-in-the-Rock in 1879, with the same hope expressed by companies of handcart pioneers.

Down to the newest convert, we share in the heritage of the migration, in much the same way that we share in the heritage of the children of Israel under Moses or a remnant of Israel led by Lehi toward a Promised Land. That heritage is courage and commitment, responsiveness to the "call," compassionate sharing with the poor, a cheerful spirit of cooperation, and devoted faith in God.

COLONIZING THE GREAT BASIN

(By Leonard J. Arrington)

When the Later-day Saint pioneers arrived in the Salt Lake Valley in July 1847, they divided themselves into small groups or "brigades." One group went to the mountains to secure timber for building cabins. Another built bridges across the streams. Another plowed and planted corps. Still another brigade went to southern California and to Fort Hall in Idaho to secure seeds, fruit, fruit trees, and cattle.

But the largest brigrade commenced a systematic program of exploration, beginning with the Salt Lake Valley and then proceeding to Tooele Valley to the west, Weber and Ogden valleys to the north, Utah Valley to the south, and other nearby areas. The goal was to find suitable areas where the 16,000 Latter-day Saints poised on the banks of the Missouri River could settle. Within a year or two a large exploring company was dis-

patched to southern Utah and across southern Nevada to southern California. They found iron in southern Utah, and oases and springs along their route, and laid the basis for many future Latter-day Saint settlements.[1]

1848—WITHIN UTAH

The settlement process took place in five stages. The first colony out of Great Salt Lake City, as they called it at the time, was ten miles south in what is now Cottonwood and Holladay. In 1848 a group of 250 migrants from Mississippi, including 40 black servants, located on farms there. Within two years, the irrigable land in the remainder of the Salt Lake Valley and contiguous valleys was occupied. About 20,000 Latter-day Saints had settled in Tooele and Grantsville, Davis and Box Elder counties, Weber and Ogden valleys, Utah Valley, Sanpete Valley, and Parowan and Harmony in southern Utah.

1850'S—NEVADA, THE "MORMON CORRIDOR," AND PARTS OF IDAHO

The second stage of settlement, occurring in the early 1850s, was the colonization of western Nevada, southern California, and northern Idaho. Early in 1849, a group of fifteen Latter-day Saints joined a company of non-Mormons traveling westward to Humboldt Springs, the Sierra Nevada, and northern California. Upon reaching Carson Valley, near the California border, seven of the Saints decided to remain and establish a supply station. By the mid-1850s the Mormon station at Carson was an officially supported and strategic colony in the Latter-day Saint network around the Great Basin.

Meanwhile, the Saints were locating a whole string of settlements stretching south from Salt Lake City to San Pedro and San Diego, California, in a geo-political plan called the "Mormon Corridor." The first in the chain was in Utah Valley, where Provo is located; three thousand people lived there in 1852. Ephraim, Manti, and other towns were located farther south in Sanpete Valley. Parowan was established in the Little Salt Lake Valley in 1851.

The line of new settlements stretched on to Las Vegas, now Nevada, where a colony was established in 1855 to work with the Indians in the region, to mine lead, and to raise semitropical agricultural products. Farther on, a colony was established at San Bernardino, California. The reasons for the settlement are given in President Brigham Young's official journal: to continue the chain of settlements from Salt Lake City to the Pacific; to provide a mail station; to cultivate olives, grapes, sugar cane, cotton, and other such desirable fruits and products; and, in President Young's words, "to plant the standard of salvation in every country and kingdom, city and village, on the Pacific and the world over, as fast as God should give the ability."[2] Some 450 Church members from the Salt Lake Valley arrived in 1851, and by 1855 there were about 1,500 inhabitants. Their butter, cheese, eggs, and flour were sold throughout southern California, as also was a large supply of lumber which they secured from the San Bernardino Mountains.

The Idaho colony was founded in 1855, when a company of men went to the Lemhi Range of mountains near present-day Salmon. This was then Oregon Territory. The purpose of the settlement was to make friends with the Bannock, Shoshone, and Snake Indians. The men erected a fort, built homes and a blacksmith shop, and planted and fenced several acres of land. The settlement was a success, at least temporarily, and other settlers from Utah arrived. When President Brigham Young visited the settlement in 1857, everything seemed to be going well. But the next year a large party of Bannock and Shoshone, some of whom had previously been friendly, attacked the settlers, drove off most of their stock, and killed some of the men. The colony was abandoned.

The second Mormon experience into present-day Idaho began three years later as part of the settlement of the irrigable places in Cache Valley. Many persons had thought that Cache Valley was too cold to grow crops on a regular basis, but a long dry spell in 1855–56 caused Church leaders to reconsider. An experimental colony was established at Wellsville in 1856. In 1858 there was an influx of additional settlers, particularly Latter-day Saints originally from the southern states who had returned to Utah from San Bernardino. Their success attracted others, and Franklin, Idaho, was settled under the direction of Preston Thomas, a former Texan, in 1860. This was the first permanent Anglo-Saxon settlement in what is now Idaho. As time went on, the Saints spread up into Preston and other places in Oneida and Franklin counties.

Three years later, when Idaho was made a territory, forty families established a settlement at Paris, in Bear Lake Valley, under the direction of Charles C. Rich, a Latter-day Saint apostle, militia general and frontiersman. This picturesque region had been the site of a fur trapper rendezvous in the 1820s. The success in colonizing Cache Valley had given confidence that Bear Lake could be settled successfully. The Bear Lake colony was strengthened by additional families in the years that followed—sixteen villages were settled

In all, some ninety-six colonies or settlements, including the twenty-seven along the Mormon Corridor to California, were founded by the Saints during the first ten years after they came into the Great Salt Lake Valley in 1847. The pattern was one of directed settlements—that is, the colonization was a community effort directed by Church authorities rather than the result of spontaneous and independent movement of individuals: First, there was preliminary exploration by companies appointed, equipped, and supported by the central Church; second, colonizing companies were appointed to found the settlements; and third, the companies were expected to pattern the new community institutions after those of Salt Lake City, which were in turn patterned after those of Nauvoo, Illinois, and Jackson County, Missouri.

Upon reaching their destination the colonists dedicated the land by prayer and cooperatively erected a fort or stockade which would serve as a temporary home and community center, as well as a protection against Indians. From this fort, colonists went forth each day in organized groups to dig canals, plant crops, build roads, fences, and homes, and otherwise prepare the groundwork for village life. This day-to-day work was usually planned in meetings of all heads of families—and each colonist was given specific assignments. These meetings were conducted under the direction of an apostle, if one were present, or the bishop who had been appointed in Salt Lake City before the company left.

During this period of preparation the settlement area was surveyed and divided into blocks of ten acres each by an appointed Church engineer. The blocks were separated by wide streets. A large block in the center was reserved for public buildings, and an important early task was the construction of a combination meetinghouse-schoolhouse on this lot. Each of the remaining blocks was divided into equal lots of an acre or more each, which were distributed among the colonists in a community drawing. Each family was entitled to one lot. On these lots the colonists built their homes, planted their orchards, raised their vegetables and flowers, and erected their livestock and poultry sheds.

Outside the village, the surveyor located an area (called "the Big Field") that could be conveniently irrigated. It was divided into lots ranging from five to twenty acres each, depending on the amount of irrigable land and the number of colonists. One of these farming lots was assigned to each family, again by a community drawing.

Besides the heavy community involvement, life in the farm villages was a family affair—everyone helped out. Resourcefulness was an important asset. The women often helped build the houses, plow and plant the crops, cut and stack the hay, shear sheep, spin and weave cloth, care for the chickens, and milk the cows. One sister tells the story of a young man who was leaving in seven days on a proselyting mission. When the women heard that he had no suit to wear, they went to work: "One Sunday the wool was on the sheep's back," she writes, "but by the next Sunday it had been clipped, cleansed, corded, spun, woven, and made into a splendid suit and was on the back of the missionary as he delivered his farewell address in our little church house."[3]

1870'S—SURROUNDING AREAS IN THE WEST

The third wave of Latter-day Saint colonization took place in the 1870s when the Saints swarmed into southern and eastern Idaho, southwestern Wyoming, southern and eastern Nevada, southwestern Colorado, and northern and central Arizona. While this colonization was not called or directed in the same sense as in the 1850s, it was encouraged and supported by the central Church. In most instances the colonies were supervised and assited by local wards and stakes located near the area being settled.

The Latter-day Saint movement into Idaho was a direct result of a new railroad from Ogden, Utah, north to Montana. The Utah Northern Railroad, financed by eastern interests but with Cache Valley Saints doing most of the labor, was completed from Ogden to Franklin in 1874. It was extended on through the upper Snake River Valley in 1878 and succeeding years. As the railroad pushed north, settlements followed. More than a dozen different villages or communities were settled in the next few years, including Rexburg, Parker, Menan, Lewisville, and Teton. In general this settlement was relatively well organized, under the direction of William B. Preston, the ecclesiastical leader in Cache Valley. Preston's instructions from Church headquarters in Salt Lake City were to settle the Saints in villages, just as was the pattern in Utah. In this way their ecclesiastical organizations could more effectively serve them, they would be closer to schools, and they could more effectively cooperate in making ditches, fencing fields, building bridges, and running their livestock. The village plan also made it easier to guard against horse and cattle thieves, land jumpers, and hostile Indians.

The Church instructions included the following admonition:

"Care must be taken that the interests of the Indians on their reservations, water claims or otherwise are not interfered with; but they must be guarded and protected in all their rights as is the white man. In all cases, a friendly and brotherly disposition should be nourished towards the Lamanites who will be our friends if we do not repulse them."[4]

The movement into Star Valley, Wyoming, was similar, and was accomplished primarily by Cache Valley Saints. Eleven communities were founded in the late 1870s and early 1880s. Another movement at the same time resulted in the founding of a cluster of colonies in San Luis Valley in southwestern Colorado. Most of the early residents there were migrants from Mississippi who, after their conversion to the gospel, wished to locate somewhere in the Mountain West.

The movement into Nevada began in 1864 when a group was called from southern Utah to settle Meadow Valley in east central Ne-

Footnotes at end of article.

vada. But in the years that followed, group after group went to southern Nevada to settle about a dozen communities to grow cotton and semitropical products, and to supply provisions for travelers on the Spanish Trail toward California.

But the largest and most important movement of the 1870s and early 1880s was directed toward Arizona. The Mormon Battalion had passed through that country on its memorable march in 1846 from the Missouri River to the Pacific Coast. After four settlements had been founded in 1876 on the Little Colorado River, other settlements were soon founded on the Gila and Salt rivers. Despite their hard lot initially, these settlers eventually began to prosper, and they provided the foundation for the community of Latter-day Saints in Arizona which now numbers about 200,000. The Udalls, Eyrings, Ellsworth, and Kimballs are all products of this heritage.

OUTSIDE THE U.S.

With the upper Snake River solidly settled, a group of colonies began in Alberta, Canada. And with many communities now located in Arizona, it was also natural to establish bases in Sonora and Chihuahua in Mexico. These, and colonies in the Hawaiian Islands and elsewhere in the South Pacific, were lonely outposts until the significant Latter-day Saint expansion throughout the Free World after World War II. There are now more LDS stakes in Latin America than in all the world in 1928.

TWENTIETH CENTURY

We should not overlook the significant colonization in this century. In Wyoming and Idaho, for example, many members of the Church moved into the Teton area, primarily from Star Valley, Wyoming; into Magic Valley, after the completion of the Milner Dam in 1905; and into the Boise and Payette areas. Earlier colonies also grew. Some of this expansion was the result of the erection of beet sugar factories by Latter-day Saint and other interests early in the twentieth century. In still more recent times, the opening of new lands for settlement after the completion of reclamation projects has seen considerable numbers of Latter-day Saints move into the American Falls area, Rupert, and Emmett. These provided the foundation for the 200,000 or more Latter-day Saints in Idaho today.

SOME LDS CONTRIBUTIONS TO WESTERN COLONIZATION

Most of the Latter-day Saint colonists in the mountain states and Oregon and Washington were farmers. Latter-day Saints have always been heavily involved in the growing of cattle and horses, wheat and hay, potatoes and peas, and sugarbeets. Some time ago, Kusum Nair, a charming writer and educator from India, who had received a grant from the World Bank to make a study of agriculture in the United States, Japan, and India, suggested a reason for the Latter-day Saint success with these crops. In her prize-winning book "The Lonely Furrow," there are two chapters on Latter-day Saint farmers. She wrote of one prominent non-Mormon agriculturist in Washington who told her that most Americans could not do irrigated farming. "It is much harder work than other kinds of agriculture," he said. "An American can look big—six feet tall. But he cannot work hard. Now the Orientals and Mormons can do that kind of work. They don't mind it. But not Americans. It's too hard." And he went on to tell Mrs. Nair that the Mormons "learn to do it only because they had to. It was a desert they settled, and there was no place else they could have gone to." Mrs. Nair concludes her two chapters on the Mormons by commending them for their blending of agriculture and religion in what she calls spiritual economics.[5]

Hard work is not the only contribution of Latter-day Saint pioneers to the development of the West. Here are some others:

1. They made persistent efforts through the years to establish friendly relations with Indians, and they have played a significant role in the intellectual, social, economic, and cultural achievements of western Indians in the past generation.

2. They contributed significantly toward the passage of women suffrage in the states of the mountain west in the years before World War I.

3. They helped perpetuate a heritage of economic cooperation, which has helped provide the kind of economic organization necessary to the development of the arid West.

4. They established and maintained cultural facilities and activities: ward schools, stake academies, colleges and universities, dance halls, choirs, theatrical productions, art festivals, classes in literature, and instruction in health and nursing.

Finally, it would be well to remember three general goals of early Latter-day Saint colonists. First, they cultivated a reverence for life and for nature. Even as they crossed the Great Plains, headed for the Salt Lake Valley, they agreed upon a rule that they must be kind to their animals. "The more kind we are to our animals," said President Brigham Young, "the more will peace increase, and the savage nature of the brute creation will vanish away" (in Journal of Discourses, 1:203).

Second, they tried to keep their settlements clean and productive. "Build cities," said President Young, "adorn your habitations, make gardens, orchards, and vineyards, and render the earth so pleasant that when you look upon your labors you may do so with pleasure, and that angels may delight to come and visit your beautiful locations" (in Journal of Discourses, 8:83).

Third, they sought personal development and improvement. This accounts, no doubt, for their heavy investment in education. Elder Parley P. Pratt said: "Here we can cultivate the mind, renew the spirit, invigorate the body, cheer the heart and ennoble the soul of man. Here we can cultivate every science and art calculated to enlarge the mind, accommodate the body, or polish and adorn our race."[6]

President Brigham Young often said that the way to achieve success as a person, as a family, as a community, as a nation was to work hard, plan well, and trust in God.

That formula, inherent in the success of the Latter-day Saint colonization of the Old West, remains valid for all of us.

PROPOSED TAKEOVER OF CONOCO, INC.

● Mr. JACKSON. Mr. President, takeover fever is sweeping Wall Street and infecting several of our largest oil companies. Conoco Inc., our Nation's ninth largest oil company, is presently the subject of a friendly takeover attempt by DuPont and unfriendly takeover attempts by both Mobil Corp., our Nation's second largest oil company, and Joseph E. Seagram & Sons, a U.S. corporation which is controlled by Seagrams, Ltd., the large Canadian distiller. Recent press reports indicate that several other large U.S. oil companies have obtained multi-billion-dollar lines of credit for the purpose of either funding additional takeover attempts or defending against possible takeover attempts. Included among such companies are said to be Gulf, Texaco, Cities Service, Pennzoil, and Marathon.

There can be no doubt that the possible acquisitions by major oil companies of other oil companies pose significant policy questions for Congress and the administration. The antitrust implications of these mergers could be particularly important. In this connection, I would call the Senate's attention to the complaint filed earlier this week by Conoco, seeking a judicial determination that violations of section 7 of the Clayton Act would occur if Conoco were acquired by Mobil.

On July 22, 1981, Conoco Inc. filed an antitrust complaint against Mobil Corp. and Mobil Oil Corp. in the U.S. District Court for the District of Columbia. (Conoco Inc. against Mobil Corporation, civil action No. 81–1694). The complaint sets forth the exploration, production, refining, transportation, and marketing characteristics of both Conoco and Mobil, traces the development of Mobil from its origin in the Standard Oil Trust which was dissolved in 1912 following a Supreme Court decision that the trust violated the Sherman Antitrust Act and alleges that:

If Mobil were to acquire Conoco the expected result of such acquisition will be substantially to lessen competition and to tend to create a monopoly in violation of Section 7 of the Clayton Act in both national and local markets in the following lines of commerce, among others: the exploration for, production and acquisition of crude oil; the refining of crude oil; the sale of refined petroleum products including motor gasoline, distillate fuel oil, diesel fuel and petroleum coke; the operation of natural gas processing plants and the sale of natural gas liquids; and the acquisition and sale of uranium and coal.

Conoco's complaint includes a number of specific allegations concerning the effects of Mobil's proposed takeover, including:

1. The takeover would result in Mobil owning and operating 23.1 percent of the nation's crude oil pipeline transportation system. Mobil presently owns 4,449 miles (11.9 percent) of the total U.S. crude oil pipeline system (and ranks first) and Conoco owns 4,071 miles (11.2 percent and ranks second). After the takeover, Mobil will own 8,541 miles (23.1 percent) of the nation's crude oil pipeline system. The second ranking company in the crude oil pipeline sector would become Shell with 2,247 miles of pipe-

line, almost one-fourth the share of the pipeline system which would be held by Mobil. The Conoco complaint alleges that:

"A market structure will be created whereby Mobil may be able to exert substantial economic power over the independent producers of crude oil by reason of its control of a substantial share of the total miles of crude oil gathering pipelines which are an essential means of transporting crude oil from the wellhead to the trunk lines through which it is ultimately carried to refineries.

2. The gasoline market shares of Mobil after the Conoco takeover would be:

(In percent)

Idaho	11.1
Montana	15.1
Nebraska	16.2
South Dakota	10.6
Wisconsin	11.0
Wyoming	14.1

3. Conoco, through its subsidiary Consolidation Coal Company, is the second largest coal producer in the U.S. and the holder of the largest proven reserves. A combination of Mobil and Conoco would give Mobil control of 8.2 percent of our nation's coal reserves. In the Northern Plains market (consisting of North Dakota, Wyoming and Montana), Mobil would control at least 18.9 percent of the proven coal reserves under federal coal leases.

4. The takeover of Conoco would result in Mobil controlling 97.2 million pounds or 8.8 percent of the total United States recoverable uranium reserves.

Mr. President, I recognize that the allegations of the Conoco complaint are just that—allegations. Nonetheless, the complaint as a whole suggests that there are indeed serious antitrust issues involved which deserve the most careful study by the Department of Justice, the Federal Trade Commission, and the appropriate committees of Congress.

Mr. President, I ask that the text of Conoco's complaint be included in the RECORD at this point.

The complaint follows:

IN THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

[Civil action No. 81-1694]

Conoco Inc., High Ridge Park, Stamford, Connecticut 06904, Plaintiff, v. Mobil Corporation and Mobil Oil Corporation, 150 East 42nd Street, New York, New York 10017, Defendants.

Plaintiff, Conoco Inc. ("Conoco"), by its attorneys, brings this action for preliminary and permanent injunctive relief under the federal antitrust laws against defendants Mobil Corporation and Mobil Oil Corporation (collectively "Mobil") and complains and alleges the following:

I. *Jurisdiction and Venue*

1. This action is brought pursuant to Section 16 of the Clayton Act, 15 U.S.C. § 26, to prevent and restrain threatened violations by defendants of Section 7 of the Clayton Act, 15 U.S.C. § 18. This Court has jurisdiction of this action pursuant to Sections 1331 and 1337 of the Judiciary Code, 28 U.S.C. §§ 1331 and 1337.

2. Defendents Mobil and Mobil Oil are found and transact business in this District; are engaged in commerce; and are within the jurisdiction of this Court for purposes of service of process.

3. Many of the acts and transactions alleged herein are being carried out, have effect, are occurring and, unless enjoined, will continue to occur within this District. Venue is proper in this District pursuant to Section 12 of the Clayton Act, 15 U.S.C. § 22, and Section 1391 of the Judiciary Code, 28 U.S.C. § 1391.

II. THE PARTIES

4. Plaintiff Conoco is a publicly held corporation organized and existing under the laws of the State of Delaware, with its principal executive offices in Stamford, Connecticut.

5. For its fiscal year ended December 31, 1980, Conoco reported net income of $1,026,-200,000 on total revenues of $18,766,300,000. Conoco is the ninth largest oil company headquartered in the United States as ranked by total sales and by assets, and is the fourteenth largest industrial corporation in the United States, as ranked by total sales and by net income, and the eighteenth largest such corporation as ranked by assets.

6. Defendant Mobil is a corporation organized and existing under the laws of the State of Delaware with its principal executive offices in New York, New York. Mobil is a holding company whose origins stem from the Standard Oil Company of New York, originally a member of the Standard Oil Trust, and from the Vacuum Oil Company, another member of that combine which had been dissolved in 1912 following a Supreme Court decision ruling that it violated the Sherman Antitrust Act. In 1931 the Standard Oil Company of New York and the Vacuum Oil Company merged to form the Socony-Vacuum Oil Company, which in 1966 changed its name to Mobil Oil Corporation.

7. For its fiscal year ended December 31, 1980, Mobil reported net income of $3,272,-000,000 on total revenues of $63,726,000,000. Mobil is the second largest oil company headquartered in the United States as ranked by total sales, assets and net income. Mobil is the second largest industrial corporation in the United States, as ranked by sales and the third largest as ranked by assets and net income. Mobil describes itself as "one of the world's largest companies."

8. As fully integrated multinational oil companies, Mobil and Conoco compete in numerous product and energy markets:

MOBIL	CONOCO
(a) Mobil operates in over 100 countries.	(a) Conoco operates in over twenty countries in North and South America, Europe, Africa, Asia and Australia.
(b) Mobil is engaged in the exploration for, development and production of crude oil, natural gas and natural gas liquids; the refining of crude petroleum; and the transportation and marketing of crude oil, natural gas liquids and refined petroleum.	(b) Conoco is engaged in the exploration for, development and production of crude oil, natural gas and natural gas liquids; the refining of crude petroleum; and the transportation and marketing of crude oil, natural gas liquids and refined petroleum.
(c) In the United States, Mobil is a major producer of crude oil and natural gas and a leading refiner and marketer of petroleum products. It produces oil in 15 countries, has 35 wholly or partly owned refineries and operates a fleet of 100 ocean-going vessels.	(c) In the United States, Conoco is a major producer of crude oil and natural gas and a leading refiner and marketer of petroleum products. It produces oil in 7 countries, has 8 wholly or partially owned refineries and operates a fleet of ocean-going vessels with a capacity of 1,601 deadweight tons.
(d) As of December 31, 1980, Mobil had at least 2,251,000,000 barrels of net proved petroleum reserves world-wide, and is the tenth largest holder of proved petroleum reserves in the United States with 890,000,-000 barrels. These figures do not include Mobil's share of the substantial reserve holdings of the Arabian-American Oil Company (ARAMCO), which it owns in partnership with Exxon, Standard of California and Texaco, its competitors in the United States.	(d) As of December 1, 1980, Conoco had 1,988,000,000 barrels of proved petroleum reserves world-wide, and was the fifteenth largest holder of proved petroleum reserves in the United States, with holdings of 403,000,000 barrels. In addition, Conoco holds under lease 4,017,000 acres of undeveloped petroleum properties in the United States.
(e) As of December 31, 1980, Mobil had total world-wide production of petroleum liquids of 700,000 barrels daily, and 368,000 barrels daily from its United States operations, and ranked sixth in production domestically.	(e) As of December 31, 1980, Conoco had world-wide production of petroleum liquids of 458,000 barrels daily and 143,000 barrels daily from its United States operations, and ranked sixteenth in production domestically.
(f) In 1979, Mobil ranked seventh in the United States in the ownership of interstate oil pipelines.	(f) In 1979, Conoco ranked fifteenth in the United States in the ownership of interstate oil pipelines.
(g) Mobil owns the largest number of miles of crude oil gathering pipelines in the United States.	(g) Conoco owns the second largest number of miles of crude oil gathering pipelines in the United States.
(h) As of December 31, 1980, Mobil owned and operated seven petroleum refineries in the United States, with a total capacity of 899,600 barrels daily, and ranked seventh in domestic refining capacity.	(h) As of December 31, 1980, Conoco owned and operated seven petroleum refineries in the United States, with a total rated capacity of 455,000 barrels daily, and ranked thirteenth in domestic refining capacity.
(i) Mobil markets motor gasoline in forty-eight states, through 17,425 branded retail outlets.	(i) Conoco markets motor gasoline in forty-one states, through 5,605 branded retail outlets.
(j) Mobil is the tenth largest holder of proven coal reserves in the United States.	(j) Conoco, through its Consolidation Coal Company, is the largest holder of proven coal reserves in the United States and is this nation's second largest coal producer.
(k) As of 1979, Mobil was tied with Conoco as the fifth largest holder of uranium concentrate reserves in the United States.	(k) As of 1979, Conoco was tied with Mobil as the fifth largest holder of uranium concentrate reserves in the United States.
(l) Mobil is a major producer of natural gas. For the year ended December 31, 1980, Mobil produced 3,510,000,000 cubic feet daily of natural gas world-wide, and 2,285,000,000 cubic feet daily in the United States and ranked fourth in domestic production. It also ranks fourth in domestic production of natural gas liquids.	(l) Conoco is a major producer of natural gas. For the year ended December 31, 1980, Conoco produced 1,364,000,000 cubic feet daily of natural gas world-wide, and 778,000,000 cubic feet daily in the United States and ranked sixteenth in domestic production. It also ranks ninth in domestic production of natural gas liquids.

MOBIL	CONOCO
(m) Mobil is a significant producer of regular-grade low sulfur petroleum coke.	(m) Conoco is a significant producer of regular-grade low sulfur petroleum coke and is the largest domestic producer of premium petroleum coke, which is used in the production of electrodes for steel-making furnaces.

9. Conoco participates in numerous joint ventures with other oil companies in the ownership of federal offshore oil and gas producing properties, in the ownership and operation of natural gas processing plants and related gathering pipeline systems, in crude oil trunk pipelines, and in refined product and natural gas products pipelines. Its partners in these ventures include ARCO, Cities Service, Exxon, Getty Oil, Gulf, Mobil, Tenneco, Standard of California, Standard of Indiana, Superior Oil, Texaco, TransOcean (now Mobil), and Shell. Conoco has significant joint interests in potential oil producing properties in Alaska and is in partnership with Gulf for oil and gas exploration on over one million acres in the Williston Basin area of Montana and North Dakota. Overseas, Conoco participates in joint ventures with other oil companies in the North Sea, Africa, the Middle East and Southeast Asia.

10. Mobil, together with Exxon, Texaco and Standard of California, which individually are the four largest oil companies in the United States, are owners of the Arabian-American Oil Company (ARAMCO). That consortium accounts for virtually all of the crude oil production in Saudi Arabia, the world's largest exporter of crude oil and, next to the United States, the leading oil producing country in the free world. Through ARAMCO, Saudi Arabian crude oil supplies a significant percentage of the United States' demand for oil. Mobil, together with the other owners of ARAMCO and the Saudi government, has developed a long-term relationship based upon a mutuality of interests to produce and market Saudi crude oil. Mobil has entered into partnership relationships with the Saudi government to process, transport and market crude oil and petroleum products and has at least one Saudi Arabian citizen on its board of directors.

11. Mobil also participated in joint ventures with other major oil companies in other overseas areas and in the United States. These include exploration and production properties, crude oil and refined product pipelines, natural gas processing plants and associated gathering lines Its partners in various of these ventures include Conoco, ARCO, Cities Service, Exxon, Getty, Gulf Oil, Standard of California, Standard of Indiana, Phillips, Shell, Standard Oil of Ohio, Texaco and Union. Through these ventures, Mobil's interests are linked with virtually every other major oil company.

12. Mobil's growth and enormous size is partly the result of mergers and acquisitions. For example, in the past few years Mobil has made the following acquisitions:

(a) In 1974 Mobil acquired a majority interest in Marcor, Inc., and thereafter in 1976 acquired all of Marcor.

(b) In 1979 Mobil acquired General Crude Oil Co. for $792 million.

(c) In 1980 Mobil acquired TransOcean Oil, Inc. for $715 million.

(d) In 1980 Mobil acquired the Vickers Energy Corporation.

III. The Mobil Offer

13. On July 17, 1981, Mobil made a tender offer (the "Offer") to purchase 43,500,000 shares of Conoco for $90 per share.

14. If Mobil acquires those shares it will own, directly or indirectly, a majority of Conoco's outstanding shares of common stock. Following the completion of the offer, Mobil intends to merge Conoco into Mobil for a wholly owned subsidiary of Mobil, pursuant to which the remaining shareholders of Conoco would receive shares of preferred stock of Mobil Oil and/or debentures of Mobil.

IV. Trade and Commerce

15. The oil industry is comprised of four basic levels of operation: the exploration for and production of crude oil, natural gas and natural gas liquids; the transportation of liquid petroleum and refined products; the refining of crude oil; and the marketing of refined petroleum products.

16. A large number of entities are engaged in one or more levels of the petroleum industry. However, a vast disparity exists in the size and scope of the operations of these entities. They range from multibillion dollar, multinational corporations, such as Mobil and Conoco, which are vertically integrated into all levels of the petroleum industry, to individual proprietors who may have but an interest in a single oil well or operate one independent retail gasoline station.

V. Violations Alleged

17. If Mobil were to acquire Conoco the expected result of such acquisition will be substantially to lessen competition and to tend to create a monopoly in violation of Section 7 of the Clayton Act in both national and local markets in the following lines of commerce, among others: the exploration for, production and acquisition of crude oil; the refining of crude oil; the sale of refined petroleum products including motor gasoline, distillate fuel oil, diesel fuel and petroleum coke; the operation of natural gas processing plants and the sale of natural gas liquids; and the acquisition and sale of uranium and coal.

Count one

(Elimination of Horizontal Competition in the Oil Industry)

18. Conoco repeats and realleges the allegations of paragraphs 1 through 17, inclusive, of this Complaint, as if fully set forth herein.

19. Mobil and Conoco are both large, integrated oil companies and, as such, compete with each other and other large integrated oil companies in a number of related product lines. Mobil's and Conoco's ranks in the following petroleum product lines have been estimated as follows:

	Mobil rank	Conoco rank	Combined rank
U.S. energy producing companies on a Btu basis, 1979	9	5	2
U.S. energy producing companies on a dollar basis, 1979	8	10	2
U.S. crude oil, condensate and natural gas liquids production, 1979	9	16	6
U.S. natural gas production, 1979	4	16	3
Proven U.S. natural gas reserves, 1979	7	16	4
U.S. refining capacity, 1979	8	15	4
U.S. refinery crude runs, 1979	8	14	2
U.S. interstate oil trunk line barrel-miles, 1979	7	14	1
U.S. refined product sales, 1979	7	15	4
U.S. motor gasoline sales, 1979	6	13	2

There are regional and local markets where the market shares and ranks are even greater and the effect of the combination of the two companies would be even more substantial. These changes in rankings are particularly significant in this industry which has such a vital significance to the nation.

20. Since the announcement of Mobil's interest in acquiring control of Conoco, other major, fully integrated oil companies have publicly announced the fact that they are arranging credits of billions of dollars.

(a) On July 20, 1981, Gulf Oil, the nation's seventh largest integrated oil company in terms of production and sixth largest in terms of refining capacity, announced that it had arranged stand-by credit of about $5 billion "in order to be financially ready to act on opportunities which may be present in today's business environment."

(b) On July 10, 1981, it was announced that Texaco, the nation's sixth largest integrated oil company in terms of production and the fifth largest in terms of refining capacity, was negotiating a $5.5 billion line of credit.

(c) On July 14, 1981, Marathon, the nation's fourteenth largest integrated oil company in terms of production and ninth largest in terms of refining capacity, acknowledged that it had been seeking funds understood to total $5 billion.

(d) On July 10, 1981, Pennzoil, the nation's twenty-sixth largest integrated oil company in terms of production and forty-first largest in terms of refining capacity, announced that it was arranging a $2.5 billion line credit with Citibank.

(e) On July 14, 1981, it was announced that Cities Service, the nation's fifteenth largest integrated oil company in terms of production and seventeenth largest in terms of refining capacity, is understood to have negotiated a $1 billion loan to protect itself, and to be in a position to frustrate any offer.

21. As these announcements indicate, the Mobil acquisition of Conoco, if allowed to proceed, would tend to trigger additional oil company acquisitions that would further reduce competition in the integrated oil business.

Effects of the Proposed Acquisition

22. The effects of the proposed acquisition of Conoco by Mobil will be substantially to lessen actual and potential competition in the broad range of products and businesses in which they are presently substantial competitors in violation of Section 7 of the Clayton Act in the following ways, among others:

(a) Actual competition between Conoco and Mobil in the acquisition and control of petroleum supplies and in the marketing and sale of all types of petroleum products will be eliminated, lessened or foreclosed in national and regional markets.

(b) Potential competition and the potential for increased competition between Mobil and Conoco in all types of petroleum products may be eliminated, lessened or foreclosed in national or regional markets.

(c) Mergers or acquisitions between other major integrated oil companies selling many of the same petroleum products will be fostered, thus creating the likelihood of a further substantial lessening of competition.

Count two

(Elimination of Horizontal Competition in the Acquisition of Crude Oil)

23. Conoco repeats and realleges the allegations of paragraphs 1 through 21, inclusive, of this Complaint, as if fully set forth herein.

24. Substantially all of the crude oil produced in the United States is transported to refineries by pipelines. Crude oil gathering pipeline systems form an integral part of the oil field purchasing organizations of oil companies to secure supplies of crude oil for their businesses.

25. With 4,449 miles of gathering lines,

Mobil ranks first in the United States with 11.9% of total U.S. gathering line mileage. Conoco ranks second with 4,071 miles which represents 11.2% of the United States gathering line total. The next ranking firm in terms of crude gathering pipeline mileage is Shell with 2,247 miles.

26. If Mobil were to acquire Conoco the combined entity would own and operate 8,541 miles of crude oil gathering pipelines, representing 23.1 percent of the total mileage of crude oil gathering pipelines, and would control nearly four times the mileage of crude oil gathering pipelines as the next largest company. The four-firm concentration would be increased from 35 percent to 41 percent, or an increase of 17 percent, and the eight-firm concentration would increase from 56 percent to 61 percent, or an inccrease of 9 percent.

27. Mobil and Conoco are direct horizontal competitors in the purchase of crude oil from others to provide for their refinery operations throughout the world. In the United States, the prices paid by refiners on the lease purchases from producers are based on their posted prices for the particular area and type of crude. These price postings have quality differentials based on the specific gravity of the crude, with the lighter oils being higher priced due to their greater yield of gasoline and light distillates which produce more revenue. Conoco and Mobil compete as price posters to purchase the following different types of crude oil among others: Wyoming Sour; Wyoming Sweet; Kansas Sweet; Oklahoma Sweet; Oklahoma Sour; North Texas Intermediate; West Central Texas Intermediate; West Texas-New Mexico Sour; West Texas-New Mexico Intermediate; West Texas-New Mexico Ordovicial; and South Louisiana Sweet.

28. Crude oil prices and gravity differentials vary from field to field depending on the competition among buyers in the local area and their particular refinery needs. Refiners must watch closely the price postings of their competitors, particularly other majors who have gathering pipeline systems available to hook up to the producing properties. Because of their sizeable overlapping gathering systems, Conoco and Mobil are sometimes the dominant competing crude oil buyers in particular market areas and are among relatively few purchasers to whom the producers in those fields can look as an outlet for their crude oil production.

29. Among the markets where Conoco and Mobil have leading positions as lease purchasers of crude oil are:

(a) The North Texas field in eleven counties surrounding Wichita Falls, Texas, where total field production is 73,000 barrels daily or approximately $932.5 million on an annual basis, where Conoco purchases 17.6% of the total output and Mobil purchases between 10% and 15%.

(b) An eleven county area in South Central Kansas where total field production is 48,400 barrels daily or approximately $613.2 million on an annual basis, where Conoco purchases 11.3% of the total output and Mobil's purchases are somewhat greater.

(c) Converse and Natrona, Wyoming where total field production is 48,471 barrels daily which, on the basis of an average price of $35 per barrel, equals $613.2 million on an annual basis, where Conoco purchases 6% of the total output and Mobil is believed to purchase a similar share.

Effects of the Proposed Acquisition

30. The effects of the proposed acquisition of Conoco by Mobil will be substantially to lessen actual and potential competition and tend to create a monopoly in the ownership of crude oil gathering pipelines in the United States and individual oil fields and groups of oil fields in violation of Section 7 of the Clayton Act in the following ways, among others:

(a) Actual competition between Conoco and Mobil in the acquisition or control of crude oil for transport over crude oil gathering pipelines will be eliminated, lessened or foreclosed in the United States and in individual oil producing areas of the United States.

(b) Concentration in the ownership of crude oil gathering pipelines will be increased, barriers to entry may be created, current participants in the market may be discouraged from increasing their presence by internal expansion and new entrants may be discouraged from entering by the existence of the merged entity.

(c) A market structure will be created whereby Mobil may be able to exert substantial economic power over the independent producers of crude oil by reason of its control of a substantial share of the total miles of crude oil gathering pipelines which are an essential means of transporting crude oil from the wellhead to the trunk lines through which it is ultimately carried to refineries.

Count three

(Elimination of Horizontal Competition in the Retail Marketing of Motor Gasoline)

31. Conoco repeats and realleges the allegations of paragraphs 1 through 21, inclusive, of this Complaint, as if fully set forth herein.

32. Conoco markets gasoline in 41 states through 5,605 retail outlets. In 1980 it sold 2,486,000,000 gallons which represented 2.3 percent of total gasoline sales in the United States. Conoco ranks about thirteenth among all domestic marketers. Mobil is the fourth largest gasoline marketer in the United States with approximately 6.2 percent of the total. It has 17,425 retail outlets located in 48 states. The combined companies would rank at least third.

33. Conoco markets under its major "Conoco" brand in Louisiana, Texas and New Mexico northward through the Plains states, Rocky Mountain states and upper Midwest. In this area Conoco sells to branded jobbers who market the gasoline at retail through various service stations which they either own or lease.

34. Conoco markets directly through company owned and operated outlets:

(a) in the Southeast and Middle Atlantic states under the "Kayo" brand;

(b) in four upper Midwestern states under the "Western Stores" brand;

(c) in eight Midwestern and Southwestern states under the "Fast Gas" and "Jet" brands;

(d) on the West Coast under the "Fast Gas", "Jet", "Econo", "Aztec" and "Nugget" brands.

All of these company operated stations sell gasoline at the price level of the independents, which generally is two or three cents a gallon below the pump prices of the major company branded stations.

35. Conoco sells a substantial portion of its gasoline production (approximately 30 percent) to private rebranders. These rebranders generally market gasoline at retail price levels in competition with and below the prices posted by the major company outlets. Mobil has long maintained a policy of not selling gasoline to private rebranders.

36. Conoco and Mobil are substantial direct competitors in the retail sale of motor gasoline in most states. For example, in the eleven states in Petroleum Administration for Defense District 2 where Conoco sells through branded jobbers under the "Conoco" brand, its share of total gasoline sales amounts to 4.8 percent and Mobil's is 4.4 percent. Combined they would rank second with a market share of 9.2 percent. These states are Oklahoma, Kansas, Missouri, Indiana, Illinois, Iowa, Wisconsin, Minnescta, Nebraska, North Dakota and South Dakota.

37. The respective market shares of Conoco and Mobil in the sale of retail gasoline in a number of states are as follows:

[In percent]

State	Conoco	Mobil	Combined share
Arkansas	5.6	3	8.6
Idaho	10.1	1	11.1
Iowa	4.8	5	9.8
Kansas	3.7	6	9.7
Louisiana	4.9	4	8.9
Minnesota	4.8	5	9.8
Montana	13.1	2	15.1
Nebraska	7.2	9	16.2
North Dakota	2.6	6	8.6
South Dakota	2.6	8	10.6
Tennessee	3.5	5	8.5
Texas	3.5	6	9.5
Wisconsin	3.0	8	11.0
Wyoming	8.1	6	14.1

In many terminal market areas throughout the Midwest, Mobil is one of the primary price competitors for Conoco. These markets include Chicago, Wood River, Illinois, the Twin Cities, Mount Vernon (Springfield), Missouri, Kansas City, Des Moines, and Omaha. In addition, Mobil is one of Conoco's primary pricing competitors in the New Orleans and Houston markets.

38. Because Conoco is an aggressive price marketer both through its branded Conoco jobbers and through its private brand company operated stations its competitive impact in the countless markets where it competes with Mobil is substantially greater than the percentage figures of gasoline sales would indicate. Its preservation as an independent competing factor is more important to competition than would be that of a company following a less aggresive pricing policy.

Effects of the Proposed Acquisition

39. The effect of the proposed acquisition of Conoco by Mobil will be substantially to lessen actual and potential competition and to tend to create a monopoly in the retail sale of motor gasoline in various markets and submarkets throughout the United States, in violation of Section 7 of the Clayton Act in the following ways, among others:

(a) Actual competition between Conoco and Mobil in the retail sale of motor gasoline will be eliminated, lessened or foreclosed.

(b) Concentration in the retail marketing of motor gasoline in the United States, and in various individual states and local markets will be increased, and barriers to entry may be created or increased by existence of the merged entity.

(c) Conoco will be eliminated as an actual substantial price competitor in the retail sale of motor gasoline.

(d) Conoco will be eliminated as a substantial source of supply to independent private rebranders.

(e) Mergers or acquisitions between other sellers of retail gasoline may be fostered, thus creating the likelihood of a further substantial lessening of competition.

Count four

(Elimination of Horizontal Competition in the Refining of Crude Oil)

40. Conoco repeats and realleges the allegations of paragraphs 1 through 21, inclusive, of this Complaint, as if fully set forth herein.

41. Conoco owns and operates eight refineries in the United States, and has an aggregate operable refining capacity of 445,000 barrels per day. It is the thirtieth largest refiner in the United States with 2.5 percent of total domestic refining capacity.

42. Mobil owns and operates seven refineries in the United States, and has an aggregate operable refining capacity of 899,600

barrels per day. It is the seventh largest refiner in the United States with 4.6 percent of total industry.

43. Conoco and Mobil are and have been for some years competitors of each other in the refining of petroleum products throughout the United States and in regions thereof. Combined they would become the third largest domestic refiner with 7.1 percent of the industry total.

Effects of the Proposed Acquisition

44. The effect of the proposed acquisition of Conoco by Mobil will be substantially to lessen competition and to tend to create a monopoly in the refining of crude oil in the United States and in regions thereof in violation of Section 7 of the Clayton Act in the following ways, among others:

(a) Actual and potential competition between Conoco and Mobil in the refining of crude oil in the United States and in regions thereof will be eliminated, lessened or foreclosed.

(b) Concentration in the refining of crude oil in the United States and regions thereof will be increased, and barriers to entry will be increased or created.

(c) Conoco will be eliminated as a substantial independent competitor in the refining of crude oil.

(d) Mergers or acquisitions between other refiners will be fostered, thus creating the likelihood of further substantial lessening of competition.

Count five

(Elimination of Horizontal Competition in the Manufacture and Sale of Petroleum Coke)

45. Conoco repeats and realleges the allegations of paragraphs 1 through 21, inclusive, of this Complaint, as if fully set forth herein.

46. Petroleum coke is a refined petroleum product produced at oil refineries equipped specially to process it. In terms of coke producing capacity Mobil ranks as the nation's largest producer with 13 percent of total U.S. capacity. Conoco ranks thirteenth with 2.3 percent of the total.

47. There are three distinct types of petroleum coke: (1) regular-grade low sulfur petroleum coke which is used in the manufacture of aluminum; (2) regular-grade high sulfur petroleum coke which is used as an industrial fuel; and (3) premium-grade petroleum coke which is used in the manufacture of graphite electrodes for electric arc steel furnaces.

48. Conoco is a significant manufacturer of regular-grade low sulfur petroleum coke. In 1980 Conoco produced approximately 180,000 tons of regular-grade low sulfur coke, which accounted for approximately 5% of the total domestic production.

49. Mobil is also a significant manufacturer of regular-grade low sulfur petroleum coke. In 1980 Mobil produced approximately 15% of the total domestic production of regular-grade low sulfur petroleum coke.

50. Conoco has announced plans for the construction of a manufacturing facility at its Lake Charles refinery to convert residual fuel oil into regular-grade petroleum coke. The facility, scheduled for completion in 1984, will have an annual production capacity of 640,000 tons of regular-grade coke which, depending on the feedstock's sulfur content, can be used either in the manufacture of aluminum or as an industrial fuel. It would increase Conoco's share of total industry capacity to 5.5%.

51. The manufacture of regular-grade low sulfur petroleum coke is concentrated, with the four largest producers accounting for approximately 53% of total domestic production.

52. Conoco is the dominant domestic producer of premium-grade petroleum coke. In 1980, Conoco manufactured approximately 180,000 tons of premium-grade petroleum coke domestically, which accounted for approximately 80% of the total domestic production.

53. A substantial amount of expertise and know-how is required to manufacture premium-grade petroleum coke. The product is highly specialized and quality is the essential element; accordingly, purchasers generally purchase only from those companies with a recognized level of expertise in the manufacture of premium-grade petroleum coke.

54. Mobil does not presently manufacture premium-grade petroleum coke domestically although it has manufactured premium-grade coke at its Torrance, California refinery. Because of Mobil's substantial coking facilities, it could become a significant manufacturer of premium-grade coke if it had the expertise, know-how and reputation for manufacturing premium-grade petroleum coke that Conoco enjoys.

55. Conoco has announced plans for a phased expansion of its premium-grade petroleum coke manufacturing facilities at its Lake Charles refinery. Upon completion of the first phase the refinery's annual premium-grade coking capacity will be increased by 48,000 tons to 238,000 tons.

Effects of the Proposed Acquisition

56. The effects of the proposed acquisition of Conoco by Mobil will be substantially to lessen actual and potential competition and to tend to create a monopoly in the manufacture of regular-grade low sulfur petroleum coke and premium-grade petroleum coke in the United States in violation of Section 7 of the Clayton Act in the following ways, among others:

(a) Actual competition between Conoco and Mobile in the manufacture of regular-grade low sulfur petroleum coke in the United States will be eliminated, lessened or foreclosed;

(b) Concentration in the manufacture of regular-grade low sulfur petroleum coke in the United States will be increased and barriers to entry may be increased or created by the existence of the merged entity;

(c) Conoco's already dominant position in the manufacture of premium-grade petroleum coke will be entrenched as a result of Mobil's coking capacity.

Count six

(Elimination of Competition for the Acquisition of Foreign Crude Oil)

57. Conoco repeats and realleges the allegations of paragraphs 1 through 21, inclusive, of this Complaint, as if fully set forth herein.

58. Both Mobil and Conoco are substantial purchasers of crude oil on the world market for shipment to and consumption in the United States.

59. There is a world-wide cartel of oil producing countries known as the Organization of Petroleum Exporting Countries ("OPEC"). The OPEC countries maintain a 77 percent share of non-Communist-world oil reserves. Chief among these OPEC countries is Saudi Arabia which has the power, by virtue of its vast reserves and productive capacity, to exercise control over the world price of oil by increasing or decreasing production. Saudi Arabia's activities as a major OPEC member and the world's largest exporter of crude oil have a direct and substantial effect on prices for crude oil in the United States.

60. The Arabian American Oil Company ("ARAMCO") is a firm that is jointly owned by Exxon, Mobil, Texaco and Standard of California, the four largest integrated oil companies in the United States. Under concessions granted by Saudi Arabia, ARAMCO is by far the world's largest oil-producing corporation.

61. Because Saudi Arabia is the world's largest oil producing country, Mobil, and the other ARAMCO partners, enjoy market power far greater than their individual market shares might indicate. The only effective counter to this market power is the effective competition by Conoco and other companies which produce or purchase oil in the world market. The acquisition of Conoco by Mobil will weaken the competitive position of the independents.

Effects of the Proposed Acquisition

62. The effect of the proposed acquisition of Conoco by Mobil will be substantially to lessen actual and potential competition and to tend to create a monopoly in the market for the production and sale of crude oil in violation of Section 7 of the Clayton Act in the following ways, among others:

(a) Actual competition between Conoco and Mobil and the other ARAMCO partners in the acquisition of crude oil will be eliminated, lessened or foreclosed.

(b) The ability of Saudi Arabia to control the world price of oil will be enhanced.

Count seven

(Elimination of Horizontal Competition in the Production and Marketing of Coal)

63. Conoco repeats and realleges the allegations of paragraphs 1 through 21, inclusive, of this Complaint, as if fully set forth herein.

64. Because of the world-wide energy crisis, coal has become a much more highly valued and potentially critical resource, both as a direct source of energy and as a raw material. The United States is one of the richest areas of the world in proven coal reserves.

65. Conoco, through its subsidiary Consolidation Coal Company, is the second largest coal producer in the United States and the largest holder of proven reserves.

66. Mobil is currently developing a surface coal mine in Wyoming and has proved and probable reserves of 4,135 million tons located primarily in the Western United States and in Illinois. Mobil's coal reserves are substantially larger than most of the largest coal producers in the United States. Conoco's coal reserves as a percentage of total domestic reserves are 5.6 percent and Mobil's are 1.6 percent. A combination with Conoco would give Mobil control over an undue percentage of this country's vital coal reserves.

67. The Northern Plains, consisting of the States of North Dakota, Wyoming and Montana, is recognized by the Department of Energy, the Department of the Interior, the Department of Justice and others, as a separate geographic market or submarket for coal.

68. Conoco presently has approximately 13.9 percent of the proven reserves of coal under federal coal leases in the Northern Plains market. Upon information and belief, Mobil has sufficient reserves in the Northern Plains market to account for at least 5 percent of the proven reserves of coal under federal coal leases.

Effects of the Proposed Acquisition

69. The effects of the proposed acquisition of Conoco by Mobil will be substantially to lessen competition and to tend to create a monopoly in the production and marketing of coal in violation of Section 7 of the Clayton Act in the following ways, among others:

(a) Actual competition between Mobil and Conoco in the production and marketing of coal will be eliminated, lessened or foreclosed in:

(i) the United States;

(ii) the Northern Plains, and/or

(iii) Wyoming and other states.

(b) Potential competition between Mobil and Conoco in the production, marketing and sale of coal will be eliminated, lessened or foreclosed in:

(i) the United States;

(ii) the Northern Plains, and/or
(iii) Wyoming and other states.

Count eight

(Elimination of Horizontal Competition in the Exploration for and Production of Uranium)

70. Conoco repeats and realleges the allegations of paragraphs 1 through 21, inclusive, of this Complaint, as if fully set forth herein.

71. Conoco is engaged in the exploration for and production of uranium in the United States, as well as in other countries. As of December 31, 1980, Conoco held 389,458 acres of uranium prospecting lands in nine states.

72. Conoco conducts part of its uranium business through joint ventures or partnerships, and part independently:

(a) Conoco owns a two-thirds interest in the Conquista uranium mine and mill in Texas.

(b) Conoco has a one-fourth ownership interest in the Benavides uranium project in Duval County, Texas. In situ leaching commenced at this project in February 1980.

(c) Conoco has entered into a joint venture with a subsidiary of Westinghouse Electric Corporation to develop Conoco's uranium deposits near Crownpoint, New Mexico.

73. Conoco has a strong reserve position in uranium reserves. Conoco estimates its reserve holdings at approximately 61 million pounds which is 5.5 percent of domestic recoverable uranium concentrate reserves.

74. Mobil has acquired significant reserves of uranium, and is exploring actively for uranium in the United States, principally in Texas and New Mexico, and in Canada and Australia. Mobil also has developed leaching technology for the production of uranium.

75. Mobil has approximately 36 million pounds of recoverable uranium concentrate reserves in this country and accounts for 3.3 percent of the total domestic reserves.

76. Concentration in the ownership of recoverable uranium concentrate reserves is moderately high. The four largest firms account for approximately 35 percent of the total U.S. reserves, and the eight largest account for approximately 55 percent.

77. If Mobil were to acquire Conoco the combined entity would own approximately 97.2 million pounds of recoverable uranium concentrate reserves and account for approximately 8.8 percent of the total U.S. reserves. The four-firm concentration in the ownership of domestic reserves of uranium would increase from 35 percent to 39 percent, or an increase of 11 percent, and the eight-firm concentration would increase from 55 percent to 59 percent, or an increase of 7.7 percent.

Effects of the Proposed Acquisition

78. The effects of the proposed acquisition of Conoco by Mobil will be substantially to lessen actual and potential competition and to tend to create a monopoly in the ownership of uranium reserves in the United States in violation of Section 7 of the Clayton Act in the following ways, among others:

(a) Actual competition between Conoco and Mobil for the acquisition or control of uranium reserves will be eliminated, lessened or foreclosed in the United States.

(b) Conoco will be eliminated as an independent competitive entity engaged in the acquisition of ownership or control of uranium reserves.

(c) Concentration in the ownership of uranium reserves will be increased, barriers to entry may be created, current participants in the market may be discouraged from increasing their presence by internal expansion and new entrants may be discouraged from entering by the existence of the merged entity.

VI. IMMEDIATE AND IRREPARABLE INJURY

79. If Mobil is not temporarily, preliminarily and permanently enjoined and restrained from carrying out the pending offer to purchase Conoco stock, the public interest will be injured in the following ways, among others:

(a) Competition will be eliminated, lessened or foreclosed, and a monopoly may tend to be created in violation of Section 7 of the Clayton Act, in the following lines of commerce, among others: the exploration for, production, acquisition and transportation of crude oil; the refining of crude oil; the sale of refined petroleum products including motor gasoline, distillate fuel oil, diesel fuel and petroleum coke; the operation of natural gas processing plants and the sale of natural gas liquids; and the acquisition and sale of uranium and coal.

(b) Concentration in those product categories will increase and the tendency toward concentration strengthened; and

(c) Barriers to entry in those industries will be created or increased.

80. If Conoco is not provided with the temporary, preliminary and permanent injunctive relief requested, Conoco and its shareholders will suffer immediate and irreparable harm in the following ways, among others:

(a) Conoco will be injured in its business operations by reason of the violations of Section 7 of the Clayton Act:

(b) Conoco's business and its relationships with customers and employees will continue to be jeopardized by the uncertainties generated by the pendency of the Mobil tender offer;

(c) Conoco's separate identity and current competitive status is being and will continue to be damaged such that it could never be completely restored;

(d) Conoco will experience great difficulty in hiring and retaining officers and employees to the detriment of present and future corporate administration;

(e) Conoco and its shareholders have already been and will continue to be subjected to litigation challenging the legality of the proposed merger, or arising by reason of Mobil's tender offer, and may be subjected to potential treble damage liability because of the illegality of the proposed merger;

(f) The assets and operations of Conoco and Mobil will become commingled, thus making it impossible to restore Conoco fully to its present independent status if the proposed merger is eventually held to be illegal;

(g) Mobil will acquire a "listening line" to Conoco's trade secrets, business strategies and confidential business operations, thereby affording Mobil an unfair and significant competitive advantage over Conoco even if Mobil is able to divest Conoco if the proposed merger is later found to be illegal.

PRAYER FOR RELIEF

Wherefore, plaintiff respectfully prays for judgment as follows:

A. Declaring that the acquisition of Conoco by Mobil violates Section 7 of the Clayton Act.

B. Enjoining defendant, its agents, servants, employees and all persons acting on its behalf or in concert with it temporarily, preliminarily and permanently, from:

(i) acquiring or attempting to take any further action to acquire any shares of Conoco stock;

(ii) voting in any manner any Conoco shares; and

(iii) exercising or seeking to exercise, directly or indirectly, any influence or control over Conoco, or Conoco's management or policies.

C. Requiring defendant to divest itself of any and all of Conoco's shares held or acquired by it.

D. Compensating plaintiff or attorneys' fees and costs incurred in this action; and

E. Granting plaintiff such other and further relief as this Court may deem just and proper.●

R. & D. BUDGETS FOR SMALL BUSINESS PROGRAM

● Mr. HATFIELD. Mr. President, Senator RUDMAN has introduced legislation which requires agencies with R. & D. budgets over $100 million to set aside specific amounts of their R. & D. budgets for small business programs. This legislation now has 80 cosponsors and will be marked up in the Small Business Committee in the near future.

It is a tragic fact that R. & D. as a percentage of GNP has dropped dramatically in the last 20 years while our toughest competiors are increasing their commitment to R. & D. The problem is especially acute in that the Federal Government provides 60 percent of total funds spent on R. & D. and 60 percent of that figure goes to defense and space. The administration is reducing total R. & D. funding but is increasing military R. & D. and therefore, the amount of Federal R. & D. money that is available for commercial development is being further restricted. In a time when we so desperately need to restore our productivity growth and remain competitive with Japan and Germany, I believe it is imperative that we devote funds for commercial R. & D.

The beauty of Senator RUDMAN's bill is that it targets limited Federal R. & D. funds to those businesses which are most innovative. Studies have shown that it is the firms with less than 500 employees that are making more innovations per dollar of R. & D. The small firm does not have the overhead expense and can experiment more freely—but is often trapped by its need of start up funding for the R. & D. project. It is a tragic fact that less than 4 percent of Federal R. & D. funds went to firms with less than 500 employees in spite of the track record of these firms in innovation.

Mr. President, articles recently appeared in INC. magazine on innovation and Senator RUDMAN's proposed legislation. I urge my colleagues to read this article on the role of small innovators in our economy.

The articles follow:

STANLEY MASON IS GROWING OIL ON TREES

(By Tom Richman and Susan Benner)

"It was like trying to brief a bunch of hummingbirds in an airplane hanger," says Stanley Mason of his first appearance before a U.S. congressional subcommittee.

Mason, the president of Simco Inc., a small research-and-development company, had been invited to talk about how oil-bearing plants like the Chinese tallow tree might help reduce U.S. dependence on foreign oil. But neither his presentation nor his charts nor the suitcase full of tallow-tree seeds seemed to make an impression. The Senators kept coming in and out of the hearing room on other business.

Granted, the legislators weren't the first people who refused to give Mason's ideas the attention that the silver-haired entrepreneur thought they deserved. Large companies he had approached had told him that the project was "gang-busters," he says, but they weren't interested in a joint venture because the payback was almost certain to be further

out than two years. However, the senators had invited him to speak and—being new to the subcommittee circuit—he says he thought the government really was soliciting his help. By the end of the day, when 75 pounds of pea-sized tallow-tree seeds spilled from the suitcase onto the floor of his congressman's office, he figured he could write the trip off as a loss.

It was frustrating. Mason has been convinced for four years that the Chinese tallow tree is part of the solution to one of the country's major problems. You can literally crush the seeds of the tallow tree, filter out the particles, and put the liquid directly into a diesel engine with no processing or refining. The engine will continue to run at the same power level, but the smoke will turn from black to white and smell more like honey cooking than like diesel fumes. The tallow tree produces far more oil and wax per acre than any other vegetable oil plant grown in the United States. Mason thinks enough tallow trees could be grown on marginal land in the United States to replace 5 percent of the petroleum used in this country, at a cost equal to that of diesel fuel.

But more interesting to Mason than the tallow tree's value as a fuel is its potential for industrial use. The whitish outside part of the seed can be used as a substitute for edible fats, like cocoa butter. The oil can be used in the manufacture of plastics. Chemicals in the seed can be used as a finishing oil in paint. The leftover solids can be compressed and fed to cattle. And branches cut in harvesting the seed can be chopped up and sold as wood chips.

"It's like the pig," says Mason. "You use everything."

But neither the senators nor the large companies seemed to take his plans for the tallow tree seriously. Though Chinese farmers had used its seeds for centuries primarily for making soap, the U.S. market had already rejected it twice—in the late 1700s and the early 1900s—as a raw material for commercial production of soap. The tree grew well in the coastal areas of Texas and Florida where it was planted, but the cost of harvesting the seeds by hand, as the Chinese did, was prohibitive in the United States. Mason had come across it in 1978 when Dr. H. W. Scheld, then a researcher at the University of Houston and now the director of research and principal scientist for Simco, was studying the trees potential as a source of woody biomass for the Department of Energy. Mason knew the oil market from a stint he did with the Hunt-Wesson Foods subsidiary of Norton Simon, and he suggested that Scheld look at the tallow tree as a source of edible oil.

Mason was also at Hunt-Wesson during the development of the tomato harvesting machine and figured he could get a tallow-tree harvesting machine designed. But his plans for tallow-tree development would go nowhere if he couldn't find an outside source of money. He had calculated that he would need something like $3 million per year for five years to get it ready for the market. And though Simco is financially successful, he says, like many small companies it doesn't have the resources to fund an idea on that scale.

Funding innovative ideas has never been easy, of course, but some people say the problem is getting worse. United States spending on research and development as a percentage of the Gross National Product has declined steadily, if not dramatically, since 1964, from 2.97 percent of the GNP to an estimated 2.33 percent in 1980. By contrast, West Germany and Japan have been spending an increasing percentage of their GNPs on R&D.

The government funds about 60 percent of all R&D in the United States, and well over half of that goes to defense and space projects, which have only indirect application to commercial markets. President Reagan proposes to boost the space and defense portion of government-funded R&D to 68 percent in 1982, up from 60 percent in 1980.

And where does this money go? Last year, the government spent almost $31.7 billion on R&D, about 70 percent of that in private industry. (The rest went to government labs and universities.) But R&D grants and contracts awarded to companies with fewer than 500 employees accounted for less than 4 percent of the government's total R&D expenditures.

The odds are decisively against the small-company entrepreneur.

"This country is horribly underfunding start-up research and development," says William Chandler, founder and president of Bay Venture Management, a San Francisco venture capital firm that specializes in start-ups. "People with good ideas have a much more difficult time getting money than their track records justify."

Stanley Mason is a prime example. Mason brought the world an eclectic variety of products including the first "no-glug" plastice bottle, the first form-fitting disposable diaper with tabs, a burglar alarm that hangs on a door knob and goes off when anyone touches the knob, Masonware microwave cooking dishes, and fertilizer printed on the back of black plastic for gardens.

At 59, he's no rookie. He worked for U.S. Steel as a draftsman, for Armstrong Cork as an ad writer, for Martin Aircraft Tool as a tool engineer, and later as a proposal director for projects including Titan and Project Vanguard. He was in charge of packaging and new products at Hunt-Wesson Foods, and was vice-president of development and technical services at American Can.

He gave up big-company security in 1973 to start Simco, a small company that specialized in conceputalizing and developing new products. He intended to stay small to ensure that his time wouldn't be drained away by administrative concerns. And he has. Today Mason owns three companies—two R&D firms, Simco Inc. in Weston Conn., and Simco Space Bio-Systems Research Services in Houston, Tex., and a third company, the Masonware Corp. in Newport Beach, Calif., which markets his line of microwave cookware. The two R&D companies have a total of 12 full-time people, with a network of about 120 scientists, technicians, and specialists who are brought into work on various projects. Half of the companies' work is for large-company clients like Johnson & Johnson, S.C. Johnson & Son (Johnson Wax), Frito-Lay, Lipton (Tea), American Can, and Neutrogena. The other half is developing proprietary products of their own.

Though Mason has had no trouble getting contracts for major corporations' own projects, none he's approached have been willing to take the risks that a long-term commitment to an unproven (and off-the-wall) product like the tallow tree would entail. And he's convinced that attitude is typical of most large companies.

"Failure in large companies is not tolerated," he says. "There's a dictatorship of the bottom line. Lots of people think they know how to control the bottom line, and they generally control it by not taking action, by not taking risks. They're protecting what has been built before by those who had guts or were foolhardy enough to take risks."

Therefore, goes the thinking of Mason and others who advocate federal support of R&D, since small companies don't have the money, and large companies won't spend it, the government should fund long-term R&D efforts. "The government has the power, the money, and the incentive to do it," says Mason. "How long do you think we could support a war without imported oil?"

The government does believe in supporting some R&D, of course. That's why it's spending more than $30 billion on it. But most of the money isn't going to small companies like Mason's.

If large companies produced more innovations, then few small companies would have reason to complain. But in fact the opposite is true: Small companies produce about twice the innovations per employee as large companies.

Passing over small companies is "cheating the taxpayer," says William Whiston, director of economic research at the Small Business Administration. Whiston has studies going back 20 years that support his claim. One of the most widely quoted is a 1977 National Science Foundation study that tentatively concluded that between 1953 and 1973 firms with fewer than 1,000 employees produced 24 times as many innovations per employee as firms with more than 10,000 employees, and 4 times as many as the companies in between. That finding later turned out to be incorrect. More recent analyses show that small companies are somewhere between 1.8 and 2.8 times as innovative as large companies per employee.

Whiston will settle for the smaller numbers. "I think all you have to do is establish that small business is at least as innovative as big business," he says.

If that is the case, then why, asked a panel studying industrial innovation for the Commerce Department in 1979, is so much of federal R&D awarded to large firms, federal laboratories, and universities? "We believe," the panel said, "that a larger share of federally funded R&D awarded to small businesses would produce substantially greater results." But the trend appears to be going in the other direction.

As it turned out, Stanley Mason's experience defied the trend. Though the congressional subcommittee didn't seem to pay much attention to what he had to say, a New York Times reporter passed the story on to a friend at Newsweek. When Newsweek quoted Simco vice-president Michael Handler in an article on alternative energy, someone at the NSF was intrigued enough to ask the company if it would be interested in a relatively new research grant program they had for small companies.

The NSF didn't start its Small Business Innovation Research program (SBIR) out of a concern for small companies or a conviction that they would do innovative work. In fact, Congress required it to set aside some of its applied research budget for small business. The NSF charged Roland Tibbetts, then a director of applied research programs, with seeing that the money was well spent.

Tibbetts and others he consulted devised a three-phase program that he thought might be a pilot for other agencies, as well as for a larger scale effort at the NSF. It was designed to lead a small company from a six-month feasibility study to a two-year larger scale research effort, and then to private sources of capital, such as venture capitalists and large corporations, for commercialization.

The program attracted 329 proposals from 34 states in 1977, and of those 42 got Phase I grants of up to $25,000. The following year, the entire $4.3-million budget was allotted to Phase II grants, which average $200,000, for a continuation of half of the first 42 projects. In 1979 and 1980 the number of applications and Phase I projects funded increased.

Twenty-five thousand dollars didn't sound like much money to Mason, but in spite of the relationships he'd built up with large companies over the years, no one else was giving him anything. Besides, the application called for just a 20-page proposal, and he thought the exposure to the scientific community might be good for the project. Mason and his colleagues put together and sent off what was 1 of 530 applications submitted by small companies in 1980.

Simco got its $25,000 and put in about that much more of its own. During the six months that the feasibility study lasted, the company continued its study of the growth, production, and seed characteristics of the tree. But the most important effects of the grant, says Mason, were a wider acceptance by serious scientists and the opportunity of coming up with a long-term research plan. "If it weren't for the NSF, we would not have been able to get the kind of brains working on this that we have," says Mason.

What the NSF gets out of the program is, of course, hard to measure, and figuring out what the nation's rewards are is even harder. Most of the products have yet to hit the market, though many of them sound promising, for instance a microcomputer that understands and answers questions in English rather than in computerese and a new process for making solar panels. And the charter recipients of Phase I and II grants, who received a total of $5.3 million from NSF, have attracted about $16 million in private funding.

But those rewards aparently haven't been enough. The NSF has reorganized itself several times during the four years of the SBIR program's existence, and after each reorganization, the percentage of money and manpower allotted to applied research has been smaller. Consequently, the SBIR budget, calculated as a percentage of the NSF, applied research funding, has not increased as rapidly as the program's supporters had hoped.

The effect has been not simply to distribute fewer resources to a smaller number of participants, but to shake the program's structure. Program managers and topic areas have been shuffled. Grants have been delayed by turnover and by uncertainties about loss of funding. Phase II money, which hadn't been awarded on schedule even before the major reorganizations, has been delayed for as long as 15 months.

The delay has slowed progress on some projects to a backwards crawl. Allocation of already scarce small-company resources has become very difficult when the fate of what in some cases is a significant portion of their efforts is unknown.

And the steady production of press releases by the NSF and other government agencies hasn't helped. News about projects went out when grants were accepted and project reports were filed, giving the grant recipients' competitors as long as 15 months to catch up.

"Small companies can't afford to be strong along the way," says one Phase I recipient who is still waiting to hear about a Phase II grant decision that was expected last September. He says he has been told over the phone since last December he would get the money, even that the check was in the mail, but so far, he hasn't seen a dollar. "There's no excuse for the way they operate," he says. The delay has cost him a specialist he couldn't afford to keep dangling and caused difficulties in his relationship with the third-party source of funding he was required to line up to complete his Phase II application.

There are also complaints about the amount of time and money for Phase I grants—mostly that it isn't enough—and some concern that because proposals are usually reviewed by university professors, only academic-type projects get approved.

You might think with all the problems, that small companies would be wary of government support. And some, like Biospherics Inc., a $6-million company in Rockville, Md., have decided to reduce their dependence on federal grants and contracts. Biospherics, which recently received public attention for a patent on a process using "left-handed" sugars to make noncaloric sweetners, has begun to emphasize the analytical and lab services that are more marketable to private industry.

Yet other small companies, some of the same ones that are most vocal in expressing dissatisfaction with the current state of the NSF grants, think the idea of the program is excellent, or at the least, a step in the right direction.

But is that step enough? No, says Dr. Gilbelt Levin, president of Biospherics. "The nation has to be willing to risk more than $25,000 and six months."

Stanley Mason agrees. Though Simco has applied for a Phase II grant, the $200,000 he would get would fund only a small portion of the tallow-tree development plan he has in mind. Still, he's optimistic. The NSF program did help Simco get past some of the scientific community's initial skepticism. And though he has no large company partner firmly committed to a joint venture, he's getting lab support from the R&D departments of six major corporations. Deutz Corp, has tested tallow-tree fuel in tractor engines, and a large hospital-supply company is considering using tallow-tree fuel in 200 of its diesel trucks. A couple of food-oil companies are testing the seed's edible oils. S. C. Johnson, Neutrogena, and Mars Inc. have worked on applications in their industry.

"The government should support this," says Mason. "Even though a little company like ours is maybe a hundred times more efficient per dollar than any large companies, there aren't very many dollars to be efficient with." In the absence of large-scale government support, Simco is "foolishly" supporting the project on its own. "This is a project which must be done," says Mason. "We're going to get this damned thing off the ground. And, we hope, make money on it."

Why Bureaucrats Avoid Small Business R&D

As a rule, the federal government doesn't like to do business with small companies, for reasons that are not hard to understand if you're the government employee who has to sign the R&D procurement contract.

Big R&D efforts usually involve many scientific or technical disciplines. So the tendency of procurement officials is to say, "Why not give the contract to a big company and let them manage it for us," according to Eugene Rosen, small business adviser at the National Aeronautics and Space Administration. "That's been the attitude at NASA," Rosen adds.

Besides being easier to manage, R&D contracts with big, established firms involve less risk to the government official who okays the contract. He can hardly be blamed if, say, General Electric fails to deliver on time, but let him try to explain the failure of a $3-million independent firm that nobody else in the agency has ever heard of.

In some agencies, "profit" is a dirty word. Take the Public Health Service, for example, which has only this year decided to allow for-profit business to compete for its research assistance grants. The fine print in the new regulations almost assures that the agency won't have too many takers. There will be no provision for profit in the research grants. Only direct and indirect costs will be covered. And should the research turn up something useful—and of potential commercial value—it belongs to the government, which can share it with anyone. And just in case the company should earn something from royalties, license fees, or copyrights on the data it produces, that income, too, belongs to the government up to the full amount of the R&D grant awarded.

Profit is not a dirty word at the Department of Defense, which adds about 4% to contracts it negotiates with suppliers. Called Independent Research and Development/Bid and Proposal (or IR&D/B&P), this money is awarded in addition to contract costs and profits, and is intended to help DoD contractors cover the technical and administrative expenses of preparing their bids and conducting the research required to keep them abreast of the state of the art in their industries. Is the estimated $1.7 billion in IR&D/B&P that Defense handed out in 1979 to its 93 largest contractors, for example, a subsidy, as critics frequently charge? Defense officials say no. But if you run a small company that's trying to get its first DoD contract, you'll be competing with your own money against veteran suppliers whose bidding costs have already been picked up by the government.

Of course, government is supposed to apply an even hand in awarding its R&D business to private firms, so it publishes requests for proposals (RFPs) in the Commerce Business Daily ($105 per year by subscription) where anyone can see them. But there is an old saying in the procurement business, according to a government official who has been there: "If you haven't heard about it before the RFP is published, it's too late to respond." Big businesses keep people in Washington whose job it is to keep their ears open, and those firms get a leg up on the small company that has just 30 days or less to respond to a published RFP.

Sen. Warren Rudman, a freshman Republican from New Hampshire, says the government should start heeding its own studies and turn over more of its R&D work to small businesses. His proposed amendments to the Small Business Act would require most federal agencies and departments to establish "small business innovation research" programs, modeled on the four-year-old National Science Foundation program. Agencies with R&D budgets greater than $100 million—and that is most of them—would be required, under Rudman's bill, to set aside specific amounts of their R&D budgets for the small business programs: not less than 0.2 percent of their total R&D budgets for fiscal 1982, 0.6 percent for 1983, and 1 percent thereafter.

Government agencies probably won't like the bill. "We are against it," says a NASA procurement official. He complains about the additional bureaucracy and inefficiency. NASA already has enough authority to do a better job on its own, the official says, adding, "We don't need a law to tell us we need innovation." A spokesman for the Office of Management and Budget said the Reagan Administration had developed no position on Rudman's proposal yet. But, he added, the government's procurement laws have already become an "absolute monstrosity . . . with set-asides for minorities, women, small business, and disadvantaged business. I would find it very surprising if the OMB did like [the Rudman bill]."

Part of the opposition to the Rudman proposal is more easily understood when you look at what Reagan's budget writers have done to the allocation of R&D money among agencies. Although the Administration has budgeted 28 percent more money for R&D in 1982 than in 1980, the increase is primarily in the defense area, where R&D spending will rise 54 percent. In virtually every other agency, R&D budgets have been either cut or increased less than the rate of inflation. Universities, nonprofit organizations, government laboratories, and established government grant and contract recipients can already see their incomes declining.

NASA, which has in the past made efforts to attract small companies into its basic research programs, will pour more of its resources into development programs, according to Stuart Evans, the agency's director of procurement. "Most of our development contracts," he adds, "go to big companies."

In contrast, the NSF has awarded most of its small business grants for applied research. Under the Reagan budget, the NSF will concentrate on basic research where universities

and nonprofit organizations get most of the grants.

Even the substantially higher funding for defense-related research may not bring much business to small companies, says Judith Obermayer, president of a Cambridge, Mass., research firm. "When there's so much money to spend and you can't spend it fast enough," she says, "you aren't going to take the time to write a $100,000 or $200,000 contract. You don't want to be caught not spending it all, for heaven's sake."

Rudman and others on Capitol Hill argue that as R&D budgets get tighter, agencies should be turning toward small business, not away from it, to increase the returns on their limited dollars. "This is not a small business relief bill," says a member of Rudman's staff. "This is a way to get federal government R&D needs met more efficiently."●

OFFICE OF ALCOHOL FUELS

● Mr. BAUCUS. Mr. President, I am confident that James G. Stearns will be the new Director of the Office of Alcohol Fuels, within the Office of Conservation and Renewable Energy under the Department of Energy. This position is a critical one for the advancement of the production and consumption of alcohol fuels and one that I believe Mr. Stearns will ably fill.

I am sure that with Mr. Stearns' agricultural background, he will recognize the potential of alcohol fuels in helping our Nation's ranchers and farmers combat the increasing cost of production attributed to energy. Mr. Stearns' task will not be an easy one. The Reagan administration has recommended the elimination of Federal loans and loan guarantees through the Department of Energy and the USDA under the provisions of the Energy Security Act of 1980. He most assuredly will not reach the goal established under the Energy Security Act of developing an industry capable of producing 920 million gallons of fuel alcohol by the end of 1982. However, a strong commitment to increasing our national production of fuel alcohol should be made by the Office of Alcohol Fuels under Mr. Stearns.

The elimination of loans and loan guarantees strikes the small producer and agricultural community more severely than the commercial fuel alcohol industry. The administration argues, and rightfully so, that there are still many financial incentives to encourage alternative fuel production. The difficulty for small producers is that they must find a source of capital to be able to take advantage of these tax incentives—at a time when capital formation is one of the most critical problems facing farmers and small business.

Another advantage of encouraging agricultural sectors to produce alcohol fuels is that abundant supplies of the feedstock needed for production are readily available. Producing fuel alcohol in rural areas and "stretching" the amount of fuel available for agricultural production will benefit not only our farm sectors—through lower cost of production—but our consumers and our national economy through decreasing our inflationary dependence on foreign oil.

I am confident that Congress will restore partial funding for the loans and loan guarantee programs under the Energy Security Act. However, equally important, is the Office of Alcohol Fuels program to encourage both production and consumption of fuel alcohol.

Already, uncertainty of the Federal Government's commitment to alcohol fuels and of consumer demand for gasohol has slowed alcohol production. For example, Archer Daniels Midland Co. planned to build the world's largest fuel alcohol plant in Des Moines, Iowa. They have now held off on their plan because of the uncertainty in the fuel alcohol market.

The need for an effective advocate to encourage the production and consumption of alcohol fuels is apparent. I believe James Stearns has the ability to develop an aggressive alcohol fuels advocacy program within and outside of DOE.

I hope that Mr. Stearns' "machine" and the Office of Alcohol Fuels will run as if powered by gasohol. This, of course, recognizes that the addition of ethanol to unleaded gasoline enhances the octane level of the gasoline which delivers superior engine performance, reduces engine knocking and may lead to improved acceleration.●

The PRESIDING OFFICER. Who seeks recognition?

Mr. METZENBAUM. Mr. President——

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

Is it necessary to ask unanimous consent that the pending amendment be temporarily laid aside?

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Is that an amendment on day care?

Mr. METZENBAUM. Yes.

Mr. BAKER. Mr. President, I have to have Senator DOMENICI come to the Chamber before we proceed.

Mr. METZENBAUM. Mr. President, I ask that my previous request be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, are we still in morning business?

The PRESIDING OFFICER. We are still in morning business.

Is there further morning business? If not, morning business is closed.

ECONOMIC RECOVERY TAX ACT OF 1981

The Senate continued with the consideration of the joint resolution.

Mr. BAKER. Mr. President, I might say for the benefit of my friend from Ohio, that I just learned that the Senator from New Mexico has an interest in this matter and I respectfully request that he withhold any further action on it until the Senator is present.

Mr. METZENBAUM. I did not know that.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I am advised there is not a budget question to be raised against the proposal of the distinguished Senator from Ohio.

Before we proceed, may I inquire if there are other arrangements that need to be attended to in that connection.

Mr. PACKWOOD. There is no budget issue. The chairman of the Budget Committee has looked at it and assured me of that. I have just checked with the minority leader and he knows of no objection, although these are two separate amendments and they would be covered with one vote.

Mr. METZENBAUM. That is perfectly agreeable. I would point out to the majority leader that the Senator from Delaware (Mr. BIDEN) is not here. He has indicated that he would not be willing to have a voice vote tonight, but is perfectly agreeable to setting it for a time certain on Tuesday, with the caveat or the condition that the Senator from Louisiana has raised, that in the event the Senate is able to dispose of the entire tax bill on Monday this matter would also be disposed of on Monday.

Mr. BAKER. Mr. President, could I inquire of the Senator from Ohio?

I am perfectly willing to do that as far as I am concerned, but since we cannot have a voice vote tonight, and would not have a rollcall vote until Monday or Tuesday, would the Senator from Ohio be willing to put over the whole thing until Monday and make this amendment the pending business when we return on Monday morning?

Mr. METZENBAUM. This Senator will not be here on Monday.

Mr. BAKER. How about Tuesday?

Mr. METZENBAUM. Tuesday would be fine. Seven-thirty in the morning would be fine.

Mr. BAKER. The Senator tempts me.

Mr. DOLE. It would help the manager of the bill if we do it tonight because it takes care of about seven or eight names on that long list. We do have an agreement on it. By Monday, it might get out of the bag. By Tuesday they may think of a higher number.

Mr. METZENBAUM. Either way is all right.

Mr. BAKER. Would the Senator from Delaware be willing to let us have a voice vote on this tonight?

Mr. BIDEN. No; I would not.

Mr. BAKER. Mr. President, I am advised now that the problem has arisen which the chairman of the committee predicted, that we take these amendments in sequence as they occur.

Mr. President, in view of that request, I cannot agree to do other than to call

up the amendment. It may be that we will not finish it today, in which case it would go over until Monday. I am not in a position to take it up and set it for Tuesday.

Mr. METZENBAUM. Then I could wait and call up the amendment on Tuesday.

Mr. LONG. Can we agree informally among ourselves that we will endeavor to vote on this amendment before we go to a third reading?

As far as I am concerned, if the Senator is not here, I will be glad to offer his amendment for him myself.

Mr. METZENBAUM. Mr. President, I spent a lot of time on this amendment. I am not trying to delay the Senate. I do not want to delay the Senate. I am perfectly willing to call it up this evening and set it for a time and date certain, and agree to vote on it Monday, if necessary. But I would like to be in a position to call up my own amendment and speak to it.

I do know what the problem is about setting it for a time certain on Tuesday on the other side. Since it does not seem to me an unreasonable kind of request, nor would it put anybody at a particular disadvantage——

Mr. BAKER. If the Senator will permit me to interrupt, Mr. President, I am going to do something I almost never do. That is to recognize the special and unique circumstances involved here.

I am now advised that I do not have a formal request for an objection on that, but, rather the expression of a preference. There is a distinction that may not be important to anybody but me, but it is a distinction.

I am prepared now to recede from the position I stated earlier and let the Senator go ahead and offer his amendment, with the understanding that it will not be voted on tonight.

I am prepared to make a unanimous-consent request, if it is agreeable to the two managers and other Senators involved, that after debate on this issue is concluded this evening, when we return to the consideration of the bill on Tuesday it will be the first order of business and the vote will occur at that time. If the Senator is agreeable to that, if the managers are agreeable to that, and the minority leader, I am prepared to make that request.

Mr. METZENBAUM. Yes.

Mr. DURENBERGER. If the majority leader will yield, if agreeable I plan to propose an amendment in this matter. That proposal would be agreeable to me, providing that at the time of the vote on the amendment of the Senator from Ohio, my amendment would also be voted on at the same time.

Mr. METZENBAUM. That is agreeable.

Mr. BAKER. Mr. President, I have a problem there. We have a list of amendments with no second degree amendments. If the Senator is agreeable to consider these two amendments together, to modify the amendment of the Senator from Ohio by incorporating the amendment of the Senator from Minnesota so that it would then be a single amendment—would that be agreeable?

Mr. METZENBAUM. That is agreeable.

Mr. DURENBERGER. For purposes of the vote?

Mr. BAKER. Yes.

Mr. DURENBERGER. That is agreeable.

Mr. BAKER. Mr. President, I ask unanimous consent that after debate is concluded on the amendment to be offered by the Senator from Ohio, that the amendment be temporarily laid aside; that we resume consideration of that amendment as soon as the Senate resumes consideration of the tax bill on Tuesday next, and that the amendment of the Senator from Ohio and an amendment to be offered by the Senator from Minnesota be consolidated into a single amendment for the purpose of final disposition by the Senate.

Mr. BIDEN. Reserving the right to object, Mr. President, what will that do to the time agreement reached on the amendment? How much time will we have on this issue tonight if that is agreed to?

Mr. BAKER. Mr. President, there are 30 minutes equally divided on the amendment.

Mr. DOLE. I can give time off the bill if the Senator wants more time.

Mr. BIDEN. I just want to make sure I understand what is being consolidated here. Are we consolidating two amendments?

Mr. PACKWOOD. The amendment of the Senator from Ohio and the Senator from Florida, which was the amendment of the Senator from Minnesota for himself, was literally physically split in two. The Senator from Chio will be offering part of it as an amendment. The Senator from Minnesota will be offering part of it as a separate amendment but they will be voted on as one. They will include sliding scale, fringe benefits, refundable credits. But they are split in two.

Mr. BIDEN. So we are talking about a total of an hour's time or a half hour?

Mr. BAKER. Mr. President, I put the question to the Chair: Under these circumstances, if the unanimous consent is granted by the Senate and we have two amendments considered en bloc for a single vote, will the Senate indulge 1 hour of debating divided 30 minutes on each amendment or 30 minutes on the consolidated amendment?

The PRESIDING OFFICER. It will take unanimous consent to consider the amendments en bloc. Therefore, it would be up to the Senate to establish the amount of debate time.

Mr. METZENBAUM. If the Senator from Tennessee will yield for 1 minute, I might say I am presenting the amendment on behalf of and with the Senators on the floor, I do not expect to speak more than 1 minute. I expect to put my statement in the RECORD. Looking around at the gallery, it does not seem there are many people who will be wanting to hear our debate, and I think many of us will foreshorten our speech.

Mr. BAKER. The Senator is a foresightful person.

Mr. BIDEN. Under those circumstances, Mr. President, I do not object.

Mr. BAKER. Mr. President, I ask unanimous consent that there be 30 minutes equally divided for debate on the amendments in question.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the amendment pending at the desk be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 296

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask unanimous consent that it be considered.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) for himself, Mrs. HAWKINS, Mr. DURENBERGER, Mr. PACKWOOD, and Mr. HEINZ, proposes an unprinted amendment numbered 296.

Mr. METZENBAUM. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following:

CREDIT FOR CERTAIN HOUSEHOLD AND DEPENDENT CARE EXPENSES

SEC. . (a) ALLOWANCE OF CREDIT.—Subsection (a) of section 44A of the Internal Revenue Code of 1954 (relating to expenses for household and dependent care services necessary for gainful employment) is amended to read as follows:

"(a) ALLOWANCE OF CREDIT.—In the case of an individual who maintains a household which includes as a member one or more qualifying individuals (as defined in subsection (b)(1)), there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the product of—

"(1) the employment-related expenses paid by such individual during the taxable year, multiplied by

"(2) the greater of—

"(A) the percentage equal to—

"(i) 30 percent, reduced by

"(ii) 1 percent for each $2,000 of such individual's adjusted gross income for such taxable year, or fraction thereof, which is in excess of $10,000, or

"(B) 20 percent.".

(b) DOLLAR LIMITATION.—Subsection (c) of section 44A of such Code (as redesignated by subsection (b)) is amended to read as follows:

"(c) DOLLAR LIMITATION.—

"(1) IN GENERAL.—The amount of the employment-related expenses incurred during any taxable year which may be taken into account under subsection (a) shall not exceed—

"(A) $2,400 if there is one qualifying individual with respect to the taxpayer for such taxable year, or

"(B) $4,800 if there are two or more qualifying individuals with respect to the taxpayer for such taxable year.

(d) EARNED INCOME LIMITATION.—Paragraph (2) of subsection (d) of section 44A of such Code (as redesignated by subsection (b)) is amended to read as follows:

"(2) SPECIAL RULE FOR SPOUSE WHO IS A STUDENT OR INCAPABLE OF CARING FOR HIMSELF.

In the case of a spouse who is a student or a qualifying individual described in subsection (b)(1)(C), for purposes of paragraph (1), such spouse shall be deemed for each month during which such spouse is a full-time student at an educational institution,

or is such a qualifying individual, to be gainfully employed and to have earned income of not less than—

"(i) $200 if subsection (c)(1)(A) applies for the taxable year, or

"(ii) $400 if subsection (c)(1)(B) applies for the taxable year.

In the case of any husband and wife, this paragraph shall apply with respect to only one spouse for any one month.

(e) The amendments made by this section shall apply to taxable years beginning after December 31, 1981.

SEC. A. ALLOWANCE OF A CREDIT FOR HOUSEHOLD AND DEPENDENT CARE SERVICES PROVIDED BY AN EMPLOYER.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable), as amended by section 321 of this Act, is amended by inserting after section 44G the following new section:

"SEC. 44H. HOUSEHOLD AND DEPENDENT CARE SERVICES PROVIDED BY EMPLOYER.

"(a) IN GENERAL.—In the case of an employer (as defined in section 3431 (d)) who provides qualified household and dependent care services to his employees, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 50 percent of the excess of—

"(1) the expenses paid or incurred by such employer during the taxable year in providing such services to his employees, over

"(2) the amount of remuneration, if any, paid to such employer by his employees for providing such services during the taxable year.

"(b) QUALIFIED HOUSEHOLD AND DEPENDENT CARE SERVICES.—For purposes of this section, the term 'qualified household and dependent care services' means those services which if paid for by the employee would be considered employment-related expenses under section 44A (c) (2).

"(c) CAPITAL EXPENSES.—The expenses which may be taken into account under subsection (a) in determining the amount of the credit shall not include any amount paid or incurred by the employer which is chargeable to capital account.

"(d) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under a section of this subpart having a lower number or letter designation than this section, other than the credits allowable by sections 31, 39, 43, and 44A. For purposes of the preceding sentence, the term 'tax imposed by this chapter' shall not include any tax treated as not imposed by this chapter under the last sentence of section 53 (a).

"(e) DENIAL OF DOUBLE BENEFIT.—No deduction or credit shall be allowed under this chapter with respect to any amount for which a credit is allowed under this section.

"(f) PASS-THROUGH IN THE CASE OF SUBCHAPTER S CORPORATIONS.—Under regulations prescribed by the Secretary, rules similar to the rules of subsections (d) and (e) of section 52 shall apply."

(b) CONFORMING AMENDMENTS.—

(1) The table of sections for subpart A of part IV of subchapter A of chapter 1, as amended by section 221 (c) of this Act, is amended by inserting after the item relating to section 44G the following:

"Sec. 44H. Household and dependent care services provided by employer.".

(2) Section 6096(b) (relating to designation of income tax payments to Presidential Election Campaign Fund), as amended by section 221(c) of this Act, is amended by striking out "and 44G" and inserting in lieu thereof "44G, and 44H".

SEC. CREDIT ALLOWED FOR CERTAIN SERVICES OUTSIDE TAXPAYER'S HOUSEHOLD.

(a) Paragraph (2) of section 44A(c) (defining employment-related expenses) is amended by striking out subparagraph (B) and inserting in lieu thereof the following new subparagraphs:

"(C) DEPENDENT CARE CENTERS.—Employment-related expenses described in subparagraph (A) which are incurred for services provided outside the taxpayer's household by a dependent care center (as defined in subparagraph (D)) shall be taken into account only if—

"(i) such center complies with all applicable laws and regulations of a State or unit of local government, and

"(ii) the requirements of subparagraph (B) are met.

"(D) DEPENDENT CARE CENTER DEFINED.—For purposes of this paragraph, the term 'dependent care center' means any facility which—

"(i) provides care for more than six individuals (other than individuals who reside at the facility), and

"(ii) receives a fee, payment, or grant for providing services for any of the individuals (regardless of whether such facility is operated for profit).

Such term shall not include a facility which regularly provides care for six, or fewer, individuals (other than individuals who reside at the facility) and which serves as the residence of the individual operating the facility.".

Mr. METZENBAUM. Mr. President, Senator HAWKINS joins me today in offering as an amendment to the tax bill a key portion of the Stronger American Families Act of 1981.

Senators DURENBERGER, PACKWOOD, CRANSTON, D'AMATO, MOYNIHAN, TSONGAS, WILLIAMS, KENNEDY, RANDOLPH, SIMPSON, LEVIN, and RIEGLE also join in cosponsoring this proposal.

Our amendment is designed to respond to the fact that the real world in which American families live today is very different than it was years ago.

In 1960, for example, only 30 percent of married women held jobs. Today, that figure is nearly 50 percent.

Ten years ago, 39 percent of the Nation's children had mothers in the work force. Today, the children of working mothers make up fully half of all American youngsters below the age of 18.

To some extent, that growth has taken place because women have begun to break into business and professional careers from which they had been excluded. But the fact is, Mr. President, that the doctors, the lawyers, and the business people represent only a small fraction of the Nation's working mothers.

Few of America's working mothers are in highly paid occupations—the average two-earner family has a combined annual income of $25,000.

A large percentage of them are young—in their twenties and early thirties. And they are working because in today's economic climate, their families simply cannot get by on one income.

But unfortunately, Mr. President, the child care facilities available to working families have not expanded to match the movement of mothers into the work force.

In too many cases, working mothers are forced to leave their children without adequate supervision. And when child care facilities are available at all, they cost these hard-pressed young families an average of $50 per child per week.

A majority of American families have identified child care as an area in which they want their Government to be more responsive. In a recent Gallup poll, 67 percent supported tax credits for businesses to provide on-site child care, and fully 70 percent supported tax credits to assist families in meeting child care expenses.

The amendment we offer today has four components.

First, the amendment addresses the problem of availability by offering to employers new incentives to provide their employees with child care services.

The second component of this amendment recognizes that most Americans are not fortunate enough to be employed by companies that offer their own child care programs. It, therefore, strengthens substantially the existing day care tax credit for all working parents, regardless of income, in order to compensate for the effect of inflation on the existing tax credit.

Under current law, taxpayers may claim as a tax credit, 20 percent of the first $2,000 they spend on child care expenses. Our amendment raises that level to $2,400.

In addition, Mr. President, the amendment will target assistance to middle- and lower-income working families by adding 1 percent to the 20-percent credit for each $2,000 by which a family's income falls below $20,000. The maximum tax credit under this provision would be 30 percent to families earning $10,000 per year or less.

Finally, our amendment removes from the Tax Code provisions that actively discourage working families from keeping handicapped children and elderly relatives in the home.

Today, the eligibility for tax relief is limited to payments to persons who come into the home to care for elderly or handicapped family members.

I am sure, Mr. President, that there are thousands upon thousands of families in this country who would like to take advantage of that provision. But for most of these families, the cost of paying a nurse or even a babysitter is simply too great.

Special day care centers for the handicapped exist—and are within the means of working families. But expenditures for facilities of this kind do not qualify for tax credits.

The same is true for dependent care programs for senior citizens.

And the result is that many families are forced against their will to institutionalize their elderly and handicapped members. That should not be happening in this country.

Mr. President, the Joint Committee on Taxation has estimated that this amendment will reduce Federal revenues by approximately $340 million in fiscal year 1983. But I cannot think of a better target for tax reduction.

This is a real world amendment we are offering, it is not drawn from some ab-

stract theory. The amendment is inspired by what we know are the day-to-day problems of working men and women.

This amendment rewards the productive people of this country.

It will insure better, more readily available care for countless thousands of American children.

It will help families to stay together.

It is a proposal whose time has come, Mr. President, and I ask for its adoption.

Mrs. HAWKINS. Mr. President, I support this amendment. On July 14, 1981, Senator METZENBAUM and I introduced Senate bill No. 1478, along with Senators WILLIAMS, TSONGAS, and the others mentioned. Today, we are offering an amendment to House Joint Resolution 266 based on that bill and the day care provisions contained in the House version of the tax bill, as reported out of the Ways and Means Committee. Mr. President, this amendment is designed to increase American productivity, and in that aim it is perfectly consistent with the underlying legislation, the Economic Recovery Tax Act of 1981.

By 1980, more than half the women with children under 18 were in the work force. That is the fact. But 1990, two-thirds of all mothers with children under 6 years of age will be working, and three-fourths of all two-parent families will have both parents in the work force. This trend to two-earner families comes about in large part because of the economic conditions which have prevailed for the last few years, conditions which make it impossible for the middle class to survive on a single income.

Since those mothers have already moved into the work force, Mr. President, the question is how to provide for their children in a way most consistent with family stability and with worker productivity. This legislation addresses that problem in two ways.

First, it encourages employers to provide day care services for their employees by contracting with community-based day care centers. Employers who have provided such services have found that job turnover is lower, absenteeism and tardiness are down, employee morale is up, and it is easier to recruit new workers. Those are precisely the factors which lead to higher productivity, and precisely the factors this tax bill is supposed to produce.

Second, this legislation extends the availability of tax credits for day-care expense. The current limit of 20 percent makes it difficult for the middle-income family to afford the kind of care that is necessary. This amendment would increase the percentage of expense that can be taken by families below $30,000 per year in income. The amendment also makes the credit refundable, so that it can be used at the lowest end of the income scale, by families without taxable income.

Ninety percent of the Government's present expenditures on day care comes in the form of direct assistance, or direct provision of day care services, largely through the various antipoverty programs of the Government. Thus, it is not available to the middle-class family, and offers lower income families little choice. By changing the emphasis to the indirect form of assistance the tax incentive provides, assistance should be more available to the middle class. At the same time, lower income families will be helped to make choices about the kind of care they want for their children.

Mr. President, the amendment has some other provisions, designed to clarify the treatment of day-care services provided by employers, so that they are not treated as taxable income.

Mr. President, I can well understand the desire to keep the present tax bill clean, and to avoid revenue-losing amendments. At the same time, I repeat my observation that the purpose of the bill is to increase productivity. If we do not lose sight of that fundamental purpose, with see that the Metzenbaum-Hawkins amendment is perfectly consistent with it, and should be adopted. I hope that we will keep that purpose in mind, and judge the amendment in relation to it, rather than to some mythical legislative purity.

Mr. President, I urge the adoption of the amendment, and I yield the floor.

Mr. PACKWOOD. Mr. President, I am delighted to join with the Senator from Ohio and the Senators from Florida and Minnesota in cosponsoring both of these amendments. Taken together, they are a great step forward in trying to insure that the single parents of this country will have an opportunity to work and can afford to do so. For most single parents—and today, that is still usually women, although not as much as it might have been 5 or 10 years ago—today, the greatest single cost for those single parents or even for those who are married and both husband and wife have to work to make ends meet, is day care. This bill will be a weighty factor in their determination to try to enter the work force rather than think to themselves, "It's cheaper to go on welfare because I cannot afford day care."

If that concept can be grafted into the tax law, it will be one of the best steps forward for the social structure of this country.

UP AMENDMENT NO. 297

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Minnesota (Mr. DURENBERGER), for himself and Mr. PACKWOOD, Mr. METZENBAUM, Mrs. HAWKINS, Mr. HEINZ, Mr. CRANSTON, Mr. D'AMATO, Mr. MOYNIHAN, Mr. TSONGAS, Mr. WILLIAMS, Mr. KENNEDY, Mr. RANDOLPH, Mr. SIMPSON, Mr. LEVIN, and Mr. RIEGLE proposes an unprinted amended numbered 297.

Mr. DURENBERGER. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following:

(a) CREDIT MAY EXCEED TAX LIABILITY.—Section 44A of such Code is amended—

(1) by striking out subsection (b), and

(2) by redesignating subsections (c) through (g) as subsections (b) through (f), respectively.

(b) REFUNDABILITY OF THE CREDIT.—Subsection (b) of section 6401 of such Code (relating to amounts treated as overpayments) is amended to read as follows:

"(b) EXCESSIVE CREDITS.—If the amount allowable as credits under section 31 (relating to tax withheld on wages), section 39 (relating to certain uses of gasoline, special fuels, and lubricating oil), section 43 (relating to earned income credit), and section 44A (relating to expenses for household and dependent care services necessary for gainful employment) exceeds the tax imposed by subtitle A (reduced by the credits allowable under subpart A of part IV of subchapter A of chapter 1, other than the credits allowable under sections 31, 39, 43, and 44A), the amount of such excess shall be considered an overpayment. For purposes of the preceding sentence, any credit allowed under paragraph (1) of section 32 (relating to withholding of tax on nonresident aliens and on foreign corporations) to a nonresident alien individual for a taxable year with respect to which an election under section 6013 (g) or (h) is in effect shall be treated as an amount allowable as a credit under section 31.".

(c) CONFORMING AMENDMENTS.—

(1) Paragraph (5) of section 44A(e) of such Code (as redesignated by subsection (b) of this Act) is amended by striking out "subsection (c)(1)" and inserting in lieu thereof "subsection (b)(1)".

(2) Sections 44C(b)(5), 44D(b)(5), 44E(e)(1), 55(b)(2), and 56(c) of such Code are amended by striking out "and 43" and inserting in lieu thereof "43, and 44A".

(3) Paragraph (4) of section 6201(a) of such Code (relating to assessment authority) is amended to read as follows:

"(4) ERRONEOUS CREDIT.—If on any return or claim for refund of income taxes under subtitle A there is an overstatement of the credit allowable by section 39 (relating to certain uses of gasoline, special fuels, and lubricating oil), section 43 (relating to earned income), or section 44A (relating to expenses for household and dependent care services necessary for gainful employment), the amount so overstated which is allowed against the tax shown on the return or which is allowed as a credit or refund may be assessed by the Secretary in the same manner as in the case of a mathematical or clerical error appearing upon the return, except that the provisions of section 6213(b)(2) (relating to abatement of mathematical or clerical error assessments) shall not apply with regard to any assessment under this paragraph.".

(4) Subsection (a) of section 53 of such Code (relating to limitation of credit allowed by section 44B based on amount of tax) is amended—

(A) by inserting "and" at the end of paragraph (5),

(B) by striking out ", and" at the end of paragraph (6) and inserting in lieu thereof a period, and

(C) by striking out paragraph (7).

(5) Subsection (b) of section 6096 of such Code (relating to designation of income tax payments) is amended by striking out "44A,".

(d) The amendments made by this section shall apply to taxable years beginning after December 31, 1981.

EXCLUSION OF DEPENDENT CARE ASSISTANCE FROM THE INCOME OF EMPLOYEES

SEC. . (a) EXCLUSION FROM INCOME.—Part III of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to items specifically excluded from income) is amended by redesignating section 128 as section 129 and inserting after section 127 the following new section:

"SEC. 128. DEPENDENT CARE ASSISTANCE PROGRAMS.

"(a) IN GENERAL.—Gross income of an employee does not include amounts paid or expenses incurred by the employer for dependent care assistance to such employee if the assistance is furnished pursuant to a program which is described in subsection (d).

"(b) EARNED INCOME LIMITATION.—

"(1) IN GENERAL.—The amount excluded from the income of an employee under subsection (a) for any taxable year shall not exceed—

"(A) in the case of an employee who is not married at the close of such taxable year, the earned income of such employee for such taxable year, or

"(B) in the case of an employee who is married at the close of such taxable year, the lesser of—

"(i) the earned income of such employee for such taxable year, or

"(i) the earned income of the spouse of such employee for such taxable year.

"(2) SPECIAL RULE FOR CERTAIN SPOUSES.—For purposes of paragraph (1), the provisions of section 44A(e)(2) shall apply in determining the earned income of a spouse who is a student or incapable of caring for himself.

"(c) PAYMENTS TO RELATED INDIVIDUALS.—No amount paid or expenses incurred during the taxable year of an employee by an employer in providing dependent care assistance to such employee shall be excluded under subsection (a) if such amount was paid directly to an individual—

"(1) with respect to whom, for such taxable year, a deduction is allowable under section 151(e) (relating to personal exemptions for dependents) to such employee or the spouse of such employee, or

"(2) who is a child of such employee (within the meaning of section 151(e)(3)) under the age of 19 at the close of such taxable year.

"(d) DEPENDENT CARE ASSISTANCE PROGRAM.—

"(1) IN GENERAL.—For purposes of this section a dependent care assistance program is a separate written plan of an employer for the exclusive benefit of his employees to provide such employees with dependent care assistance. The program must meet the requirements of paragraphs (2) through (6) of this subsection.

"(2) ELIGIBILITY.—The program shall benefit employees who qualify under a classification set up by the employer and found by the Secretary not to be discriminatory in favor of employees who are officers, owners, or highly compensated, or their dependents. For purposes of this paragraph, there shall be excluded from consideration employees not included in the program who are included in a unit of employees covered by an agreement which the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and one or more employers, if there is evidence that dependent care benefits were the subject of good faith bargaining between such employee representatives and such employer or employers.

"(3) PRINCIPAL SHAREHOLDERS OR OWNERS.—Not more than 25 percent of the amounts paid or incurred by the employer for dependent care assistance during the year may be provided for the class of individuals who are shareholders or owners (or their spouses or dependents), each of whom (on any day of the year) owns more than 5 percent of the stock or of the capital or profits interest in the employer.

"(4) NO FUNDING REQUIRED.—A program referred to in paragraph (1) is not required to be funded.

"(5) NOTIFICATION OF ELIGIBLE EMPLOYEES.—Reasonable notification of the availability and terms of the program must be provided to eligible employees.

"(6) STATEMENT OF EXPENSES.—The plan shall furnish to an employee, on or before January 31, a written statement showing the amounts paid or expenses incurred by the employer in providing dependent care assistance to such employee during the previous calendar year.

"(e) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) DEPENDENT CARE ASSISTANCE.—The term 'dependent care assistance' means the payment of, or provision of, those services which if paid for by the employee would be considered employment-related expenses under section 44A(c)(2) (relating to expenses for household and dependent care services necessary for gainful employment).

"(2) EARNED INCOME.—The term 'earned income' shall have the meaning given such term in section 43(c)(2), but such term shall not include any amounts paid or expenses incurred by an employer for dependent care assistance to an employee.

"(3) EMPLOYEE.—The term 'employee' includes, for any year, an individual who is an employee within the meaning of section 401(c)(1) (relating to self-employed individuals).

"(4) EMPLOYER.—An individual who owns the entire interest in an unincorporated trade or business shall be treated as his own employer. A partnership shall be treated as the employer of each partner who is an employee within the meaning of paragraph (3).

"(5) ATTRIBUTION RULES.—

"(A) OWNERSHIP OF STOCK.—Ownership of stock in a corporation shall be determined in accordance with the rules provided under subsections (d) and (e) of section 1563 (without regard to section 1563(e)(3)(C)).

"(B) INTEREST IN UNINCORPORATED TRADE OR BUSINESS.—The interest of an employee in a trade or business which is not incorporated shall be determined in accordance with regulations prescribed by the Secretary, which shall be based on principles similar to the principles which apply in the case of subparagraph (A).

"(6) UTILIZATION TEST NOT APPLICABLE.—A dependent care assistance program shall not be held or considered to fail to meet any requirements of subsection (d) merely because of utilization rates for the different types of assistance made available under the program.

"(7) DISALLOWANCE OF EXCLUDED AMOUNTS AS CREDIT OR DEDUCTION.—No deduction or credit shall be allowed under any other section of this chapter for any amount excluded from income by reason of this section.".

(b) EXCLUSION FROM WAGES.—

(1) EMPLOYMENT TAXES AND COLLECTION OF INCOME TAX.—Subtitle C of such Code is amended by striking out "section 127" in section 3121(a)(18) (relating to the Federal Insurance Contributions Act), section 3306(b)(13) (relating to the Federal Unemployment Tax Act), and section 3401(a)(19) (relating to collection of income at source on wages) and inserting in lieu thereof "section 127 or 128".

(2) SOCIAL SECURITY ACT.—Subsection (q) of section 209 of the Social Security Act (defining wages) is amended by striking out "section 17" and inserting in lieu thereof "section 127 or 128".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1981.

SEC. (a) CREDIT ALLOWED FOR CERTAIN SERVICES OUTSIDE THE TAXPAYER'S HOUSEHOLD.—Subparagraph (B) of section 44A(c)(2) is amended to read as follows:

"(B) EXCEPTION.—Employment-related expenses described in subparagraph (A) which are incurred for services outside the taxpayer's household shall be taken into account only if incurred for the care of—

"(i) a qualifying individual described in paragraph (1)(A), or

"(ii) a qualifying individual not described in paragraph (1)(A) where the qualifying individual regularly spends at least 8 hours each day in the taxpayer's household."

(b) The amendment made by this section is effective after December 31, 1981.

Mr. DURENBERGER. Mr. President, the bill we are debating this afternoon bears the title "The Economic Recovery Tax Act of 1981." And economic recovery is in fact what this bill is all about.

By 1985, the tax incentives we have placed in this bill will create approximately 13 million new jobs. By adopting the amendments Senators PACKWOOD, HAWKINS, METZENBAUM, and I offer this afternoon, we can insure that these job opportunities will be available to all Americans—including women and men who want to work but cannot afford to because of the rising costs of child care. We can remove that barrier by broadening the child care tax credit.

The composition of America's work force is changing rapidly because mothers have become a permanent part of the Nation's labor force. In 1979, for example, 62 percent of mothers with school-age children, 52 percent of mothers with children ages 3 through 5, and 41 percent of mothers with children under 3 years were in the labor force. The number of young children with working parents has increased dramatically over the past two decades and the projections for the eighties show further increases. It is estimated that by 1990, two-thirds of all mothers with preschool children will be working regularly and that three-quarters of all two-parent families will have both parents in the work force.

To enable these parents to meet their pressing economic needs, a much larger number of dependent day-care opportunities must be provided for parents at a price they can afford.

For example, one-fourth of all working mothers are single parents, and their incomes are much lower than those of other working families. Even in families with two parents working, if the mother's income were subtracted from the total family income, most of these families would fall below the poverty level.

Thus, many working families cannot afford to provide the basic necessities such as food and housing as well as the dependent day care which is necessary for them to work.

Although the present tax credit has been effective as far as it goes, its impact has been focused on a relatively limited segment of the population. The tax credit has historically served the dual purposes of recognizing child care as a business expense necessary for earning income and helping lower income working parents afford the dependent care expenses they incur while trying to maintain a minimal standard of living for their families.

While the 1976 tax amendments intended to address both of these purposes, the benefits have greatly favored those families using the credit as a business

credit over those using it as a means of affording dependent care.

For example, 83 percent of the 1978 benefits went to families earning over $12,000, the threshold for the Bureau of Labor Standard's lower family budget.

In order for the tax credit to provide more benefits for those who cannot afford dependent care, the credit would have to be adjusted to provide lower budget families with increased benefits and slide those benefits down to the current business credit level as the families' incomes rise. This amendment would do just that.

Mr. President, the key aspect of this amendment is the fact that the dependent care credit is refundable. Those who need this credit the most are the low-income families, who pay little or no Federal tax. A tax credit is meaningless unless the recipient has some tax liability against which the credit can be claimed.

Unless the dependent care credit is refundable, it will have no impact on the people we most need to reach, the poorest families, those for whom the access to this credit will mean the difference between work and welfare. The refundable credit is a dramatic innovation, one that will bring the benefits of this bill to thousands of families that have never shared the benefits of the current law.

It is imperative that any Federal policy should be sensitive and responsive to the needs of people who have insufficient dollars to provide for an acceptable standard of living. These amendments help those who are working to help themselves and their families. This is Federal assistance in the finest sense of the term—not a handout but a handup to a better standard of living.

If I had carte blanche and unlimited dollars, I would increase this credit even further. The broad dependent care provisions in the Economic Equity Act are a clear example of where we should be heading. But for the moment, we have to live with the reality of a $55-billion budget deficit, and the need to construct a bill that will gain approval in the House, and receive the President's signature. The amendments we offer today are an important step in the right direction. They will provide real help to those in immediate need. I appreciate the efforts of Senators DOLE, METZENBAUM, PACKWOOD, and HAWKINS in developing this amendment, and I want to particularly acknowledge the contribution of Gary Winget and the other members of my own dependent care task force in Minnesota. I urge every Senator to join in supporting this essential addition to our economic recovery program.

Let me close by summarizing the five elements of our amendments:

First, the dependent care tax credit is increased to 30 percent for families with incomes of up to $10,000, decreasing by 1 percent for each additional $2,000 in income. For those with incomes above $30,000 the credit remains at 20 percent, the same as present law.

Second, the amount of day care expenses for which the credit may be taken is increased from $2,000 for one dependent and $4,000 for two or more dependents in present law to $2,400 for one dependent and $4,800 for two or more dependents in our amendments.

Third, for those with little or no tax liability, the credit is refundable.

Fourth, dependent care provided by an employer is not taxed as income to the employee; and

Fifth, employers who contract with day care providers receive a credit of 50 percent of the employer's expenses.

What does this mean? To a family with $10,000 of income and $2,400 of dependent care expenses, the credit increases from $400 in present law to $720 under our amendments. And if that family has little or no income tax liability, they would receive up to $720 in refund from the Government. A family with $20,000 of income and $2,400 in expenses receives $200 more than under present law.

I urge my colleagues to adopt this important package.

Mr. METZENBAUM. Mr. President, I ask the distinguished Senator from Minnesota if the names of all the cosponsors on the amendment of the Senators from Ohio and Florida are on the amendment he has just offered.

Mr. DURENBERGER. Yes, Mr. President, the cosponsors of the amendment include the Senator from Ohio, the Senator from Florida and the Senator from Oregon.

Mr. METZENBAUM. And all the other Senators who are cosponsors of the first amendment?

Mr. DURENBERGER. That is correct, Mr. President.

● Mr. KENNEDY. Mr. President, I am proud to be a cosponsor of the child care amendment offered by Senator METZENBAUM and Senator HAWKINS, and I congratulate them for the effective presentation they have made.

This amendment will help those who have been hurt the most by recent budget cuts, the middle- and low-income families, the women and children of the Nation who need our help the most.

We must face the inadequacies of today's employment structure. When a child comes home to an empty house or a mother is forced to let her family slip below the poverty level because she cannot afford day care, the Nation is the poorer.

This situation is not unique. Today, one out of two women work outside the home, a 70-percent increase since 1950. The number of working mothers has increased tenfold. The children of working mothers make up fully 50 percent of all of America's children below the age of 18.

In many instances, a mother's income makes the difference between poverty and economic solvency. Among working mothers with husbands present, 20 percent had husbands whose incomes were below $7,000. For those 2.9 million working mothers who do not have husbands, and for their children who do not have fathers, the income brought home by the female head of the household is of crucial importance.

The myth that women are not working for money has been exploded. The statistics prove undeniably that the working mother is an economic necessity, not a luxury. And while the numbers have risen dramatically, child care facilities have not expanded to match.

Such women face the choice of leaving children without supervision for hours each day or of dropping out of the workforce.

The average cost of day care is $50 a week and on the rise. The maximum tax credit for day care under the current system, which is $400, regardless of income, is inadequate and unfair.

Four million families across the country now take advantage of the day care tax credit. Yet, programs which now provide vital day care service are being slashed.

Title XX will be consolidated into a social service block grant and then forced to compete with other worthwhile programs for 25 percent fewer funds. Title XX day care has been serving fewer children each year, dropping 14 percent in 3 years.

Day care facilities which employed CETA workers will have to seek other means of staffing centers.

The age limit and the Federal reimbursement rate have been lowered for meals and lunches in day care facilities.

Many cuts proposed by the administration target the very programs which protect the Nation's neediest children—child nutrition, food stamps, medicaid, AFDC.

This amendment will assist families which most need to compensate for cuts in these programs during this time of high inflation and great economic uncertainty. This amendment will help working mothers provide their children with the necessary supervision and care so vital to their development. By targetting lower income families through a sliding credit scale, we will enable women to participate in meaningful employment and help to raise their families above the poverty line.

This amendment is a step toward a fair and equitable labor market. It realistically addresses the changing role of the Nation, and it protects the Nation's children.

I also want to emphasize one of the most important features of the amendment, the fact that it is refundable. Too often, the tax relief we provide is not available to those who need relief the most—the lowest income members of our society whose tax liability is not large enough to fully use the relief that is provided by the tax laws.

The refundable feature of this amendment means that this problem is avoided. If a taxpayer's tax liability is not sufficient to take full advantage of the day care credit, the taxpayer will receive a refund of the balance. That is a major tax reform, and I commend the Senator from Ohio and the Senator from Florida for this important achievement in the area of tax justice. This amendment will truly provide relief to those who need it most.●

Mr. METZENBAUM. Mr. President, I yield the floor.

Mr. BIDEN. Mr. President.

The PRESIDING OFFICER. The Chair inquires, who yields time?

Mr. BIDEN. I assume that I am in control of the opposition time, Mr. President.

Mr. METZENBAUM. I am happy to yield to the Senator from Delaware.

Mr. BIDEN. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. BIDEN. Who controls the opposition time?

Mr. DOLE. Mr. President, I am happy to yield to the Senator on the bill.

Mr. BIDEN. I think there is time on the amendment.

The PRESIDING OFFICER. Does the Senator from Kansas seek recognition to yield time?

Mr. DOLE. Yes, Mr. President.

Mr. BIDEN. Mr. President, as I started to say, I rise in opposition to the amendment offered by my four distinguished colleagues relating to tax credits for day care for single parents and married couples. I do it somewhat reluctantly, because I think that the effort that they are making is extremely well intended. I think it is needed and I think that they should be commended for it. My argument is not with what they are trying to do here as it is with the provisions of present law.

Right now, Mr. President, a single parent and a married couple who, in order to be able to work or in exercising their choice of both being able to work can receive a tax credit.

Mr. President, as we all know, we set social policy in the tax code as much as we do any other place in the legislative process. And when we say in the tax code that people are going to get a credit or a deduction from their taxes to do something, we are creating that credit or deduction because we are encouraging people to do that activity. We encourage the oil companies to drill for more oil. We encourage people to buy homes by allowing them to deduct the mortgage interest and property taxes they pay on their homes. We encourage people to do many things in many ways. I just want to make sure everyone understands what we are encouraging to be done here.

It is one thing to encourage single parents on limited incomes to get off of welfare and into the job market.

Quite frankly I think that is not only admirable, I think it is a moral imperative, and I also think it is economically sound to do it from the point of view of the taxpayer.

I am even prepared to buy that argument for married couples who are on limited income because in today's economic circumstances it is not like when mom and pop were raising the kids, they need more money today to raise a child. In order to give the child the same care and material considerations that my mother and father gave me, a young couple has to make considerably more money today than 10 years ago.

I understand that. But what I do not understand, Mr. President, is the social policy that says a husband making $40,000 a year, and a wife making $30,000 a year should be entitled to a tax credit whenever they go into the job market. Why are we encouraging through the Tax Code, a decision made in the household, that primary child care during the working day from infancy to grade school be given to a day care center? Why are we doing that? Why is it necessary for people who are living on the margins financially, raising their families and choosing to provide the primary care for their children to pay for an upper-income family's day care? And that is what it is, it is a payment, to allow me making $62,000 a year and my wife who is a schoolteacher making $15,000 a year to send my children to day care centers. Why should that be allowed? What is the reason for doing that?

Well, I suggest to you, Mr. President, there is no good reason for that.

My colleagues who stood up and spoke briefly before me said the main beneficiaries are single parents. Good. Then they went on to say that married couples who have to work are also beneficiaries. Fine.

Then they pointed out that we are even going to have a refundable tax credit for those folks who make so little that this would not help them unless it was refundable, and that is good.

But what is not good is the fact that couples making over $30,000, $40,000 a year are able to, at the expense of other taxpayers, choose to go out and work and put their child in a day care center in order to have another home with an extra bedroom, to have a new patio, to be able to go to the beach for 3 weeks, in short, to have some material gain that exceeds necessity. If they want to do it, fine. They should be able to do that. But I for one do not want to be party to a system that says through the tax structure that it is socially desirable for that to be done.

I know I sound a little bit like one of the folks in the moral majority. Maybe I am a little bit too old-fashioned, but blood is thick and we are such an incredibly materialistic society. My generation, and I am 38 years old, looks more to material gain than it does to the primary care of their children, and in many instances, not just their children, but also their parents. Every one of us here receives office calls in our home States saying, "Senator WARNER, Senator BIDEN, Senator METZENBAUM, can you help get my mother and dad into a senior citizens home," and because we want to service our constituency to say "OK, we will try to help."

I did that for the first year until one of the more prominent lawyers with whom I had worked called to ask me to help get his mother into a senior citizen home. I thought to myself "What does he want to get his mother into a senior citizen center for? He makes good money. His mother is ambulatory and I know he has two extra bedrooms."

What is happening to this country? Why is it that there are fewer mothers, fathers, and grandparents living in the homes of their children today than there were in the year 1930?

I hear the answers my generation give me. "When Mom and Dad move in we have to put Billy and Johnny in the same room. It will affect their psyche. They should all have their own rooms. We all have to have our own space. Because, you know, Mom is a pain in the neck when she is in the kitchen with my wife." True.

"You know, my Dad really gets on my nerves. When he is around he is a pain in the neck. I cannot go out and cut the lawn without him telling me how to fix the lawnmower."

And so for convenience of my generation, we farmed out our parents, we do not have the attitude "blood is thick, mine is is mine, and that is my responsibility."

It is another story, Mr. President, if they cannot afford it. We are not talking about that. If I had to have my Mom or Dad come and live with me, it would be a serious financial problem. And the way it would be a serious financial problem is that my kids might not be able to go to camp for a month or stay in the private schools they are in or I may not be able to put in that new driveway I want or buy that place at the beach.

So what is wrong with that? Why should I not have to make that sacrifice? I do not know.

And quite frankly, I have never been as upset about an issue as I am about this issue, as trivial as it may seem, because I think it is the perfect example of the cancer that exists in this society. It is the reason why the moral majority, as outrageous as it is, speaks a modicum of truth about the rest of us: We do not even take care of our own families today.

Why should we be in a position of setting social policy that says people who are neither single parents nor poor should get a tax credit for not taking care of their child because they both want to work?

If you want to make that choice, make it, but do not ask me to pay for it. Do not ask me to agree to that as good social policy.

And we wonder why when we go back home some of us are criticized about day care centers.

When day care centers started off, it was simple. The day care center was supposed to take care of circumstances where the husband or wife had no alternative.

I not only support that, I support it strongly, and I think we should significantly increase the credit people get, under those circumstances. I commend the Senator from Ohio for increasing the deduction from $400 to $1,000 for the lower incomes, if these are still the figures in the amendment. I was a single parent for 5 years raising two kids with a good salary and I went to hire someone to help me raise my children.

If you wanted anyone remotely competent, you had to pay, back in 1973, $15,000 a year, a car, the credit cards, and medical benefits.

So how does a single mother raise several kids working as a secretary in the typical town in this country making only $8,000 a year? She cannot.

But we judge her children by the same

standards we judge our children. They will be judged on every standard from achievement testing in school to whether or not they are good citizens. And here we are, instead of skewing the money to help the most needy, we are continuing to let people who have combined incomes of $30,000, $40,000, $50,000, $60,000 a year to take a tax credit.

I think that is reprehensible. I do not think that is what we stand for in this country. I do not think it should be the policy of this country. And I do not think I have one vote beyond my own to change that policy. In the 9 years I have been in this body I have never taken the floor to argue a position that I did not think I had some chance of winning.

But I really feel strongly about this.

I think it is a sad commentary on this society when we, say, as a matter of social policy, that we should make it easier for people, who have neither the financial necessity or the personal need, to forget their responsibility to take care of that child all day from the time the child is an infant until the time they get in school. I do not care whether in a modern marriage you want the man or the woman to take that responsibility. That has to be resolved by each couple individually.

But every single study that we look at, everything we learn, everything we hear tells us that kids are looking for the love and the companionship of their parents.

So what we are doing now as a social policy, is saying, "Here," drop them off at 8 o'clock in the morning and pick them up at 3 o'clock in the afternoon, "because I want a new patio; because I want to go on vacation; because I want to expand my horizons."

As a social policy I think it is undesirable and wrong.

I yield the floor.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I wish to commend my good friend from Delaware for a very eloquent speech. I appreciate the sincerity of his position.

My only concern is that he has missed the main point of our amendment because the problem about which he is speaking is not a matter of this legislation. The very people about whom he is concerned are the ones that this legislation is addressed to—those are poor working mothers who have to put their children in a facility in order to go to work.

Now, the problem which the Senator is speaking about has to do with those who are in the higher income brackets. This amendment does not address itself to them because all income levels are already covered under current law.

If the Senator's position has the validity he claims it has, then he ought to be on the floor on the tax bill, offering an amendment to eliminate the right to get tax credits for those who are in the upper brackets.

But the maximum figure to which our bill addresses itself is $30,000. What we are really concerned about are those poor working mothers who need a job, who cannot find the funds to take care of their children, and who have to go on relief unless some additional tax credit is provided for them.

Mr. BIDEN. Will the Senator yield for a question?

Mr. METZENBAUM. Yes.

Mr. BIDEN. Will the Senator be willing to amend his amendment to take care of my problem, then, because I agree with everything he just said; that is, eliminate married couples whose income exceeds $30,000 from benefiting from this tax break?

Mr. METZENBAUM. No, I am not prepared to amend it to do that. But I am prepared to debate the issue of whether it ought to be $30,000 or whether you stop it at $40,000. I do not know.

Mr. BIDEN. Does the Senator agree it should be stopped at some point?

Mr. METZENBAUM. I think there is some merit to stopping it.

But I want to make something clear: I would like to see my good friend from Delaware on this floor addressing, with the same enthusiasm and commitment, the investment tax credit that we just gave to the Howdy-Doody Show this afternoon. I think that kind of eloquence would have been so persuasive to this body that maybe we would not have accepted it.

That particular amendment did not address itself to the family, but it is the family home that we are tearing apart with so many of the budget cuts that we have made right here on the Senate floor.

I would hope that the Senator would give the same persuasive argument and the same sincerity and the same kind of concern to those investment tax credits that he is giving to this issue of the family getting an increased tax credit for their children to be in day-care centers.

I respect the Senator from Delaware as I respect few other Members of this body. I have high regard for his integrity, for his ability, and for his compassion. But I believe that this amendment is not the place on which he should be addressing his enthusiastic and splendid oratory.

Mr. BIDEN. Mr. President——

The PRESIDING OFFICER. The Chair regrets to inform the distinguished Senator from Delaware that the time for the opponents on the amendment has expired.

Mr. BIDEN. A parliamentary inquiry, Mr. President. I thought I was yielded time off the bill. Is there not still time in opposition on the amendment?

The PRESIDING OFFICER. The Senator used the time on this amendment.

Mr. DOLE. Mr. President, how much time does the Senator from Kansas have remaining on the bill?

The PRESIDING OFFICER. Twenty-five minutes on the entire bill.

Mr. BIDEN. How much time is remaining on the amendment, if I may ask?

The PRESIDING OFFICER. The time allocated for those desiring to oppose the amendment has expired.

Mr. BIDEN. A parliamentary inquiry, Mr. President. I think if the official reporter would read back the record—which I will not ask—you will find that the time yielded to me was yielded on the bill and not on the amendment. But I will not make a big deal about it.

Mr. DOLE. Mr. President, I am happy to yield 2 minutes off the bill to the Senator from Delaware.

Mr. BIDEN. I appreciate that. I will not take—I guess I cannot take any more time.

Mr. DOLE. I would yield more, but I only have that much left for the remainder of the bill.

Mr. BIDEN. I appreciate that. The Senator has been very generous.

If I understand the implication of the Senator's comments, it is that I am not as forceful on matters that are equally as important. If that is what he is saying, then I think I resent that. If that is not what he is saying, then I did not understand him.

Now, let me point out that I have spoken out on other issues in this bill, including supporting the Senator's position on the oil issue and his position on the budget overall.

Let me point out that there is nothing more fundamental than the decisions we make in this bill as it relates to the makeup of the American family and what we think is the proper way for it to be constructed.

But, I appreciate being able to speak out on this issue and I hope you will appreciate the reasons why I cannot support this amendment.

Mr. METZENBAUM. Mr. President, how much time is remaining for the proponents of the amendment?

The PRESIDING OFFICER. There are 4 minutes and 35 seconds remaining for the proponents of the amendment.

Mr. METZENBAUM. Mr. President, I should like to take 1 minute and then I will yield the remainder of the time to the Senator from Minnesota. Is that all right?

Mr. DURENBERGER. That is all right.

Mr. METZENBAUM. Mr. President, I want to make it clear that the Senator from Delaware has been as eloquent in connection with this tax bill, and some of the amendments having to do with issues of concern to the Senator from Ohio, as any other Member of this body—in fact, probably more eloquent in most respects.

Indeed, he makes a valid point about the matter of the 20-percent credit for those earning over $30,000 a year. I will be happy to explore that subject with him in proper hearings in the Finance Committee, and I believe it is a matter to be so explored.

All I am saying is that the main thrust of his argument is not applicable to the amendment before us today, because this amendment is truly directed at those in the lower income brackets and it has to do not only with those who put their children in day care centers but also those who, in some instances, have to put the elderly in day care centers.

I hope the Senator will see whether he can join us in supporting this amendment and that we might join in exploring the issue he has raised so eloquently this afternoon.

Mr. DURENBERGER. Mr. President, I

compliment the Senator from Ohio for his comments with regard to the comments of the Senator from Delaware.

I compliment the Senator from Delaware for the feeling, for the emotion, and for the genuine expression of his feelings about how we use the Tax Code in our own way for the benefit of many people who have no other way to survive in this world.

Mr. President, I yield the remainder of the time to the Senator from Kansas.

Mr. DOLE. Mr. President, I thank the Senator from Minnesota, and I thank all Senators who have participated the last 2 days in efforts to negotiate some agreement on this amendment.

I certainly thank the distinguished Senator from Delaware for his participation in the debate, because he has raised some questions that I believe others may have and may not have stated publicly.

We have had visits with the Secretary of the Treasury, Mr. Don Regan, this afternoon, and I believe we have worked out a satisfactory amendment.

There is a great deal of interest in the program expressed by the Senator from Ohio—the Senator from Florida (Mrs. HAWKINS), the Senator from Minnesota, the Senator from Oregon, and others who are cosponsors of this amendment.

It seemed to me, as manager of the bill, that the best way to resolve the issue was to try to negotiate some agreement. This has been done, and those of us who have an interest in the matter and those of us who will be conferees understand the great support in the Senate.

Finally, I note that this amendment was not without cost. Tht 1982 cost, as I understand it, is in the neighborhood of $21 million; in 1983, $338 million; in 1984, $400 million; in 1985, $477 million; in 1986, $549 million.

I hope that it is properly directed so that it will encourage participation in the work force and that it will go to low-income families and not, in effect, be a windfall for upper-income couples or workers.

Mr. President, I again thank all Senators for their patience, and I thank Secretary Regan and others who participated in these discussions. I particularly thank the Senator from Ohio, because he has been very interested in this matter.

The PRESIDING OFFICER. All time on the amendment has expired.

Mr. BIDEN. Mr. President, will the Senator yield 1 minute on the bill?

Mr. DOLE. I yield.

Mr. BIDEN. Mr. President, since I am the only one who objected to a voice vote on this matter, and in light of the fact that I have spoken my piece, if it accommodates the Senators on the floor and those who are interested in this matter to have a voice vote tonight, I, on reflection, have no objection to that.

I will be back with my amendment to eliminate people over the $30,000 mark from being eligible for this. I do not know whether that complicates things or not. Since I was the one objecting, I will withdraw that.

● Mr. CRANSTON. Mr. President, I am pleased to support and cosponsor the amendment offered by the distinguished Senator from Ohio (Mr. METZENBAUM) as amended by the Senators from Oregon (Mr. PACKWOOD) and Minnesota (Mr. DURENBERGER) to increase the existing child care tax credit, make it refundable, and provide increased incentives for employers to become involved in providing child care assistance for their employees.

I have long been involved in efforts to deal with the enormous difficulties faced by working families in finding adequate and affordable child care. As the chairman during the past two Congresses of the former Subcommittee on Child and Human Development, I chaired numerous hearings on this issue and authored legislation to provide assistance to low-income working families struggling to stay in the work force and off the welfare rolls. Child care is an important and essential service which allows families to be self-sufficient.

Mr. President, in recent years, the number of working mothers of children under the age of 18 has dramatically increased from approximately 42 percent in 1970 to 53 percent in 1978. These percentages continue to rise each year, particularly among mothers of children under the age of 6. For example, in 1977, data from the Department of Labor indicated that 40.9 percent of all mothers of children under the age of 6 were in the labor force; this percentage had increased to 43.7 percent by 1978 and is even higher today. Every projection of population trends over the next several decades indicates that these increases will continue. Indeed, it has been estimated that by the year 1990 there will be a 60-percent increase in the need for child care providers for the children of working parents and some 2.2 million additional children under the age of 6 will need child care services while their parents work.

Unfortunately, the data is also overwhelming that there is simply not enough affordable child care today for the millions of working parents who need these services. Census data has indicated that at least 2 million school-age children between the ages of 7 and 13 and 20,000 preschool children under the age of 6 are left without any supervision at all. Many single parents who are the sole support of their children are unable to find adequate child care which will enable them to work, to be self-sufficient, and to provide a decent standard of living for their families. In the past, Federal assistance for child care has been haphazard at best. For public assistance recipients and a small portion of the working poor, direct subsidies through programs such as title XX have been available to a limited extent.

For upper-income families, some assistance has been available under the existing child care tax credit. But for the families in the middle—with incomes too high for direct assistance and too low to benefit from the tax credit—there has been virtually no assistance to help meet the costs of child care. These families, struggling to stay in the work force and off the welfare rolls, have been left to fend for themselves—too often with little success.

Unfortunately, as a result of the administration's plans to reduce funding for title XX and various other social service programs that provide assistance to child care programs, the amount of child care assistance available to working families is going to be cut to a level below even what exists today. Hundreds of thousands of families throughout this country are likely to see their child care programs shut down or their children denied assistance from existing programs.

The administration's budget proposals will also severely limit the deduction, under present law, of work-related expenses incurred by AFDC recipients who take jobs. Under present law, AFDC recipients are allowed to disregard certain work related expenses, such as child care, in their AFDC benefit eligibility determination when they join the work force. Under the reconciliation bill child care deductions would be limited to $160 per month—regardless of the actual cost of care—and other earned income deductions would be deductible only for the first 4 months after an AFDC recipient joins the work force. This creates the unfortunate situation where, in many cases, an AFDC recipient will be better off staying home and accepting welfare rather than trying to move into the workforce.

The changes proposed in this amendment to the existing child care tax credit will make the child care tax credit available for the first time to many families who will be hurt by the administration's cutbacks in child care assistance under title XX and other programs and thereby provide some incentive for them to stay in the work force.

LIMITATIONS OF TAX CREDIT APPROACH

Attempting to deal with the child care needs of working families in this Nation through the tax credit approach has some basic limitations. It is difficult to reach those most in need—those working at the minimum wage level or slightly above who have little disposable income to utilize for child care services. Receiving a tax credit benefit once a year in April does not always provide adequate assistance to a family facing weekly and monthly child care costs. Presently, two-thirds of the families utilizing the tax credit have incomes in excess of $15,000. Making the credit refundable will be very important in providing some benefits to families with incomes below $15,000.

The tax credit approach is also limited in that it does not directly affect a basic problem: Lack of sufficient programs in many communities even for families with financial resources to pay for adequate child care. During the hearings I held in the 95th and 96th Congresses, witnesses from numerous communities all over the United States described long waiting lists for child care programs and difficulties families face in finding adequate child care. Only a direct services program such as provided under title XX or envisioned under the legislation I sponsored during the 96th Congress would assure that the supply of adequate child care would actually be increased.

Nevertheless, the proposed changes would make the existing tax credit more

equitable by making it available to low-income workers and targeting more assistance toward those at the lower end of the income scale. The amendment, in addition to making the credit refundable, provides for a sliding scale so that lower income families will receive a larger credit than those families with higher incomes.

I am also pleased that the amendment specifies that the tax credit can be utilized only for expenses incurred for child care centers which comply with all applicable laws and regulations of a State or unit of local government. In other words, this Federal credit cannot be used to pay for child care which is not legal in the applicable State or locality. Any other approach would usurp the State and localities' authority to regulate the quality of child care services.

INCENTIVES FOR EMPLOYERS

I strongly support the provisions in this amendment to encourage employers to provide assistance to their employees in meeting their child care needs. The amendment would provide a tax credit for noncapital expenses incurred by employers who provide assistance to their employees, either through on-site child care facilities or through community facilities. It would also allow for rapid amortization of capital expenses incurred by employers in order to encourage the establishment of onsite child care facilities.

Employer-sponsored child care assistance is an important part of our overall efforts to deal with the increased need for child care services. In my own State of California, there has been a great deal of recent activity around the development of employer-sponsored child care. These efforts have included both development of on-site programs and encouragement to employers to offer child care assistance as fringe benefits to their employees, just as employers currently offer other fringe benefits such as health care, vacation, and educational subsidies to their employees. This amendment would encourage both of these approaches.

Mr. President, these are very important measures to encourage employers to help their employees find adequate child care. Employer-supported child care services need to be encouraged and this amendment provides substantial incentives for employers to become involved in this area.

CONCLUSION

I am pleased to support this amendment. Although dealing with the enormous child care needs of working families throughout this Nation through a tax credit approach has certain limitations, it plays an important part of our overall efforts to help working families. The changes in the existing child care tax credit contained in this amendment will make this credit more equitable and allow many low-income working families, for the first time, to utilize this credit.

It is heartening to see the bipartisan support for this effort to address the child care needs of working families and I applaud the efforts of the Senator from Florida (Mrs. HAWKINS), the Senator from Minnesota (Mr. DURENBERGER), and the Senator from Oregon (Mr. PACKWOOD) for working with the Senator from Ohio (Mr. METZENBAUM) to develop an acceptable amendment. I urge adoption of the amendment.●

Mr. BAKER. Mr. President, has all the time expired for debate on the two amendments that were consolidated?

The PRESIDING OFFICER. The majority leader is correct.

Mr. BAKER. Mr. President, I understand that the request I am about to put is satisfactory to all parties involved in this debate. I understand now that they are willing to have a voice vote on the two amendments en bloc but that no motion to reconsider or a motion to table the motion to reconsider will be made tonight.

I ask unanimous consent that any motion to reconsider the vote on the amendment tonight be postponed until after the Senate resumes consideration of this bill on Tuesday next.

Mr. ROBERT C. BYRD. Mr. President, this will be in accordance with the desires of the distinguished Senator from Louisiana (Mr. LONG).

Mr. BAKER. I thank the minority leader, and that is my understanding.

To explain the request before the Chair rules on it, as I understand it now, we will have a voice vote on the two amendments en bloc. Has there been an order for the consideration of the vote on the two amendments en bloc?

The PRESIDING OFFICER. The Chair wishes to inquire of the distinguished majority leader, is this vote to be carried over until Monday?

Mr. BAKER. No. I thank the Chair. That is a point that must be covered.

I wish to amend the previous order in the following respects: First, that the amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Second, that there be no further debate on the amendments, and that a voice vote occur on those amendments this evening.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, a motion to reconsider that vote, if such is offered, will occur as the first matter to address the Senate after the Senate resumes consideration of this bill on Tuesday next unless this bill is taken to third reading prior to that time, in which case this portion of the request would be vitiated.

Mr. METZENBAUM. Is it my understanding that should there be a motion to reconsider there would be no time available for debate or is it the intention of the majority leader to make time available? The Senator from Ohio is not requesting time for debate.

Mr. BAKER. I thank the Senator. In that case, Mr. President, I ask unanimous consent that there be no further debate on the motion to reconsider the vote on the amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator include in his request that it be in order now to move to reconsider the vote? I do this because I am sure that Mr. Long wanted a vote.

Mr. BAKER. Yes; I wonder if the minority leader would like to ask for the yeas and nays?

Mr. ROBERT C. BYRD. I would like it to be in order to do that.

Mr. BAKER. I thank the minority leader.

I ask unanimous consent that it be in order at this time to make a motion to reconsider the vote or rather to make the motion to reconsider the vote after the vote is taken, and that it be in order as well to order the yeas and nays on the motion to reconsider at this time.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I make the request for the yeas and nays on behalf of Mr. Long.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendments, en bloc, of the Senator from Ohio and the Senator from Minnesota.

(Putting the question.)

The amendments (UP Nos. 296 and 297) were agreed to en bloc.

Mr. BAKER. Mr. President, I thank all Senators for agreeing to this arrangement.

Mr. President, it is now almost 7:45 p.m. I know of no further business to come before the Senate this evening, and no amendments to be disposed of at this time. I will inquire of the distinguished minority leader if he is aware of any amendments.

Mr. ROBERT C. BYRD. I know of no further amendments.

PHASEOUT OF SECTION 189

Mr. DURENBERGER. Mr. President, the decline in our supply of rental housing is well documented. This burden falls heaviest on those who can least afford it, young families just starting out and the elderly. Young families need reasonably priced shelter when their incomes are low and they are trying to save to purchase their own home. Elderly people are often trying to scale down their housing costs and find more convenient and manageable living quarters.

The desperate shortage of rental housing is frustrating the dreams and aspirations of both these groups or anyone trying to find moderately priced rental housing. The vacancy rate nationally is at its lowest point in several decades which means decent rental housing is extremely hard to find. I know this is a serious problem in my own State and is even worse in several others. In addition, the housing that is available is rising in price almost monthly due to the growing demand.

I am pleased to cosponsor this amendment which will aid greatly in solving this major problem. The phaseout of section 189 of the tax code will remove an inequitable, costly barrier to the construction of more rental housing. There is no reason why the builders of rental housing should not be allowed to deduct

construction period interest and costs just like any other business.

I urge my colleagues to support this vitally needed amendment.

TIME LIMITATION AGREEMENT

Mr. BAKER. Mr. President, on Monday, when the Senate resumes consideration of this bill, I ask unanimous consent that Mr. SASSER be recognized to offer a marriage penalty amendment, on which there will be a 30-minute time limitation; to be followed by an amendment by the Senator from Michigan (Mr. RIEGLE) on marriage penalty, 30 minutes; to be followed by an amendment by the Senator from Washington (Mr. GORTON) on mutual savings banks, 10 minutes equally divided; followed by an amendment by the distinguished Senator from Nebraska (Mr. EXON) and the distinguished Senator from New Jersey (Mr. BRADLEY), a trigger amendment, with 2 hours equally divided; with the understanding that the Exon-Bradley amendment will not occur before 12 noon; to be followed by a Kennedy amendment on home heating, 30 minutes equally divided; to be followed by a Mitchell amendment on small business inventory, 1 hour equally divided; to be followed by a Nunn-Chiles amendment on IRS-Justice Department, 1 hour equally divided; then an amendment by the Senator from Pennsylvania (Mr. HEINZ) on pollution control, 1 hour equally divided; then an amendment by the Senator from Ohio (Mr. GLENN) on incremental research, 1 hour equally divided; a second amendment by Mr. GLENN on research and development, 1 hour equally divided.

Mr. President, I conclude my request with the amendment by Mr. HEINZ.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Reserving the right to object, Mr. President.

Mr. METZENBAUM. Mr. President, reserving the right to object, it is my understanding that the request of the Senator from Tennessee incorporates all of the limitations and proscriptions with respect to amendments that were originally entered into at the time they were offered?

Mr. BAKER. Yes, Mr. President, nothing in this request shall affect any of the provisions of the parent request, which was entered a few days ago.

Mr. METZENBAUM. I thank the Chair.

The PRESIDING OFFICER. Is there objection? The Senator from Kansas.

Mr. DOLE. Mr. President, I think Senator GLENN did want his amendments considered on Monday. He asked if an hour each would be satisfactory but he probably would not need that much time.

Mr. ROBERT C. BYRD. Mr. President, I am only temporarily objecting to that request until we can make a phone call. I think the rest of the majority leader's request can be proceeded with.

Mr. BAKER. Mr. President, let me proceed with the eight requests which end with the Heinz amendment, with the hope that Nos. 9 and 10, both Glenn amendments, can be sequenced later.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

Mr. BAKER. I thank all Senators.

RECESS UNTIL 10 A.M. MONDAY, JULY 27, 1981

Mr. BAKER. Mr. President, I move, in accordance with the order previously entered, that the Senate now stand in recess until the hour of 10 a.m. on Monday next.

The motion was agreed to; and at 7:43 p.m. the Senate recessed until July 27, 1981, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate July 24, 1981:

IN THE AIR FORCE

Lt. Gen. Lloyd R. Leavitt, Jr., U.S. Air Force (age 52), for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 8962.

The following-named officers for promotion in the U.S. Air Force, under the appropriate provisions of chapter 839, title 10, United States Code, as amended.

LINE OF THE AIR FORCE

Lieutenant colonel to colonel

DEPARTMENT OF THE TREASURY

Elizabeth Jones, of New Jersey, to be Engraver in the Mint of the United States at Philadelphia, Pa., vice Frank Gasparro, resigned.

DEPARTMENT OF DEFENSE

Alton Gold Keel, Jr., of the District of Columbia, to be an Assistant Secretary of the Air Force, vice Robert Jay Hermann.

DEPARTMENT OF JUSTICE

Michael R. Spaan, of Alaska, to be U.S. attorney for the district of Alaska for the term of 4 years vice Alexander O. Bryner, resigned.

DEPARTMENT OF EDUCATION

Jean Tufts, of New Hampshire, to be Assistant Secretary for Special Education and Rehabilitative Services. Department of Education, vice Edwin W. Martin, Jr.

COMMUNITY SERVICES ADMINISTRATION

Clarence Eugene Hodges, of Indiana, to be an Assistant Director of the Community Services Administration, vice Michael T. Blouin, resigned.

NATIONAL LABOR RELATIONS BOARD

John R. Van de Water, of California, to be a Member of the National Labor Relations Board for the remainder of the term expiring August 27, 1981, vice John A. Penello, resigned.

John R. Van de Water, of California, to be a Member of the National Labor Relations Board for the term of 5 years expiring August 27, 1986 (reappointment).

CALIFORNIA DEBRIS COMMISSION

Brig. Gen. Homer Johnston, Jr., [redacted], Col. Paul Bazilwich, Jr. [redacted], and Col. Paul Frederick Kavanaugh, [redacted] all of the Corps of Engineers, to be Members of the California Debris Commission, under the provisions of section I of an Act of Congress approved 1 March 1893 (27 Stat. 507) (33 U.S.C. 661).

MISSISSIPPI RIVER COMMISSION

Maj. Gen. William Edgar Read, [redacted] U.S. Army, to be a Member and President of the Mississippi River Commission; and Maj. Gen. Hugh Granville Robinson, [redacted] U.S. Army, and Brig. Gen. Richard Samuel Kem, [redacted], U.S. Army, to be Members of the Mississippi River Commission, under the provisions of section 2 of an Act of Congress, approved 28 June 1879 (21 Stat. 37) (33 U.S.C. 642).

CONFIRMATIONS

Executive nominations confirmed by the Senate July 24, 1981:

DEPARTMENT OF THE INTERIOR

James R. Harris, of Indiana, to be Director of the Office of Surface Mining Reclamation and Enforcement, vice Walter N. Heine, resigned.

DEPARTMENT OF STATE

Dean E. Fischer, of Virginia, to be an Assistant Secretary of State.

INTERNATIONAL ATOMIC ENERGY AGENCY

Richard T. Kennedy, of the District of Columbia, to be the Representative of the United States of America to the International Atomic Energy Agency, with the rank of Ambassador.

FEDERAL AVIATION ADMINISTRATION

Michael J. Fenello, of Florida, to be Deputy Administrator of the Federal Aviation Administration, vice Quentin Saint Clair Taylor.

INTERNATIONAL COMMUNICATION AGENCY

Gilbert A. Robinson, of New York, to be Deputy Director of the International Communication Agency, vice Charles W. Bray III, resigned.

DEPARTMENT OF STATE

Joan M. Clark, of New York, a Career Member of the Senior Foreign Service, to be Director General of the Foreign Service (new position).

DEPARTMENT OF ENERGY

James G. Stearns, of Nevada, to be Director of the Office of Alcohol Fuels (new position).

DEPARTMENT OF STATE

Robert Strausz-Hupe, of Pennsylvania, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Turkey.

David Rowland Robinson, of the District of Columbia, to be Legal Adviser of the Department of State, vice Roberts Bishop Owen, resigned.

EXECUTIVE OFFICE OF THE PRESIDENT

George A. Keyworth II, of New Mexico, to be Director of the Office of Science and Technology Policy, vice Frank Press, resigned.

PEACE CORPS

Everett Alvarez, Jr., of Maryland, to be Deputy Director of the Peace Corps, vice William G. Sykes.

DEPARTMENT OF STATE

Monteagle Stearns, of California, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Greece.

John R. Countryman, of the District of Columbia, a Foreign Service officer of class 2, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Sultanate of Oman.

David Anderson, of New York, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Socialist Federal Republic of Yugoslavia.

Marshall Brement, of Arizona, a Foreign Service officer of class 1, to be Ambassador Extraordinary and the Plenipotentiary of the United States of America to Iceland.

Richard Noyes Viets, of Vermont, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Hashemite Kingdom of Jordan.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

DEPARTMENT OF JUSTICE

William Bradford Reynolds, of Maryland, to be an Assistant Attorney General, vice Drew S. Days III, resigned.

DEPARTMENT OF THE TREASURY

Nora Walsh Hussey, of South Dakota, to be Superintendent of the Mint of the United States at Denver, vice Evelyn T. Davidson, resigned.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Robert W. Karpe, of California, to be President, Government National Mortgage Association, vice Ronald P. Laurent.

DEPARTMENT OF THE TREASURY

Clifford M. Barber, of New York, to be Superintendent of the U.S. Assay Office at New York, New York, vice Manuel A. Sanchez, Jr.

EXTENSIONS OF REMARKS

SBA ENTERS THE FRAUD-AND-WASTE HALL OF FAME

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. DONNELLY. Mr. Speaker, I wish to call the attention of my colleagues to the scathing indictment of the Small Business Administration recently published in U.S. News & World Report.

Small businesses generate half the jobs and most of the innovation in the American economy. Congress has long recognized this contribution, and we have supported the Small Business Administration in the hope of stimulating this key segment of the economy.

As the General Accounting Office has repeatedly pointed out, and the following article dramatizes, the best intentions of Congress and the American people have been corrupted and subverted by shabby administration.

The burden is now on President Reagan and SBA Administrator Michael Cardenas to straighten out the well-intentioned programs we have set up. It is their duty to prove their ability to root out the deeply entrenched waste and abuse that threaten to stifle the programs, the businesses they were intended to serve, and the Nation's commitment to provide assistance to the most vital segment of our economy.

The article follows:

[From the U.S. News & World Report, July 27, 1981]

SBA ENTERS THE FRAUD-AND-WASTE HALL OF FAME

(By Orr Kelly)

A federal agency charged with the mission of aiding small businesses has instead fallen victim to scandal after scandal.

Only in a slapstick comedy would one expect to find a government agency that goes into business with the Mafia, bankrolls a con game, tinkers with the nation's security and showers money on "truly needy" millionaires.

But the story of the Small Business Administration is not a comedy for the taxpayers. It would be funny only if it did not cost so much.

An agency bedeviled by mismanagement, infested with politics and tainted by corruption, the SBA was established in 1958 to aid small businesses with low-interest loans and practical advice. It is also responsible for handing out millions of dollars each year in disaster-assistance loans.

Since then, it has made 417,488 small-business loans worth 30.4 billion dollars and provided 1.9 million disaster loans worth 8.8 billion. It now employs 4,400 persons in 103 offices throughout the country and expects to grant loans or to guarantee bank loans totaling 6.4 billion dollars this year.

Serious problems, ranging from criminal misconduct to millions in uncollected bills, plague SBA programs. Although the agency is supposed to recover most of the money it hands out, its records show that it has gone 5 billion dollars in the hole in its 23-year life.

Particularly irritating to investigators is the way some individuals have managed to live high on the hog because of dealing with SBA.

While one SBA-backed firm in Gaithersburg, Md., was running in the red, the net worth of its owner soared in four years from $153,500 to more than 1.1 million. And a Los Angeles contractor backed by SBA saw his net worth grow from a little more than a half-million dollars to 3.4 million dollars in a two-year period.

In another case, investigators found a consulting firm, hired without competition, that was charging the government for tuition for the children of company executives and for the lease of a Jaguar, a swimming pool, a tennis court and oil paintings.

Here, gleaned from the records of the SBA's inspector general, the General Accounting Office and the Senate Small Business Committee, are four documented cases that illustrate some of the more serious problems afflicting one of Washington's most seriously troubled agencies—

IN BUSINESS WITH THE MOB

While the U.S. government spends millions to fight the Mafia, the SBA went into partnership with Irwin Weiner, a Chicago man described in congressional testimony as linked to "major organized-crime figures" and "thought to be the underworld's major financial figure in the Midwest."

The unusual arrangement resulted from the SBA's effort to deal with a serious problem faced by small contractors. They are required to post bonds to guarantee that they will finish work they have contracted to do, but many of them find it difficult, if not impossible, to provide such a guarantee, known as a surety bond

To solve this problem, the SBA set up a program in which insurance firms would provide bonds, with 90 percent of the amount guaranteed by the SBA.

The assumption was that, because the private insurance firms would be responsible for paying part of the losses, they would be just as careful with the federal money as they were with their own.

In many cases, the program has worked as planned. Some 30,000 small contractors have been aided in securing more than 6 billion dollars' worth of business. But the program is also subject to severe abuse, as investigators learned when they delved into the operations of Weiner's American Bonding Company.

From the beginning of the program in the early 1970s, Weiner's firm was among the most active in the Chicago area, writing 933 bonds worth 66 million dollars. But then, in 1978, a flood of claims descended on SBA because contractors bonded by Weiner's firm failed to finish their contracts. Defaults quickly mounted into the millions.

Theoretically, Weiner lost, too. But investigators suspect that the loss of his 10 percent share of the bonds was only a minor irritation. Unknown to SBA officials, companies lined to Weiner were brought in to finish up the jobs—at exorbitant expense.

In one case uncovered by the Better Government Association in Chicago, a contractor was hired to build a new structure for the Morningstar Baptist Church in Peoria, Ill., and obtained a surety bond through Weiner's firm.

Long before finishing the job, the contractor went bankrupt. Another company associated with Weiner finished the church—with the SBA footing much of the bill—for far more than the original estimate on the job. The cost to the taxpayers, which included a double payment for the roof on the church, totaled $339,930.

So far, the SBA has had to pay out more than 2 million dollars to cover defaults under the bonds Weiner's firm wrote—and the toll is still mounting.

Now, the whole SBA surety-bond program is being probed by a grand jury in Chicago.

BANKROLLING A CON GAME

When SBA officials heard that Sandra Brown wanted to form a Small Business Investment Company, they were delighted. She would be the first woman to head such a firm—a symbolic breakthrough in the government's effort to provide opportunities for women to compete in big-time financing.

An SBIC is a firm, usually controlled by a bank or wealthy investors, set up to make loans to small businesses. For a shrewd operator, it can be a license to make money.

The investors have to put up some money of their own, but most of the funds have been provided by the government-guaranteed loans. There are risks. But the government puts in as much as $4 for every dollar from the investor, and this leverage makes it possible for an SBIC to garner large profits on a relatively small investment—as many of them have done.

This opportunity for large profits was deliberately built into the program. The belief was that this would save government money in the long run by putting the responsibility for choosing and helping the small businesses on the private investors rather than on the staff of the SBA.

There have long been reports of problems with the program, as with so many of the agency's programs.

SBA Inspector General Paul R. Boucher took a look at the operations of the SBIC's over a three-year period and reported in a special survey last year that 42 percent of them had been cited for significant violations of rules or regulations. One SBIC, for example, was caught charging what amounted to 40 percent interest.

Nothing, however, had prepared SBA officials for their expensive brush with Sandra Brown. A New York wheeler-dealer involved in buying and selling businesses, Brown had published a magazine and written a column of financial advice in a national magazine as well as The American Express Handbook for Women. In 1977, she formed the First Women's Small Business Investment Corporation.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Officials of SBA did not check up on the companies that Brown's outfit was supposedly lending money to.

Many of the "small businesses" were simply paper fronts for a giant con game that victimized the SBA and a group of banks to the tune of more than 10 million dollars.

By the time Robert Morgenthau, Manhattan district attorney, took a hard look at her operations and secured an indictment early last year, Brown had taken the SBA for 3.4 million. Four lending institutions and her own firm had been hit for more than 6 million.

Investigators are still trying to find out where all the money went. Some of it, they found, paid for three townhouses, a condominium, a ski lodge, a horse farm, two boats and a helicopter—not exactly the kind of assistance to small business that the SBA had in mind.

Brown was convicted in December of 41 counts of grand larceny and conspiracy and is now free on bail pending appeal. And SBA officials are still trying to figure how they came to bankroll one of the biggest con games in New York history.

TINKERING WITH NATIONAL SECURITY

Starting in 1971, BDM, a research-and-development company based in McLean, Va., had operated a sophisticated electronic testing system for the Army at Fort Hunter Liggett, Calif. The tests—actually large-scale mock battles involving scores of tanks, planes and helicopters—are designed to tell the Army which tactics will work and which will not in actual warfare. How well the tests simulate the realities of battlefield situations could determine whether American forces win or lose in some future combat.

Early last year, when the 9-million-dollar-a-year contract came up for renewal, the SBA stepped in, took over the contract itself and handed it to another firm. Much of the successor firm's previous experience had consisted of serving hot dogs to football fans at the Stanford University stadium in California.

This extraordinary power by the Small Business Administration to pass out contracts without competitive bidding is part of a program approved by Congress to help minority-owned or economically disadvantaged businesses to get a foothold in the lucrative field of high technology.

In this case, the contract was given to Arcata Associates, Inc., of Burlingame, Calif.

Arcata, which is not related to the larger Arcata Corporation, qualified because it is headed by a Chinese American, Buck W. Wong, who also holds a master's degree in business administration from Stanford.

Although the Army found that Arcata was lacking in experience and management to handle the contract, SBA insisted that it was qualified. Army officials reluctantly went along on the deal.

Arcata quickly subcontracted 67 percent of the professional work to a large competitor of BDM.

In its first six months, Arcata got a satisfactory rating from the Army, but its performance was not good enough to win the full incentive award that it would have received had it done a first-rate job.

How much impact the takeover of the Army test program by the SBA will have on national security may never become apparent. But Army officials say that, if they had had their choice, a contract of this importance would have been awarded on a competitive basis to the best-qualified firm instead of being handed to an inexperienced firm.

There is the possibility that Arcata will learn enough from its Army contract to set out on its own, unaided by the SBA, in the field of high-technology contracting.

If it does, it will be a rare exception. The experience with the SBA's highly controversial program for providing government contracts to small businesses is that most of the businesses never graduate. They cling to the program year after year, blocking other firms from participating. Of 4,598 companies in the program, only 166 have gone out on their own.

As a result, the General Accounting Office, which keeps an eye on federal programs for Congress, recently described this effort to aid small businesses as "a promise unfulfilled." The GAO went on to charge that the aid had gone to a select group of companies that "view the program as an end in itself."

PROFITING FROM DISASTER

When a devastating blizzard swept through eastern Massachusetts and Rhode Island on Feb. 5-7, 1978, the SBA came under intense pressure to provide help in a hurry.

The agency brought in two permanent employees and hired 180 temporary workers to verify storm-damage claims, authorize payments and disburse checks. Within weeks, they made 12,000 disaster-assistance loans totaling 121.4 million dollars.

The result was another disaster—for the taxpayer.

Among those hired were George Wattendorf, his daughter, his secretary and a number of personal friends.

They are now acccused in federal indictments of using scores of aliases to obtain some 40 disaster loans totaling more than $500,000.

It was only because a clerk noticed that many loan applications carried the same Social Security numbers, but different names, that an investigation was launched.

According to the indictments, Wattendorf, who has since died, and his associates submitted phony loan applications buttressed by pictures of property owned by others that had been damaged in the blizzard. In its eagerness to help those in distress, SBA's inexperienced crew of temporary employes simply sent out the checks as fast as the applications came in.

Investigators are now trying to determine how widespread Wattendorf's operation was. They have already found records showing that he had obtained disaster loans in Florida and Kentucky and possibly in Mississippi and Texas as well.

What is even more worrisome is that SBA's get-the-money-out-fast policy may well have created other large losses of which it is not even aware.

Last year alone, 1.2 billion was handed out in 70,000 disaster loans. Although that amounted to 69 percent of the loans made during the year, the disaster-loan program has been treated as a nuisance, a "program that was constantly interfering with the agency's 'real' mission," according to a recent report by an advisory group made up of SBA employes.

Related to the sloppiness in handing out money to those who claim to be disaster victims is the agency's failure to collect on the loans. Earlier this year, the Senate Small Business Committee was told that nearly 1.2 billion dollars in disaster loans is past due, delinquent, deferred or in liquidation.

ROOTS OF THE PROBLEMS

Wherever investigators look, the SBA seems to overflow with problems, most of them stemming from pressure to disburse cash without provisions for adequate safeguards.

The agency has also been a political football. In a recent case, the U.S. Merit Systems Protection Board summed up the agency's reputation this way: "The SBA has long been regarded as an agency that is unusually subject to partisan political influence, and has often been involved in controversy over charges of political abuse of the merit systems."

Perhaps most ironic is the accusation that SBA officials have done much of the procurement for the agency through noncompetitive contracts, in effect squeezing out small businesses that might have competed for those contracts.

Some congressmen think the agency is so badly jinxed that it should simply be scuttled like a contaminated ship. But Senator Lowell P. Weicker, Jr. (R-Conn.), chairman of the Senate Small Business Committee, insists that SBA can be reformed and saved.

That task is now up to Michael Cardenas, a Fresno, Calif., accountant who is the SBA's new administrator. He says his first goal is to change the public image of the agency.

But he has been hampered by difficulty in finding qualified people willing to work for SBA. He has succeeded in signing on only a handful of applicants who meet his standards for approximately 100 vacancies.

Yet to be seen is whether the Reagan administration can rehabilitate a problem agency with a reputation for handing out government money in ways that has even some of its strongest supporters dismayed.●

P. J. BEAN, M.D.

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. DYSON. Mr. Speaker, birthday celebrations are always something to enjoy no matter what age we happen to be celebrating. Each year that celebration takes on new meaning as we look back at our accomplishments and take stock of the future.

P. J. Bean, M.D., of St. Mary's County is celebrating his 90th birthday today and I want to share some thoughts about Dr. Bean with this distinguished House.

Dr. Bean is an institution in St. Mary's County. Walk down any road and ask a resident about Dr. Bean and a twinkle will come into their eye as they recount a story of Dr. Bean's medical skills and how he helped one of their children or grandchildren, during an illness. He is the epitome of the country doctor, having cared for the children, grandchildren, and great grandchildren of St. Mary's citizens.

To many of us who grew up under the care of Dr. Bean, his recent retirement came as a surprise. I think that all of us in St. Mary's County, including my brothers and sisters, expected

"Doc" Bean to practice medicine forever.

Mr. Speaker, I would like to recognize the vast achievements of Dr. Bean, his constant and diligent attention to the health of thousands of people in St. Mary's County for whom he cared; people who knew they could count on Dr. Bean no matter what the circumstances.

Today, Dr. Bean is 90 years of age, and I want to wish him continuing health and happiness in the coming years. No man deserves more.●

MANDATORY MINIMUM SENTENCES AND TIGHTER BAIL PROVISIONS ARE NEEDED IN THE FIGHT AGAINST DRUG TRAFFICKERS

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. BEARD. Mr. Speaker, drug smuggling is big business. According to the Drug Enforcement Administration, drug trafficking generated $64 billion in untaxed profits in 1980, making it one of the most lucrative forms of commerce in the world. The havoc these traffickers wreak on our society in terms of individual suffering, destroyed families, and disruption of communities is staggering and can no longer be tolerated. Today, I am introducing legislation to eliminate or drastically reduce the incentive to participate in the drug smuggling business by increasing the certainty of long prison sentences. My bill, which is directed toward bigtime traffickers, imposes mandatory minimum penalties on individuals convicted of offenses involving large quantities of marihuana, cocaine, and opium derivatives.

In June, the Select Committee on Narcotics Abuse and Control, at my request, conducted a hearing on sentencing practices in narcotics cases. Under our current Federal sentencing scheme, a first-time offender convicted of trafficking in tons of marihuana and kilograms of heroin can expect to receive a prison sentence of 3 to 5 years and be eligible for parole after serving only a year to a year and a half. Law enforcement witnesses representing the States of Florida, Tennessee, and Virginia agreed that the Federal laws do not deter traffickers. In fact, in Florida, where severe mandatory minimum penalties for violations of the drug laws have been recently enacted, suspects arrested under joint Federal-State seizures have attempted to be taken into Federal custody to avoid State prosecution. According to Florida's Attorney General Smith, "It is evident that traffickers who know about the Florida law are reacting in a way that show their fear of it." The reluctance to face the severe State penalties has also been evident in the increased smuggling activity in the States bordering on Florida. Further, some smugglers arrested in bordering States indicated to authorities that they would have conducted business in Florida, but changed destinations because of the tough mandatory sentencing features of the law.

Police Chief Joe Casey, of Nashville, testified that Tennessee's new mandatory sentencing laws "worked for the protection of the public and not for the protection of the criminal whose dependence on drugs, either for his own use or for the sale to others, resulted in the original crime as well as many others against society."

Mr. Speaker, the testimony of these witnesses convinced me that mandatory minimum sentences, if directed toward those trafficking in large quantities of illicit drugs, can serve as a deterrent. The arguments often posed by opponents to mandatory sentences—increasing the backlog in the courts and overcrowding of our prisons—simply do not outweigh the pain inflicted by these criminals on our law-abiding citizens.

The bill has three principal features. First, the bill amends the Controlled Substances Act and Controlled Substances Import and Export Act to provide for a mandatory minimum sentence of not less than 5 years, for violations involving: (1) not less than 500 pounds or more than 2,000 pounds of marihuana; (2) not less than 14 grams or more than 28 grams of any opium derivative; and (3) not less than 200 grams or more than 400 grams of cocaine. The mandatory minimum penalty increases to not less than 10 years or more than 30 years for violations involving more than, (1) 2,000 pounds of marihuana; (2) 28 grams of any opium derivative; and (3) 400 grams of cocaine. The bill also increases the penalties for violations involving phencyclidine (PCP).

Second, the bill increases the penalties which must be imposed for violations involving distribution of a controlled substance to a person under 18.

Finally, my bill amends the Federal bail/bond provisions of the criminal code to allow a judicial officer to also consider whether the offender will pose a danger to the community or another person before the offender may be released pending trial.●

REAGAN DELAY ON VOTING RIGHTS EXTENSION SHAMEFUL

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. DIXON. Mr. Speaker, today I am sending a letter to the President urging him to take a firm, forthright, and immediate position in favor of extending the Voting Rights Act of 1965.

The administration's silence on this issue of fundamental importance to 20 million black Americans is nothing short of unconscionable. Mr. Reagan has personally stated that he would "defend to the death" an individual's right to vote. Yet he has failed to make any public statements on the matter after raking the act over the coals during last year's campaign, suggesting at one point that the act be extended nationwide, thus diluting its impact and effectiveness.

The hearing record established by the Judiciary Subcommittee on Civil and Constitutional Rights, which reported the bill unanimously to the full committee, indicates that discrimination at the ballot box is not a thing of the past. And yet the President has given the Attorney General until October 1 to compile a review and analysis of an issue which has been reviewed and analyzed to death.

Surely, if the President can rewrite an entire Federal budget in 12 hours and mount a massive public relations campaign to win over reluctant Representatives, he can come to a swift and decisive position on a bill to protect the rights of millions of Americans to participate in our Democratic process.

Mr. President, the voting rights is about to leave the station, and I think it is high time you jumped aboard.●

SECRETARY WATT IS WRONG MAN FOR THE JOB SAYS BEAVER DAM, WIS., DAILY CITIZEN

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. KASTENMEIER. Mr. Speaker, it is becoming increasingly apparent to growing numbers of Americans concerned with our environment and its future protection that Interior Secretary James Watt simply does not represent the values held by a majority of Americans in this regard.

Secretary Watt is totally undermining important environmental goals supported by the American people. He is effectively ignoring decades of legislation designed to protect our country's natural resources for generations

to come. Almost every facet of our environmental heritage is coming under attack and Secretary Watt is the principal advocate of these destructive policies.

The Beaver Dam Daily Citizen in Beaver Dam, Wis., called for Secretary Watt's resignation on July 22. I strongly share the views expressed in its editorial which I would like to insert at this time.

WATT MUST GO

Interior Secretary James Watt should resign.

His views, policies and decisions are so inconsistent with the duties of his office and agency that there is no reason for him to remain on the job—unless a direct attack on the nations' environment and expendable natural resources is the goal of the Reagan administration

The Interior Department does more than run the nation's national parks—though that is important enough, and Watt is finding ways to enrich private park concessionaires in these scenic areas bought by and until now preserved for the public.

Interior also oversees the United States' offshore oil development. It administers the vast federal lands in the West and in Alaska.

Watt has quickly moved to allow increased offshore oil drilling near four of Northern California's most scenic beaches. And there just plain aren't other beaches like them.

Watt is moving full tilt to try to turn over control of federal lands in the West to the states. This can be seen as "getting the federal government off the people's backs." Or it can be seen as the dark side of the so-called Sagebrush Rebellion, which has been painted as a populist arising in the West, where plain folks want to make their own decisions. More cynical types regard the Sagebrush Rebellion as a land grab directed by the already rich and powerful in the West who want to control and exploit federal lands to enhance their own wealth on land owned by the public.

The last point is critical. We are not talking about whether or not the nation needs more energy. Nor are we talking about the level of company profits gained in the rough and tumble of the marketplace. We are talking about the use of the peoples' land, air and water.

Wisconsin Congressman Bob Kastenmeier, D-Sun Prairie, who represents most of this area in Congress, has called for Watt's resignation. We support Kastenmeier's call.

Yesterday U.S. Sen. William Proxmire, D-Wis., delivered a blistering attack on Watt. Proxmire noted that Watt has called for an 85 percent spending cut on land purchases for parks, wildlife refuges and additions to the national forest system, while cutting big water projects (which often line the pockets of key landowners and construction firms with millions of public dollars), by a token 5 percent.

The Wisconsin Senator ripped Watt for sacrificing the long term productivity of federal Western grazing lands to maximizing quick profits for livestock operators—private individuals granted permission to use the public's land.

The crux of the problem is that Watt just plain doesn't understand the nature of the job he's in. It is not to find ways to best exploit the natural resources under the control of the Interior Department. It is not to boost the interests and economic success of businesses operating on those lands.

Rather, it is the job of the Interior Secretary to administer those lands and resources held in public trust for present and future generations in such a manner that those yet unborn may get full use, enjoyment and benefit from them.

A hundred years ago, Watt would have made a great buffalo hunter, fur company president or lumber baron in an era when raping the nation's resources was the path to power. In 1981, he's the wrong man for the job of Interior Secretary.●

A NEW POLICY FOR EL SALVADOR

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. GARCIA. Mr. Speaker, recently, Thomas O. Enders, Assistant Secretary for Inter-American Affairs called for a peaceful political solution to the civil strife in El Salvador. On the surface, this seems to be a monumental step by the administration regarding its policy in El Salvador. Upon closer examination, however, the administration has not changed its policy significantly.

Enders said that, "the search for a political solution will not succeed unless the United States sustains its assistance to El Salvador." This approach has negative overtones. The State Department is covering up its policy of continued military assistance to the junta with this call for a political solution.

The administration's suggestion for elections is a sound proposal, but only if the elections serve as a legitimate attempt to bring together all political groupings. The left may not be popular with the administration, but many of the left-leaning groups have a strong following among the Salvadoran people. The administration, however, does seem to be tempering its policy toward El Salvador. In Mr. Enders' speech, he placed a renewed emphasis on economic reform and a condemnation of violence, whether from the left or the right. There was even a warning to the Salvadoran military that it must monitor its own activities more closely, particularly regarding political violence. These are all positive signs, but if arms and military equipment keep flowing to El Salvador, the administration's rhetoric will have no meaning.

As long as this struggle is viewed by Mr. Reagan and the upper reaches of the State Department as an ideological confrontation, there are going to be problems. East does not meet West in El Salvador. Not all opponents of the junta are Marxist-Leninists. Guillermo Ungo of the National Revolutionary Movement is a former member of the junta and a Social Democrat. He is not a Communist.

I am not trying to rehash old arguments. Yet, I think it is important that the President and his policymakers are reminded that the situation in El Salvador is not simply a battle against communism. Mr. Enders spoke about the political progress of Honduras and Guatemala in his speech last week. He praised "the courage of Honduran leaders in standing by their election commitments." I agree, Honduras is trying to bring about democratic reforms. But Mr. Enders encouragement for a successful, legitimate, democratic election in Guatemala will not be enough to turn that country's political situation around. It might help if the United States refused to sell any more military equipment to Guatemala until the government in that country does something about the political violence and terror there.

Mr. Enders condemnation of Nicaragua for failing to hold elections this fall is based on faulty reasoning. That country is trying to recover from a revolution. The social and economic fabric of Nicaragua was ripped apart. The people must have time to recover before they can establish new political parties and institutions.

I do agree very strongly with one point Mr. Enders made. He said the United States must "identify and seize opportunities to help such a solution (democratic) actually take place (in El Salvador)." These opportunities, however, must arise from the initiative of the Salvadoran people. The United States must listen to the will of the Salvadoran people, if there is to be a lasting peace in that country.

The United States exerts an enormous amount of influence in El Salvador. I think it is, therefore, necessary for this country to be more responsible and sensitive with its policy toward El Salvador and throughout all of Central America. I do not believe it is sensitive of the United States to hold an olive branch in one hand and an M-16 in the other. The United States must take the first step in El Salvador by stopping military aid and encouraging the junta and the left to sit down and negotiate a peaceful and just solution to their problems. The United States should support peaceful change and elections, but we must also practice what we preach by ending military support of the junta.●

AMERICA'S MIDEAST RESPONSIBILITY

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Ms. OAKAR. Mr. Speaker, a very thoughtful editorial appeared today in

the Washington Post which, I believe, adds dimension to the complex problems and solution to the problems of the Middle East.

The following is the text of this editorial:

[From the Washington Post, July 24, 1981]

AMERICA'S MIDEAST RESPONSIBILITY

The lesson of the last fortnight in the Middle East is this: the region is in a recognizably new phase that requires a review of positions the United States has not examined in years.

This phase began with the re-election of Menachem Begin. Thus fortified, he set out to destroy the Palestinian military presence in southern Lebanon. He also appears to have had it in mind to reduce the Palestinians as an independent negotiating factor at least over the next four years. The PLO responded with the first rocket attacks in more than a year that actually killed some Israeli civilians. In return, the Begin government killed hundreds and wounded hundreds more Lebanese and Palestinian civilians, openly stating its intent to turn civilians against the guerrillas.

It is the totality of this situation, entailing not just the mutual targeting of civilians but also the torpedoing of already-gloomy negotiating prospects and the resulting damage to American interests, that the United States must now address.

Israel has a right to defend itself. But it does not have a right to label any excess of preemption or retaliation self-defense and then expect others to accept this reading. And the fact is that Mr. Begin has been dissipating Israel's most precious asset in the United States, its claim to a moral edge.

Some people suggest that the attacks are Mr. Begin's answer to the post-Iraq American plea to show restraint in the use of American-supplied weapons. And from this they conclude that Mr. Reagan should keep in effect, or extend, his suspension of deliveries of F16s. A case can be made that the United States needs to make such a gesture to salvage standing with friendly Arab states. But the jiggling of arms deliveries is a limited and in most respects bad idea. It runs against the fundamental American purpose to keep Israel strong and secure, the better to enjoy its national life—and to be able to make political accommodations. Precisely because maintaining a certain level of such aid fulfills American as well as Israeli objectives, restricting aid is unconvincing and, thus, ineffective and even humiliating: Mr. Begin and everyone else knows that the arms tap will be turned back on.

Jiggling deliveries also has this fatal disadvantage; it does not address the central political question, the fate of the Palestinians. For 33 years the United States, recognizing a special debt to a people ravaged by Hitler's Holocaust, has sustained the Jewish effort to build a homeland in part of Palestine. This has been a proud chapter for Americans. But Israel remains besieged, in a sense never more so, and the United States, Israel's only friend and patron, itself pays major costs. The reason is that the Palestinian issue is not being properly addressed.

For this, Israel and the United States are not the only responsible parties. The Arabs, including the Palestinians, share heavy—and bloody—blame. The Palestinians could have had their state in 1948 from the United Nations or until 1967 from Jordan. The PLO's basic charter still upholds a policy of terror. But though many peoples have lost their homeland and are ignored, the Palestinians' claim to nationhood does have a moral basis. The reality of Arab and global politics gives it political urgency.

For many years the United States followed Israel's lead in pretending there was no Palestinian question. Under Jimmy Carter, neglect yielded to an intense search for a formula for Israeli-Palestinian reconciliation, with a two-state result always the gleam in Mr. Carter's eye. But it was the mote in Mr. Begin's. The Carter quest fell short.

Although ideally a solution would be reached by negotiations, Mr. Begin's Palestinian policy early on mooted the question of whether the Palestinians could ever be drawn in to Camp David. From his extension of Jewish settlement in the West Bank through his niggardly approach to the Palestinian autonomy talks to his recent raids in Lebanon, the Israeli prime minister has ensured that Palestinian readiness for a political solution could not be fairly tested. He makes no bones about this. In his inaugural address in 1977 he disconnected Israel from a demand to be recognized by the Palestinians—a demand creating a reciprocal obligation. Mr. Begin does not say that under certain conditions he would accept a Palestinian state. He says that under no conditions will he.

How then can it be learned whether, as some Palestinians hint and as their friends insist, the Palestinian movement is ready for a two-state coexistence solution? Here we arrive at another obstacle: the American pledge of 1975 not to deal with the PLO unless it first accepted Israel's right to exist in word and deed. Is this pledge still vital?

The premise of that pledge was the legitimacy of Palestinian nationalism. It was intended as a tactical lever to bring the PLO to accept Israel's legitimacy: then it would be the Palestinians' turn. But Mr. Begin has blocked that, too. Now the United States is locked into insisting on conditions that, even if they were met by the PLO, Mr. Begin would dismiss as meaningless and irrelevant. The American no-dealing pledge is thus being honored, although Mr. Begin's Camp David pledge to submit the "final status" of the West Bank and "the location of the boundaries" to negotiations with Palestinians is not. Yet these promises are related to one another.

Another way of answering is by reference to the practical consequences. We refer here not simply to the evident advantages to American security, political and economic interests of going with the moderate Arab flow supporting Israeli-Palestinian coexistence. In the current crisis in Lebanon, an Israeli-Palestinian cease-fire is plainly in the American interest. A cease-fire securing the northern Israeli border is just as plainly in Israeli's interest. The 1975 pledge keeps the United States from talking with the PLO about a cease-fire.

A third way of answering would be to underline that the sole purpose of dealing with the PLO would be to draw it along the negotiating track laid out, and agreed to by Israel, at Camp David: not to "reverse alliances" or to abandon Israel but to secure for Israel the condition of peace it has been unable or unwilling to try to secure for itself.

Dealing with the PLO would indeed be to allow a terrorist group to shoot its way into eventual respectability. But it makes a difference that the PLO is a terrorist organization and also an authentic representative political organization, that Mr. Begin himself trod this path, and that the Israeli military is now conducting the policy it is. What makes the most difference is what the PLO would be "shooting its way into."

The PLO would not be extinguishing Israel, which has its own strength and—still and we hope forever—a friend in the United States. The PLO would be "shooting its way into" a process intended to lead, if all went well, to a state of its own next to Israel. It could not conceivably be allowed such a state if it did not accept the usual neighborly obligations. Given the PLO's record and makeup, heavy extra obligations would be in order.

These questions ought to be at the top of the administration's mind as it composes a Middle East policy over the next few months. It is especially important to consult with Anwar Sadat, not least because an American PLO initiative could conceivably lead Israel to break off at least temporarily the peace process it has been conducting with Egypt.

If it is true that the Israeli leader refuses to open to the Palestinians the avenue that the Camp David parties, including Israel, promised to open to them, then this changes everything. And if this is true, Mr. Begin must be told that, failing to alter this policy and to commit himself otherwise, he is driving the United States to deal directly with the PLO—for the purpose of securing from it the concessions to Israel that the United States has always hoped the PLO would make. Far from abandoning Israel, the United States would be asking the PLO to accept publicly and unequivocally Israel's right to exist, to enter direct negotiations with Israel and to repudiate terror. The American responsibility to Israel, to Arabs and to its own interests requires no less.●

TRIBUTE TO THE WASHINGTON STAR

HON. IKE ANDREWS

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. ANDREWS. Mr. Speaker, very few cities in the United States have been blessed in recent years, as Washington has, with two excellent, competing, daily newspapers.

The decision by Time, Inc., yesterday to stop publishing the Star is a tragic loss to Washington and to journalism.

In the nearly 9 years I have been in Washington, the Star has shown tremendous improvement in its coverage, content, and format. But, obviously, its circulation and advertising revenues have not improved sufficiently for Time, Inc., to continue trying to put it in the black.

In paying tribute to the Star, I would especially like to recognize the achievements of two men—Ed Yoder, editor of the editorial page, and Jon Yardley, book editor.

Both are graduates of the University of North Carolina at Chapel Hill. Both were distinguished editors of the Daily Tar Heel while students at UNC-CH.

After completing his studies as a Rhodes scholar at Oxford, Ed joined the Charlotte News as an editorial writer. Jon worked for several years for the New York Times.

Then, for a number of years, Ed and Jon worked together on the editorial staff of the Greensboro Daily News and had a large part in making that newspaper's editorial page one of the most respected in the United States.

Jon spent a year at Harvard as a Nieman fellow and later joined the Miami Herald as its book review editor. Along the way, he found time to write a highly praised biography of Ring Lardner.

These talented journalists were reunited at the Star several years ago. Since being there, each has received the Pulitzer Prize—Ed for editorial writing and Jon for criticism.

To the Star and especially to Ed Yoder and Jon Yardley, I say: You have served us well. Many thanks. We will miss you.●

"HAPPY" CHANDLER BELONGS IN BASEBALL HALL OF FAME

HON. LARRY J. HOPKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. HOPKINS. Mr. Speaker, major league baseball holds a special, and important, place in American society. The men who have shaped the game hold the same special place in the hearts of Americans.

But one of these men, Albert B. "Happy" Chandler of Kentucky, has been denied this honor—despite being the man chiefly responsible for eliminating racial segregation from the game.

While baseball commissioner from 1945 to 1951, Happy Chandler paved the way for Jackie Robinson to become the first black man to play in the major leagues. Yet, he has not been recognized for this landmark achievement by the Baseball Hall of Fame.

An excellent column, which appeared last March in the New York Times, tells the story of Happy Chandler's achievement, and explains why he belongs in the Hall of Fame. I urge all my colleagues, baseball fans or not, to read the column and give their support to the man who ended segregation in the American pastime:

A VOTE FOR CHANDLER, AN IGNORED PIONEER

(By John B. Holway)

In more than a century of major league baseball history, only a handful of men have single-handedly changed the direction of the game:

Al Spalding, the early pioneer;

Babe Ruth, who make the offense supreme;

Kenesaw Mountain Landis, who restored the game's shaken integrity;

Branch Rickey, inventor of the farm system, and

A.B. (Happy) Chandler, who opened the doors to racial integration.

Each of the five has left a historic impact on the sport, and four have been enshrined in the Hall of Fame at Cooperstown. Only one is not, though his contribution may have been the most crucial of all.

Happy Chandler, now 82 years old, is paying the price for his courage. He so offended the barons of the sport with his green light to Jackie Robinson in 1945 and a controversial one-year suspension of Manager Leo Durocher of the Brooklyn Dodgers in 1947 that in 1951 he was drummed out of the commissioner's office and replaced by Ford Frick.

The credit for opening baseball's doors to all races has been denied him and given instead to Rickey. Yet if it had not been for Chandler, Rickey could not have signed Robinson to the historic Brooklyn contract.

For 25 years Landis reportedly had consistently blocked any attempts to put blacks and whites together on a big league field. One of his first acts as commissioner in 1921 was to order all barnstorming white stars to stop playing blacks while wearing their major league uniforms. He did not want people to say that a major league team had been beaten by blacks. Some whites continued to barnstorm, but only as individuals or "All Stars," only after the World Series and only for a few weeks each autumn.

That was how things stood throughout the 1920's and 1930's. The blacks beat the whites six of every 10 games they played, but still major league fans were denied the chance to see Satchel Paige, Josh Gibson, Buck Leonard, Cool Papa Bell and others in action.

In the 1940's, with the war taking more and more white stars, rumors arose that the Pittsburgh Pirates would try out Gibson and Leonard. Bill Benswanger, president of the Pirates, was quoted in newspaper accounts to have said: "colored men are American citizens with American rights. I know there are many problems connected with the question, but after all, someone has to make the first move."

He later denied the whole thing, although, of course, he added that it is the Pirates' policy to give a job to any qualified man.

SO EASILY FORGOTTEN

According to Leonard, the Washington Senators' owner, Clark Griffith, called Gibson and him into his office, and they told him that they would be glad to try out for the Senators and thought they could make the team. Griffith, however, never mentioned the subject to them again.

In New York, Mayor Fiorello La Guardia set up a committee on equal employment opportunity. According to numerous newspaper accounts, Larry MacPhail, then owner of the Yankees, bluntly told the members that no blacks would play for the Yankees. He said the campaign was being pushed by "groups of political and social-minded drum beaters," adding that few if any blacks could qualify for the big leagues.

The irrepressible Bill Veeck hatched a plan to buy the Phils, stock them with black stars, and waltz to the pennant. Unfortunately, Landis got word of the scheme and allegedly killed it. "I realize now," Veeck says, "that it was a mistake to tell him."

According to The Pittsburgh Courier, the Chicago White Sox manager, Jimmy Dykes, actually summoned up courage to hold a tryout for the pitcher Nate Moreland and a college football whiz named Jackie Robinson. Robinson reported with a charley horse. Whistled Jimmy: "I'd hate to see him on two good legs!" Jackie, he reported, "is worth $50,000 of anybody's money. He stole everything but my infielders' gloves."

But Robinson and Moreland didn't get the jobs.

Why was the racial bar, in general representative of American sentiment of the time and so firmly in place for more than half a century, never lowered? Organized ball seemed to blame it on the fans. Reportedly, the National League president, Ford Frick, said in the early 1940's: "We have always been interested in Negro players, but have not used them because of the public."

After Robinson was admitted to the major leagues, however, Frick was a strong supporter. In 1947, Robinson's first season in the major leagues, the St. Louis Cardinals threatened to strike in favor of playing against Robinson and the Dodgers. Frick told the Cardinal players: "If you do this, you are through, and I don't care if it wrecks the league for 10 years. You cannot do this because this is America."

In his tenure, however, Landis remained as immovable as ever. The last thing he told Wendell Smith of The Courier, a noted black newspaper, was, "There is nothing further to discuss." Smith then wrote that Landis, in 1944, "died with those words on his lips."

In April 1945, the major leagues announced the name of their new commissioner, Senator A. B. (Happy) Chandler of Kentucky.

"We went right down to see him the morning the story broke," said Eric (Ric) Roberts, a baseball historian and a long time writer for The Courier. "Chandler came out immediately, shaking our hands, and said 'I'm for the Four Freedoms. If a black boy can make it on Okinawa and Guadalcanal, hell, he can make it in baseball.' And he told us, 'Once I tell you something, brother, I never change. You can count on me.' I always thought that was a pretty stout thing for a Southerner to say."

The moment Rickey read that story in The Courier, he began to move. Chandler paid for his stands. In 1951, when Chandler's contract ran out, he was a goner, and he never got credit for giving Rickey the green light to sign Robinson.

In the 35 years that have elapsed since Chandler's historic decision, most of his enemies have passed from the baseball scene. A new generation, unscarred by the bitter racial feelings of the past, now sits on the Hall of Fame veterans' committee. It is in their power to accord Chandler the honors that others withheld.

All the other actors in the drama have been elected to Cooperstown—Landis, Griffith, MacPhail, Rickey, and Robinson himself.

The major league performances of such stars as Robinson, Campanella, Roberto Clemente, Ernie Banks, Willie Mays and Hank Aaron, all Hall of Famers, was made possible by the courageous decision of Happy Chandler. It will be a happy day for Cooperstown when he is given the honor so richly deserved and so long denied.●

AMENDMENTS TO H.R. 4242 TO FACILITATE UTILITY COAL CONVERSION

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. RAHALL. Mr. Speaker, I intend to offer two amendments to H.R. 4242, the Ways and Means Committee tax bill, which are aimed at significantly strengthening the financial capability of utilities wishing to construct coal-burning facilities. There is an urgent need for changes in the Federal tax code to achieve the accelerated construction of these facilities due to the sad financial condition of the Nation's electric utilities. Many cannot afford to borrow the additional capital to finance the conversion and replacement of oil- and gas-fired powerplants with new, more efficient coal-fired units.

By using widely accepted tax incentives, my amendments will facilitate the accelerated construction of coal-burning facilities. There is convincing evidence that such new plants will ultimately save electricity consumers billions of dollars because of the large and growing cost differential between coal and other fuels. Furthermore, I believe these amendments to be consistent with the tax incentive philosophy of the Ways and Means Committee.

Basically, the first amendment will allow expensing for pollution control equipment which is public utility property that has a present class life of 18 years or less. This equipment will not be subject to transitional rules and will be eligible for the full investment tax credit.

The second amendment will allow public utilities switching to coal the same energy tax credit—10 percent—now provided for other industrial companies which convert or replace oil- or gas-fired installations with coal. All coal utilization property, including pollution control equipment would be eligible for this credit.●

PIONEER DAY

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. MARRIOTT. Mr. Speaker, on this day in 1847 a great event transpired. Brigham Young and the Mormon pioneers completed their heroic journey across desolate plains and rugged mountains, and arrived in the Great Salt Lake Valley.

Many faithful followers must have had second thoughts about their leader, Brigham Young, as he rose from his wagon, weakened by the travel and hardships the pioneers had endured, looked out over the arid desert before him and said, "This is the right place."

In the years which ensued, these courageous people worked unceasingly to make Utah a good place to live. They began controlled irrigation, and changed the unproductive Utah deserts into fertile fields where their crops flourished. They built roads and highways, beautiful cities, churches where they were free to worship without fear of persecution, and they erected a magnificent temple.

By the time of his death in 1877, some 30 years after entering the Salt Lake Valley, Brigham Young had directed the founding of over 350 communities in an area encompassing Utah as well as parts of Idaho, Montana, Nevada, and Colorado.

These pioneers accomplished a marvelous task: They conquered a wilderness and groomed it into one of the most beautiful areas in the Nation. On January 4, 1896, Utah was admitted to the Union.

Now the anniversary of the arrival of these pioneers in the Salt Lake Valley 134 years ago on July 24, is recognized throughout the State as Pioneer Day. Families, friends, and church congregations gather together to celebrate and give thanks for their heroic ancestors. There are parades and festivities in every city and town as Utahans commemorate this occasion.

Today Utah is one of the most crucial, important States in the Nation. It is among the top 15 mineral-producing States, with abundant reserves of petroleum, coal, copper, and several other minerals, such as uranium, which are vital for our national defense.

The tar sands and oil shale deposits in Utah have the potential of saving America from her energy dilemma. Although countries in the Middle East and North Africa have a virtual monopoly on the world's oil reserves, 110 to 140 billion barrels of recoverable oil lie in the tar sand and oil shale deposits in eastern Utah.

Yes, this great State is destined to become the energy giant of America in the coming years, but today it is best known for its grand mountains and beautiful scenery, its great skiing, and above all its people.

So as Utah prepares to help the Nation in so many ways, and its people continue in the traditions of hard work and self-sufficiency learned from their pioneer forefathers, let us pay tribute to this great State and those who made it a good place to live.●

AARP-NRTA URGES CONGRESS TO IMPLEMENT MORE COMPREHENSIVE ANTI-INFLATION PROGRAM AS PART OF TAX BILL

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. PEPPER. Mr. Speaker, the tax bill we will soon be considering has enormous consequences for every working and retired American. At this historic juncture, Congress has the opportunity to enact policies which would stimulate savings, increase productivity, reduce unemployment, and attack the root causes of inflation. There has been a great deal of concern, however, that in an effort to outbid the administration's ill-conceived across-the-board billion dollar giveaway to the rich, the Ways and Means Committee bill may fail to completely address these four goals of the Democratic Party.

The 13-million-member American Association of Retired Persons/National Retired Teachers Association has expressed such concerns in an open letter to the Ways and Means Committee. AARP-NRTA stresses that the fiscal policies contained in the comprehensive tax bill should be mutually supportive and not work at cross-purposes with one another. In addition, AARP-NRTA emphasizes that inflation exacts a particularly cruel toll on the elderly. In the years of hearings held by the Select Committee on Aging, we have consistently identified inflation as one of the most difficult problems faced by the elderly, along with the lack of adequate income, health care, housing, and social services. Congress should keep these considerations at the forefront as we consider tax policies that may have an effect on inflation, as well as programs which cost effectively protect the most vulnerable elements of society from its effects. I commend to my colleagues this open letter to the Ways and Means Committee:

Sustained high rate inflation is the chief threat to and concern of the elderly. Consequently, the 13 million member National Retired Teachers Association-American Association of Retired Persons are mandated by their leadership to oppose all actions which promise to increase inflation, and to evaluate fiscal and monetary policies, as well as other actions, in terms of their effects on inflation. Viewed from that perspective, the Economic Recovery Tax Act of 1981 is at variance with the kind of fiscal policy the nation needs at the present time. The across-the-board cuts in personal income taxes for which this legislation provides, although reduced somewhat from the Administration proposal, are still too large, particularly in conjunction with the planned very large increase in defense spending. This remains so even taking into

account the approved expenditure reductions in other budget categories. The basic policy approach of relying on stringent monetary policy to (hopefully) restrain inflation while pursuing a stimulative fiscal policy is the wrong policy combination.

It is simply asserted, without convincing proof, that large cuts in personal income tax rates, which will certainly increase federal budget deficits, will quickly generate large gains in output and incomes, the taxes on which will more than offset the initial revenue loss. It seems far more likely that the revenue loss will not be offset, because taxpayers are not likely to change their behavior radically and save a significantly larger proportion of their incomes—especially in the current, high inflation economic environment. While we do not share the belief that Federal deficits have been the only cause of inflation, they have certainly contributed to it in a major way. Large Federal budget deficits, year after year, are not something that can safely be ignored. Inflation is much too high. The Federal budget must be brought into balance and the sooner the better.

Apparently, the thinking behind the tax bill is that budget deficits can be ignored because monetary policy can and will be used to restrain inflationary pressures. While monetary policy certainly has an important role to play in restraining inflation, all the burden cannot be put on monetary policy without severe damage to the economy. The natural tendency of the "tight" monetary policy which is now being pursued by the Federal Reserve, and its accompanying high interest rates, is to curtail investment, both by business in new or modernized production facilities and by consumers in housing and automobiles. Although the tax bill contains provisions intended to encourage business to devote a larger share of profits to investments, the effect of the monetary policy which the Federal Reserve will have to follow to dampen inflationary pressure, is to make credit more expensive, and thereby discourage investment. All of these factors lead to the conclusion that a better policy mix would be to have a less stimulative fiscal policy and a less restrictive monetary policy.

There is, however, an even more fundamental failing of current policy, and that is that it assumes that the primary cause of inflation is excess demand—"too much money chasing too few goods." There is ample evidence to suggest that the cost-push (wage-price spiral) part of the inflation is the larger and more intractable part. The abolition of the Council on Wage and Price Stability removed whatever stabilizing influence the wage-price guidelines supplied, and it may not have been much, but nothing has been put in their place.

It is vitally important not be lulled into complacency by the recent slackening pace of inflation as measured by the Consumer and Producer Price Indexes. This is due largely to the current weakness in prices of oil, not to any abatement of the underlying or "core" rate of inflation. As we have found out before, the only constant in oil prices is their volatility. The U.S. has been lucky in the current weakness of oil and other commodity prices, but it has made little or no progress in reducing the basic inflation rate, and the tax package now being considered in the Ways and Means Committee offers no promise that it will do so.

Proponents of this tax package make much of its supposed beneficial effect in increasing employment, but this misses the point. The economy has been quite successful in creating jobs over the past decade. What it has not done, in addition to bringing inflation under control, is maintain an adequate level of productivity growth, the basis for the increase in standards of living we all want. One way to stimulate productivity growth is to invest in more productive facilities, but investments in human capital—education and training—are also necessary, and these are not being increased. Some of the budget cuts, in fact, would reduce them.

If we are going to invest more we will have to save more, and the tax bill does not do nearly enough to stimulate savings. It reduces the $200/400 exclusion of dividend and interest income, which is much too low to begin with, in favor of an untried instrument that, to the extent it does stimulate savings, does so at a high cost to the Treasury in order to furnish a barely concealed subsidy to the thrift industry. We acknowledge that the thrift industry has severe problems (most of which are the result of inflation), but the so-called "All-Savers" certificate is a very poor way to try to solve them.

We also question the long-run utility of indexing the personal income tax. While we agree that "bracket-creep" is an undesirable product of inflation, the better solution is to curb inflation, not to set up what may become a new rigidity in the tax system.

It is past time for Congress and the Administration to establish a comprehensive and effective anti-inflation program, unconstrained by ideology. Under such a policy monetary and fiscal policy should be mutually supportive—not working at cross purposes. Inflation is seriously damaging the economy and social fabric of the nation, and the elderly in particular.●

CONGRESSIONAL VIGIL FOR SOVIET JEWRY

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. DORNAN of California. Mr. Speaker, I join this year's Congressional Vigil for Soviet Jewry in the hope that by telling the world, in this forum, about individuals who have suffered under the Soviet regime, we can move the Soviet Union to observe its Helsinki commitment to guarantee fundamental human rights.

I believe my colleagues should be aware of the case of Leonid Lubman, a Russian Jew born in Leningrad and educated in electrical engineering. Mr. Lubman's troubles with the Soviet regime began when he publicly supported a Jewish coworker who wanted to emigrate to Israel.

When Leonid tried to have his treatise on sociology published in the West, he was arrested and charged with revealing state secrets. He was tried, and, as is almost always the case, convicted. He was sentenced to 13 years in a labor camp.

Mr. Speaker, no one has heard from Leonid Lubman since August of last year. We know that he has spent some of his prison term in solitary confinement. His family tells us that he has been tortured with hallucinogenic drugs.

I call on the Soviet Union to release Mr. Lubman and return him to his family, and to release all the other men and women they have imprisoned—whose only crime has been to try to leave a country where it is illegal to follow truth, and to freely pursue happiness.●

THE NEED FOR A NEW IMMIGRATION POLICY

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. GARCIA. Mr. Speaker, as I related to you and my colleagues on the floor of the House, immigration is an issue of deep concern to me. Because of the large number of Dominicans in my district, I am particularly concerned about their plight. I wrote a letter to President Reagan yesterday regarding this matter. I submit a copy of that letter to be published in the RECORD.

HOUSE OF REPRESENTATIVES,
Washington, D.C., July 23, 1981.

Hon. RONALD W. REAGAN,
President of the United States,
The White House, Washington, D.C.

DEAR MR. PRESIDENT: I have recently seen recommendations made by your Task Force on immigration. I agree with you on the need for a new immigration policy. I also understand that formulating an effective and just policy is a thankless and difficult job. Yet, I must respectfully disagree with some of the recommendations made by the Task Force.

As a Representative from the South Bronx, I am particularly concerned with immigration policy as it concerns immigrants from the Dominican Republic. Two aspects of the immigration policy most directly affect Dominicans; the proposed legalization programs and the preference system as it is presently structured.

The recommended legalization program prohibiting newly legalized immigrants from bringing in their families, seems to me to be unfair and dangerous. It is unfair to ask these people to begin a new life without the support and comfort of their families. It is dangerous to keep these people out of the mainstream of American life for such an extended period of time, ten years according to the Task Force's recommendations. This would be the same as establishing a whole new underclass of citizens.

The problem I have with the preference system, is that the Task Force has not recommended that it be revised. As the preference system is presently set up, it favors wealthier immigrants from more economically stable nations. A laborer from the Dominican Republic, a person who truly needs a chance, has no real opportunity to migrate to this country legally. I am not advocating opening this nation's borders without restrictions, but I am suggesting that the immigration preference system be set up in such a way so that the economically de-

prived would have a better chance of coming to this country.

Dominicans and other poor Latin and Caribbean peoples may not have oil or other material wealth, but they have numbers; people who are willing to work to keep this country prosperous. I believe, Mr. President, that we need to rethink our immigration policy so that it gives a fair chance to some of the world's forgotten people.

Sincerely,

ROBERT GARCIA,
Member of Congress.●

THE ARGENTINE GULAG

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. OTTINGER. Mr. Speaker, I am including in today's RECORD an article which recently appeared in the New York Times by Hector Timerman and Tom Bernstein concerning the existence of concentration camps in Argentina. Hector Timerman is a son of Jacobo Timerman, a former political prisoner in Argentina and author of "Prisoner Without a Name, Cell Without a Number." Mr. Bernstein is a member of the Lawyers Committee for International Human Rights.

These two men detail some of the evidence contained in a comprehensive report, "Testimony on Secret Dètention Camps in Argentina" which was issued last year by Amnesty International. The report shows how and why Argentine concentration camps are able to operate, and addresses the disappearances of over 20,000 people in Argentina.

It is becoming increasingly clear that the Argentine Government is one of the world's worst offenders of human rights. Despite the overwhelming evidence of the vicious, Nazi-like nature of that regime, the Reagan administration continues to seek to legitimize Argentine terror by maintaining cordial relations and selling arms to Gen. Roberto Viola. It is time for us to stop endorsing these terrible crimes against humanity.

I commend this important article to the attention of my colleagues:

THE ARGENTINE GULAG

(By Hector Timerman and Tom A. Bernstein)

The Argentine Foreign Minister, Oscar Camilión, on June 26 complained to the United States chargé d'affaires in Buenos Aires about allegations made on television that there are concentration camps in Argentina. Mr. Camilión later told reporters that the allegations, made by Hector Timerman, the son of Jacobo Timerman, were "intolerable." In addition, Mr. Camilión compared the Timermans to Joseph Goebbels, Hitler's Minister of Propaganda, accusing them of spreading the "big lie." The record must be set straight.

Where, Mr. Camilión, have the 20,000 "disappeared" persons gone?

The evidence, which continues to accumulate, is shocking. The most comprehensive report, "Testimony on Secret Detention Camps in Argentina," was issued last year by Amnesty International. It details how and why the camps are able to operate. It is based upon the accounts of two prisoners, Oscar Alfredo González and Horacio Guillermo Cid de la Paz. Amnesty independently verified their testimony, cross-checking the facts with 4,000 other cases it has investigated.

Between November 1977 and February 1979, Mr. González and Mr. Cid de la Paz were imprisoned in five camps, also known as Pozos ("pits") or chupaderos ("drains"): "Club Atletico," "El Banco," "Olimpo," "Omega," and Mar del Plata Naval Base. More fortunate than most, they managed to escape. Their testimony describes the gulag in detail. Activities in the camps were methodically planned and systematically planned and systematically recorded on special forms. "The repressive forces," the report states, "operate in accordance with the following system: kidnapping; interrogation by means of physical and mental torture; period in concentration camps; 'final decision.' These four stages are repeated inexorably."

Most significant, in view of Mr. Camilión's charges, the report makes clear that the camps are not merely detention or labor camps but systemized death camps. According to Mr. González and Mr. Cid de la Paz: "You are only in the camp for a period, the length of which is difficult to predict; afterward comes the 'transfer'. . . . The key to the future was in this word, repeated a thousand times by us and our kidnappers."

Who was "transferred"? "The choice of who was to be 'transferred' was normally made on the basis of our potential or actual use in their opinion. They assessed us on different levels, the main ones being political, military and economic."

How many were "transferred"? "Between 30 and 50 comrades were taken away in the 'transfers.' In the fifteen months we spent as 'disappeared' people, we witnessed approximately ten 'transfers.'" (This is, between 300 and 500 people.)

What the prisoners were told: "During a 'transfer' carried out in January or February 1978, we heard a junior officer from the Federal Police . . . say to those who were in the 'transfer' line: 'We are going to give you an injection. . . . It is only a tranquilizer. The journey to the centre will be very long; you have to go to el Chaco [a province in northern Argentina] in a transport aircraft.'"

What really happened: "In April 1978 a comrade who had been held in [the Navy mechanics' school in Buenos Aires] was taken to the 'Banco.' He told us that he managed to find out about the 'transfers' in that camp. All those 'transferred' were injected with a powerful sedative. . . . Afterwards they were put into a lorry and from there into an aircraft, from which they were thrown into the sea, alive but unconscious."

Who is responsible: Mr. González and Mr. Cid de la Paz personally observed a number of military officers in the concentration camps, including the general who was Chief of Staff at the time, Carlos Suárez Masón, and a General Richieri, chief of police for Buenos Aires Province. They concluded that the camps could not exist without the direct participation of the highest members of the Government, including the man who was President then, Gen. Jorge Rafael Videla; the First Military Council, or junta; the Second Military Council, or junta, and its head, Gen. Roberto Eduardo Viola, who is the new President.

There are at present thousands of "disappeared," including hundreds of children, who may still be alive. The other day, representatives of The Mothers of the Plaza de Mayo—mothers of the "disappeared"—traveled to the United States to plead their cause. They want to know where their children are and who is responsible for their "disappearance" and death. The only hope for those still in the camps, they say, is a full accounting of the "disappeared."

The world is witnessing a crime against humanity. Those responsible must answer for their crimes. In a sense, the generals already have imprisoned themselves. Each day the world learns more about what they have done, and there is nothing they can do to stop this. It is only a matter of time before they will be judged.●

VOTE NO MONDAY ON TOURISM BILL

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mrs. SCHROEDER. Mr. Speaker, while we are trying to balance the budget and cutting, just to cite one example, social security benefits to the elderly, the casino, resort, and hotel industry has the audacity to come to Congress petitioning for a handout.

I want to share with my colleagues some background information on the bill from the Congressional Quarterly, January 31 and May 16, 1981:

SENATE'S QUICK PASSAGE OF TOURISM BILL CATCHES ADMINISTRATION OFF GUARD

The Senate quickly passed a foreign tourism promotion bill Jan. 27, taking the Reagan administration by surprise and creating a politically awkward situation.

The bill (S. 304), almost identical to one (S. 1097) pocket-vetoed by former President Carter, would create an independent agency to help implement national tourism policy. (Veto, Weekly Report p. 112; S. 1097, 1980 Weekly Report p. 3548)

The agency would replace the Commerce Department's U.S. Travel Service (USTS), which some members contended has done an inadequate job.

Carter had vetoed S. 1097 arguing that its separation of toursim promotion from international trade activities was a "seriously flawed management approach." He also criticized establishing a review board with "extraordinary powers" that would be dominated by the travel industry. Carter had wanted to eliminate USTS and transfer its tourism functions to the Commerce Department's International Trade Administration (ITA). (Weekly Report p. 131; 1979 Almanac p. 350)

During confirmation hearings on his nomination as commerce secretary, Malcolm Baldrige showed a preference for using the existing bureaucratic structure to handle promotion of foreign travel, although he said he would study the legislation passed last year. (Weekly Report p. 110)

In a statement released Jan. 29, Secretary Baldrige indicated his displeasure with the Senate action and said he has doubts about the effectiveness of a new independent agency. But he did not say what the admin-

istration would do about the bill, which has been sent to the House.

"This administration intends to cooperate with the Congress on the complicated and difficult [economic] planning that lies ahead, so I was surprised at the quick passage of the tourism bill in the Senate, as I would have appreciated presenting the administration's views," he said.

Bypassing the Commerce Committee, the Senate passed S. 304 by voice vote on the day the bill was introduced by Business, Trade and Tourism Subcommittee Chairman Larry Pressler, R-S.D., committee Chairman Bob Packwood, R-Ore., ranking minority member Howard W. Cannon, D-Nev., and others.

The Senate acted quickly "to make sure everybody knows we haven't given up," a committee staffer said.

A similar bill (H.R. 1311) has been introduced in the House. The Transportation Subcommittee of the Energy and Commerce Committee plans to hold hearings.

SUPPORTERS' ARGUMENTS

Pressler said increased foreign tourism could improve the U.S. trade deficit by funneling more foreign currency into the nation's economy. The tourism industry, he said, contributed more than $140 billion to the domestic economy and provided about 6.6 million jobs.

Carter had argued that the bill would seriously damage executive responsibilities by creating an independent agency outside the president's budget review. But Pressler contended that it did not circumvent the budget process and some agencies now submit budget requests simultaneously to Congress and the president.

In response to Carter's objection that the advisory board would only serve industry interests, Pressler said it would have no regulatory authority and agency control would remain with Congress and the executive branch.

In addition Carter objected that the agency would be "an independent foreign office in miniature." But, Pressler contended that the agency's functions would go no further than those of the USTS.

Noting Carter's contention that tourism promotion would be carried out better by the ITA, Pressler said the industry's importance requires individual attention.

"Hopefully the new administration will quickly realize . . . that if the federal government is willing to work in a partnership with the travel and tourism industry, then the economic health of our country stands to benefit greatly," Pressler said.

Baldrige said, however, "It's very possible" that tourism promotion would get the necessary support from the ITA, which handles balance-of-trade matters. A program like tourism needs "the best supervision, backup support and administration to make it work," he said.

"The record of past independent agencies in this regard does not give me a feeling of optimism about the effectiveness of another independent agency," Baldrige continued in his statement.

PROVISIONS

As passed by the Senate, S. 304:

Created an independent agency, the U.S. Travel and Tourism Administration, to prepare a detailed tourism development plan. The agency would be headed by an administrator, who would be appointed by the president and confirmed by the Senate.

Required the tourism plan to provide for branch offices in foreign countries, consultation with foreign nations about tourism matters, the review of all federal policies and programs that might affect tourism and the development of industry data and technical assistance. The plan must be given to Congress by April 15, 1982.

Provided that no federal official or agency may require the tourism unit to submit budget requests, legislative recommendations or testimony for approval before submitting them to Congress.

Established an advisory board dominated by industry representatives to review the activities of the new agency.

Directed the USTS to provide the new agency with $1 million for fiscal 1981 and provided for the transfer of all USTS activities and assets to the new agency within 180 days of enactment.

Authorized $8.6 million for USTS in fiscal 1981.

Barred the secretary from reducing the funds appropriated below the fiscal 1980 level.

TOURISM BILL RISKS VETO

The House Energy and Commerce Committee May 12 approved a compromise bill to promote tourism in an attempt to avoid a confrontation with the Reagan administration, but warnings of a presidential veto are still in the air.

As ordered reported, H.R. 1311 would replace the Commerce Department's U.S. Travel Service (USTS) with a U.S. Travel and Tourism Administration within the department. The bill would authorize $6.5 million for the new administration in fiscal 1982, plus $1.1 million from International Trade Administration (ITA) funds to create nine new tourism offices abroad.

Also, the new agency would be headed by an under secretary, rather than an assistant secretary, which is the rank of the current USTS chief.

The travel industry backs the compromise.

The administration opposed the bill's original plan to create an independent agency outside the Commerce Department to replace the USTS. The bill also would have authorized $8.6 million in fiscal 1982 to encourage foreign travel to the United States. (Weekly Report p. 655)

Commerce Secretary Malcolm Baldrige had objected strongly to an independent agency, arguing that a new bureaucracy would not aid the tourism industry and that trade matters should be consolidated within the department. The administration wants the tourism office to come under the ITA. (Weekly Report p. 233)

He had warned the committee he would recommend a presidential veto.

A Commerce Department official said the administration still opposes the compromise offered by Norman F. Lent, R-N.Y., ranking minority member of the Commerce, Transportation and Tourism Subcommittee.

The administration believes the bill still would create bureaucratic difficulties, especially by placing an under secretary over such a small office, the spokesman said. An under secretary is the third-ranking department official. The department now has an under secretary heading the $175 million-a-year ITA.

Also, Baldrige fears other special interest groups would try to prove they have political clout by seeking higher ranking officers to handle their programs, the official said.

A subcommittee spokesman said members believe an under secretary would lend needed visibility to tourism promotion.

A letter to the full committee from James J. Florio, D-N.J., subcommittee chairman; Lent; James D. Santini, D-Nev., chairman of the U.S. Congressional Travel and Tourism Caucus; and Gary A. Lee, R-N.Y., a subcommittee member, said the compromise "should allay the major concerns of the Department of Commerce while retaining a strong and independent tourism program."

A measure (S. 304) that would create an independent tourism promotion agency was passed Jan. 27 by the Senate. A similar bill (S. 1097) was cleared by Congress last year, but was pocket-vetoed by president Carter. (Weekly Report p. 233; 1980 Almanac p. 269)●

TIGHTEN UP PAROLE TO KEEP CRIMINALS OFF THE STREETS

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. BEARD. Mr. Speaker, today I am introducing the Parole Reform Act of 1981. It is a simple bill which is designed to do one thing: See to it that criminals serve more of their sentences before becoming eligible for freedom.

Currently under the Federal system criminals are eligible to be set free after serving only one-third of their sentences. A criminal sentenced to life or a sentence of over 30 years—such as a murderer—may be eligible under current law for parole after only 10 years. I think it is unconscionable that vicious criminals could be set free upon society after so short a time.

There are those who say that the only humane purpose of incarceration is rehabilitation, as though the criminal is nothing more than a patient. But I believe, as I am sure the overwhelming majority of Americans do, that along with rehabilitation, incarceration serves the purpose of punishment of wrongdoers, and the purpose of getting them off the streets.

The people, through their elected representatives, have established the severity of punishment that will be allotted for a particular crime. Judges are already given a great deal of discretion in fixing a sentence. To allow the parole board to frustrate both the people's representatives and the trial court by releasing a criminal after having served only one-third of his sentence is antidemocratic. It is a loophole slipped into the criminal justice system by elitist reformers who really blame society, instead of the criminal, for the crime. My bill would plug up that loophole by setting a more reasonable standard. It would increase the duration of a sentence each criminal must serve before becoming eligible for parole from only one-third of that original sentence to a minimum of two-thirds. In the case of a life or 30-years-plus sentence, the minumum is raised from 10 to 25 years.

The U.S. Department of Justice conducted a major study during the 1970's of Federal parolees. The study tracked the records of hundreds of randomly chosen Federal prisoners following their release on parole. It found that 62.5 percent were arrested at least once during their parole for either a crime or a parole violation. Forty-one percent of the sample were arrested more than once. These figures obviously suggest that parole is coming far to easily to prisoners in the Federal system.

I would like to offer one horrifying example that reinforces my belief in the need for stricter sentence enforcement. The March 27, 1981, Washington Post reported that 26 prisoners in Maryland operating on a work-release program—parolees, if you will—were indicted on 61 charges of murder, rape, armed robbery, and narcotics violations allegedly committed while on release under this program. This sort of abuse illustrates that parole plans need to be drastically tightened up. It is ridiculous for known criminals to be released into society like this. My bill would insure that release is not so easy to come by, and I believe that fact, in itself, will help deter future criminals.●

H.R. 1918, PENSIONS FOR VETERANS OF WORLD WAR I

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. MATSUI. Mr. Speaker, I would like to include in the RECORD testimony I presented earlier this week before the Veterans' Affairs Committee on behalf of H.R. 1918, a bill to provide pensions for veterans of World War I.

There are few issues more obviously just than a pension for the veterans and widows of the First World War. I feel almost as if I am treading on some hallowed ground to be addressing this issue. Yet, as one of the younger Members of Congress, born on the eve of the Second World War, I feel a responsibility to support this pension legislation and to let these veterans know that we continue to value their sacrifices. They were the might of America that went nobly to fight "the war to end all wars." That description, of course, turned out to be too optimistic. But it was a conflict in which Americans fought for no selfish gain, no objective but to end the senseless bloodshed on another continent. It was an era of which we can all be proud. Since only one member of this subcommittee was even born before World War I was over, I expect these are feelings you share.

That we have yet to enact a service pension for World War I veterans and widows is, I believe, shameful. For every previous war, pensions had been made all-inclusive within 50 years after the end of the fighting. Those earlier Congresses did not have to concern themselves with competition for Federal funds among a variety of veterans' programs. But the record of their philosophy was clear and consistent: a pension was a compensation for service, with no other limitation. Every veteran and every widow was eligible, regardless of income. I understand that Oliver Wendell Holmes received his Civil War pension while he served on the Supreme Court.

Now that we have so many other programs for more recent veterans, across-the-board pensions for them would be an anachronism. But in this specific area of benefits, the World War I group really belongs to an earlier period. Enacting H.R. 1918 will be writing the last page on a whole volume of history. If we do not act soon, time and death will overtake us, and that page will have to be left blank, to our eternal discredit.

Understand, Mr. Chairman, that the cosponsors of this bill are acutely aware of the fiscal limits proscribing immediate payment of this pension. So are the World War I veterans. The action we are asking for now is mainly symbolic. But it is a symbol of vital importance.

When these hearings are concluded, I would urge you to mark up either H.R. 1918 or some other device which would: first, include all World War I veterans and widows; and second, retain the latitude for paying as much of such a pension as we are able in the future.●

THE CONGRESSIONAL COUNTRY CLUB—A WELL ESTABLISHED CONTRADICTION

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. MITCHELL of Maryland. Mr. Speaker, the following story, reprinted from the December 1980 Washington Afro-American newspaper, recounts the story of George Koch and his countinuous tireless 4-year-long efforts to correct the Congressional Country Club's injustices against its employees. Ironically this posh site of luxurious activities continues to be patronized by many influential Supreme Court Justices, Congresspersons, and others who symbolize democracy and profess to protect the human rights of all people.

The following article is very disheartening. Its notation of Koch's accusations regarding the possible operation of, among other things, an illegal gambling operation on the club's premises, should make us all ashamed that the label "congressional" continues to be worn. Additional improprieties associated with the Congressional Country Club should add outrage and question to this shame.

I urge that my colleagues review the following quite closely:

[From the Washington Afro-American, Dec. 27, 1980]

ONE MAN'S STRUGGLE TO RIGHT A WRONG

(By Miles White)

If you've ever worked at the Congressional Country Club, then read on. You may be owed thousands of dollars in backpay that one club member has said has illegally been taken out of workers' paychecks for over thirty years. As much as a million dollars is involved. And he's gone to court to have it stopped.

If you didn't know that George Koch (pronounced Cook) was a white, middle-class, conservative Republican lobbyist for the grocery manufacturing industry, you might think he was Martin Luther King, Jr. Certainly their stories are similiar, and Koch's courage appears to be as great.

For the past four years, Koch has waged an almost single-minded effort to get the Congressional Country Club to open its financial record books up to public inspection after he discovered that the club had been dipping into employee's wages without their knowledge.

The prestigious country club, whose membership includes a former U.S. President, Supreme Court Justices and a cadre of congressmen as well as other successful establishment types, is located in the plush suburbs of Maryland and boasts two 18-hole golf courses, swimming pools, bowling alleys and other luxuries for the privileged.

Koch's odyssey began in the summer of 1975 when he received a phone call from a waitress at the club who had been fired without a hearing after more than 24 years of service. The woman, Juanita Chavis, said a manager ordered her to move a table that was too heavy for her to lift. When she could not, he fired her.

Chavis called Koch, whom she knew only slightly but whom she thought seemed friendlier than most other club patrons. After a few months of negotiating with club officials, Koch persuaded them to reconsider her case and eventually rehire her.

But like Dr. King, whose involvement in the civil rights movement was sparked by the injustice that Rosa Parks finally refused to take, Koch's involvement in the lives of the club's workers did not end there.

Later the next year, two college students who had discovered their checks short for a summer they worked at the club, complained to the management and got fired for their efforts. Chavis told them to call Koch.

After hearing their story, Koch contacted club officials again and demanded the students be given a hearing. Nothing happened. He referred the students to an attorney who filed a lawsuit on their behalf. The club settled the case for $3,700.

"I couldn't believe morally, ethically or socially these people would steal from little people," he later told a reporter. "Stealing becomes more despicable when you steal from people who are working for you."

Koch finally filed a lawsuit against the club in Montgomery County Circuit Court alleging the club had been skimming employee paychecks on a systematic basis, and

demanded that the records be made public to find out if it were true. The club said no dice. What followed has been a four year court fight which has cost both sides hundreds of thousands of dollars. Koch has spent more than $100,000 of his own money, including some which he borrowed, to finance the suit, which has become sort of his own personal crusade to right some of what's wrong with the world.

"There are enough laws on the books," Koch said recently over a breakfast of grapefruit and coffee. "If enough people just took it upon themselves to enforce the laws already there, it would be a better world."

Koch is a deeply passionate man who cares genuinely about the sufferings of other human beings. Since the lawsuit, he has interviewed hundreds of waiters, and other workers at the club, collecting an awesome file of information and evidence to substantiate financial irregularities he has uncovered at the club.

Besides the questions about worker's pay, Koch has accused the club of conducting an illegal gambling operation in the men's grill, substituting cheap wines for expensive brands, personal use of club personnel by the club's manager, and allocation of employee Christmas Fund Distributions to dead or nonexistent persons.

Koch said the questions about the club's business practices "go to the heart of the club operations and to the integrity of its management." But so far, he has not gotten anything from the club except a hard time and the scorn of fellow club members who oppose his actions. But he is adamant about his motives.

"You can't have double standards," he says, his silver-grey hair giving him the look of aristocratic distinction. "We have closed our eyes to so many things in life that it's catching up with us. We've got to start facing up to some things."

Although most of the workers Koch is defending are black, some are also white, so he has not been able to file a separate discrimination suit or take advantage of groups which combat race and sex discrimination. Still he has pressed on, receiving little outside help save the support and reassurance of his wife of 30 years and his six children.

Koch's life has not been the same since the series of events began. He still spends hours and hours of his spare time every week to research the case and compile thousands of pages of testimony and documents. He has gained notoriety, although reluctantly. Stories about his campaign against the club have appeared in both local and national newspapers.

And last month, the Montgomery County NAACP honored Koch with a special luncheon in his behalf, praising his resolve to correct the injustices against workers at the club and improving their working conditions. Since he began his campaign, employees at the club now have a dental plan, improved working conditions, and the paycheck deduction that has been a part of its practice since 1948 has been eliminated.

Koch is now working with Maryland Attorney General Steve Sachs to locate persons who have worked at the club and since left who may be entitled to backpay awards because of the pay-skimming scheme. Members of Congress, including conservative Senator Jesse Helms and Senator George McGovern, have also lauded Koch's efforts champion the rights of the powerless.

The most "gratifying" reward he gets however, according to Koch, is the expression of thanks from some employees he has helped. He is a kind of cult hero to the hundreds of workers who have benefited from his efforts. Yet he is a near outcast from the ranks of other highbrowed club members who have sometimes harassed him as being a "troublemaker." But despite the hell he has gone through Koch says he would do it again if he had to.

The 64 dollar question now, is where has the money been going? "That's the bottom line question," Koch says. And apparently, club officials are not very interested in answering it. To do so might raise a battery of other questions to look at. Were club managers getting kickbacks? Did the money finance the gambling operations? Is organized crime involved? Are any prominent club members, politicians or otherwise, involved in shady business dealings?

While the subject might seem purely a localized issue, some indications point to a wide interest in how the case is resolved. Club managers from other parts of the country have contacted Koch about it. But as yet, no firm resolution seems in sight.

Koch's determination to help a small group of dishwashers and housekeepers is a spirit that is sadly unique since the height of the civil rights movement. He feels that only such actions can bring it back again. "The country cannot live by laws alone," he concludes. "It's a question of morality."●

SMALL BUSINESSES UNDER ATTACK

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. WEAVER. Mr. Speaker, in the past 9 years, more than 1,750 service stations have closed in the State of Oregon alone. Hundreds of stations close nationwide every year.

Why is this happening? It is not because people have stopped buying gasoline, or have ceased having their automobiles repaired. In fact, a certain sector of the retail service station industry is making record profits, and is even buying up new businesses as fast as it can.

Who could this be? None other than this country's major oil companies who, in addition to making record profits through price manipulation, are growing fatter and fatter through ownership and lease of independent stations.

These corporations are using their record profits, and well-practiced ability to successfully exercise the most predatory of business practices—to buy out, or otherwise squeeze out, small independent service stations.

To correct this problem, I have cosponsored H.R. 1362—introduced by BERKLEY BEDELL—the Small Business Motor Fuel Marketer Preservation Act of 1981. This act protects the rights of the service station owner in several ways:

First. The act gives service station owners the first chance to buy the stations they lease if the oil company decides to sell it.

Second. It prohibits oil companies from directly operating retail stations.

Third. It mandates rack pricing so that everyone starts from a fair fuel cost. It allows the station owner to go to alternate suppliers for their gasoline.

Earlier this year, I wrote to service station owners in Oregon asking for their support for this legislation, and for their comments. I would like to share some of their responses with you.

A former service station operator in John Day, Oreg., wrote:

Though it is too late to help us, I felt compelled to write just to encourage your efforts to help the service station dealers who somehow manage to stay in business despite the unfair tactics of their companies. Union Oil was determined to close our station—with the new lease agreement they reluctantly offered, came an enormous increase in rent. But it was a sign or close up choice. We chose to sign and at least make the attempt to remain in business—for the years we worked hard at loyally promoting their products, we felt we have been stabbed in the back.

In the same vein, a struggling service station operator in Lincoln City, Oreg., agreed:

While reading your letter regarding the Small Business Motor Fuel Marketer Preservation Act of 1981, my faith in my fellow man and government raised several points. I am in my 27th year at this location and was fortunate enough to buy the property and rebuild it prior to 1972. Since that time, the service station business and the oil company's policy have changed completely. All for the worst.

A longtime dealer in Eugene, Oreg. wrote and said:

The Small Business Motor Fuel Marketer Preservation Act of 1981 you have introduced could well be the salvation of the small operators—I only hope it is not too late. If the present situation continues, I would guess that there won't be but a handful of leasing dealers left in the Eugene area within 2 years time.

And, a Winston, Oreg., Shell dealer expressing the station owners' desperate need for this legislation wrote:

I have been in the service station business for more than 30 years. It has never been an easy occupation due to the tactics of the oil companies. Now it seems that they are more determined than ever to completely freeze out all dealers such as myself. I only hope that I will be able to hold it all together until such time as you and your colleagues can pass the Small Motor Fuel Marketer Preservation Act of 1981.

This is just a small sampling of the huge number of letters I have received from Oregon service station owners. I strongly urge you to talk to dealers in your district to see how devastating the conditions these dealers face are.

It is our responsibility to protect the small entrepreneurs who keep the free enterprise system operating smoothly. Let us put an end to the tragic loss of

family business caused by subsidization, price discrimination, abuse of leasing practices, harsh credit terms and other predatory practices. Let us stop the big oil companies from squeezing out the small stations of America.

I strongly urge you to cosponsor H.R. 1362. If you desire additional information, please contact BERKLEY BEDELL, or myself.●

TRIBUTE TO LIEUTENANT GENERAL GRAVES

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. BROOMFIELD. Mr. Speaker, the retirement of Lieutenant General Graves marks the end of a brilliant career spanning more than 35 years in the U.S. Army. Lieutenant General Graves, completing his service as the Director of the Defense Security Assistance Agency, has exemplified our country's finest qualities of leadership, dedication, scholarship, and management. His excellent contribution to our various security assistance programs has enabled the United States to solidify international relationships with important allies in vital areas throughout the world. Lieutenant General Graves' prior service as Director of Military Applications, U.S. Atomic Energy Commission/ERDA, was of inestimable value in insuring the security of present and future generations of Americans. I cannot possibly note all of his accomplishments, but let me state that wherever Lieutenant General Graves has served, whether in Washington, Korea, Vietnam, or Europe during World War II, he has distinguished himself among his peers.

Lieutenant General Graves' service to the Nation, his pursuit of excellence in accomplishing his tasks, and his outstanding vision in policy formulation, have been deeply appreciated by myself and my congressional colleagues. While his retirement no doubt marks a joyous time in his life, a time in which to pursue activities long put off, I know that the Congress and the Nation will miss him.●

THE EXCLUSIONARY RULE MUST BE ABOLISHED

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. BEARD. Mr. Speaker, today I am introducing a bill to eliminate and establish an alternative to the exclusionary rule in Federal criminal proceedings. The exclusionary rule is a creature purely of the Supreme Court—it is not called for by the Constitution—which mandates that credible and valid evidence must be ignored in a criminal proceeding if there was the slightest mistake, no matter how technical, in the compliance by police officers with the individual rights safeguards of the Constitution.

This rule was imposed by the Supreme Court on Federal proceedings in the case of *Weeks* v. *United States,* 232 U.S. 383 (1914), and extended to State criminal proceedings in *Mapp* v. *Ohio,* 367 U.S. 643 (1961). I an hopeful that by repealing the exclusionary rule for Federal criminal proceedings, its application to the States will be dropped as each State develops alternative means of redress for individual rights violation by its law enforcement authorities. Three members of the Supreme Court have gone on record against the exclusionary rule. See, for example, Chief Justice Burger's opinion in *Bivens* v. *Six Federal Agents,* 403 U.S. 388 (1971), where he stated that the exclusionary rule "creates a damage remedy not provided for by the Constitution and not enacted by Congress," and the Chief Justice called on Congress to act:

> Reasonable and effective substitutes can be formulated if Congress would take the lead, as it did, for example, in 1946 in the Federal Tort Claims Act. I see no insurmountable obstacle to the elimination of the (exclusionary rule) if Congress would provide some meaningful and effective remedy against unlawful conduct by government officials.

My bill does just that. It allows for disciplinary action by law enforcement supervisors against officers who intentionally violate the constitutional rights of citizens, and it allows the citizen to sue the Government for compensatory and punitive damages. For a criminal convicted of the crime for which the evidence was seized, only compensatory damages would be available.

The problem with the exclusionary rule is simple: It punishes the victim for the misdeeds of the police, even where those misdeeds are so trivial that "misdeed" is hardly the correct word. The exclusionary rule only helps criminals, because it provides no redress whatsoever, as my bill does, to innocent victims of police misconduct. The exclusionary rule acts only to throw out valid evidence of the criminal's guilt, thus only criminals can benefit from it, because if the person were innocent, there would be no evidence of crime to seize.

The exclusionary rule has never been utilized in England or its Commonwealth countries, where the illegality of a seizure of perfectly good evidence does not affect its admissibility at trial. Police violators of the law are held personally accountable for their misdeeds—it is not the victim of the crime who suffers by watching his tormentor go free.

Crime is increasing at a fearsome pace in America, Mr. Speaker. I do not hold out the prospect that this bill will provide immediate relief, but what it will do clearly is make if far more likely that the guilty do not go free because of some trivial procedural error by officers acting purely in good faith.●

A TRUE DEFENSE: AN ABM SYSTEM

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. PAUL. Mr. Speaker, a growing number of Americans who support the strongest possible defense for the United States are speaking out in opposition to the MX missile system, and the absurd notion that the only defense Americans should have against attack is the threat to bomb the aggressor country into oblivion.

Such men as Gen. Daniel Graham, Senator MALCOLM WALLOP, and Mr. James J. Kilpatrick have pointed out that instead of building an MX racetrack in the desert—and then building a ballistic missile defense system in order to keep the Soviets from overwhelming the MX—we should reconsider our basic strategic doctrine and move toward a truly defensive system such as a space-based ABM system. The billions planned for the MX system would be infinitely better used to build a continental defense for the United States.

My good friend M. Stanton Evans, a noted journalist, recently wrote a column on this subject that I recommend every Member should read:

> Under a plan approved by President Carter, some 200 [MX] missiles would be shuttled around among 4,600 shelters in sparsely settled regions of Utah and Nevada, connected by some 9,000 miles of newly constructed highways. The cost of the arrangement has been variously estimated at $33 billion to $68 billion—making it, as U.S. News avers, the single most expensive weapons program in the nation's history.
>
> As might be expected of a program that is at once novel, expensive, and defense-oriented, the MX idea has come under severe attack, and the Reagan administration, while favoring the concept, is reviewing the busing mode approved by Carter. Such reconsideration is strongly encouraged by residents of Utah and Nevada, who don't want the MX on the premises, and who are represented by Sens. Jake Garn and Paul Laxalt, both close to Reagan.
>
> All of which is a prime example of the confusions that inevitably arise whenever a major strategy is grounded on a mistaken premise. When the assumptions behind a policy are in error, twists and turns that aim to correct for the original difficulty frequently serve to make the problem worse.

Often the difficulty can be solved, if at all, only by going back and correcting the conceptual error made at the very beginning.

In this case, the seminal confusion is the assumption that the United States should not have any defenses against incoming Soviet missiles. This assumption derives from disarmament lobby theories about a balance of terror between the United States and the U.S.S.R., in which each possesses the power to obliterate the other and neither has an effective defense against the onslaught. To achieve this state, it is considered desirable that the U.S. civilian population be deprived of defenses against potential nuclear devastation, which reassures the Soviets of our good intentions and encourages them to follow suit.

While it may seem improbable that anything so palpably stupid could be the basis of official policy, rest assured that this has been the major governing principle of American strategy for upwards of a decade. It has been in obedience to such notions that we have engaged in SALT negotiations with the Soviets, renounced development of anti-ballistic-missle defense (AMBs) which would seek out and knock down in-coming projectiles, and let our air defense lapse into virtual nonexistence.

It has been our refusal to develop an ABM which—combined with trade policies that provide the advanced technology necessary for modern missile guidance to the Soviets—has served to make our land-base weapons increasingly vulnerable to enemy attack. Having deprived our civilian population of effective defenses in order to gamble everything on our deterrent, we suddenly find that we have left the deterrent open to attack as well. Hence the need for an MX expedient to hide from missiles that we can't knock down.

This is piling one absurdity on another. The obvious answer to this mass of confusions is to undo the original error which says we shouldn't have any defenses against a missile onslaught. The Reagan administration should spend the MX money to develop a workable system of antimissile defenses instead.●

HOW TO REDUCE THE PRICE OF ELECTRICITY

HON. LARRY E. CRAIG

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. CRAIG. Mr. Speaker, a few weeks ago I had the privilege of chairing and moderating a major energy conference in my State. It provided Idahoans the opportunity to assemble some of our region's foremost energy experts for a discussion of our mutual concerns, and to better clarify and understand the challenges we face in providing for our energy needs.

The 1981 Idaho Energy Conference was highly successful and will indeed help us take appropriate steps to strengthen our State's economy and project its environment through energy planning.

The recently enacted Pacific Northwest regional power bill stipulates that a projection be made of our energy needs through the 21st century. Current estimates show that in 1990 we will face an energy gap, or supply shortage, of from 11 to 22 percent, the 22-percent shortfall being the more likely to occur if the Washington Public Power Supply System's nuclear plants 4 and 5 are delayed in becoming operational past that year.

One would not have to exercise his or her imagination too hard to conjure up the bleak economic picture of our State, if we do indeed find ourselves in this unfortunate situation, just 9 short years ahead.

I am sure in that context of frustration and crisis we could then orchestrate some dramatic go-for-broke solutions to show that Congress is working on the problem. It is much harder to face up to difficult choices now, amid the complacency of a temporary oil glut, which, I might add, some experts believe is a device used by the Saudis to retard our drive to throw off our dependency upon their product.

Crisis reaction is not the answer.

In this regard I should like to include in the RECORD a recent article addressing the energy needs of a region of our country where the effects of energy shortfall have, perhaps, made their strongest impression. Written by Robert V. Kline, a research fellow at the Energy and Environmental Policy Center of Harvard University, and Richard Wilson, a professor of physics, also at Harvard, this article is an example of how complex technical proposals frequently face their ultimate acceptability test on the basis of very down to earth, practical considerations, based on actual costs to consumers. I sincerely believe the conclusions of these learned gentlemen have practical application for the Pacific Northwest as well.

The article follows:

[From the Christian Science Monitor, May 8, 1981]

HOW TO REDUCE THE PRICE OF ELECTRICITY

The price of electricity is rising faster than inflation is raising the general price level. As a result of high electricity prices, people are more critical of the planning by utility companies and are putting increasing pressure on these utility companies through the public utility commissions. Unfortunately the direction of this pressure is often wrong, and will in itself lead to future price increases instead of price reductions.

New England is a case in point.

New England, even in 1981, generates 60 percent of its electricity from oil. In 1971 some oil was bought by utility companies at $1.75 per barrel—about four cents per gallon. Now it cost 17 times as much ($30 per barrel or 70 cents per gallon).

The only way to avoid steadily increasing prices of electricity is to break the dependence upon oil by replacing existing generating stations by other power stations which use cheaper fuels. These power stations must be paid for; yet the only action on prices that an electric utility can take without approval by a public utility commission is to pass through this increase of oil price to the consumer. This is allowed legally by the Fuel Adjustment Charge, which was originally intended to force the utility companies to pass on reductions in oil prices!

In contrast, utility companies have problems in paying for the needed capital for new construction; public utility commissions neither want them to charge in advance, nor do they want to allow enough return on capital, in this time of inflation, to encourage banks to lend the money. In Massachusetts utility companies have been trying to invest in the Seabrook nuclear power facility for two years but have until now been prevented from doing so by the Massachusetts Public Utility Commission.

The recent decision of MPUC to allow further purchases in Seabrook is a sound one, but it is not enough. the commission must make sure that utilities are financially able to meet their commitments to Seabrook. It is politically tempting to blame untilities for problems that owe much more to the failure of the region's utility commissions to support nuclear power wholeheartedly a decade ago. The result is worse than stagnation, because future price increases are built into the system.

There are two types of new power plants that are possible in New England; coal, including conversion of oil to coal, and nuclear. There are only a few power plants for which it is ready to convert to coal. For many power plants there is no space for coal storage, or waste storage, or adequate pollution suppression devices. It would seem unwise to convert the plants in the major cities of Boston and New York. But there are several new nuclear power plants being planned and under construction—Millstone 3, Seabrook 1 and 2, and Pilgrim 2. If these power plants are being delayed by state regulatory and political actions.

We therefore decided to study in detail the cost savings to the New England Region when these plants are finished. If, for example, Millstone 3 had been finished in 1978 when planned, it would have cost a little over a billion dollars—or about $900 per kilowatt. At that cost the wholesale price of electricity from this plant would now be about 4.4 cents per kilowatt hour, which is less than the 5 cents per kilowatt hour from burning oil alone. Moreover, the 4.4 cents would have declined as the power plant was paid for falling to 3.5 cents per kilowatt hour in 1990.

Although the cost of power plants is rising even faster than inflation, the cost of oil is also rising faster than inflation. As residual oil costs approach even present world oil prices the fuel cost for a kilowatt hour of electricity from oil will increase from 5 cents to 6 cents.

We therefore draw the important conclusion: now and in the forseeable future it is economic to build new nuclear power plants, and throw away oil-fires power plants, as the new plants are finished. Yet public utility commissions have erroneously chastised utility companies for having "too much excess capacity"—overlooking the fact that the people are best served by building until all oil-fired electrical generating capacity is excess.

We have added up the total cost that New England consumers will pay in the next decade, assuming that they use the same amount of electricity as today, and assuming that inflation continues at 10 percent and oil prices go on rising. If we do not finish these new electricity plants, we will spend $39 billion at wholesale prices. If we had finished them on time, we would be spending only $26 billion. The difference is a $13 billion charge for the delays we have

had. If we complete these plants now as quickly as possible, we will spend $31 billion. If oil plants are converted to coal in the few cases where it is feasible, we will spend a few billion less.

We have omitted many costs of an indirect nature: mining hazards associated with coal; oil spills; and nuclear safety problems. These are not part of the direct costs to New England. In the long term, prices of nuclear electricity and coal prices are likely to be comparable over much of the country with nuclear having a 10-20 percent edge in New England.

Utilities have been trying to buy hydroelectric power from Quebec since 1965 but have failed. The capital costs of electric power from the sun or wind in 1980 remain considerably higher than nuclear or coal. In 1970 planners preferred nuclear power to the only reasonable alternative, coal, for environmental reasons. We believe they were right, and that those who claim that nuclear power is unacceptably dangerous to the environment are tragically wrong.

New England will pay a stiff price for delaying these power plants. Losses can be limited by delaying no further. The political actions can be reversed, and then the capital can be found for rapid completion of these and any other power plants, coal or nuclear, needed to disconnect the region from expensive foreign oil.●

TRIBUTE TO SOUTHERN CALIFORNIA MOTION PICTURE COUNCIL

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. WAXMAN. Mr. Speaker, I would like to call attention to the fine accomplishments and goals of the Southern California Motion Picture Council (SCMPC). At a time when many Americans are deeply concerned about the quality of motion pictures and television programs, this organization is striving to improve the caliber of the industry's productions. Among the objectives of the council is to furnish unbiased information and to aid in the building of audiences for high-quality movie and television productions. The SCMPC encourages parents to take an active, responsible part in television program selection in their homes.

Toward these ends, the SCMPC compiles a directory of meritorious films for all audiences, which it distributes nationally to associations such as PTA's, libraries, and religious institutions. While some organizations have called for the boycott of certain films deemed by them objectionable, the council finds its own directory and other efforts a more effective and sensitive way of educating viewing audiences.

Each of the movies listed in the directory has been recognized for its excellence at one of the council's bimonthly meetings. The members of SCMPC hope that their distinguished awards will focus enough attention on these superior films to motivate audiences to see the productions. Consequently, the council hopes that the increased viewership will serve to promote production of the very best in programing.

Mr. Speaker, on behalf of the residents of the State of California, and of all others who continue to benefit from the efforts and services of the Southern California Motion Picture Council, I wish to express my profound appreciation and support of this organization.●

NORTH CONWAY—A NICE PLACE TO LIVE

HON. NORMAN E. D'AMOURS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. D'AMOURS. Mr. Speaker, with all the bad news in the world today it is a pleasure to report that there are still places one can call "home" where neighbors still help neighbors, and the simple pleasures of peaceful living can still be enjoyed.

Judy Mann's excellent column in today's Washington Post describes one family's move from the trials and tribulations of Metropolitan Washington to the serene and friendly environment of North Conway, N.H. I recommend it to all my colleagues.

COUPLE PURSUES DREAM AND FINDS IT IS REAL

(By Judy Mann)

This is a story about a dream, the kind we all have at one time or another, but the kind most of us don't pursue, opting instead to suffer occasional twinges of dissatisfaction with the life we have chosen rather than risk losing it all. But for Marilyn and Larry Miller, the dream turned out to be something real, which is what makes this a story.

The year was 1975. The Millers' first store at 14th and Fairmont streets NW had been burned during the riots and they had spent the seven intervening years trying to make a go of it with the Loudoun Supermarket. They had three children, a home in Reston and the kind of 12-and 14-hours days that owners of small businesses put in when they are competing with supermarket chains. It wasn't working, and when they faced the inevitable conclusion that their market wasn't going to make it, they sat down and looked at the way they lived and decided to change it. "We were like ships passing in the night," recalls Marilyn. "We spent very little time with ourselves or with our children."

They had always liked New England, and went to visit friends in the Boston area, thinking of relocating there. "It wasn't what we were looking for," says Marilyn, "althought at the time we couldn't have given a good definition of what that was." Larry Miller thought it was Lake Winnipesaukee, the magnificent New Hampshire lake he discovered in the almanac. But when they went there, they found that it wasn't what they were looking for. "That really got us down," says Marilyn. "We felt the silver lining we were trying to find just didn't exist."

They decided to visit friends in Maine. The shortest route on the map took them through a town called North Conway in New Hampshire. "It was on Easter Sunday and snowing," says Marilyn. "We hit the entrance to the Mount Washington valley and we drove about a mile and a half through the main thoroughfare and Larry parked the car by the side of the road and got out and walked around and got back in and he said 'I don't know what's here, but this is where we're going to live.'

"And I, not being very calm about the whole thing, told him he was out of his mind," says Marilyn. But the friends they visited in Maine told them that North Conway was, indeed, the kind of neighborly, small town they were looking for. They returned through North Conway and found a real estate agent. "The more he showed us the area, the more we fell in love with it," says Marilyn. All they needed was to find a business to run. That night, the agent called them and told them of a restaurant that seemed "unsettled." The next day, they met the owner, made an offer and 24 hours later had themselves "The Big Pickle." Both Larry and Marilyn were born and raised in Washington. "We did our best to pursuade our family and friends whom we had spent all our lives with that what we were doing was truly a super thing for us," says Marilyn. Within three weeks, the Millers had sold their home, liquidated their business and moved to North Conway. "About 90 percent of our negotiations right down to the purchase of our house and establishment of our business was solely based on handshakes and just the intent of man's good will," she said. After settling on the house and business, however, they had very little cash. The house they bought was "affordable," as Marilyn puts it, because it had a defect: when it rained heavily there was a threat of serious flooding on the first level. The real estate agent told them it could be corrected. "So we took a chance and felt if we could get through the first year without a monsoon we could get to the problem." Within three weeks of moving in, there was a downpour and neighbors called them at work to say the house was filling with water. A plumber came to pump the water out and told them it would take $1,400 to correct the problem. They didn't have the money. "He looked at us and said, 'You have a problem; I will correct it, and when you are able to pay me, you pay me.' Fourteen months later, we paid him."

The Millers have become active in community affairs and take frequent trips with their friends and children in the north country. Their restaurant is only open for lunch and breakfast, so that both of them have had the experience for the past six years of being home when their children get out of school. They own a four-bedroom home on an acre of land, and are within minutes of mountains and lakes and recreational facilities that tourists spend thousands of dollars to see once a year. "We could not afford to live in the city based on the income we are making here," says Marilyn, "but based on what we are earning and the way we are living, we are far ahead of the game."

"You don't have the tension that you have in the city," says Larry. They feel freer about leaving their home unlocked, their children alone or letting them do things on their own. "We go back to Wash-

ington once or a twice a year. We enjoy our family and friends, but the traffic and hustle-bustle, I don't know how people do it. I was always a small town person and didn't know it." says Larry.

The Millers took a chance, and for the first two years sacrificed a lot to make it work, "right down to our eating habits," says Marilyn. Their only regret is that they didn't do it sooner. "We took a deep breath, packed our bags and went after a dream," she says. "And we were lucky, because we found it."●

REAGAN TAXONOMICS OR HOW TO STIMULATE R. & D. TO THE PRIVATE SECTOR

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. RITTER. Mr. Speaker, shortly we will begin debate on the tax bill, a key element in the President's economic recovery program. As a scientist, I would like to take this opportunity to highlight some of the tax initiatives for research and development being considered.

A frequent criticism heard these days is how the Reagan administration is "cutting back on R. & D." First, contrary to the opinions of those folks who make a business out of government grants and contracts, government R. & D. is not the only game in town nor should it be. Second, it is important to note that reducing the growth rate of government-sponsored R. & D. does not mean that the administration is anti-R. & D. High-priced, long-term research with a potential for a valuable payoff for the entire society, like the National Institute of Health's research or basic science and engineering research conducted by the National Science Foundation, will continue. Frequently, much government research never finds its way off the dusty shelves where reports are stored, or it takes too long and costs too much to get useful information or products. Let us face it, many studies end up serving no useful purpose; wasting taxpayer's dollars. There is both a need to lessen the waste of our tax money on unnecessary or superfluous research and a need to encourage necessary and vital R. & D.

The big question—the most difficult to answer—is, "How does one decide what is superfluous or necessary and vital R. & D.?" Well, payoff in the marketplace might help with the answer. R. & D. which gives us the invention and the innovation to stimulate the economy, create new jobs in new areas, and enhance productivity is a big part of the answer to beating inflation. I wish there were easy answers to identify where these R. & D. efforts should be, but there are not. The best we may be able to do with nearly a $3 trillion economy is to allow more of the decisions about R. & D. be made by those who will potentially profit from the financial and professional risks taken; individuals who seek to promote new ideas and products and processes.

The goals of federally funded R. & D. research can stray to goals of self perpetuation. On the other hand private sector R. & D. has some natural, built-in safeguards against the waste of money and resources. A government bureaucrat cannot feel the same pressure for financial efficiency like a businessman working for survival.

With these principles in mind, there are some tax proposals being considered in Washington which would encourage research in the private sector. First, reducing the taxes paid by individuals on earnings from entrepreneurial efforts gives reward to the risk of leaving secure corporate or government environments to test one's mettle in the marketplace. Starting solo has risks and the rewards need to be there as well. Thus, the administration's proposed 25 percent, 3-year reduction in tax provides greater reward to stimulate individuals to get out and try their own ideas. Proposed capital gains tax rate reductions from 28 percent to 20 percent will further work to make reward more competitive with risk. These features should have a powerful impact on the newer, smaller, more innovative firms where personal income tax schedules are more often used.

Second, the administration tax package also provides a 25-percent tax credit for increases in wages and salaries related to R. & D. work. Third, a plan, with bipartisan Senate and House sponsorship, would extend the 25 percent beyond wages and salaries to include materials, lab supplies, and most important, the cost of computer time. A small new business with $100,000 invested in R. & D. might get a $25,000 credit under this plan.

The administration's proposal to provide a 25-percent tax credit for increase in wages and salaries related to R. & D. work encourages the funneling of bright and innovative minds into research; the type of research that will bring payoffs in new technology. To illustrate the way the tax credit for R. & D. wages would work, consider a company whose average R. & D. wages for 1982-84 is $100,000. In 1985 the company pays $200,000 in R. & D. wages. The company would be allowed to take 25 percent of the increase—0.25 by $100,000—or $25,000 off the top of its tax bill in addition to the tax deduction normally taken for wages in 1985. The $100,000 increase in R. & D. wages in 1985 would be returned at an annual 46 percent corporate tax rate through this deduction bringing the total tax benefit to $71,000. The company's aftertax cost on R. & D. wage increases would be $0.29 on the dollar for 1985 as opposed to the present aftertax cost of $0.54 on the dollar.

R. & D., applied in the marketplace, is critical to the health of our economy. It is preventive medicine against inflation and falling productivity. We need to once again allow the technological pioneers of this country the means to compete with one another; to provide the improvements in the quality of life that we all seek. For that, we need to regard innovators and inventors once again as heroes. They have been too long submerged in an overbureaucratized, overtaxed, and overregulated economy where litigants are kings. Let us start by making R. & D. a profitable business for a change.●

MANDATORY ADDITIONAL SENTENCES ARE THE MOST EFFECTIVE WAY OF DEALING WITH GUN-USING CRIMINALS

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. BEARD. Mr. Speaker, today, I am introducing a bill designed to deal with one of this country's worst problems: The problem of violent crime involving the use of firearms. I believe that the available facts show that the only truly effective way to deal with handgun crime is through mandatory minimum sentencing. That is what my bill does.

In brief, my bill, which applies to Federal crimes, would tack on an additional mandatory 5-year sentence to that sentence already imposed for the crime if the criminal used a gun in the commission of that crime. In the case of a second conviction, an additional 10-year mandatory sentence would be tacked on to the sentence for the crime itself. For example, a criminal convicted of armed robbery might get 7 years for the robbery. My bill would require an additional 5 years for the use of a gun in that crime; 10 years if a second offense.

The important points about the additional sentence are these: First, the sentence is mandatory; the judge cannot suspend it or put the criminal on probation, nor will the criminal be eligible for parole during the 5-year period. Thus the bill says to every would-be gun-using criminal: "Use a gun. Go to jail." That is not currently the case, as many criminals go free despite their crimes, due to suspended sentences or early parole.

Second, the additional sentence must run consecutively, not concurrently, with the sentence for the crime itself, thus it is not superfluous.

Third, the existence of the additional mandatory sentence may not be commented upon to the jury at trial. Critics of mandatory sentencing say that juries sometimes will acquit a defendant rather than condemn him to a mandatory sentence. Whether this is true or not, my bill obviates the problem by prohibiting mention of the additional sentence during the trial on the defendant's guilt or innocence.

The facts show that mandatory sentencing for armed crimes is far more effective in deterring criminals than gun control laws. Arizona enacted a 5-year mandatory sentence for gun crimes in 1974; over the ensuing 3 years, armed robberies fell 25 percent, South Carolina enacted the same type of statute in the same year; within 3 years, the armed robbery rate had fallen 15 percent. Florida, in 1975, enacted a mandatory 3-years-to-life sentence for use of a gun in a felony; the following year, handgun murders were down 21 percent, armed robberies down 38.5 percent. Michigan, in 1976, established a mandatory 2-year sentence for carrying a firearm during a felony; the following year, armed robberies were down 30.4 percent, firearms murders down 33.7 percent.

Mandatory sentencing means certainty in sentencing. It tells all criminals in simple language that using a gun means going to jail—period. No parole, no suspension—just jail. As the tide of violent crime rises, threatening to engulf us, it time for the law-abiding citizens to deliver one clear, unmistakable message to the forces of violence: We are not going to take it anymore.●

PROCLAMATIONS IN OBSERVANCE OF CAPTIVE NATIONS WEEK

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. DERWINSKI. Mr. Speaker, as we continue to mark the 23d observance of Captive Nations Week, I wish to insert several proclamations issued from the Governors of the States of Virginia, West Virginia, Michigan, Indiana, Mississippi, and Maine. This represents a broad range of spiritual support for those nations enslaved under the bandage of communism.

CERTIFICATE OF RECOGNITION

By virtue of the authority vested by the Constitution in the Governor of the Commonwealth of Virginia, there is hereby officially recognized: Captive Nations Week, 1981.

Recent events in Poland remind us that people in various parts of the world are still engaged in struggles to preserve their freedom, and look to America for inspiration and understanding.

I, therefore, join the President and the Congress, which have set aside the third week in July as CAPTIVE NATIONS WEEK, in calling the significance of this celebration to the attention of the people of Virginia.

JOHN N. DALTON,
Governor.

PROCLAMATION FROM THE STATE OF WEST VIRGINIA

Whereas the imperialistic politics of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of many countries; and

Whereas the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas the freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas the Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies and activities, expressing their sympathy with and support for the just aspirations of the captive nations.

Now, therefore, I, John D. Rockefeller IV, Governor of the State of West Virginia do hereby proclaim July 12 through July 18, 1981, as Captive Nations Week in West Virginia.

JOHN D. ROCKEFELLER IV,
Governor.

EXECUTIVE DECLARATION FROM THE STATE OF MICHIGAN

The desire for freedom and liberty burns in the hearts of people throughout the world, including those living in nations dominated by the policies of Communist Russia.

Freedom-loving people of Albania, Armenia, Bulgaria, Byelorussia, Croatia, Czechia, Estonia, Hungary, Latvia, Lithuania, Poland, Rumania, Serbia, Slovakia, the Ukraine and other captive nations look to the United States as the vanguard of human freedom.

Therefore, I, William G. Milliken, Governor of the State of Michigan, do hereby declare July 12-18, 1981, as Captive Nations Week in Michigan, and urge all citizens to dedicate time and effort to the goal of freedom and liberty for all people throughout the world.

WILLIAM G. MILLIKEN,
Governor.

PROCLAMATION FROM THE STATE OF INDIANA

Whereas the imperialistic politics of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czechoslovakia, Latvia, Estonia, Byelorussia, Romania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Servia, Croatia, Slovenia, Tibet, Cossakia, Turkestan, North Vietnam, Cuba, Cambodia, South Vietnam, Laos, Afghanistan and others; and

Whereas the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas the freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas the Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week of July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies and activities; expressing their sympathy with and support for the just aspirations of the captive nations;

Now, therefore, I, Robert D. Orr, Governor of the State of Indiana, do hereby proclaim the week of July 12-18, 1981, as Captive Nations Week in Indiana, and call upon our citizens to join with others in observing this week by offering prayers and dedicating their efforts for the peaceful liberation of oppressed and subjugated peoples all over the world.

ROBERT D. ORR,
Governor.

PROCLAMATION FROM THE STATE OF MISSISSIPPI

Whereas the imperialistic politics of Soviet Communists makes a mockery of the idea of peaceful coexistence between nations, and has led to movements of aggression and the annexation of the enslaved nations and the people of these lands; and

Whereas the desire for freedom and independence by the people of those subjugated nations constitutes a powerful deterrent to any ambitions of those communist leaders to provocate a major war; and

Whereas the freedom loving peoples of the captive nations look to the United States as a powerful and untouched citadel of human rights; and

Whereas the third week in July each year has been set aside in order to express sympathy with and support for the aspirations for the recovery of their freedom and independence:

Now, therefore, I, William F. Winter, Governor of the State of Mississippi, do hereby proclaim July 12-18, 1981, as Captive Nations Week in Mississippi, and call upon all Mississippians to join in observing this week with appropriate ceremonies and activities and to reaffirm their dedication to the ideals which unite us and inspire others.

WILLIAM F. WINTER,
Governor.

PROCLAMATION FROM THE STATE OF MAINE

Whereas the aggressive and imperialistic policies of Communist Russia have led to the subjugation of over a score of countries in Eastern Europe, Central Asia, and elsewhere; and

Whereas these captive nations constitute a substantial portion of the world's population which has been denied what we Americans consider traditional liberties; and

Whereas the yearning for freedom is irrepressible, eternal, and worthy of our assistance and support in every possible way; and

Whereas the Congress of the United States has designated the third week in July of every year as Captive Nations Week until all those nations are relieved of the yoke of oppression;

Now, therefore, I, Joseph E. Brennan, Governor of the State of Maine, do hereby

proclaim Sunday, July 12 through Saturday, July 18, 1981 as Captive Nations Week throughout the State of Maine and urge all the citizens of our state to observe this week with appropriate ceremonies and activities to express sympathy and support for the aspiration of captive peoples.

JOSEPH E. BRENNAN,
Governor.●

OUR DEBT TO DEMOCRACY

HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. WYLIE. Mr. Speaker, Phil Bronsdon, a senior at Dublin High School in Dublin, Ohio, and one of my constituents, has received the U.S. Government Award presented annually by the Dublin Area Women's Republican Club for his views, which he has entitled, "Our Debt to Democracy."

I am told that Phil Bronsdon feels strongly about these expressed responsibilities to our society.

OUR DEBT TO DEMOCRACY

(By Phil Bronsdon)

A common definition of a debt is something that is owed. Ours is a society of responsibilities; we all share in some of them. In order to meet all of our pressing obligations, we must establish and organize priorities. The chief responsibility of the young should be this very task. A strong democracy is an involved democracy.

One of our debts to democracy comes in our military obligation. Each of us needs to find a positive, meaningful way to serve our country. Fulfilling this debt is the first step to repaying our debt to democracy.

Another debt, of those who can qualify, is the political debt. Any citizen of our great land has many privileges. He can vote in part of the world's greatest political system. He can further contribute by campaigning for a candidate of his choice, even if it is himself, because in this country any citizen may run for almost any office. This is a very important second step to a free country.

Another of our debts is a responsibility to ourselves, as well as to our country; it is to live an honest, honorable life. In a time of dog-eat-dog aggressions, we must band together in the rich spirit that ignited the eternal flame of democracy. We must find room in our hearts and time in our days to help our neighbors, and we will help ourselves to a better way of life in a land of freedom and peace, America.

In order for each of us to insure a full reimbursement of our debt, we must strive to reach our individual potentials. Each of us has the God-given ability to become a responsible, effective citizen, of whom the United States can be proud. We must all take every opportunity to be the very best citizens we are capable of being to ensure that we repay our debt to democracy.●

THE TALE OF HOFFMAN

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. LEHMAN. Mr. Speaker, my constituents, Bernard and Rose Hoffman, of Florida's 13th Congressional District, are to be congratulated. Their son, Joe Israel Hoffman, recently graduated with the degree doctor of medicine from the University of Miami School of Medicine, class of 1981.

Dr. Hoffman's special achievement was featured in the University of Miami-Jackson Memorial Medical Center's summer edition of Spectra, and I would like to share his special story with my colleagues.

THE TALE OF HOFFMAN

Like many of this year's 175 med school graduates Joseph I. Hoffman began at an early age to consider becoming a doctor. But unlike many of his classmates, the circuitous events of his life, leading up to his acceptance for residency by Anne Bates Leach Eye Hospital, have been as interesting and challenging as the med school itself.

Hoffman was born Joseph Israel 25 years ago in Kenitra, a small town on the Atlantic coast of Morocco.

He attended primary school there up to the age of 12. At this time, tragedy struck. While he was away at school, Hoffman's parents died.

He was an only child, so after being orphaned, the one person he could turn to for support was his rabbi in Morocco.

Here the adventure and the good fortune began.

With the help of his rabbi, Hoffman made aliyah to Israel after a brief stay in Marseilles, France.

The aliyah is when a person moves to Israel from his native country and gives up his citizenship to become an Israeli citizen.

He worked on a kibbutz (collective farm) until 1971. Beside attending school and performing general chores, his main duty was milking cows, an experience which Hoffman said he enjoyed very much.

"I was growing up and the job carried certain responsibilities. The village was being run by the kids in the school and there were very few older people there," Hoffman said.

While still in Israel, Hoffman kept in contact with the sister of his rabbi who was still in Morocco.

She and her family had been trying for 18 years to get visas to America. Finally, their visas were granted and they made the journey to Miami.

After settling into their new homeland, the rabbi's sister and her husband contacted Hoffman, offering to sponsor his immigration to America if he was interested.

Interested he was.

"I enjoyed living on the kibbutz, but I began to feel that it was time for me to begin a serious education," Hoffman explained.

In just one year Hoffman had his student visa to America—an accomplishment within itself since the usual waiting time for a visa to America is much longer.

He arrived in Miami, and although he was fluent in Hebrew, French, and Arabic, he spoke no English. Despite the language barrier however, life in America was not totally foreign to him. He learned to speak Spanish.

"There was an American naval base near Kenitra and as a young boy, I met a lot of Navy people there," he said, explaining his initial exposure to the American lifestyle.

Soon Hoffman was enrolled in Miami Norland Senior High where he got his first formal lessons in the English language. He later attended North Miami High and graduated in 1974 from North Miami Beach High.

Hoffman then attended Miami-Dade Community College for a year before enrolling in the University of Miami.

He was recognized for academic excellence at both. He was accepted into the UM medical school after three years of undergraduate work.

Hoffman attributed his scholastic accomplishment to hard work and the support by his parents, Bernard and Rose Hoffman, who adopted him in 1973.

"I had long been interested in the medical sciences and being adopted brought a lot of stability to my life," he explained.

Hoffman will become and American citizen this month. He was granted permanent status by a special act of Congress in a bill by Congressman William Lehman.

Hoffman's list of scholastic honors include the 1979 Earl R. Sutherland Award which is given by the med school's Biochemistry Department for the best performance on part one of the National Boards Exam.

He also is the member of seven honor and professional societies and was on the Dean's List and President's Honor Roll while in undergraduate school.

But according to Hoffman, one of the highest honors he has yet to receive is being selected to serve his opthalmology residency at the Bascom Palmer Eye Institute.

"I felt exhilarated and extremely fortunate when I learned I'd been selected by Bascom Palmer," he said.

Only six applicants of the thousands from around the world were selected for residency at Bascom Palmer, Hoffman's first choice.

He will begin the residency after a one-year internship at Mt. Sinai in Miami Beach.

When he takes breaks from his medical studies, Hoffman enjoys scuba diving, water skiing, jogging, racquetball, theater and concerts. He described one of his most exciting experiences as diving in the Red Sea at the tip of the Sinai Peninsula.

Hoffman is a part of the medical school's 26th graduating class. Thirty eight of the graduates will serve their first-year residencies at UM affiliated hospitals.

Jess Catlin was elected to Alpha Omega Alpha to head the list of student awards announced at the Senior Class Banquet May 22. Others were:

Family Practice, Cheryl Reinhart; Medicine, Ileana Tandron and Joe Hoffman; Surgery, Nestor Javech; Alumni, James Norconk; Julia Fisher Papper, Mike Perry; Upjohn, Ileana Tandron; American Medical Women, Maria Garcia-Moore, Recia Kott-Blumenkrantz, Judy Pardo, Nancy Schleider-Kushner, Ruth Schobel, and Ileana Tandron.

Also, Lange Bok, Maria Garcia-Moore and Recia Kott-Blumenkrantz; Merck Book, Jon Bruce Chopyk, Joel A. Greenberg, Michael Horowitz, and Alfred Rivera; Ob-Gyn, Jr., Core-Carmen Fernandez and Judith Pardo; Psychiatry, William Goekeler; Anatomy, Joe Hoffman; Pediatrics, Ruth Schobel.●

LOS ANGELES COUNTY BOARD OF SUPERVISORS ENDORSES A STRONG CLEAN AIR ACT

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. WAXMAN. Mr. Speaker, the Los Angeles County Board of Supervisors recently sent me the attached resolution calling for renewal of a strong and effective Clean Air Act. As this resolution shows, millions of Americans continue to be concerned about the health and economic damage caused by air pollution. I hope they will continue to make their voices heard during the impending debate over reauthorization of the Clean Air Act.

I commend the board's resolution—adopted July 7, 1981—to the attention of my colleagues:

RESOLUTION

Whereas, air pollution continues to be a blight on Los Angeles County; and

Whereas, an attempt is underway in Congress to water down the Clean Air Act of 1970; and

Whereas, many residents must spend most of their days of the year living in what the South Coast Air Quality Management District terms "unhealthful air"; and

Whereas, air pollution constitutes the one dark spot on our otherwise perfect climate and carries with it many economic costs for our area, such as reduced tourism, deterioration of rubber and other products, and increased health costs; and

Whereas, despite the fact that 60% of Los Angeles County's air pollution comes from automobile emissions, before the Clean Air Act was passed the auto industry merely dragged its feet in developing smog devices; and

Whereas, although the fight is difficult, now is not the time to give up the battle for clean and healthful air for all Americans:

Now, therefore, be it resolved, That the Board of Supervisors of the County of Los Angeles urge the members of the Congress of the United States to renew the Clean Air Act in a responsible and effective way, so that this landmark legislation can continue to serve as the cutting edge for cleaner air throughout our Nation.●

RECLAMATION REFORM ACT OF 1981

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. LUJAN. Mr. Speaker, one of the most crucial issues yet to be resolved by this Congress is the issue of reclamation reform. Thousands of farm families in 17 Western States are still living under the dark cloud of uncertainty that was cast over the Federal reclamation program by the last administration.

During the 95th and 96th Congresses, those farm families petitioned the legislative branch for relief and protection from the misguided excesses of the executive branch regulations which were neither based on sound interpretation of law nor grounded in acceptable public policy. Both the 95th and 96th Congresses wrestled with the problem, argued with the administration, debated various approaches to reclamation reform, but failed to provide the legislative relief so obviously needed.

Western farmers know that the present administation has no intention of pursuing the revolutionary land-redistribution schemes that surfaced over the past 4 years; but they also know that the same forces that failed this time will be back at the farm gate at the first opportunity, trying to tell the farmers where they may or may not live, what they can and can not do with their private property, and how they should manage the operation of their farms.

This Congress must not fail to protect these farmers from any future administration that wants to dismantle the world's most stunningly successful agricultural production system and change it into some kind of urban resettlement program operated by lottery out of Washington.

The bill I am introducing today—the Reclamation Reform Act of 1981—will provide farmers with the protection they need from such tomfoolery. It will erect a legal fence around the family farm to keep the social tinkerers at bay while the farmer works the land, supports his family, pays his taxes and tries to provide the Nation with abundant low-cost food.

My bill does two things:

First. In title I, it makes a number of amendments to the 1902 Reclamation Act without changing the 160-acre limitation on ownership.

Second. In title II, it gives each reclamation farmer his choice of coming under one of two programs:

A. If he chooses this program he remains under the provisions of the 1902 act as amended in title I, in which case he would still be under the 160-acre limitation on ownership, exactly as he is today. If he and his neighbor want to pool their individually owned 160-acre parcels into one farm operation, they may, just as in the past. And it makes no difference whether 2 farmers or 100 farmers choose to pool their lands into a single large farming operation, as long as the land remains in ownerships of no more than 160 acres per person. They may lease their lands to each other or to a professional farm manager, as in the past, if that is their choice. In short, the Federal Government exchanges its subsidy in the water for the right to have the ownership of the land spread across as many individuals as possible, thus assuring wide distribution of the benefits from the Federal project.

B. If a farmer does not choose to stay under the current law, as outlined above, he may opt for this second program, under which he may obtain subsidized water for up to 960 acres, regardless of whether he owns the land or leases it from others. In exchange for this larger guaranteed entitlement to water, he must accept the condition that he will pay full cost for any water he uses for lands in excess of 960 acres. And, in contrast with plan A, wherein the 160-acre limitation applies to each individual in a family and thus permits each family member to own 160 acres, the 960-acre limit in plan B applies to the entire family as a unit.

Thus, a family consisting of a man, his wife and four children would be entitled to 960 acres under either plan.

Which program a family chooses to be under will depend, of course, on the goals that family has set for itself. Plan A permits more flexibility of operation, with limited opportunity to acquire ownership equity, while plan B permits the acquisition of more ownership equity but places economic restrictions on farm size.

The important point is that the family, not someone else, sets those goals and makes that choice.

From the standpoint of recouping the Federal investment in these projects, this is a good bill because the money will come back to the Treasury faster from those paying full cost for their water.

A word about some of the 1902 act amendments in title I:

On residency, my bill responds to the unanimous plea we heard from reclamation farmers to remove this horse-and-buggy anachronism from the law, once and for all. And somehow, the thought of Federal agents fanning out through the West with tape measures, making sure the farmers live within the Washington-prescribed distance of their alfalfa, suggests just a wee bit too much Federal protectiveness toward our alfalfa. The residency requirement is repealed in title I.

And on the issue of whether lands receiving water stored behind dams built by the Corps of Engineers should come under reclamation law, my bill comes down on the side of the western farmers, who would be terribly discriminated against if the laws were made to apply as proposed. None of the proponents of bringing these dams under reclamation law are willing to apply their idea even-handedly across the Nation. There are corps-built dams from Florida to Oregon and from Maine to California. Farmers in both the East and West irrigate their lands with water from corps dams. But the proposal has been to have only the farmers of the West come under the restrictive law while the farmers in the East do not. The unfairness is pa-

tently obvious and my bill exempts all corps projects from reclamation law except as specifically provided by the Congress.

Other amendments in title I will mandate equivalency when requested by a district, restore to recordable contracts any time lost by Federal moratoriums on land sales, tighten up the antispeculation feature of excess land disposal laws, and exempt from acreage limitation various categories of lands in unusual situations such as lands owned by religious organizations, lands receiving temporary flood waters, and so forth. All are exemptions that were contained in the Interior Committee bill that was reported favorably during the last Congress.

That, Mr. Speaker, is what the bill does. The response to every major problem is the response we heard from the farm families themselves. The major thrust of the bill is to preserve and protect the principle of small family farms by retaining the 160-acre-ownership limitation while adding a new opportunity for those farmers who wish to own more acreage but who agree to pay full cost for water over a certain amount.

It is a good bill, a workable bill, a reasonable bill and a bill that can be supported by farmers, by administrators, by westerners, by easterners, by conservatives, and by liberals. It is the right answer to reclamation reform. I invite all of my colleagues to join me in sponsorship, and I will do everything I can as ranking member of the Interior Committee to schedule early hearings and markup so we can get this legislation to the President for signature before the end of the year.●

PERSECUTION AND HARASSMENT OF JEWS IN THE SOVIET UNION

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. SMITH of New Jersey. Mr. Speaker, I rise today to take part in the "Call to Conscience" Congressional Vigil for Soviet Jewry, in the hope that my efforts here in Congress can help Svetlana Levina who wishes to emigrate to the free world.

Svetlana, who is a physician, and her son applied for permission to emigrate in March 1978. At that time, Svetlana was 42 years old, yet incredibly, the Soviet authorities denied her request because she did not have her mother's permission. Svetlana's parents were divorced many years ago and her mother refuses to see her. Now the Soviet Union, which has done so much to damage family life, is denying this woman and her son the opportunity to pursue a peaceful and free family life.

Recent reports from Tashkent indicate that this widowed woman may be arrested for parasitism since she has not worked since 1978. What will happen to her son if she is thrown in jail? How will this reflect on the Soviet Union's so-called concern about family stability?

If Svetlana is a parasite, as the Soviets imply, should they not be glad to see her leave? The behavior of the Soviet authorities in their handling of this case seems to be both inconsistent and hypocritical.

Mr. Speaker, there has been a sharp decline in Jewish emigration from the Soviet Union in recent years. Over 50,000 Jews emigrated in 1979 but in 1980 the number fell off to 21,000. Monthly levels of emigration have continued at a low level so far this year.

This continuing pattern of insensitivity is deplorable. Svetlana Levina is experiencing the same kind of persecution and harassment as thousands of other Jews in the Soviet Union. Antisemitism in the Soviet Union runs rampant. The outright contempt for religious freedom that the Soviets habitually demonstrate is an international disgrace.

It is entirely appropriate for the Congress and the President to refuse the Soviet Union most-favored-nation status for as long as they continue their despicable practices. We must send a signal to the world that the tyrannical actions of this regime will not be tolerated by our Nation.

Mr. Speaker, I am proud to serve as the cochairman of the 97th Congressional Freshmen for Soviet Jewry. I hope that increasing numbers of my colleagues will join in this effort to achieve justice for those who wish to emigrate from the Soviet Union. For those who choose to remain, let us insist that they be free to practice their religion and express their opinions without fear of reprisal.●

DEFICITS, MONEY, AND THE CAUSES OF INFLATION

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. BROWN of Ohio. Mr. Speaker, I would like to place in the RECORD an extremely thoughtful and relevant article by Dr. David I. Meiselman, entitled "Deficits, Money, and the Causes of Inflation."

Dr. Meiselman clearly shows in this article that inflation is not caused by tax cuts but by excessive money creation relative to the supply of goods in the economy. The importance of this message is that the claim that the administration's across-the-board marginal tax rate cuts will lead to inflation has absolutely no basis in fact.

This article instructs those who oppose the administration's tax plan to instead turn a watchful eye to the Federal Reserve if they are serious about reducing inflation.

I recommend this excellent article for my colleagues:

[From the Wall Street Journal, July 21, 1981]

DEFICITS, MONEY, AND THE CAUSES OF INFLATION

(By David I. Meiselman)

The conventional wisdom holds that budget deficits are a major cause of inflation. Many fiscal conservatives and Keynesians, both liberal and Wall Street varieties, may not agree on very much, but they see eye to eye that deficits mean rising prices.

Contrary to these widely and deeply held beliefs, the evidence is that there is little, if any, direct historical connection between budget deficits and inflation, or between deficits and money growth that causes inflation.

I ran statistical tests to see if there has been any sizable or dependable relationship between inflation and deficits, tax rates or government expenditures, especially after making allowances for the effects of money supply and output. I found little or no relationship between inflation and the key fiscal policy variables Keynesians believe cause rising prices. I recently reported some of these findings in testimony before the Joint Economic Committee and the Senate Finance Committee.

Many other researchers have come to similar conclusions for at least the past 20 years since a pioneering study by Milton Friedman and me first found that the Keynesian analysis that emphasizes deficits is useless in explaining economic events.

If deficits don't cause inflation, what does?

Inflation follows the general laws of supply and demand. Prices on average increase when aggregate demand exceeds aggregate supply.

OUTPUT DEPENDS ON INCENTIVES

Aggregate demand is determined by the quantity of money. There is a close and dependable connection between the nominal quantity of money and nominal gross national product, which is the best measure of total spending, or demand. The quantity of money is controlled by Federal Reserve actions.

Aggregate supply depends on other factors, such as available inputs of labor, capital and raw materials, and the state of technology. Output also depends crucially on the incentives to put these means to efficient use.

Prices, then, depend on the ratio of money to output. This is a convenient way to summarize aggregate demand and supply.

When money grows faster than output, aggregate demand exceeds aggregate supply. The result: Prices and interest rates rise, and inflation results. When money and output grow at the same pace, demand and supply remain in balance, and prices on average are stable. The relationship between money per unit of output and inflation may well be the most extensively tested proposition in all of economics with few, if any, exceptions.

To reduce inflation, public policies must lead either to more output or to less money growth. Because tax reductions that enhance incentives, such as those in the ad-

ministration's tax package, lead to more output, the result is lower prices when money is held constant.

Reduction in government expenditures also tends to be anti-inflationary. Resources are typically more productive in private sector use, so that reduced government outlays make possible further gains in useful output. In addition, many government programs and transfer payments impair incentives.

This analysis also explains why countries such as Japan and Germany, where deficits are a significantly higher fraction of GNP than the U.S., have slower inflation, more growth, more saving, lower nominal interest rates and higher real interest rates than in the U.S. Money has increased more slowly and smoothly in those two countries than in the U.S., and neither country taxes saving and investment as severely as we do.

All deficits are not alike, even when they are the same size. It makes a big difference how the deficit is financed. It also makes a difference how the deficit is incurred—whether the deficit is the result of cutting taxes or increasing expenditures, and whether the taxing and spending changes alter total output.

Deficits can be financed by selling bonds to the Federal Reserve or to the public. If a deficit is financed by selling government bonds to the Federal Reserve, the resulting increase in the money supply leads to inflation and thereby to rising market interest rates.

Alternatively, if the deficit is financed by selling bonds to the public, no such inflationary increase in money takes place. To be sure, real interest rates may rise in order to induce the public to buy the additional bonds. But unless there is an increase in inflation, this rise in interest rates is bound to be small.

The major factor causing high interest rates is the large inflation premium which is built into all interest rates at present. Thus, any attempt to lower interest rates by simply printing new money to buy additions to the national debt ends up by causing higher inflation, which, in turn, causes interest rates to rise, not fall.

Even though deficit itself may not cause inflation, deficits would lead to inflation if deficits caused the Fed to increase the money supply. Deficits are widely seen as placing some great and large unspecified "burden" on the Federal Reserve. To lighten this burden, the Fed prints some new money and goes out and buys itself some bonds.

The Fed is not required by law to monetize the deficit. Indeed, the spirit of the law explicitly prohibits the Fed from doing so; witness the restrictions on direct sales of securities by the Treasury to the Fed.

But there is a loophole. The loophole is that the Fed can buy outstanding debt rather than new debt. Because there is essentially no difference between buying old bonds and new bonds, the results of buying old debt are the same as monetizing new debt. When this happens, money expands. Inflation results.

Although the Fed often blames deficits for causing inflationary money growth, the evidence is that, from 1960 to 1980, there was no significant relationship between changes in money supply and changes in the national debt. Not only is there no legal or practical need to monetize increases in the public debt, the Fed has not systematically done so. In addition, in recent months high officials of the administration have repeatedly stated that they do not wish the Fed to monetize deficits.

The inflation impact of deficits also depends on how they are incurred. The effects of taxes and expenditures are not necessarily offsetting or homogeneous. What is crucial is the impact of taxes and expenditures on output.

For example, if deficits occur because of increased government expenditures, these outlays typically use up resources and leave fewer resources for the private sector. Because resources are generally used less efficiently in the public sector, efficiency falls. Even if the same number of people are at work, total output is less useful, less valuable. This is the equivalent of a fall in output, and thereby more inflation.

Different tax changes may have different impacts on output. Tax-rate reductions that lessen the discentive effects of the tax system will cause output to increase. For a given stock of money, more output results in lower prices.

Thus, incentive-enhancing tax reduction leads to lower prices, even if the tax cut increases deficits. This is why the administration's tax-reduction package will help to curb inflation, whatever its impact on deficits. Because tax reduction is combined with substantial expenditure cuts, the administration's fiscal package has a significant anti-inflationary impact.

DEPRESSING PRIVATE SECTOR

There is certainly an important and legitimate role for taxes in financing needed government services. If more resources are to be channeled into the public sector, higher taxes depress private sector activity, thereby freeing resources and making them available to the public sector.

However, tax rates have already become so high, largely because effective rates have been driven up by bracket creep rather than being explicitly legislated by Congress, that the private sector is already too depressed for our own good.

Moreover, the depressive effects of high and rising marginal tax rates have curtailed savings, capital formation and risk-taking more than consumption, and reduced work effort more than leisure. Small wonder that a high employment peacetime economy has little or no growth in recent years for the first time in American history.

High levels of taxes do not reduce prices and do not fight inflation. High taxes do reduce output, employment and economic growth. Balancing the budget by squelching initiative and limiting rewards cannot improve our situation. It is time to stop punishing ourselves in the erroneous belief that slow economic growth and recession resulting from excessively high tax rates are the remedy for inflation and high interest rates, or in the hope that pain, itself, will cure our problems.

Masochism is not the remedy. Budget cuts, tax cuts that lessen disincentives, regulatory reform and above all a slow, stable and predictable rate of growth of money are the necessary components and the solution for our serious inflation and high interest rate ills.

It is time to stop imposing failed remedies on a sick economy.●

HARRY CHAPIN AND WORLD HUNGER

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. PATTERSON. Mr. Speaker, last Thursday, July 16, America lost a gifted poet and folk musician, Harry Chapin. Harry Chapin had a unique ability to project warmth and feeling into his musical performances, attaining a rapport with audiences that few musicians could equal. His music was self-described as "cosmic moments in noncosmic lives," and his songs "Taxi" and "Cat's in the Cradle" depict such moments in the lives of common men.

Complementing his poetic and musical talents was Harry's dedication to the cause of eradicating world hunger. As he sought harmony in the verses that he wrote, so did he seek harmony in the world in which he lived. He believed that by eliminating world hunger, we would also "remove some of the hopelessness that fuels unrest and may endanger any society's equilibrium." To that end, he gave numerous benefit concerts and sought to educate us all as to the plight of those less fortunate than ourselves. Harry Chapin's accomplishments as a musician will be remembered by us all; his efforts as a humanitarian must not be forgotten.

I think Harry Chapin's memory would be well served if we continue to strive toward eliminating hunger and the worst vestiges of poverty and disease from our world. One way we can do this is by assuring that more of our foreign assistance money goes to help the truly needy people in the developing world. As the chairman of the House subcommittee with jurisdiction over the multilateral banks, I recently introduced legislation—H.R. 3972, the Hunger and Global Security Multilateral Development Bank Act—which seeks to have the international development agencies target at least half the benefits of their lending toward helping the poor. I hope that, through this legislation, the cause to which Harry Chapin was so deeply committed will be served in a significant way.●

DOES THE PAST HAVE A FUTURE?

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. MOAKLEY. Mr. Speaker, I have come upon a disturbing discrepancy between the President's goals for our country and a budget proposal

made by the administration. Prior to being elected, then-Governor Reagan continually promised to bring America back to its intended greatness and to help promote a better awareness of and pride in America. Let it be known each of us shares with him these ideals and purposes and support responsible and equitable budget cuts. However, the President's public philosophy has not been followed by consistent and thoughtful actions.

I was extremely surprised and disappointed when I discovered, last spring, the administration had proposed to cut all funding for the National Historical Publications and Records Commission. In so doing, the Office of Management and Budget rejected the compromise proposal, H.R. 2979, which reauthorizes a funding level for NHPRC of $3 million, a 25 percent cut from the 1981 budget.

There are several reasons why NHPRC must not be abolished. First, the Commission is responsible for the scholarly interpretation of many priceless historical documents. If the analysis, research, and presentation of historic documents and records is terminated, the study of American history or Government will become stagnated disciplines.

In addition, a publication subvention program encourages presses to accept and publish, under stringent paper and binding standards set by the commission, volumes that are frequently more difficult, time consuming and expensive to print than ordinary books.

Third, the time, money, and effort that have been invested in the documentation, publication, and presentation of historical papers and letters by the private sector, the Federal Government and volunteers will be wasted overnight.

In President Reagan's home State, over $1 million has been contributed to active historical publications and records projects; less than half of this money is Federal. In fact, some States such as New York have up to $5 million invested in active projects.

Last, and most importantly, in regard to Federal waste, the funds previously designated for the NHPRC have been carefully and economically distributed to leverage the maximum amount of private funding. The Commission has been able to leverage an average of 60 percent private funding for projects.

The publication and records projects are extremely diverse and significant in content. The Founding Fathers' papers, the papers of Jefferson Davis, the papers of Eugene V. Debs, the temperance and prohibition papers and the history of the U.S. Congress are examples of active projects which may not weather the proposed funding reductions.

The primary assumption of the President, the administration and the House opponents is that the private sector will be able to supply the funding level which the Federal Government will abandon. What they have been unable to see is that Federal funding, since 1964, has been used to leverage private funding to its maximum.

Another assumption of the administration has been that the private sector will fund these publications and record projects, as it did before the grants program was funded in 1964. In truth, only a handful of projects existed in 1964, and they were operating on very small private grants, together with institutional support.

The myth that the private sector will take up the slack for the NHPRC, the NEA, the NEH and the Historic Preservation Fund has been shattered by the large corporation's recent public statements concerning the admissible level of funding for philanthropic moneys. I submit, for the benefit of my colleagues an excellent article, "Nonprofit Groups Call on Industry To Replace U.S. Aid," from the front page of the New York Times (July 6, 1981):

NONPROFIT GROUPS CALL ON INDUSTRY TO REPLACE U.S. AID

(By Kathleen Teltsch)

Large companies from coast to coast report a surge in appeals for grants from antipoverty groups, universities, cultural agencies and other nonprofit organizations scrambling to replace money they fear they will lose as a result of Reagan Administration budget cuts.

The companies say there is no way they can come anywhere near offsetting the Federal grant money that is to be eliminated.

"We've been deluged with thousands of requests, a 100 percent increase in the first quarter of this year," said Mary Hall, vice president of corporate contributions at the Weyerhaeuser Company headquarters in Tacoma, Wash., which twice a day receives mail sacks crammed with appeals. Most corporate givers reported an increase of 25 to 35 percent in requests from the nation's 300,000 nonprofit organizations, which range from opera companies and private universities to groups that feed the poor.

"There's a certain element of panic about anticipated losses," Richard F. Neblett, contributions coordinator for Exxon, said at its Manhattan headquarters, where the increase in appeals is less dramatic than that at Weyerhaeuser.

VOLUNTEER AID ENCOURAGED

Throughout the budget-cutting process, senior White House officials have said that they expected private volunteer efforts to replace many curtailed Government programs. For example, a Task Force on the Arts and Humanities that President Reagan named in May is to report by the end of the summer on what Mr. Reagan called a plan "to make better use of existing Federal resources and to increase support for the arts and humanities by the private sector."

However, despite efforts in Congress and elsewhere to encourage private giving, corporate officers and other experts on charity say that business, foundations and individual givers combined will be unable to offset the Federal grant money being out.

While final details of the budget cuts are not yet known, a study by the Urban Institute in Washington recently estimated that there would be reductions of $128.2 billion from 1981 to 1984 for social welfare, health, environment, the arts and Government-financed housing and food programs.

$27 BILLION LOSS IN 5 YEARS

Lester M. Salamon, the political economist who directed the institute's study, said that the anticipated cuts would mean a loss of $27 billion over the next five years for the nonprofit organizations working in these fields, the groups now flooding corporations with their appeals for money.

Contributions to nonprofit groups by companies and some 600 company-operated foundations last year totaled only $2.55 billion, according to the American Association of Fund-Raising Counsel Inc.

The difference between the amount of funds to be lost and the total corporate contribution is of such dimensions that companies cannot possibly pick up the whole tab, said Anne Klepper, a senior research associate for the Conference Board, whose 4,000 members include the country's leading foundations, government agencies and educational institutions.

"There have been unrealistic expectations about who will do what for a long time," she said. "Now the situation is getting crunchier. Inevitably there will be struggle to survive among the nonprofits. It could be a Darwinian scene."

Private giving from all private sources for nonreligious purposes would have to increase by 144 percent over the next five years to make up for reductions in Government assistance and keep up with inflation, Mr. Salamon estimated, growth four times faster than the average over the last five years.

TOO MUCH, TOO SOON

Corporate officials say the Administration's assumption that the private sector and especially business can fill the void is expecting too much, too soon.

"You cannot send a Mailgram from Washington to all corporations and say a funny thing happened, and expect they will be ready immediately to make up the shortfall—life is not like that," Edward M. Block, a vice president of the American Telephone and Telegraph Company, remarked in objecting to the proposed cutback in financing for the National Endowment for the Arts. Mr. Block is also president of the American Council for the Arts.

Even if business took the lead in support of the arts, a vast fund-raising campaign could not be started in time to avoid serious damage, Mr. Block contended. Business will also be under heavy pressure to help pay for a variety of human services, he observed, suggesting that these might be assisted at the expense of the arts.

A.T.&T. is the leading partner of the Bell System, whose $38.2 million budget for philanthropy made it the largest single donor in the business community in 1980. Exxon ranked second, with contributions of $38.1 million. Only six private foundations in the United States give away more money annually.

Many companies plan to increase giving, among them Exxon, International Business Machines, Levi Strauss and General Electric, but the widespread opinion is that the total for all would not offset the Government reductions.

A DROP IN THE BUCKET

Contributions from corporations increased 15 percent in 1978 and 1979, dropping to 4 percent because of low profits last year, but even if the former high level was reached, it would amount to only $380 million more a year, "a drop in the bucket," in the words of John J. Schwartz, president of the American Association of Fund-Raising Counsel.

"Dollar for dollar, there is no way for the private sector to make up for the cuts," agreed John H. Filer, chairman of the Aetna Life and Casualty Company, although he maintained that companies and nonprofit groups could have significant impact in critical areas, including training the hard to employ.

Less than 30 percent of the country's two million companies report to the Internal Revenue Service that they make philanthropic donations, the Conference Board said. Under Federal law, companies are permitted to deduct for charitable giving up to 5 percent of their taxable income. Only a few, mainly companies in the Minneapolis area that have joined a 5 Percent Club, reach the maximum; the average hovers around 1 percent.

Even before the Reagan Administration, there were efforts by organizations and individuals to persuade companies to step up giving and to reach the thousands that do not make any contributions.

The National Business Roundtable issued a policy statement in March endorsed by the Chamber of Commerce and the National Association of Manufacturers calling on the business community to increase giving. And Laurence A Wien, a New York lawyer and real estate investor, is credited with having "shamed" dozens of prospering companies into increasing their contributions by presenting or threatening to push stockholder resolutions.

Raising the present level of company giving to 5 percent would increase corporate contributions to $10 billion to $12 billion, according to philanthropic experts. However, even doubling the present level to 2 percent is expected to take several years, these analysts said.

BUSINESS FACES IMPLICATIONS

The Administration and public expectations that business can be "the thousand-fingered Dutch boy plugging the dikes" poses risks for business, which "will have to perform as never before," according to Donald H. Haider, professor of public management at Northwestern University. Speaking at a Public Affairs Council meeting of corporate leaders in Chicago in March, Mr. Haider produced a stunned silence with his warning that a failure by industry to increase business activity, create jobs and also act as the "great gap-filler" could result in a backlash in which business could lose the freedom from regulations and other benefits it expects from the Reagan Administration.

Brian O'Connell, president of the Independent Sector, said it would be a mistake for the Administration to single out business and give the impression that the burden now rests with it to pick up the slack. The group, set up two years ago to stimulate private charitable giving, has been lobbying for new tax laws to encourage giving by individuals. Its 310 members include leading companies, foundations and nonprofit organizations.

"I believe business will do more and can do more, but it has to be done in a spirit of encouragement and cooperation and not by giving the impression that business must fulfill an obligation," Mr. O'Connell said.●

A TAX REFORM SUBSTITUTE

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. CONYERS. Mr. Speaker, today I am introducing a substitute to the tax bill reported out of the Ways and Means Committee this week. The legislation I am introducing is essentially the tax portion of the Congressional Black Caucus alternative first budget resolution for fiscal year 1982 that was debated in the House on May 6, 1981.

I am introducing this legislation in order to offer my colleagues an opportunity to consider a thorough-going alternative to the tax bills drafted by the Ways and Means Committee and the administration. Neither bill accomplishes what the American public has long sought: to reform and simplify the Tax Code; provide tax relief where it is needed; and insure that the tax burden is fairly distributed among all citizens and institutions, including the business sector.

It was with sadness that I learned that the committee bill—the Democratic tax bill—in its basics differs very little from the bill drafted by the administration. Both bills are giveaways to the corporate sector, that would virtually eliminate any real tax burden on the part of business. The committee bill furnishes the oil industry and oil producers a completely unwarranted cut in their windfall profits tax liability, which will cost the Treasury some $7 billion over a 6-year period. Both bills further complicate the Tax Code, and perpetuate and expand the tax subsidies and loopholes enjoyed by corporations and the privileged.

The bill I am offering incorporates the essentials of the Congressional Black Caucus tax package that formed part of its alternative budget resolution. The Democratic Study Group, in commenting on that tax package, called it "the largest and fairest tax cut of any of the proposals before the House" and "the boldest step of any proposal being offered to the House to deal with the Federal deficit."

This tax bill proposes the most far-reaching reform of the Tax Code that has been advanced in recent years. It cuts taxes by providing:

A 10-percent nonrefundable social security tax credit to both employers and employees;

Increase of the zero bracket amount and of the child care credit;

An increase in the earned income tax credit for low-income families;

A targeting of capital gains reform to productive investments;

A first-year capital cost recovery system for equipment that will provide the incentives business needs to boost productivity.

I intend to go before the Committee on Rules for a rule that allows the House to consider this alternative.

A summary of the main provisions follows:

SUBSTITUTE TAX PACKAGE PROPOSAL

	Effective date	Fiscal year 1982 cost/savings (Billions of dollars)
Individual tax cuts:		
(a) Rate reduction; increase of the zero bracket amount; increase the earned income tax credit; increase the child care credit.	Jan. 1, 1982	−24.3
(b) Nonrefundable 10% credit against social security payroll taxes for employees.	Jan. 1, 1982	−8.0
(c) Phased-in reduction of the "marriage penalty" tax.	Jan. 1, 1982	−0.4
Total		−32.7
Business tax cuts:		
(a) First-year capital recovery system with expensing up to $25,000 and special limits on utilities and petroleum refineries.	Jan. 1, 1982	−7.5
(b) Nonrefundable 10% credit against social security payroll taxes for employers.	Jan. 1, 1982	−5.3
Total		−12.8
Special tax cut items:		
(a) Estate and gift tax changes: Unlimited marital deduction; $350,000 exemption for farms and small business.	Jan. 1, 1982	(1)
(b) Expansion of Individual Retirement Accounts and Limited Employee Retirement Accounts.	Jan. 1, 1982	−0.3
(c) Rehabilitation tax credit	Jan. 1, 1982	(1)
(d) Extension of the targeted jobs tax credit.	Jan. 1, 1982	(1)
(e) Investment tax credit for equipment leased to public mass transit authorities.	Jan. 1, 1982	(1)
(f) Tax exempt industrial development bonds for mass transit.	Jan. 1, 1982	(1)
Total		−0.5
Tax reform:		
(a) Restrict capital gains deduction only to capital gains that come from truly productive investments.	Jan. 1, 1982	+3.0
(b) Eliminate tax straddle shelter	Jan. 1, 1982	+1.4
(c) Limit oil company abuse of foreign tax credit.	Jan. 1, 1982	+0.6
(d) Cash management: Corporate estimated tax.	Jan. 1, 1982	+2.4
(e) Terminate expensing of oil company intangible drilling costs.	Jan. 1, 1982	+2.0
(f) Terminate percentage depletion allowance for oil companies.	Jan. 1, 1982	+1.7
(g) Terminate the deferral of income on domestic sales corporations (DISC's).	Jan. 1, 1982	+1.4
(h) Terminate deferral of income on controlled foreign corporations.	Jan. 1, 1982	+0.3
(i) Put a cap on business meal deductions and eliminate other entertainment and travel deductions.	Jan. 1, 1982	+1.0
(j) Increase the excise taxes on alcohol and tobacco products by 10%.	Jan. 1, 1982	+0.6
(k) Put a $1,500 cap on the consumer credit deduction.	Jan. 1, 1982	+0.7
(l) Put a $10,000 cap on the mortgage interest deduction.	Jan. 1, 1982	+0.4
(m) Eliminate the tax credit for corporations doing business in U.S. possessions.	Jan. 1, 1982	+0.8
Total		+16.3

[1] Negligible.

TOTALS

Personal tax cut	−32.7
Business tax cut	−12.8
Special tax cuts	−0.5
Tax reform	+16.3
Budgetary effect	−29.7

●

REAL MANDATE IS FOR POLLUTION CONTROL

HON. ANTHONY TOBY MOFFETT
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. MOFFETT. Mr. Speaker, last week the House of Representatives did itself proud. In a strong demonstration of support for the Clean Air Act, the Members refused to use an appropriations vote to repeal the inspection and maintenance provisions of the act.

This action, in defense of auto-related pollution control, did not demonstrate an insensitivity to reform. The Health Subcommittee, under Chairman Henry Waxman, will begin a process of thoughtful revisions of the act once the administration submits its proposals. We will proceed in a balanced way. But our deliberations, while acknowledging the need to reform the act in those sections requiring our attention, will be based on the public's firm commitment to effective pollution control.

Recently, "Inside E.P.A.," in its June 19, 1981, issue, discussed a survey of public opinion by the Arthur D. Little Opinion Research Corp. I obtained an analysis of their findings titled "Public Attitudes Toward Air Quality Control," which I would like to share with all Members of Congress. Among its conclusions, the analysis states:

> Overall, the public does not accept the argument that air quality standards are now unreasonably high and too costly to achieve. In fact, only about one-fourth of the public believe that such is the case and that air quality standards could be eased without too much loss of protection from air pollution.

In addition, the study found that most people support, and would oppose the weakening of PSD or, clean air area regulations. The survey found that most people did not agree with the National Commission on Air Quality's recommendation that deadlines for attaining pollution standards be abolished. Sadly, the survey found that a majority of the public (75 percent) did not feel that statements by business could be believed relative to air pollution issues.

I am anxious to work with the business community to devise cost-effective mechanisms for them to achieve existing standards for pollution control. The bubble policy may be one such mechanism for achieving compliance with effective air quality standards at lower costs. Regardless of the route which we take, I do hope that the public's support for air pollution control is remembered by the Congress as we take another look, during the reauthorization process, at the Clean Air Act.

The statement by Opinion Research follows:

ORC PUBLIC OPINION INDEX
PUBLIC ATTITUDES TOWARD AIR QUALITY CONTROL

Summary and implications

This nationwide Index study finds that the American public is not ready to make very many concessions in its long-term commitment to very high standards of air quality control. There is very little support by the public as a whole for many of the changes sought by critics of the current regulations mandated by the 1970 Clean Air Act and its 1977 amendments.

The public's attitude is highly significant in view of the current hearings in Congress on the reauthorization of the Clean Air Act, while at the same time the Reagan administration signals its intention to seek revisions of the act based on the use of cost-benefit analysis.

Overall, the public does not accept the argument that air-quality standards are now unreasonably high and too costly to achieve. In fact, only about one-fourth of the public believe that such is the case and that air-quality standards could be eased without too much loss of protection from air pollution.

Indeed, although there has been some change in attitudes during the past three years, no more than one-fourth of the population would permit the relaxation of overall environmental standards in order to achieve economic growth. In fact, two-thirds of the population continue either to place environmental protection above economic growth or feel that we can achieve our current environmental protection goals and economic growth at the same time.

Specifically, the majority of people do not think that air pollution standards should be relaxed in areas where the air is now cleaner than the national standards. Most people support the provisions of the Clean Air Act, added in 1977, to prevent the significant deterioration (PSD) of air quality in these areas.

The public's attitude contrasts with the views in a report released in late February by the National Commission on Air Quality (NCAQ) which recommended changes in the pollution regulations for clean air regions. The Commission, established by Congress in 1977 to recommend alternatives for controlling air pollution, found that the elimination of some PSD restrictions would make little difference in the level of pollution. At the same time, the Commission's report also stated that the PSD program had not had a negative effect on energy development.

The suggestion to eliminate deadlines for cities to attain cleanup goals, another recommmendation of the National Commission on Air Quality, also finds little favor with the public. There is a feeling on the part of some critics that the constant extension of the deadlines works against achieving the goals. But most members of the public apparently believe that without deadlines cities would not make their best efforts to meet the goals.

Less than one-fourth of the public favor the idea of permitting a company to meet air-quality standards by reducing overall emissions from an entire plant—the "bubble" concept—rather than requiring it to reduce emissions from each individual source within the plant. Almost two-thirds of the public insist that there should be a standard for each individual source of pollution within a plant. However, they may be unaware of the number of companies already using the "bubble" concept, and the significant cost savings that have been achieved while overall attainment standards are not relaxed.

Where people are willing to allow some relaxation of air standards is in areas of high unemployment. Most people would consider relaxing some standards in these areas on case-by-case basis, depending upon how serious the pollution problem is.

However, fewer than 2 people in 10 think there should be a blanket relaxation of the standards for the entire region.

Perhaps one reason that so many people insist on maintaining air-quality standards is the fact that almost half the public still consider the problem of air pollution to be at least somewhat serious in their area, although the number of people who feel this way has declined markedly over the past decade.

Indeed, few Americans think there has been any decrease in the amount of air pollution in their vicinity over the past 5 years. On balance, people feel that the situation locally has remained unchanged during that period.

Business and industry are the groups most likely to stir public dissatisfaction in regard to the steps taken to protect or improve U.S. air quality. In fact, they are the only groups with whom the public as a whole is not more inclined to be satisfied than dissatisfied. Environmental and consumer groups receive the most praise for their actions.

Indeed, two-thirds of the public consider environmental and consumer groups to be at least fairly reliable sources of information about the problems of air pollution. In contrast, only four people in ten now think they can rely upon the statements of business and industry spokesmen regarding air pollution.

As it is, the majority of people in almost every key population subgroup are actively involved in or sympathetic to the environmental movement, even though there has been a slight decline in support for the movement during the past year. Among the public as a whole, fewer than one person in ten are unsympathetic.

With skepticism about business' statements so widespread, it is not surprising that relatively few people agree with business' frequently heard complaint that air-quality standards are now unreasonably high and too costly to achieve. Even though they are aware that the underlying basis for the standards is protection from adverse health effects for even the most sensitive groups, most people do not support business' position.

The chemical, automobile, and trucking industries are most criticized for causing air pollution. However, few industries escape a significant amount of criticism. In fact, there has been a sharp increase in the number of people who think that the auto industry causes at least a fair amount of air pollution.

Over half the public—a dramatic increase since 1975—believe that auto pollution controls have contributed at least a fair amount to any reduction in total air pollution.

The public's belief in the importance of auto pollution controls is underlined by the more prevalent desire to have the devices retained than to have controls relaxed to save gasoline.

The problem of "acid rain" is another issue sure to be vigorously debated, if not during consideration of the Clean Air Act, then surely in the near future. A United States-Canadian research group claims that the burning of coal in some Midwestern plants is the principal cause of the acidifica-

tion of some streams and lakes lying to the northeast. A treaty between the two nations will be negotiated starting in June of this year.

Meanwhile, the National Commission on Air Quality has recommended a halt to the efforts of some states to relax controls on the burning of high-sulphur coal. The commission would also require sulphur dioxide emissions to be significantly reduced over the next 10 years.

In view of the media attention given to "acid rain" in recent months, perhaps it is not surprising that the majority of Americans are aware of the problem. What is of great interest is the fact that 4 people in 10 who claim to have some knowledge about the situation say they do not know what causes "acid rain." The most commonly cited cause is factories or manufacturing.

Even more important to business, however, is the level of concern expressed by people who are aware of the problem. Although just 4 people in 10 among the public as a whole are at least somewhat concerned, this proportion translates into two-thirds of those who already have some knowledge of the problem.

A similar situation pertains in regard to the "greenhouse effect." Although there is far less awareness of the problem than of "acid rain," understanding of the cause is again low, while concern is high among people who claim to have heard or read at least a little about the situation. At present, concern about the "greenhouse effect" is not widespread among the public as a whole: less than one-fourth of the total population are now concerned. However, more than 6 people in 10 who already are aware of the problem are concerned.

The implications for business in regard to both "acid rain" and the "greenhouse effect" appear obvious. As the problems are increasingly debated and media coverage grows, more and more people will become aware. However, awareness does not necessarily lead to increased understanding of the problems and their causes, but may, in fact, compound the confusion and controversy.

At the same time, the level of concern about the two problems appears likely to increase among the public as a whole. As already noted, the higher the level of awareness is, the greater the level of concern.

All in all, it seems clear that business must accept the fact that the American public will continue to insist that there be no significant weakening of the goals envisioned by the Clean Air Act. With Congress confronted by the NCAQ's findings that the act has not contributed to unemployment, has had minimal effect on inflation, and will not hinder Western energy development, many of industry's principal arguments have already been seriously challenged.

It appears totally unrealistic for business and industry to seek wholesale changes in the act. Rather, business' strongest position might be based upon an acceptance of the overall goals accompanied by a strong drive to eliminate many of the regulatory complexities that have evolved. One point to be stressed is that a flexible policy, allowing business and industry to develop their own methods for meeting clean-air requirements, could not only lower the costs of compliance but also better insure that the goals will be met.

NOTE—About this study: Results in this report are based on telephone interviews with a national probability sample of 1,000 persons aged 18 and over, conducted during the period March 26 through March 31, 1981.●

UPON INTRODUCTION OF THE STRATEGIC AND CRITICAL MATERIALS STOCK PILING REVISION ACT OF 1981

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Friday, July 24, 1981

● Mr. MARRIOTT. Mr. Speaker, today I am introducing legislation to prescribe a new method for determining the quantity of any material to be stockpiled and for improving the operation of the stockpile transaction fund under the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98 et seq.). In order to maintain a strong national emergency preparedness program it is essential to have in place a full complement of strategic and critical minerals and materials in our national defense stockpile. However we cannot maintain this state of stockpile preparedness if the stockpile goals are subject to the erratic fluctuations of the past. Previous administrations have in the past, zeroed stockpile goals for primary budgetary and economic purposes with defense requirements being a secondary consideration. These frequent and violent shifts in stockpile goals have been costly to the American taxpayer and extremely disruptive to industry where planning for expansion has been frequently deferred when the stockpile became an active seller. In retrospect, these fluctuations can be shown to have been untimely, unjustifiable, and inexcusable. Neither our country's national defense needs nor our growing foreign dependence for these materials have been adequately considered. Notable critical stockpile materials which have been put through this roller coaster are aluminum, copper, nickel, most of the zinc, and about half of the lead held by the Government, all of which were sold during the period 1960–75. Subsequent to these sales, we were told that new stockpile goals had once again been established and that we were deficient in all of these materials. For example, 2 million tons of aluminum and 4.4 million tons of Surinam grade bauxite were sold off between 1962 and 1973. By 1980 the revised stockpile goals called for the purchase of 700,000 additional tons of aluminum and 800,000 additional tons of Surinam grade bauxite. Between 1960 and 1976 over 1.24 million tons of copper, representing nearly the entire stockpile were sold off. The strategic and critical copper stockpile goal was set at zero in 1973, back up to 1,300,000 tons in 1976 and down to 1 million tons in 1980. In 1981 the taxpayer will have to pay from 50 percent to 100 percent higher per ton to replenish the stocks of copper and aluminum that were sold off for nonemergency purposes in the past. Surely this is not a responsible approach to stockpile management.

In the cases of cobalt and nickel metals for which we have essentially no domestic mine production, similar erratic fluctuations are evident. The stockpile goal for nickel has changed from 118,000 tons in 1944 to 450,000 tons in 1954 to 50,000 tons in 1963, down to zero tons in 1971 and back up to 200,000 tons in 1980. Between 1959 and 1973, 400,000 tons of nickel were sold from the stockpile at an average price of $1,600 per short ton, with the Government realizing a net proceed of $144 million from the sale. This amount falls way short of the nearly $1.2 billion it will cost the taxpayer to reacquire the 1980 goal of 200,000 tons of nickel at current prices of $7,000 per ton.

In 1944 the goal for cobalt was 11,600,000 pounds. From there it begins on the roller coaster, 40,000,000 pounds in 1949 to 129,000,000 pounds in 1955, down to a low of 11,945,000 pounds in 1973, and then back up again to 85,415,000 pounds in 1980. Between the years 1962 and 1977 the Government sold 62,000,000 pounds of cobalt at an average cost of $2.50 per pound. The net proceed the Government realized was $21,504,000. We now have an acquisition program and we must buy 45,000,000 pounds. The value in 1981 is $20 per pound and the total cost to buy the 45,000,000 pounds will be $900,000,000.

During this current session of Congress we are witnessing similar efforts to dispose of all of the stockpiled silver, in complete disregard to its strategic importance to the Nation. In these times of increasing resource protectionism on the part of Canada and Mexico we cannot afford to rely on these two countries as a guaranteed source of 50 to 60 million troy ounces of silver per year in a time of emergency. The purpose of the national defense stockpile is to be self-sufficient and not to be dependent on outside sources in an emergency. We are preparing to sell off over 100 million troy ounces of silver at bottom of the barrel prices of $8 to $10 a troy ounce. I do not want to see us coming back in 5 years and asking the taxpayer to buy back this same silver for two, three, or more times the price.

We need a method for stabilizing stockpile goals at a minimum level to avoid such erratic manipulation of the strategic and critical materials goals in the future. We also need a more direct involvement of Congress in the setting of stockpile goals and to more closely tie these goals to our import dependence. This is the purpose of this piece of legislation, which is offered as a

House companion bill to Senator McCLURE's stockpile formula bill, S. 1338.

The national stockpile was originally established by the Strategic and Critical Materials Stock Piling Act of June 7, 1939, as subsequently amended by the act of July 23, 1946 (50 U.S.C. 98-98h). Following World War II the stockpile policy was to provide sufficient strategic and critical materials to sustain the Nation through a 5-year emergency. This requirement was reduced to a 3-year emergency during the 1960's. In 1973 the administration reduced the stockpile requirement to a 1-year-emergency basis and sought legislation to dispose of large quantities of excess materials to balance the budget. However, much of this legislation was not passed by Congress. In 1976, the stockpile planning basis was returned to the first 3 years of an emergency of indefinite duration. A minimum planning base of a 3-year emergency has now been established legislatively in the Strategic and Critical Materials Stock Piling Revision Act of 1979.

Other important provisions of the Strategic and Critical Materials Stock Piling Revision Act of 1979 include:

First, clarification that the purpose of the stockpile is to provide for national defense and not for economic or budgetary purposes;

Second, authorizing the President to determine stockpile requirements and providing, for the first time congressional guidance as to how these determinations are to be made;

Third, creation of a national defense stockpile transaction fund, as a separate entity within the Treasury, to handle all funds generated by the disposal of stockpiled materials, and from which funding of purchases for the stockpile can be obtained.

These amendments are not enough; the congressional guidance has not sufficiently affected the continuing development of stockpile goals. Presently, the Federal Emergency Management Agency periodically reviews the goals and takes into consideration the recommendations of the Departments of Defense, Commerce, Interior, State, Treasury, and the Central Intelligence Agency. The recommended goals then undergo an Office of Management and Budget policy review prior to being submitted to Congress. There is no simple formula used to set criteria and to serve as a benchmark upon which to evaluate the goals set by the President. It is still possible to use the national stockpile for economic or budgetary purposes with this type of subjective development. It should not be used to provide each administration with a slush fund of valuable minerals and materials. It must be used for its true purpose; to provide this country with the strategic and critical materials needed in a national emergency.

Mr. Speaker, my bill today will take us one step closer in achieving this purpose. It will bring a more direct involvement of Congress in the setting of stockpile goals and to more closely tie these goals to our import dependence. The bill provides that the executive branch should continue to designate the materials that are needed for the stockpile. But, the bill recognizes that an order of priority exists with respect to the quantity of each material stockpiled and that fundamental to that priority is the dependency this Nation has on imports to meet raw material needs.

The United States is obviously most vulnerable to supply difficulties with respect to commodities which it does not produce in any significant quantities. In the bill these materials are designated as class A. Those commodities which represent materials of which the United States has some production but is unlikely to achieve self-sufficiency even with severe rationing or substitution, are designated class B. Finally, those commodities which the United States produces in substantial quantities but for which it has some import dependence are designated as class C. The importance of these designations is that the goals would rely on our foreign dependency. For commodities in class A, the goal would be equal to a 3-year supply of a 5-year average of net imports. For class B, the goal would be a 2-year supply and for class C, the goal would be a 1-year supply.

The President, operating through an interagency advisory committee chaired by FEMA, is authorized to designate the classification of the individual commodities under the terms of the bill and in so doing will be expected to calculate average annual U.S. net imports of each.

The bill requires a review of the goals every 4 years or whenever the 5-year trend of net imports varies by more than 10 percent over the 5-year average annual net imports. The trend rather than the average is used as the trigger point to make sure the Government is responding accurately to economic events. An increasing net import trend will reflect increased demand or lost domestic capacity. While a decreasing trend would suggest increasing domestic capacity, decreasing demand or increased substitution with its implication for changing materials application.

The bill does not change the existing provisions of the Stock Piling Act of 1979 requiring the stockpiling of sufficient quantities to sustain the United States for a period of not less than 3 years in the event of a national emergency. If the 3-year requirement is not met by the prescribed net import formula, the Interagency Advisory Committee may use a different method of computation. The methods and assumptions for calculating the new goal must then be presented to Congress for a 90-day review period before becoming effective. This review period will allow for the necessary congressional oversight in the establishment of stockpile goals and to assure the national defense stockpile is not being used for economic or budgetary purposes.

In further exposition of how the formula would work, the following table compares the current stockpile inventories with the 1980 FEMA goal and with the net import formula goal.

Commodity and class	Current stockpile inventory	1980 FEMA goal	Net import formula goal
Class A:			
Chromium, S.T.	1,173,000	1,353,000	1,572,000
Cobalt, Lb.	40,802,000	85,400,000	54,000,000
Manganese, S.T.	1,587,000	1,500,000	3,114,000
Platinum, Tr. Oz.	453,000	1,310,000	2,976,000
Class B:			
Nickel, S.T.	0	200,000	333,000
Silver, Tr. Oz.	139,500,000	0	86,000,000
Zinc, S.T.	376,000	1,425,000	1,208,000
Class C:			
Aluminum, S.T.	1,700	700,000	123,000
Copper, S.T.	29,000	1,000,000	262,000

As the example goals reflect normal peacetime import levels, Congress will want to examine any existing goals, based on a 3-year defense requirement, that are substantially below the peacetime import levels. In the case of manganese, we have no domestic mine production and have a 98-percent net import reliance. The existing FEMA goal is less than half of the formula derived goal and only 12 percent higher than 1976-80 average annual domestic consumption of contained manganese.

In addition to the stockpile goal formula provisions, this bill also provides language to improve the operation of the stockpile transactions fund. Reflecting the extent of title VII of H.R. 3364 this section amends section 9(b) of the Strategic and Critical Materials Stock Piling Act to provide that moneys received from the sale of materials from the stockpile be transferred to the transactions fund and be immediately available for the acquisition of those strategic and critical materials for which the stockpile is in deficit. The title thereby removes the present requirement that moneys in the transactions fund be appropriated before they are available for the purchase of stockpile materials. This action will increase the flexibility of the stockpile manager in taking advantage of optimum market conditions in purchasing new stockpile materials.

Mr. Speaker, I believe this bill will assist in maintaining a strategic and critical materials stockpile sufficient to meet our defense industrial base materials need during a national emergency, and I ask that each of my colleagues join me in making sure this will occur.

I ask unanimous consent that the text of my bill be printed in the RECORD.

H.R. 4266

A bill to amend the Strategic and Critical Materials Stock Piling Revision Act of 1979 in order to prescribe the method for determining the quantity of any material to be stockpiled under such Act, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Strategic and Critical Materials Stock Piling Revision Act of 1981."

SEC. 2. Section 3 of the Strategic and Critical Materials Stock Piling Revision Act of 1979 (50 U.S.C. 98b) is amended by amending subsection (c) thereof to read as follows:

"(c)(1) In order to carry out the provisions of this section, the President shall appoint an interagency advisory committee, chaired by the Director of the Federal Emergency Management Agency and composed of representatives from appropriate departments and agencies of the government, to determine which materials are to be acquired under this Act and what classification such materials shall be assigned under paragraph (2).

"(2) Materials selected to be stockpiled under this Act shall be classified by the interagency advisory committee provided for in paragraph (1) as being one of the three classes prescribed below, as appropriate:

"(A) Class A materials are those materials not produced in the States or produced in the United States in limited quantities, that are necessary for the security of the United States, are essential to the economy of the United States, and are primarily obtained from foreign sources.

"(B) Class B materials are those materials produced in the United States but are not available in sufficient quantities in the United States to offer the potential for meeting total domestic needs, are necessary to the security of the United States, are essential to the economy of the United States, and are obtained to a substantial extent from foreign sources.

"(C) Class C materials are those materials produced in substantial quantities in the United States, are available in sufficient quantities to meet total domestic requirements, are necessary to the security of the United States, are essential to the economy of the United States, and are obtained to a lesser extent from foreign sources.

"(3) The quantity of any material to be acquired under this Act (stockpile goal) shall be determined as follows:

"(A) The stockpile goal for any material designated as a class A material shall be a quantity equal to three years' domestic net imports of such material.

"(B) The stockpile goal for any material designated as a class B material shall be a quantity equal to two years' domestic net imports of such material.

"(C) The stockpile goal for any material designated as a class C material shall be a quantity equal to one years' net imports of such material.

"(4) Subject to appropriate adjustments under paragraph (5), a year's domestic net imports of any material for purposes of clause (A), (B), or (C) of paragraph (3) shall be a quantity of the material equal to the average annual imports of such material during the five calendar years immediately preceding the calendar year in which the determination for the stockpile goal is being made (base period), plus the average annual sales or minus the average annual purchases of such material made from the stockpile during such five-year base period, reduced by the average annual exports of such material during such five-year base period.

"(5) In determining the quantity under paragraph (4) of any material to be acquired for the stockpile appropriate adjustment shall be made in the computations made under such paragraph: in the case of any material which is acquired in both its crude form and in its refined or processed form so as to avoid duplicate calculations with respect to the same material.

"(6) The stockpile goal for any material acquired for the stockpile under this Act shall be reviewed once every four years by the interagency advisory committee referred to in paragraph (1). A revised objective for such material shall be established only if the five-year trend (rate of growth or rate of decline) of net imports of such material for the five calendar years immediately preceding the current calendar year increased or decreased by more than 10 per centum over the five-year average annual net imports of such material at the time of the preceding mandatory review under this paragraph.

"(7) Nothing in paragraph (6) shall be construed to prohibit the interagency advisory committee referred to in paragraph (2) from conducting a review of the stockpile goal for any material at any time other than that prescribed by paragraph (6); but in any case in which such committee determines that the stockpile goal for any material should be computed in a manner other than that prescribed in paragraph (3), the President shall notify the Committees on Armed Services of the Senate and House of Representatives in writing of that determination and set forth the proposed method and assumption underlying the computation of the stockpile goal for such material. Such alternative goal shall be computed in accordance with the principles set forth in Section 3(b) of the Act. The new goal and formula shall become effective with respect to such material unless within a period of ninety days after the date on which Congress was notified by the President, the Congress agrees to a resolution disapproving such goal or method of computing the goal."

SEC. 3. Section 9(b) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98h(b)) is amended to read as follows:

"(b) All moneys received from the sale of materials in the stockpile under paragraphs (5) and (6) of section 6(a) shall be covered into the fund. Such money shall be available for the acquisition of strategic and critical materials under section 6(a)(1) and for transportation related to such acquisition but for no other purpose."

SEC. 4. Section 5 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98d) is amended by striking out subsection (a) and redesignating subsections (b) and (c) as subsections (a) and (b), respectively.●

SENATE—*Monday, July 27, 1981*

(Legislative day of Wednesday, July 8, 1981)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

In the words of the psalmist:

Blessed be the name of the Lord from this time forth and forevermore. From the rising of the sun to its setting, the name of the Lord is to be praised. The Lord is high above all nations, and His glory above the heavens.—Psalms 113: 2-4.

We thank Thee Lord for the opportunities for worship, relaxation, rest and family time for the weekend. We thank Thee for the prospects for service to the people and to each other this week. Grant that our hearts and these Halls shall reflect Thy love and glory this week. Help us to remember the poor, the elderly, the oppressed, and all who are disadvantaged in our deliberations. So guide us that the decisions made this week will conform to Thy truth, justice, equity, and compassion.

For Jesus' sake. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

ORDER FOR CONSIDERATION OF GLENN AMENDMENTS

Mr. BAKER. Mr. President, on Friday a sequence of amendments was arranged beginning with the distinguished junior Senator from Tennessee (Mr. SASSER) and ending with the distinguished Senator from Pennsylvania (Mr. HEINZ).

I ask unanimous consent that at the end of that list, following on after disposition of the Heinz amendment, the Senator from Ohio (Mr. GLENN) be recognized to call up two amendments, one on incremental research and a second amendment on research and development.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object—and I will not object—it is my understanding that this request meets with the wishes of Mr. GLENN and it is an order that we felt might have been entered on last Friday. I thank the distinguished majority leader for including these two amendments. I remove my reservation.

Mr. BAKER. Mr. President, I thank the minority leader.

Mr. President, his understanding of the situation is exactly as my own. If there is any variation in that when the Senator from Ohio reaches the floor, I will be happy to attempt to change the order. For the moment, Mr. President, I reiterate the request.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent, after the recognition of the two leaders under the standing order and a special order in favor of the distinguished President pro tempore, the present occupant of the chair, that there be a brief period for the transaction of routine morning business not to extend beyond the hour of 10:30 a.m. in which Senators may speak for not more than 2 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

BUDGET RECONCILIATION CONFERENCE REPORT

Mr. BAKER. Mr. President, it is my hope that the conference on reconciliation of the budget can be concluded today. I have met with a number of Senators, Members of the other body, and representative members of the relevant committees over the weekend and this morning. There is still a considerable amount of work to be done and there are substantive issues to be resolved, but I believe that can be done by the close of this day. I think it is essential that we do so.

I urge all Senators who are involved to work as diligently as possible and express the hope that both our Members and Members from the other body will be as forthcoming as possible in their efforts to reconcile their differences between the Senate and House versions of the reconciliation bill in order to reach a resolution of this issue today. It is my understanding that the House of Representatives will seek and perhaps obtain a rule for consideration of the reconciliation conference report on Thursday. The Rules Committee, I believe, is scheduled to meet on Tuesday.

So if we are to meet our deadline and schedule this weekend, by the 1st of August, we have to finish that reconciliation conference today, and I believe we can.

TAX LEGISLATION

On the tax bill, Mr. President, I also have had the opportunity over the weekend to review the amendments that remain to be disposed of. And there is a considerable number. I would hope that today Senators would carefully examine the list of remaining amendments and just as carefully scrutinize their consciences and see if there is not some way we can eliminate a number of amendments from further consideration and shorten this list. Otherwise, we are going to be hard put to finish this bill by the hour designated in the previous unanimous-consent order.

Once again, Mr. President, I express a note of optimism. I believe we can do that. Indeed, I believe we can finish the tax bill on Tuesday instead of Wednesday.

I inquire of my friend the minority leader if he has any views on that subject and most especially whether or not we might entertain a consent order or modification of the previous consent order to change the time for third reading of this bill from Wednesday, as provided, until sometime on Tuesday, a day earlier?

Mr. ROBERT C. BYRD. Mr. President, I am not in a position at this time to offer any particularly optimistic hope that this may be done. I will continue to endeavor to work toward that end. I made the suggestion one day toward the close of last week but found my colleagues on this side of the aisle did not feel that they wanted to proceed in that fashion. But it is entirely possible, I think, that the Senate will finish the bill by the close of business on tomorrow. I cannot make that promise, of course.

Will the distinguished majority leader indicate what else he might see in the program through the remainder of this week? Is it his plan, if at all possible, to complete the tax bill and the conference report thereon, the conference report on the reconciliation bill, and is there anything else that we might be prepared for before the end of the week?

Mr. BAKER. Mr. President, I thank the minority leader for his statement. I join him in the hope that we can, indeed, finish this bill tomorrow. And I would even presume to wish for a modification of the order. The minority leader was the original one to suggest this and I express my gratitude to him for the suggestion. I have adopted his suggestion, I hope with not unseemly haste. But, in any event, we will do the best we can to continue to hope for the conclusion on Tuesday.

TENTATIVE SCHEDULE BEGINNING WEDNESDAY

If, indeed, we finish this bill on Tuesday, Mr. President, it is fairly clear, I think, that the reconciliation conference report will not then be available. In any event, we already have an order to proceed to the cloture vote on the Johnston amendment to the Helms amendment to the Department of Justice authorization bill. I would think, Mr. President, that if we can finish the tax bill on Tuesday it might serve the convenience of the Senate then if we set the Johnston cloture vote sometime early on Wednesday. If cloture is invoked, and the distinguished junior Senator from Louisiana understands this, I would expect, under the order previously entered, to try to go to an appropriation bill, I believe it is the HUD appropriations bill, the first one to be reported this year.

If cloture is not invoked on the Johnston amendment, then I would still hope to go to an appropriation bill or to one of the two conference reports or to some other matter of the five that were designated in the order. I would not expect any significant business, beyond those things that we could clear on the two calendars by unanimous consent, except the tax bill, the two conference reports, one on the tax measure and the other on the budget reconciliation, an appropriation bill, and the cloture vote on the Johnston amendment to the Department of Justice authorization bill.

I do not say that with absolute certainty, Mr. President. Other things may arise which must be dealt with and on which the minority leader and I could agree. But I have no expectation that any other matter of substance will be brought before the Senate except those matters.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

Mr. BAKER. Mr. President, I have no need for any time I have remaining under the standing order. I am prepared to yield it back.

Mr. President, if I have any time remaining under the standing order, I yield it to the control of the distinguished minority leader.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

PERVERSION OF OUR LEGISLATIVE PROCESS

Mr. ROBERT C. BYRD. Mr. President, I am becoming increasingly concerned about the perversion of our legislative process through mass advertising campaigns.

In my view, such selling techniques have no place in the deliberative process which has served this Nation so well and for so long.

I have heard the advertisements currently on the airwaves which attempt to ridicule the Speaker of the House of Representatives. These advertisements are negative in their approach, and devoid of substance.

Regardless of which side of the tax issue one is on, this simplistic tactic in addressing complex problems tends to demean the American people, tends to underestimate and insult their intelligence, and tends to demean the Representatives they send to Washington to serve them.

My personal belief is that the slick Madison Avenue approach being used grossly underestimates the intelligence of the average citizen, and is completely devoid of intellectual honesty.

Issues which confront our Nation should be studied in an atmosphere free of sensationalized, packaged, slick advertising campaigns which are exploitive in nature and lacking in facts.

In both the Senate and the House of Representatives this week we are deliberating on complex and far-reaching tax policy. This is not something that can or should be advertised as if it were a box of sugarcoated cereal.

Such simplistic advertising blitzes add nothing to a considered public debate of the issue.

I hope and I believe that the American people are going to see through this tactic and that such tactics will backfire.

Mr. President, I yield to the Senator from Wisconsin whatever time he desires.

Mr. PROXMIRE. Mr. President, I congratulate the distinguished Democratic leader for what he just said. I cannot agree more. This kind of one-sided attack on the Speaker of the House of Representatives is deplorable. We should not tolerate it. As the distinguished leader has said, it is negative, it is simplistic, it is based on a whole series of 30-second spots, and so forth, that give the viewer nothing but a prejudice. It is wrong and I earnestly hope it backfires as it certainly should.

THIRTY-TWO YEARS OF DELIBERATION ON THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, I call attention to another reminder of the Senate's failure to act on the Genocide Convention. This week marks the 32d year since the first Subcommittee on the International Convention on the Prevention and Punishment of the Crime of Genocide was created to consider this important treaty.

Such anniversaries leave no room for complacency. They are a bitter reminder that we have delayed beyond all reason in bringing this treaty to the floor for consideration.

The Genocide Convention has successfully withstood objections concerning its language and content. Every administration since Harry Truman has supported its adoption.

Secretary Haig was very clear in saying it is an embarrassment to our country that we have not ratified the Genocide Convention.

Numerous distinguished organizations including the American Bar Association and every religious group in this country have endorsed the convention; 87 other nations have acceded to this treaty.

Every important country in the world except the United States has ratified the Genocide Convention.

The reasons behind this support of the treaty are compelling. While the convention cannot prevent the crime of genocide from occurring, its adoption would be a strong symbolic step in the progress of human rights.

The history of international accords has shown the power of world opinion, as is witnessed by the gradual improvement of prisoner of war practices in the years following the Geneva Convention. Advancement of universal human rights is possible. The Genocide Convention is the appropriate vehicle by which we should aid that progress.

The great American author Ralph Waldo Emerson wrote that: "Progress is the activity of today and the assurance of tomorrow." Without our action to adopt the Genocide Convention, our Nation will be denied the assurance of an effective stance in dealing with any appearance of genocide in the future. Perhaps more importantly, we would have failed to take an essential step in the progress toward a more humane world.

Let us not forget that genocide is the planned, premeditated murder of an entire ethnic group, the classic example, of course, being Hitler's determination to eliminate the Jews in Europe by killing 6 million Jews. The fact is that we have a treaty that other nations have subscribed to outlaw that kind of hideous, inhumane treatment, and, of course, when the initiative for this came from the United States, it should remind us that it is time that we act; 32 years is a long time to deliberate on a treaty which simply recognizes the right of all peoples to live.

Mr. President, I call to the attention of the Senate that on every desk this morning is an Executive Calendar. On the front page of that calendar is a list of treaties sent to the Senate.

The Consular Convention with the People's Republic of China was sent to the Senate on January 19, 1981. They have acted on it now in 7 months. That is a convention with Communist China.

The treaty with Colombia concerning the status of Quita Suenio, Roncador, and Serrana has been pending too long, 8 years, but at long last we are acting on it.

The International Convention Against the Taking of Hostages, another human rights treaty, has been there since August 4, 1980, but now we are acting on it.

The Convention on the Physical Protection of Nuclear Material arrived in May 1980, about 2 years ago, and we are finally acting on it.

The Revised Customs Convention on the International Transport of Goods Under Cover of TIR Carnets is dated July 26, 1977, about 4 years.

Amendments to the Inter-Governmental Maritime Consultative Organization Convention was sent to the Senate May 20, 1980, and it is now sent to the floor of the Senate.

This convention, the Genocide Convention, has been there for how long? Thirty-one years, Mr. President—longer than any other treaty in the history of this body—and we have failed to act on it.

Mr. President, I think it is time that we considered this treaty, considered the fact that the overwhelming majority of Americans certainly favor it, and every responsible group that has considered the treaty has recommended that we act on it.

I truly hope that this Senate will not have to mark another such anniversary. I urge my distinguished colleagues to act now and ratify the Genocide Convention.

Mr. President, I yield the floor.

RECOGNITION OF SENATOR THURMOND

The PRESIDING OFFICER (Mr. KASTEN). Under the previous order, the Senator from South Carolina is recognized for not to exceed 15 minutes.

THE DAVIS-BACON ACT, PART VI, THE WALSH-HEALEY ACT

Mr. THURMOND. Mr. President, in previous presentations, I have discussed various aspects of the Davis-Bacon Act. Today, I would like to compare the Davis-Bacon Act with the Walsh-Healey Act and try and draw some conclusions about the impacts that might occur if Davis-Bacon were repealed.

Davis-Bacon proponents contend that the impact of Davis-Bacon repeal would be catastrophic. They claim that fly-by-night, cut-throat competitors would move in and undercut community prevailing wages forcing wage scales below normal levels.

No one can say with certainty what the beneficial impacts of the repeal of Davis-Bacon would be, but certainly a few results seem self-evident.

There would be reductions in the general cost of Government construction without any significant loss of employment opportunities.

The cost of administering the act would be saved.

There would be greater competition for Government construction contracts.

Some of the inflationary impact of Davis-Bacon wage determinations would be reduced.

Fortunately, we can reduce the speculation of what might happen with the repeal of Davis-Bacon by examining a similar prevailing wage law, the Walsh-Healey Act, which is no longer in force.

The Walsh-Healey Public Contracts Act was signed into law by President Franklin D. Roosevelt on June 30, 1936. It was intended in part to be the Government's answer to the problems of poor working conditions and wage cutting in private nonconstruction industry.

The National Industrial Recovery Act (NIRA) of 1933 contained requirements related to maximum hours of work and minimum wages for many Government-connected industries. When the NIRA was declared unconstitutional in 1935, Secretary of Labor Frances Perkins made two legislative proposals to the President and to the Congress. The first of these, which became the Walsh-Healey Act, was of limited scope. It was intended to govern the conditions of work for employees of private industry who were engaged in the production of goods for sale to the Government. It was felt that the Government had the right to require employers who produced goods under public contracts to insure decent standards of work for the employees of those contractors. The second Perkins proposal was eventually enacted as the Fair Labor Standards Act (FLSA).

The purpose of the Walsh-Healey Act was to accomplish three primary goals: First, to permit the Federal Government to influence the establishment of wages and working hours; second, to offset the alleged tendency of employers to depress labor conditions in order to be the lowest responsible bidder on a Government contract; and third, to make the Government a model employer. A 1952 amendment provided for judicial review of the administration of the act at the instigation of any interested party.

The Walsh-Healey Act provides that minimum prevailing wages must be paid to employees of manufacturers or dealers under contract in an amount exceeding $10,000 to the Federal Government to produce or furnish materials, supplies, articles, or equipment.

The prevailing minimum wage theory in the Walsh-Healey Act was similar to that in the Davis-Bacon Act. The Labor Department must determine the prevailing wages on the basis of similar work performed in that particular industry or a similar industry in the locality of manufacturer or supplier. Employees covered are those who, after the award of the contract, manufacture, assemble, handle or ship the goods. Executive, administrative and professional employees are exempted.

Just as is the case with Davis-Bacon today, management was critical of the techniques used in determining Walsh-Healey prevailing wages, claiming they were inflationary. The issue of locality was also controversial.

Advocates of the act argued that it was needed to protect workers from even lower wages in a low-wage industry. They also argued that it was ineffective since it was limited only to those employees on Federal contracts.

In 1964, the court decision of *Wirtz* v. *Balda Electric Co.*, 337 F.2d 518 (D.C. 1964), held that wage determinations under the Walsh-Healey Act were subject to the Administrative Procedures Act. Therefore, all parties had a right to inspect records used in making wage determinations. The surveys of corporate wage rates were made on the basis that the information obtained would remain confidential.

As a result of this court decision, since 1964, no new wage determinations have been made, and generally, the wage provisions of the Fair Labor Standards Act (FLSA) have been applied as the prevailing minimum wage rates required by the Walsh-Healey. Wage determinations that had been made prior to the court case remained in effect until superseded by the FLSA.

Union leaders predicted disaster as a result of this 1964 court decision which essentially killed the Walsh-Healey Act. The 1979 General Accounting Office's report on Davis-Bacon provided a brief overview of what exactly happened. It is worth while to extract portions of this report to show what has happened since Walsh-Healey became inoperative:

In the absence of (Walsh-Healey) wage determinations, employees working on contracts subject to the Walsh-Healey Public Contracts Act must be paid the minimum wages specified in the Fair Labor Standards Act of 1938.

The Commission on Government Procurement Study Group No. 2 evaluated the effect of not issuing wage determinations under the Act and concluded in its final report that: "The need for a prevailing wage in most manufacturing industries to protect workers from the Government's policy that contracts go to the lowest bidder is not necessary under current economic conditions."

The Commission's Study Group based its conclusion on the fact that there was no evidence that Government purchasing was exerting downward pressure on wages and the fact that: "The 'Sweatshop' conditions characteristic of the 1930's have given way to an era of prosperity and there is no current evidence that contracting by the Government is having any adverse effect on labor standards in manufacturing industries."

The Study Group did not find any adverse impact by Labor discontinuing making wage determinations for the millions of workers covered under the Walsh-Healey Act. Its report further stated that: "In discussions with major contractors and with contracting agencies, the study group was unable to develop any information or views that the wage determination aspect of the law had some relevancy today."

We also discussed the effect of discontinuing wage determinations under the act with cognizant Labor officials, who advised that, since 1975, Labor has received no significant complaints alleging an adverse effect on labor standards and protection of workers employed by manufacturing contractors doing business with the Government.

About the only effect of ending the Walsh-Healey wage determinations is that no longer are union wages the prevailing rate.

This example, Mr. President, serves as ample proof that repealing the Davis-Bacon Act would not result in any significant harm. The Walsh-Healey Act, which was declared essential to protecting the wages of workers in a low-wage

industry, is now just a historical footnote. The background, philosophy, and operation of the Walsh-Healey Act and the Davis-Bacon Act are so identical that one can reasonably predict that repealing Davis-Bacon would save the Nation millions of dollars without harming the construction industry or its workers.

We also have examples at the State level concerning the effects of repealing Davis-Bacon. In my talk last Thursday, I mentioned that 41 States had enacted their own little Davis-Bacon Acts. That figure is now 37. Four States—Alabama, Arizona, Florida, and Utah—have recently repealed their little Davis-Bacon Acts. The Florida legislature estimated a savings of several hundred million dollars with no accompanying harm by repealing its Davis-Bacon. Two other State legislatures repealed their Davis-Bacon Acts this year; the Governors of both Colorado and New Mexico, however, vetoed these bills.

Mr. President, never have I seen the case for legislative action so compelling. We must act now to correct the intolerable situation that exists because an archaic law remains on the books.

In my next presentation, I shall summarize the Davis-Bacon repeal case as it has been presented by the press.

Mr. President, I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for routine morning business.

ADDITIONAL TIME FOR DEBATE ON THE TAX BILL

Mr. BAKER. Mr. President, this request has been cleared with the distinguished minority leader and with the managers of the bill on both sides.

I ask unanimous consent that there be 2 additional hours for debate on House Joint Resolution 266, under the control of the distinguished chairman of the committee and the ranking minority member, to be equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, will the Chair lay before the Senate the pending business?

The PRESIDING OFFICER. Morning business is closed.

ECONOMIC RECOVERY TAX ACT OF 1981

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of House Joint Resolution 266, which will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 266) to provide for a temporary increase in the public debt limit.

Mr. BAKER. Mr. President, I suggest the absence of a quorum, with the time to be charged against the newly created time.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, do I understand correctly that the distinguished Senator from Michigan wishes to proceed out of sequence, in advance of the Senator from Tennessee (Mr. SASSER), on the list of amendments to be considered, by unanimous consent?

Mr. RIEGLE. I am prepared to proceed now. I understand that the Senator from Tennessee will not offer his amendment.

Mr. BAKER. I hope that is correct.

Mr. President, I ask unanimous consent that it be in order for the Senator from Michigan to present his amendment at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the debt limit bill, House Joint Resolution 266, and the pending amendment is the amendment offered by the Senator from Kansas.

Mr. DOLE. Mr. President, I ask unanimous consent that that amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 298

(Purpose: To accelerate the deduction for two-income married couples)

Mr. RIEGLE. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Michigan (Mr. RIEGLE) proposes an unprinted amendment numbered 298.

Mr. RIEGLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 26, beginning with line 9, strike all through line 21 and insert in lieu thereof the following:

"(a) Deduction Allowed.—In the case of a joint return under section 6013 for the taxable year, there shall be allowed as a deduction an amount equal to 10 percent of the lesser of—

"(1) $30,000, or

"(2) the qualified earned income of the spouse with the lower qualified earned income for such taxable year.

Mr. RIEGLE. Mr. President, my purpose in offering this amendment, is to move more quickly to reduce the unfairness and the negative effects of the so-called "marriage-tax penalty."

The committee bill would provide a new income tax deduction to help correct the tax inequity that currently hits millions of two-income married couples. The deduction proposed by the committee would equal the lesser of $3,000 or 10 percent of the earned income of the spouse with the lower wages.

However, the committee would delay the full deduction until 1983 and, in 1982, would provide only half of the deduction—$1,500 or 5 percent of lower wages, whichever is less.

My amendment would simply provide the full $3,000 or 10-percent deduction beginning in 1982.

Mr. President, my amendment would have a one-shot, nonrecurring impact on revenues, which is estimated by the Joint Tax Committee staff to be: $200 million in fiscal year 1982, and $2.9 billion in fiscal year 1983.

That revenue effect is a measure of the tax inequity that would remain in this bill for millions of married taxpayers if my amendment is not adopted.

There is a straightforward argument for this amendment. Congress has been made aware of the clear inequity of the marriage penalty. Congress knows of a way to correct that problem and bring more fairness in the tax system. Therefore, Congress should not delay the remedy.

Mr. President, two central goals of the tax system should be to provide equal treatment for all taxpayers who are in similar circumstances and to avoid tax distortions of Americans' basic choices, such as whether or not to marry.

The current tax system seriously fails to meet that second goal. For example, two single people, who each earn $10,000, would have their total tax bill go up by $391 if they get married. The penalty is as large as $3,000 to $4,000 annually for many married couples. In effect, the earnings of one marriage partner is stacked for tax purposes on top of the earnings of the other.

The result is that the first dollar earned by one spouse is taxed at the same marginal rate as the last dollar earned by the other partner. The Treasury Department estimates that, because of this, 17 million couples will pay a marriage penalty in 1981, and in all likelihood that number will grow in 1982.

Mr. President, I am certain that this penalty was never intended by Congress. The problem is only about 10 years old. In the Tax Reform Act of 1969, Congress moved to reduce a single person's tax penalty that existed at the time. But at the same time a severe marriage penalty was created.

The negative and unfair effect of the marriage penalty has been known for some time, and the Revenue Act of 1978 reduced the penalty slightly. But a large part of the penalty remains.

The problem has been made much worse by inflation. The rising cost of living has forced millions of spouses to bring a second income into the family. A tremendous change in lifestyle has occurred in recent decades. In 1947, for example, only 20 percent of American women worked outside the home. In

1980, that proportion soared to 51 percent, as married women entered the work force at higher paying jobs than ever before. That trend is expected to continue through 1990, when a projected 70 percent of women may work outside the home.

The energies and skills of women are a tremendous resource which the American economy is beginning to tap much more fully than ever before. That, of course, is a very positive development. But the marriage penalty creates for women the greatest disincentive to work that is built into the Tax Code.

Middle income families are hit even harder by this disincentive than upper income families because many of the additional costs that a two-income family incurs are rather fixed, and I refer to the cost of extra travel associated with going to and from work and child care costs that may also be involved.

Mr. President, a recent Gallup poll indicates that 83 percent of all Americans favor a change in the law to make the Tax Code fairer to married working couples.

While the committee proposes to ease the problem, it is not until 1983 that the committee would fully implement its remedy. I believe the solution should be enacted now and be put into effect immediately in the coming tax year.

Senator MATHIAS introduced an amendment several days ago that would have completely eliminated the penalty. I was a cosponsor of his amendment and preferred his approach. It would be the most equitable solution.

However, Senator MATHIAS felt he had to withdraw his amendment because the revenue impact was so large, the votes simply were not here to pass it.

Today, therefore, I am introducing a much more modest amendment. This amendment would accept the remedy of a 10-percent tax deduction that the Finance Committee has proposed. With this amendment, the Senate would simply state that, if the remedy is appropriate for these taxpayers in 1983, it is appropriate for 1982. It is not fair to arbitrarily provide only half the remedy and in effect to maintain half the penalty in 1982.

This amendment we have proposed is fair, it is modest, and I urge my colleagues to adopt it.

Mr. President, I reserve the remainder of my time.

Mr. President, I ask unanimous consent to list Senator CANNON and Senator SASSER as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I thank the distinguished Senator from Michigan.

Certainly I do not know of any other Senator who could be arguing this amendment and understand the marriage penalty better than the Senator from Michigan and the Senator from Kansas.

But I think the one problem we have with the Senator's amendment is the additional cost in fiscal year 1983, which according to the estimate I was just handed would be about $2.9 billion or nearly $3 billion. That is the reason for the phase-in under the Finance Committee bill.

It is not that we object to the result. It is that we object to the way the Senator from Michigan would proceed on the basis of the revenue numbers.

Are those the same figures that the Senator from Michigan has for that year?

Mr. RIEGLE. Yes, Mr. President, the estimates by the Joint Tax Committee are in that range, $0.2 billion in fiscal year 1982 and $2.9 billion in fiscal 1983. However, in a tax bill of this size this would be a very small item.

In addition, if we adopt this amendment, there will be some give and take in the conference with the House of Representatives. Some items that are already in this bill may have to be decreased. That would have a revenue impact and would provide room to accommodate this measure that would simply make the tax code fairer faster.

I hope that we can go on record supporting this and, when we get to conference, see if the money cannot be found to do this.

Mr. President, there is a strong supply side argument here, for those who believe in supply side economics. Reducing the marriage penalty would undoubtedly be one of the most cost-effective ways to increase an incentive to work and save. It would leave more of this hard-earned money with the people who are earning it. Paying this tax penalty is just not fair and continuing to levy the penalty has no justification.

Mr. DOLE. Mr. President, let me say that this would increase the revenue loss by $200 million in 1982 and about $3 billion in 1983. The Finance Committee proposal costs about $419 million in fiscal year 1982 and $4.4 billion in fiscal year 1983. So it is a rather substantial amendment.

I just suggest for that reason primarily I hope that this amendment will not be adopted.

There still may be some room in conference to move in this direction. Right now, according to the figures just furnished the Senator from Kansas by the Joint Tax Committee, preliminary estimates indicate that for fiscal year 1983 we are about $431 million over the revenue numbers in the administration's tax package. This would raise that to about a $3½ billion excess over the administration numbers.

I think another provision we agreed on last Friday, the $350 million amendment for child care, will also benefit the young couples with children.

I think just on the basis of the cost the Senator from Kansas is compelled to oppose the amendment.

Does the Senator wish the yeas and nays on the amendment?

Mr. RIEGLE. Yes, I wish to have the yeas and nays on the amendment.

Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I am wondering was there any agreement to have votes at a certain time or not?

Mr. RIEGLE. The Senator from Michigan is not aware that there is, but there may well be.

I am agreeable to looking for a time to accommodate Members if the vote does not come immediately.

How much time, may I inquire, remains on my side, Mr. President?

The PRESIDING OFFICER. Nine minutes remain on the side of the Senator from Michigan.

Mr. RIEGLE. I yield 3 minutes to the Senator from Tennessee.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. SASSER. I thank the distinguished Senator from Michigan for yielding to me.

Mr. President, I rise in support of the amendment offered by my distinguished colleague from Michigan (Mr. RIEGLE). His amendment provides for an immediate phase-in of the marriage tax deduction in 1982.

This is a laudable amendment, in my judgment. It builds on to the excellent work already done by the Finance Committee on this particular subject.

This amendment sends a message to the two-earner families throughout this country that we in the Senate understand their economic plight. We understand that more and more often it is necessary for both husband and wife to work to make ends meet.

Quite often the husband and wife make this decision out of concern for the well-being of their family. Both husband and wife move into the work force simply to provide for economic necessities for their family.

But, unfortunately, they presently find their work efforts are hindered by the so-called marriage tax; and the impact of the marriage tax, Mr. President, is considerable.

For couples, each earning $10,000, the marriage penalty is about $400 in taxes because both of them are working. For couples, each earning $15,000, the marriage tax penalty is nearly $700.

Retention of the marriage tax is an anachronism. It is an affront to the two-earner family throughout the country.

Mr. President, these are working people, people who must put in long hours simply to make ends meet for themselves and their families. We have heard a great deal about supply-side economics in the debate about this tax bill, and we have heard a lot about the necessity for increased capital investment. We have been implored by many to cut taxes for those in the higher income brackets so that they could save this money. These savings could then, the theory goes, be used for investment.

But, Mr. President, our most important priority should be to invest in the hard-working people of this country. The Riegle amendment, which I am proud to cosponsor, would tell the hard-working Americans where a husband and wife both work that we care about their economic future, and I hope, Mr. President, that my colleagues on both sides of the aisle will support this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. RIEGLE. I thank the Senator very much for his comments, for his cosponsorship and for his leadership in this area.

Mr. President, the Mathias amendment, which was introduced several days ago and withdrawn, would have completely eliminated the marriage tax penalty. That amendment had broad support, but the revenue effect of that amendment was very much larger than that of my amendment today.

The Mathias amendment in fiscal 1982 would have had a revenue impact of $9.5 billion, whereas the Riegle amendment will have a revenue impact of only $200 million.

In 1983 the Mathias amendment would have had a revenue impact of $11.2 billion, whereas my amendment in 1983 would have a revenue impact of $2.9 billion. The Mathias amendment would have had continuing costs in fiscal years 1984 and beyond, whereas this amendment would add nothing to the cost of the committee's bill in those future years. This amendment is much smaller by far than the Mathias amendment.

The thrust of my amendment today is to provide this marriage tax penalty relief sooner. We deal with it directly in 1982, rather than dealing with half the problem and needlessly delaying the relief for another year.

So I hope on that basis my colleagues will feel that this is a worthwhile amendment to support. It is not often we can strike down an inequity that the overwhelming majority of Americans know to be wrong. I do not think there is any disagreement in the Senate about the wrongness of the marriage tax penalty. There is wide support to eliminate it.

Since we have a problem that we know needs to be solved, we ought to act now to solve it and to provide the remedy fully and completely beginning in 1982.

Mr. DOLE. Mr. President, I suggest the absence of a quorum to be charged against the Senator from Kansas' time on the amendment.

I might say to the Senator from Michigan that we are checking with the leadership if it might not be helpful for many Members to have this vote sometime during the noon hour because there are a number of Senators in committee hearings. So I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR VOTE TO OCCUR AT 12:30 P.M. TODAY

Mr. BAKER. Mr. President, I have discussed this with the distinguished manager of the bill and with the minority leader. My understanding is that, in the event debate is concluded on this amendment, it is the wish of the parties and the better part of discretion to order a vote on this at 12:30 today.

Mr. President, I ask unanimous consent that at the conclusion of the debate on this amendment, the vote thereon previously ordered occur at 12:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I yield back the remainder of my time.

Mr. RIEGLE. Mr. President, I have no other requests at this point. I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the Senator from Washington (Mr. GORTON) is recognized to call up an amendment dealing with mutual savings banks on which there is a 10-minute time limitation.

Mr. DOLE. Mr. President, I yield 5 minutes off the bill to the distinguished Senator from Washington (Mr. GORTON).

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, the brief remarks which I intend to make at this point relate specifically to the amendment which has just been debated which was proposed by the distinguished Senator from Michigan (Mr. RIEGLE).

I should simply like to say, I am sure not only on my own behalf but on the behalf of the Members of this side of the aisle and many Members of the other side of the aisle, as well, that we sympathize greatly with the proposal to cut the marriage tax penalty. In fact, the chairman of the Finance Committee, the Senator from Kansas, has in the bill which is before us a responsible proposal to do just that.

The proposal of the Senator from Michigan, however, would add close to $2.5 billion in additional revenue loss if it were accepted in its present form.

I simply wish to point out to the Members of this body and to the general public that the Senator from Michigan who proposes this particular additional cut in revenues was one who was adamantly opposed to a tax cut of anything like the size of the one which is before the Senate right now, not only in the debate before the Senate Budget Committee on the maximum level of a tax cut but in the debate before the Senate as well.

He and many of those who are allied with him in pursuit of this amendment voted consistently to raise the amount of spending through some 40 or 50 roll-calls in this body, and voted significantly to reduce the allowance for personal and individual tax cuts which went to the Finance Committee for discussion.

So while this proposal is one that we wish we could accept, I am sure it is one that the Senator from Kansas wishes he could accept, our inability to do so is largely caused by the unwillingness of many Senators like the Senator who has sponsored this amendment significantly enough to cut the budget in order to allow it.

In order to be fiscally responsible, in order to reach a balanced budget as rapidly as possible, many of us will, with great regret, be required to vote against this amendment.

SEQUENCE OF AMENDMENTS

Mr. DOLE. I thank the distinguished Senator from Washington.

Mr. President, for those staff members of Senators who may be in committee meetings or in their offices, I would like to review the order of amendments.

Following the disposition of the amendment by the Senator from Washington (Mr. GORTON), will be the amendment of the Senator from Nebraska (Mr. EXON) and the Senator from New Jersey (Mr. BRADLEY). That will be followed by an amendment by the Senator from Massachusetts (Mr. KENNEDY), to be followed by an amendment of the Senator from Maine (Mr. MITCHELL), to be followed by the Nunn-Chiles amendment, followed by an amendment of the Senator from Pennsylvania (Mr. HEINZ), followed by two amendments of the Senator from Ohio (Mr. GLENN) and the Senator from Missouri (Mr. DANFORTH), in that order.

If, for some reason, that order cannot be accommodated by the proponents of the amendments, then I would hope that those Senators would contact us so that we might substitute other amendments. If for some reason those amendments will not be offered, and I hope that may be the case more often than not, we would like to be notified so we could schedule other amendments.

It is the hope of the Senator from Kansas that we could move very quickly on the remaining amendments and by late evening, 9 or 10 o'clock this evening, have completed nearly all of the controversial amendments.

The Senator from Kansas will also indicate that a number of amendments are under negotiation with Treasury. Some of those have been resolved and some are in the process of resolution.

I would predict that we should be able to wrap up this proposal late tonight or early tomorrow.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MURKOWSKI). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, what is the pending business?

The PRESIDING OFFICER. The Senator from Washington has been recognized to offer an amendment.

UP AMENDMENT NO. 299

(Purpose: Relating to mutual savings banks having capital stock)

Mr. GORTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Washington (Mr. GORTON), for himself and Mr. JACKSON, proposes an unprinted amendment numbered 299.

Mr. GORTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following new section:

SEC. . MUTUAL SAVINGS BANKS WITH CAPITAL STOCK.

(a) IN GENERAL.—Section 591 (relating to dividends paid on deposits) is amended—

(1) by inserting "(a) In General.—" before "In", and

(2) by adding at the end thereof the following new subsection:

"(b) MUTUAL SAVINGS BANK TO INCLUDE CERTAIN BANKS WITH CAPITAL STOCK.—For purposes of this part, the term 'mutual savings bank' includes any bank—

"(1) which has capital stock represented by shares, and

"(2) which is subject to, and operates under, Federal or State laws relating to mutual savings bank.".

(b) PERCENTAGE OF TAXABLE INCOME METHOD.—Subparagraphs (B) and (C) of section 593(b)(2) (relating to reduction of applicable percentage in certain cases) is amended by inserting "which is not described in section 591(b)" after "mutual savings bank" each place it appears.

(c) CONFORMING AMENDMENTS.—

(1) Sections 593(a) (relating to reserves for losses on loans) is amended by striking out "not having capital stock represented by shares".

(2) Paragraph (1) of section 593(e) (relating to distributions to shareholders) is amended by inserting "an institution that is treated as a mutual savings bank under section 591(b)" after "association" each place it appears.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to taxable years ending after the date of the enactment of this joint resolution.

Mr. GORTON. Mr. President, this amendment, cosponsored by my colleague (Mr. JACKSON), has been cleared with the distinguished chairman and the distinguished ranking member of the Committee on Finance. It is a technical amendment to cause the treatment of mutual savings banks which convert from mutual savings banks to stock savings banks to be identical in the tax code treatment with their bad debts and for dividends paid on deposits.

At the present time, Mr. President, savings and loans associations which convert from a mutual system of organization to a stock system of organization do not have tax consequences as a result of that choice of change in organization. Mutual savings banks do so and it significantly inhibits any mutual savings bank which wishes to go to a publicly-owned stock company. That kind of tax consequence should not occur. There is no valid policy reason for it to take place by reason of that election.

Recent very profound changes in the entire thrift industry make the flexibility to go from a mutual system to a stock system attractive in some areas, though not necessarily in other areas.

As this amendment has no significant revenue impact, Mr. President, but will help certain mutual savings banks which wish to make this change, I hope for its unanimous acceptance by this body.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, I do understand this amendment has been discussed with Senator LONG and with the Senator from Kansas and also with Treasury and the Joint Tax Committee staff as modified.

PRESENT LAW

Under present law, Mr. President, cooperative banks not having capital stock represented by shares, domestic building and loan associations, and cooperative banks without capital stock organized and operated for mutual purposes and without profit are permitted a more liberal bad debt deduction than other taxpayers (sec. 593). Under this special rule, a bad debt deduction is allowed equal to a percentage of the institution's taxable income. In the case of building and loan associations and cooperative banks, the percentage is 40-percent reduced by three-fourths of 1 percent for each percent that the institution's qualified assets (which are generally mortgages secured by real property) is less than 82 percent. Stock building and loan associations are eligible for the treatment but must meet special rules governing their investments (sec. 7701(a)(19)). In the case of mutual savings banks, the percentage is 40-percent reduced by 1½ percent for each percent that the institution's qualified assets is less than 72 percent. With the full bad debt deduction of 40 percent of taxable income, the effective rate of tax on these institutions is 27.6 (60 percent of 46 percent). In addition, there is a special rule for building and loan associations that recaptures ordinary income to the extent that the building and loan association makes distributions out of reserves attributable to more liberal bad debt deductions allowed under the percentage of taxable income method or under the laws prior to the Tax Reform Act of 1969.

Present law (sec. 594) also contains a special rule which permits life insurance income realized by a mutual savings bank to be taxed under the special rules governing life insurance companies as if the life insurance business of the mutual savings bank were operated as a separate company.

Present law (sec. 591) provides that amounts paid by mutual savings banks, cooperative banks, and domestic building and loan associations to depositors are deductible in computing the taxable income of the institution regardless of whether the amounts are dividends or interest.

DESCRIPTION OF PROPOSAL

The proposal would allow savings banks which issue stock, but which are subject to and operate under the laws of any State or the United States pertaining to mutual savings banks to be eligible for all of the special provisions described above for mutual savings banks not having capital stock represented by shares. Under this proposal, regulated stock savings banks would be allowed to compute their bad debt deduction under the percentage of taxable income method as savings and loan associations, and would be subject to the special recapture rules applicable to savings and loan associations. Regulated stock savings banks would be eligible to have their life insurance income taxed as a life insurance company. In addition, the proposal would clarify that amount paid to depositors of regulated stock savings banks would be deductible in computing the institution's taxable income.

● Mr. JACKSON. Mr. President, recently several States including Washington have passed laws permitting State-chartered mutual savings banks to convert to stock ownership. In the State of Washington this legislation was patterned after the regulations issued by the Federal Home Loan Bank Board pertaining to stock conversions by federally chartered mutual savings banks. Under the Washington State conversion statute, the converted institution generally continues to be governed by the same statutes as apply to mutual savings banks, and continues to have the same rights and restrictions on investment authority as apply to nonconverting banks. In other words, converting mutual savings banks will continue to operate as they always have except that the form of ownership will change from mutual association to stock ownership. This is being done to allow such institutions an additional means of generating capital and to improve their safety and soundness in general.

I am joining with Senator GORTON in proposing an amendment which would preserve the existing tax treatment provided to State-chartered mutual savings banks under the Internal Revenue Code for banks which choose to exercise the conversion option under State law.

Under the existing law section 593 provides rules governing reserves for losses on loans, section 591 provides rules governing deductions for dividends paid on deposits, and section 594 provides rules for mutual savings banks conducting life insurance business. The language proposed by our amendment maintains the present status of mutual savings banks where the only change is the conversion from mutual form to stock form with one exception. Under existing law savings and loan associations which have become stock institutions are required to invest 82 percent of their assets in real estate investments to receive the full deduction for losses on loans. Mutual savings banks currently are required to invest only 72 percent of their assets to receive the full deduction. Under the amendment converting mutual savings banks would be put on the same footing as stock savings and loan institutions.

Under existing law, federally chartered mutual savings banks which have converted to stock ownership are covered by sections 593, 591, and 594. In addition, there is no difference between the tax treatment provided to those savings and

loan associations which have converted to stock ownership and those which have not. These institutions receive similar treatment to mutual savings banks under the Tax Code. In other words, State-chartered mutual savings banks are the only category of savings institution which cannot convert to stock ownership and retain their present tax status. Our amendment would allow them to do so under State conversion laws.

I might note that, historically, mutual savings banks and savings and loan associations received tax exemptions because of their cooperative form of ownership and because of their concentration on real property loans. Over the years as these institutions have become more like for profit depository institutions and less like cooperatives, their exemption from tax was narrowed. As banking deregulation proceeds, it is quite possible that the Congress will have to return to the issue of the tax treatment of institutions which invest in real property loans. That is an issue which may be several years down the road but I do foresee it becoming more important as time passes.

In the short term, the amendment which Senator GORTON and I have cosponsored will allow mutual savings banks to deal with more immediate changes in the savings industry. It is my understanding that the amendment will have no revenue impact.●

Mr. DOLE. I yield to the Senator from Louisiana. It is my understanding that the Senator has discussed this with Senator GORTON.

Mr. LONG. I have no objection, Mr. President.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from Washington yield back his time?

Mr. GORTON. I yield back my time, Mr. President.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment.

The amendment (UP No. 299) was agreed to.

Mr. DOLE. I move to reconsider the vote by which the amendment was agreed to.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, Senator HART will be here shortly to offer an amendment. I suggest the absence of a quorum, the time to be equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, while we are waiting for Senators to come to the Chamber, the Senator from Kansas has an amendment which is listed in the group of amendments.

Do I need a unanimous consent to take that amendment up at this time?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. Mr. President, I ask unanimous consent that I may proceed with this amendment at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 300

Mr. DOLE. Mr. President, I send the amendment to the desk for myself and the distinguished Senator from Wyoming (Mr. WALLOP) and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE), for himself, Mr. WALLOP, Mr. GRASSLEY, and Mr. JEPSEN, proposes an unprinted amendment numbered 300.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 284, after line 4, add the following:

TITLE VI.—FOREIGN INVESTMENT IN UNITED STATES REAL PROPERTY INTERESTS.

(a) IN GENERAL.—Subchapter A of chapter 3 (relating to withholding of tax on nonresident aliens and foreign corporations) of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new section:

"SEC. 1444. WITHHOLDING OF TAX ON DISPOSITIONS OF UNITED STATES REAL PROPERTY INTERESTS.

"(a) GENERAL RULE.—Except as otherwise provided in this section, in the case of any acquisition of a United States real property interest (as defined in section 897(c)) from a foreign person, the purchaser, the purchaser's agent, or any settlement officer shall be required to deduct and withhold a tax equal to whichever of the following is the smallest:

"(1) 20 percent of the amount realized on the disposition,

"(2) the portion of the purchaser's consideration (as defined in subsection (h)(4)) which is at any time within the withholding agent's custody or control, or

"(3) if there is a seller's maximum tax liability (as defined in subsection (h)(5)), the amount of such liability.

"(b) PURCHASER AND SETTLEMENT OFFICER MUST KNOW OR HAVE NOTICE THAT SELLER WAS A FOREIGN PERSON.—

"(1) IN GENERAL.—The purchaser, the purchaser's agent or any settlement officer shall not be required to deduct and withhold a tax under subsection (a) with respect to any acquisition unless the purchaser, purchaser's agent, or the settlement officer—

"(A) knows that the seller is a foreign person, or

"(B) has received a notice provided for in subsection (c).

"(2) TIME FOR APPLYING PARAGRAPH (1).—Paragraph (1) shall be applied immediately before each payment of the consideration with respect to the acquisition of the United States real property interest.

"(c) REQUIREMENTS TO FURNISH NOTICE.—

"(1) SELLER MUST FURNISH NOTICE TO PURCHASER AND TO SETTLEMENT OFFICER.—If the seller is a foreign person, he shall so notify the purchaser, his agent, and any settlement officer at such time or times and in such manner as may be prescribed by regulations.

"(2) SELLER'S AGENT.—

"(A) IN GENERAL.—If any seller's agent has at any time before the time specified in subsection (b)(2) reason to believe that the seller may be a foreign person, he shall so notify the purchaser, purchaser's agent, and any settlement officer at such time or times and in such manner as may be prescribed by regulations. A seller's agent will not be treated as having reason to believe that a seller may be a foreign person if the seller's agent relies in good faith on a written statement of the seller (or, in the case of a seller's agent retained by another agent of the seller a written statement by such other seller's agent) that the seller is a U.S. person.

"(B) ONLY 1 NOTICE TO EACH PERSON.—Under regulations, the requirements of paragraph (1) and of subparagraph (A) of this paragraph shall be treated as met with respect to the purchaser, the purchaser's agent, or any settlement officer if at least 1 notice which meets the requirements of paragraph (1) or such subparagraph (A) is furnished to such purchaser, purchaser's agent, and settlement officer.

"(C) SELLER'S AGENT.—Except as provided in subparagraph (D), for purposes of this paragraph, the term 'seller's agent' means any person who represents the seller (or another agent of the seller)—

"(i) in any negotiation with the purchaser or the purchaser's agent relating to the transaction, or

"(ii) in settling the transaction. A person will be considered to represent the seller (or another agent of the seller) if such person retains another person to represent the seller (or such other agent) in any negotiations with the purchaser or purchaser's agent relating to the transaction or in settling the transaction.

"(D) SETTLEMENT OFFICERS NOT TREATED AS SELLER'S AGENT.—For purposes of this paragraph, a person shall not be treated as a seller's agent with respect to any transaction merely because such person performs 1 or more of the following acts:

"(i) the receipt and the disbursement of any portion of the consideration for the transaction, and

"(ii) the recording of any document in connection with the transaction.

"(3) FAILURE TO FURNISH NOTICE.—

"(A) DUTY TO WITHHOLD.—If any seller's agent—

"(i) is required by paragraph (2) to furnish notice, but

"(ii) fails to notify the purchaser or the purchaser's agent or the settlement officer at such time or times and in such manner as may be prescribed by regulations,

such agent shall have the same duty to deduct and withhold (with respect to purchaser's consideration within the seller's agent's custody and control) that the purchaser would have if the seller's agent had complied with paragraph (2).

"(B) TREATMENT OF COMPENSATION.—In any case to which subparagraph (A) applies, the purchaser's consideration shall be treated as including the compensation received by the seller's agent in connection with the transaction.

"(C) REQUIREMENT OF REASONABLE INQUIRY.—For purposes of subparagraph (A), a seller's agent who fails to make reasonable inquiry into whether the seller is a foreign person shall be treated as required to furnish notice.

"(d) EXEMPTIONS.—

"(1) IN GENERAL.—No person shall be required to deduct and withhold any amount under subsection (a) with respect to a transaction if paragraphs (2), (3), or (4) applies to the transaction.

"(2) SELLER FURNISHES QUALIFYING STATEMENT.—

"(A) IN GENERAL.—This paragraph applies to the transaction if the seller (at such time, in such manner, and subject to such terms and conditions as the Secretary may by regulations prescribe) furnishes a qualifying statement to the person who (but for this paragraph) would be required to withhold.

"(B) QUALIFYING STATEMENT.—For purposes of subparagraph (A), the term 'qualifying statement' means a statement by the Secretary that—

"(i) the seller either—

"(I) has reached agreement with the Secretary for the payment of any tax imposed by section 871(b)(1) or 882(a)(1) on any gain recognized by the seller on the disposition of the United States real property interest, or

"(II) is exempt from any tax imposed by section 871(b)(1) or 882(a)(1) on any gain recognized by the seller on the disposition of United States real property interest and

"(ii) the seller has satisfied any seller's unsatisfied withholding liability or has provided adequate security to cover such liability.

"(3) PRINCIPAL RESIDENCE WHERE AMOUNT REALIZED IS NOT MORE THAN $200,000.—This paragraph applies to the transaction if—

"(A) the amount realized by the seller does not exceed $200,000, and

"(B) the property is acquired by the purchaser for use as his principal residence.

"(4) STOCK TRANSFERRED ON ESTABLISHED SECURITIES MARKET.—This paragraph applies to a disposition of stock in a corporation if the transaction takes place on an established United States securities market.

"(e) ADJUSTMENTS IN AMOUNT REQUIRED TO BE WITHHELD.—

"(1) CANNOT EXCEED SELLER'S MAXIMUM TAX LIABILITY.—

"(A) REQUEST.—At the request of the seller or of any withholding agent, the Secretary shall establish, with respect to any disposition, the seller's maximum tax liability.

"(B) LIMIT ON WITHHOLDING REQUIREMENT.—The amount required to be withheld under subsection (a) with respect to any disposition shall not exceed the amount (if any) established with respect to such disposition under subpargraph (A).

"(2) AUTHORITY OF SECRETARY TO PRESCRIBE REDUCED AMOUNT.—At the request of the seller or of any withholding agent, the Secretary may prescribe a reduced amount to be withheld under this section if the Secretary determines that to substitute such reduced amount will not jeopardize the collection of the tax imposed by this section or section 871(b)(1) or 882(a)(1).

"(3) PROCEDURAL RULES.—

"(A) REGULATIONS.—Requests for—

"(i) qualifying statements under subsection (d)(2),

"(ii) determinations of seller's maximum tax liability under paragraph (1) of this subsection, and

"(iii) reductions under paragraph (2) of this subsection in the amount required to be withheld,

shall be made at the time and manner, and shall include such information, as the Secretary shall prescribe in regulations.

"(B) REQUESTS TO BE HANDLED WITHIN 30 DAYS.—The Secretary shall take action with respect to any request described in subparagraph (A) within 30 days after the Secretary receives the request.

"(f) RULES RELATING TO CERTAIN PARTNERSHIPS, TRUSTS, AND ESTATES.— Pursuant to such terms and conditions as may be provided by regulations, a domestic partnership, the trustee of a domestic trust, or the executor of a domestic estate shall be required under subsection (a) to deduct and withhold from amounts of which such partnerships, trustees, or executors have custody which are—

"(1) attributable to the disposition of a United States real property interest (as defined in section 897(c)(1)), and

"(2) either—

"(A) includible in the distributive share of a partner of the partnership who is a nonresident alien individual or a foreign corporation, partnership, trust, or estate;

"(B) includible in the income of a beneficiary of the trust who is a nonresident alien individual or a foreign corporation, partnership, trust, or estate; or

"(C) includible in the income of a nonresident alien individual, foreign corporation, partnership, trust, or estate under the provisions of section 671.

"(g) WITHHOLDING TO BE REQUIRED FOR DISTRIBUTIONS BY FOREIGN CORPORATIONS IN THE CASE OF CERTAIN OTHER TRANSACTIONS.— Except as otherwise provided in this section, in the case of any transaction involving a United States real property interest on which gain is recognized under section 897(d) or (e) a corporation shall be required to deduct and withhold under subsection (a) a tax equal to 20 percent of an amount equal to the fair market value of such interest (as of the time of the transaction) reduced by its adjusted basis.

"(h) DEFINITIONS.—For purposes of this section—

"(1) SELLER.—The term 'seller' means the person disposing of the United States real property interest.

"(2) PURCHASER.—The term 'purchaser' means the person acquiring the United States real property interest.

"(3) SETTLEMENT OFFICER.—The term 'settlement officer' means the person who, in connection with the settlement, receives and disburses any portion of the consideration for the transaction.

"(4) PURCHASER'S CONSIDERATION.—

"(A) IN GENERAL.—The term 'purchaser's consideration' means the cash and the fair market value of the other property which is consideration in connection with the transaction.

"(B) INDEBTEDNESS.—Except to the extent provided in regulations, if—

"(i) the purchaser assumes indebtedness of the seller or indebtedness to which the property is subject, or the purchaser acquires the property subject to an indebtedness, and

"(ii) such indebtedness was incurred within 2 years of the transaction,

then, for purposes of applying subsection (a)(2) with respect to the purchaser, the purchaser's consideration shall include the amount of such indebtedness and the amount of such indebtedness shall be deemed to be within the withholding agent's custody or control.

"(5) SELLER'S MAXIMUM TAX LIABILITY.— The term 'seller's maximum tax liability' means, with respect to the disposition of any interest, the maximum amount which the Secretary determines the seller could owe—

"(A) as tax under section 871(b)(1) or 882(a)(1) by reason of such disposition, plus

"(B) the seller's unsatisfied withholding liability with respect to such interest.

"(6) SELLER'S UNSATISFIED WITHHOLDING LIABILITY.—The term 'seller's unsatisfied withholding liability' means the withholding obligation imposed under this section on the seller's acquisition of the United States real property interest or a predecessor interest, to the extent such obligation has not been satisfied."

(b) DISCRETION TO CURTAIL REPORTING WHERE WITHHOLDING REQUIRED.—Subsection (e)(2) of section 6039C is amended to read as follows:

"(2) RETURNS, ETC.—

"(A) GENERAL RULE.—All returns, statements, and information required to be made or furnished under this section shall be made or furnished at such time and in such manner as the Secretary shall by regulations prescribe.

"(B) CASES IN WHICH WITHHOLDING IS REQUIRED.—Except when required by the Secretary, the returns, statements, and information otherwise required to be made or furnished under this section shall not be required if a purchaser, a purchaser's agent or any other person would be required, under section 1444, to deduct and withhold tax on acquiring the property from its present owners."

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to any payment of the consideration with respect to the acquisition of a United States real property interest made after December 31, 1981.

SEC. 602. TECHNICAL AMENDMENTS RELATING TO DISPOSITIONS OF INVESTMENT IN UNITED STATES REAL PROPERTY.

(a) SALES OF UNITED STATES REAL ESTATE BY CORPORATIONS ORGANIZED IN THE VIRGIN ISLANDS TAXABLE BY THE UNITED STATES.—

(1) Paragraph (1)(A)(i) of section 897(c) is amended by striking out "United States" and inserting in lieu thereof "United States or the United States Virgin Islands."

(2) Section 862(a) is amended by striking out the period at the end of paragraph (7) and inserting in lieu thereof "; and"; and by adding at the end thereof the following:

"(8) gains, profits, and income from the disposition of a United States real property interest (as defined in section 897(c)) located in a possession of the United States."

(3) Section 6039C is amended by adding at the end thereof the following:

"(f) SPECIAL RULE FOR POSSESSION AND UNITED STATES INTEREST.—A nonresident alien individual or foreign corporation subject to tax under Section 897(a) shall pay any tax and file any return required by this title—

"(1) to the United States, in the case of any interest in real property located in the United States and an interest (other than an interest solely as a creditor) in a domestic corporation (with respect to the United States) described in section 897(c)(1)(A)(ii), and

"(2) to the Virgin Islands, in the case of an interest in real property located in the Virgin Islands and an interest (other than an interest solely as a creditor) in a domestic corporation (with respect to the Virgin Islands) described in section 897(c)(1)(C)(ii).

(b) PARTNERSHIP ASSETS.—Paragraph (4)(B) of section 897(c) is amended to read as follows:

"(B) ASSETS HELD BY PARTNERSHIPS, ETC.— Under regulations, assets held by a partnership, trust, or estate shall be treated as held proportionately by its partners or beneficiaries. Any asset treated as held by a partner or beneficiary by reason of this subparagraph which is used or held for use by the partnership, trust, or estate in a trade or business shall be treated as so used or held by the partner or beneficiary. Any asset treated as held by a partner or beneficiary by reason of this subparagraph shall be so treated for purposes of applying this subparagraph successively to partnerships, trusts, or estates which are above the first partnership, trust, or estate in a chain thereof."

(c) NONRECOGNITION RULES OVERRIDDEN IN CERTAIN CASES.—Subparagraph (B) of Section 897(d)(1) is amended to read as follows:

"(B) EXCEPTION WHERE THERE IS A CARRYOVER BASIS.—Except as otherwise provided in regulations prescribed under subsection (e)(2), gain shall not be recognized under paragraph (A) if the basis of the distributed property in the hands of the distributee is no greater than the adjusted basis of such property before the distribution increased by the amount of gain, if any, recognized by

the distributing corporation. The preceding sentence shall not apply unless, at the time of receipt of the distributed property the distributee would be subject to taxation under this chapter on a subsequent disposition of the distributed property.

(d) FOREIGN CORPORATION PERMITTED TO ELECT TO BE TREATED AS A DOMESTIC CORPORATION.—Subsection (i) of section 897 is amended to read as follows:

"(1) IN GENERAL.—If—

"(A) a foreign corporation holds a United States real property interest, and

"(B) under any treaty obligation of the United States the foreign corporation is entitled to nondiscriminatory treatment with respect to that interest,

then such foreign corporation may make an election to be treated as a domestic corporation for purposes of this section and section 6039C.

"(2) REVOCATION ONLY WITH CONSENT.—Any election under paragraph (1), once made, may be revoked only with the consent of the Secretary.

"(3) MAKING OF ELECTION.—An election under paragraph (1) may be made only—

"(A) if all of the owners of all classes of interests (other than interests solely as a creditor) in the foreign corporation at the time of the election consent to the making of the election and agree that gain, if any, from the disposition of such interest after June 18, 1980, which would be taken into account under subsection (a) shall be taxable notwithstanding any provision to the contrary in a treaty to which the United States is a party, and

"(B) subject to such other conditions as the Secretary may prescribe by regulations with respect to the corporation or its shareholders.

In the case of a class of interest (other than an interest solely as a creditor) which is regularly traded on an established securities market, the consent described in subparagraph (A) need only be made by a person who held more than 5 percent of such class of interest at some time during the shorter of the periods described in subsection (c)(1)(A)(ii). The constructive ownership rules of subsection (c)(6)(C) of this section shall apply in determining whether a person held more than 5 percent of a class of interest.

"(4) EXCLUSIVE METHOD OF CLAIMING NONDISCRIMINATION.—The election, provided by paragraph (1) shall be the exclusive remedy for any person claiming discriminatory treatment with respect to this section and section 6039C."

(e) REPORTING REQUIRED FOR CERTAIN INDIRECT HOLDINGS.—Paragraph (4)(C) of section 6039C(b) is amended to read as follows:

"(C) INDIRECT HOLDINGS.—For purposes of determining whether an entity to which this subsection applies has a substantial investor in U.S. real property, the assets of any person shall include the person's pro rata share of the U.S. real property interest held by any corporation (whether domestic or foreign) if the person's pro rata share of the U.S. real property interest exceeds $50,000."

(f) Section 897 is amended by adding at the end thereof the following new subsection.

"(i) CERTAIN CONTRIBUTIONS TO CAPITAL.—Except to the extent otherwise provided in regulations, gain shall be recognized by a nonresident alien individual or foreign corporation on the transfer of a U.S. real property interest to a foreign corporation if the transfer is made as paid in surplus or as a contribution to capital, in the amount of the excess of—

"(1) the fair market value of such property transferred, over

"(2) the sum of—

"(A) the adjusted basis of such property in the hands of the transferor, plus

"(B) the amount of gain, if any, recognized to the transferor under any other provision at the time of the transfer."

(g) PRE-ENACTMENT ACQUISITIONS.—Section 897 is amended by adding the following new subsections:

"(j) FOREIGN CORPORATIONS ACQUIRED PRIOR TO ENACTMENT.—If—

"(1) a foreign corporation adopts, or has adopted, a plan of liquidation described in section 334(b)(2)(A), and

"(2) the 12-month period described in section 334(b)(2)(B) for the acquisition by purchase of the stock of the foreign corporation, began before November 26, 1980,

"then such foreign corporation may make an election to be treated, for the period following June 18, 1980, as a domestic corporation pursuant to section 897(i)(1).

"(k) SPECIAL RULE FOR CERTAIN U.S. SHAREHOLDERS OF LIQUIDATING FOREIGN CORPORATIONS.—If a corporation adopts a plan of complete liquidation and if, solely by reason of section 897(d), section 337(a) does not apply to sales or exchanges, or section 336 does not apply to distributions, of United States real property interests by such corporation, then, in the case of any shareholder who is a U.S. citizen or resident and who has held stock in such corporation continuously since June 18, 1980, for the first taxable year of such shareholder in which he receives a distribution in complete liquidaton with respect to such stock—

"(1) the amount realized by such shareholder on the distribution shall be increased by his proportionate share of the amount by which the tax imposed by this subtitle on such corporation would have been reduced if section 897(d) had not been applicable, and

"(2) for purposes of this title, such shareholder shall be deemed to have paid, on the last day prescribed by law for the payment of the tax imposed by this subtitle on such shareholder for such taxable year, an amount of tax equal to the amount of the increase described in paragraph (1)."

(h) Paragraph (2)(B) of section 1125 of P.L. 96-499 is amended to read as follows:

"(B) the new treaty is signed on or after January 1, 1981 and before January 1, 1985,

then paragraph (1) shall be applied with respect to obligations under the old treaty by substituting for 'December 31, 1984' the date (not later than 2 years after the new treaty was signed) specified in the new treaty (or accompanying exchange of notes)."

(i) EFFECTIVE DATES.—The amendments made by this section shall apply to dispositions after June 18, 1980.

Mr. DOLE. Mr. President, under present law, as enacted last year, a foreign person selling U.S. real estate after June 18, 1980, is taxable on the U.S. income from that disposition or the disposition of a U.S. real property interest. A U.S. real property interest includes either a U.S. corporation or a foreign corporation having more than 50 percent of its asset value as U.S. real property.

The provisions are enforced by information reporting by corporations that have substantial foreign investors or by owners of U.S. real property.

The provisions contain rules to prevent tax avoidance transfers of U.S. real property in nonrecognition transactions.

The amendment just offered by the Senator from Kansas and the Senator from Wyoming will replace the current system of reporting with withholding. In other words, all we have now is a reporting requirement, and there is no withholding. The purpose of this amendment is to impose a withholding obligation on the purchaser from a foreign seller or on the purchaser's agent. The rules limit withholding to cases where the purchaser has actual knowledge that the seller is foreign. It will also exempt from withholding acquisitions of single family homes for less than $200,000.

Technical amendments to the provisions would make clear that the legislation overrides the use of nonrecognition provisions, either alone or with tax haven and other treaties, to avoid U.S. taxation of foreign sellers, clarify certain potential conflicts with treaties, and correct certain hardships caused by the effective dates.

REVENUE EFFECT

There would be a revenue gain of $73 million in fiscal year 1982, $6 million in 1983, $9 million in 1984 and thereafter.

Withholding as the method of enforcing the real estate provisions was adopted by the Senate last year but dropped in conference because of concerns with protection of agents. These problems have now been worked out.

Withholding will insure, to the extent possible, the collection of tax from foreign sellers of U.S. real estate.

Withholding is the method used to insure collection of tax from foreign recipients of other U.S. source income.

Adequate withholding will enable the Secretary to relieve taxpayers of much of the presently imposed reporting which is now necessary to enforce the provision.

The technical amendments are needed to insure compliance by those who would use nonrecognition provisions and treaties in unintended ways to avoid this legislation.

Mr. President, I ask unanimous consent that the distinguished Senator from Iowa (Mr. GRASSLEY) be made a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I yield myself 2 minutes.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. I personally have no objection to the amendment, and I am not aware of anybody who does have objection to it.

I would suggest to the Senator that we agree to the amendment at this time and that a motion not be made at this point to reconsider, in the event that someone should arrive on the scene and have some doubts about this amendment. I doubt there will be, but in case they did they could move to reconsider it and we can discuss it further.

I am prepared to yield back the remainder of my time.

Mr. DOLE. Mr. President, I think that is a good suggestion by the Senator from Louisiana.

As far as this Senator knows there is no opposition to the amendment. Last year there was strong opposition in the conference. I think it was expressed by the Congressman from Florida, Congressman GIBBONS, and he will be a conferee again this year so if he still has objection, he can state it. I think his

concerns, as I understand it, have now been satisfied, and I think frankly it is a good amendment. It is one the Treasury has an interest in.

I do think the suggestion by the Senator from Louisiana is a good one.

So I will yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from Louisiana yield back his time?

Mr. LONG. I yield back our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas.

The amendment (UP No. 300) was agreed to.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

(Mrs. KASSEBAUM assumed the chair.)

Mr. LONG. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Madam President, I ask unanimous consent that the amendment of the Senator from Kansas (Mr. DOLE) be temporarily laid aside so the Senator from Nebraska (Mr. EXON) may offer an amendment.

The PRESIDING OFFICER. Under the previous order, the Senator from Nebraska is recognized.

Mr. EXON. I thank my friend from Louisiana and I thank the Chair.

AMENDMENT NO. 522

(Purpose: To reduce the third-year tax cut if certain economic goals are not attained)

Mr. EXON. Madam President, I call up my amendment No. 522, which is at the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nebraska (Mr. EXON), for himself, Mr. BRADLEY, Mr. PRESSLER, Mr. NUNN, and Mr. DIXON, proposes an amendment numbered 522.

Mr. EXON. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 15, in the matter preceding line 1, strike out the end quotation marks and the end period.

On page 15, after the matter preceding line 1, insert the following:

"(f) RATE CUT CONTINGENT ON ATTAINMENT OF ECONOMIC OBJECTIVES.—

"(1) IN GENERAL.—If the average interest rate for fiscal year 1982 on new issue 91-day United States Treasury bills exceeded 10.5 percent, then the tables under paragraph (2) and (3) of subsections (a) through (e) of this section shall not apply.

"(2) SECRETARY TO PRESCRIBE TABLES.—If paragraph (1) applies to the tables under this section, the Secretary shall prescribe tables as follows:

"(A) 1983.—For taxable years beginning in 1983, the Secretary shall prescribe tables which reduce the marginal rate brackets in the tables prescribed under paragraph (1) of subsections (a) through (e) by the lesser of—

"(i) 2.5 percent, or

"(ii) such percent as is necessary to increase Federal revenues for fiscal year 1984, in an amount equal to the amount by which the Federal budget deficit for fiscal year 1982 exceeded $42,500,000,000.

"(B) 1984 AND LATER.—For taxable years beginning after December 31, 1983, the Secretary shall prescribe tables which reduce marginal rate brackets in the tables prescribed under paragraph (3) of subsections (a) through (e) to reflect the rate reductions which are reflected by the withholding changes made in 1981, 1982, and 1983.

"(3) WITHHOLDING.—Notwithstanding the provisions of section 3402(a)(3), the Secretary shall adjust the withholding tables on July 1, 1983, to reflect the application of this section.".

Mr. EXON. Madam President, the amendment I am offering is the only effort I am aware of that addresses by law in the tax reduction bill the critical concern of the highest real interest rates in the Nation's history. We all know ruinous interest rates are the major concern today but we are tiptoeing around the problem as if it does not exist. There has been much rhetoric and gnashing of teeth over interest rates but no real action to address them head on. This is a very necessary amendment and is interlaced with the dual concern of the worthy companion goal of a balanced budget by 1984.

The President has stated that it is his goal to reach a balanced budget by 1984, and the first concurrent budget resolution, recently adopted by Congress, also affirms this important objective. The difficulty, in the opinion of this Senator, is that we say good things but lack the discipline to back our goals with reasonable legislation complete with teeth.

Regardless of how each of us votes on the various provisions of this tax cut bill, I am sure that we all hope that the tax cut action is successful and that American economic recovery results and returns to some degree of soundness. But we all know that economic projections are imprecise at best, and the current plans for our economic recovery could go awry. This is why I believe it is important to have a safety valve amendment so that Congress will have the opportunity and the flexibility to change the economic plan and pass a balanced budget for 1984, rather than being locked into a fiscal policy of no return. It is my hope, Madam President, that this amendment will not be brushed aside, as so many others have the past week or 10 days.

Madam President, this safety valve amendment is based upon the President's latest predictions and projections for the economy, dated July 15, 1981. Among the other projections, the President has indicated that there will be a balanced budget in 1984, that the Federal deficit for fiscal year 1982 will not exceed $42.5 billion, and that Treasury bill rates will average 10.5 percent for fiscal year 1982.

The amendment I am offering simply provides that if—if—interest rates exceed to 10.5 percent—the figure projected by the President—the size of the 1983 individual tax rate reduction will be adjusted by the amount, if any, that the 1982 deficit exceeds $42.5 billion.

The trigger in this amendment is attached to the level of interest rates, not to the deficit itself although it is obvious the two are closely interrelated. The reason we have chosen interest rates as the trigger is that high interest rates, if continued much longer, will have a disastrous effect on all citizens and particularly on farmers, small businessmen, housing, the thrift institutions and many other sectors of our economy. It is appropriate that interest rate levels signal the success or failure of the economic recovery plan. However, since it is the size of the deficit which plays a large part in the level of interest rates, the amount by which the deficit exceeds the President's predictions is the basis for changing the size of the 1983 tax cut if necessary.

Let me give you some examples as to how this amendment will work if adopted. If the average 91 day Treasury bill rate for new issues in fiscal year 1982 is 10.5 percent or less, this amendment will not go into effect regardless of the size of the deficit. However, if the interest rate level is 12 percent, for example, then the size of the July 1, 1983, tax rate reduction will be dependent on how much the deficit exceeds $42.5 billion. If the deficit is approximately $50 billion, the July 1, 1983, rate of individual tax reduction would be reduced to 8 percent, rather than the scheduled 10 percent.

If the 1982 deficit is $63 billion, the July 1983, rate reduction would be 5 percent, rather than 10 percent. In no case would the rate reduction be less than 5 percent under this amendment, and only individual tax rates, not tax cuts for businesses, will be affected.

How realistic, Madam President, is the administration's predicted 10.5 percent 91 day Treasury bill rates for fiscal 1982? We should first take a look at the recent past.

Despite the warning of many of us in the Senate during the reconciliation and first concurrent budget deliberations we blindly went along with the administration's rosier predictions on interest rate declines. Within the last few days the administration has revised its interest rate predictions upward for the next 2 years. This revision, Madam President, was not a minor one in terms of cost. The administration has concluded that it was over $17 billion short in its projections. That is $17 billion more in costs to the taxpayer and/or the deficit. Is it not time, Madam President, that we took the blinders off and faced reality rather than rosy, self-serving predictions? It is no wonder that the money markets are not responding to our initiatives. Wall Street knows that 2 and 2 make 4 and not 3.

In this regard, Madam President, I ask unanimous consent that a number of wire service stories and a news article—and I am going to read in part from them—be printed in the RECORD in full at this point in my remarks.

There being no objection, the articles

were ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 19, 1981]

HIGH LOAN RATES MAY BE TOO COSTLY FOR ECONOMY

Interest rates are much too high. They threaten a national economic crisis, especially in the auto, housing and thrift industries.

Quite apart from the recent well-publicized complaints of European leaders that high U.S. interest rates are creating problems for them, the objective evidence is that a monetarist policy being pursued by the Federal Reserve Board has pushed interest rates higher than they ought to be—and higher than the Fed itself expected them to be.

Even President Reagan's economic advisers, according to one of them, are "puzzled" and "confused" about the persistence of high interest rates although they propose to stick with present policy, a decision based "more on confusion than conviction." This is the view of William Niskanen, one of the three members of the Council of Economic Advisers.

One gets the feeling that Federal Reserve policymakers are compulsively flirting with economic disaster because they are afraid to shift gears, believing that as bad as things are now, they would be even worse if policy were prematurely eased.

In part, the puzzlement cited by Niskanen arises because interest rates have continued to soar even though inflation has come down dramatically. The Consumer Price Index is running at an anual rate of 8.2 percent, compared with 13.3 percent two years ago. When measured against a 14½ percent Treasury bill rate, the "real" interest rate is more than 6 percent, well above the conventional level of 2 to 3 percent.

Even if one decides to measure inflation not by the CPI but by a higher, assumed underlying inflation rate of 9 percent or so, the "real" interest rate is at an historic peak. It's a complete reversal of the pattern two years ago when "real" interest rates were negative because a 10 percent yield was running behind the 13.3 percent inflation rate.

The consequences of a policy that keeps interest rates this high are dramatic. Domestic auto sales have collapsed to an annual rate of about 5 million, a 20-year low. Meanwhile, the savings and loan industry has been pushed to the edge of a disaster that could force the government into a bailout costing as much as $50 billion, according to economist Alan Greenspan.

Niskanen says that at a recent informal session among six government economists, including some from the Fed, "there were eight different explanations (for the peak level of real interest rates)—and we didn't have a good one."

It doesn't seem all that mysterious. In a telephone interview, Salomon Bros. money expert Henry Kaufman said the record real interest-rate level "reflects the heavy burden being placed on monetary policy. In the next 12 months, we'll have a major tax cut, increased defense spending and bigger federal deficits. In that environment, what can you expect from interest rates?" Kaufman predicts that within a year, unless the government curbs the big military build-up, the prime rate will top the 21½ percent level set last year.

Kaufman's basic theme isn't challenged at the Fed when officials speak off the record. A well-posted source uses these plain words: "We face a real dilemma: The financial markets don't believe Reagan will be able to cut the federal deficit. If they [the Reagan administration] were to cut their proposed defense spending increase in half, you'd see an immediate reduction in interest rates.

"But if we were to change monetary policy now by pumping more reserves into the market, we would lose all our credibility, and long-term rates would rise at least 2 or 3 points. It's one hell of a problem because autos, housing and the S&Ls are in trouble. But so long as Reagan puts all of the burden on us, we've got no choice."

In effect, the Federal Reserve has consciously made a decision that the economy overall is resilient enough to take its austere policy even though the interest-sensitive sectors such as housing and the thrifts are in serious trouble. "In a way," says a Fed source, "as we continue this policy—although I hasten to say that's not why we are doing it—we're putting pressure on the Reagan administration. We're forcing them to face up to the significance of the big budget deficit."

But how long can this lethal game go on? The economy appears to be entering a general downturn or recession. Richard Pratt, head of the Federal Home Loan Bank Board, says that fully one-third of the nation's 4,700 S&L's "are not viable" under today's conditions of high interest rates.

Greenspan reports that because there is a limit to the number of strong institutions that can absorb weak ones, many S&L's will have to be liquidated rather than merged out of existence. Insurance will protect depositors (up to $100,000), but the government may have to put up so much cash or credit that it could "seriously threaten the success of the president's anti-inflation program," Greenspan concludes.

Thus, the wisdom of blindly following a high-interest-rate policy needs to be reexamined. The Reagan administration is beginning to worry enough about the problem to be predicting that interest rates will be coming down. But you don't get that kind of soothing assurance from the Fed. In the end, it may take a corporate bankruptcy or an international financial crisis to force a change in policy, and in the underlying monetarist dogma.

[Telegrams]

STOCKS

JULY 22, 1981.

NEW YORK.—The stock market, unable to sustain a rally attempt because of high interest rates and rumors of further hikes, fell for the third consecutive session today to a seven-month low in moderate trading.

The Dow Jones industrial average, which had been ahead more than 5 points at the outset, plunged 9.80 to 924.66, the lowest level since it finished at 918.09 on Dec. 16, 1980.

The New York Stock Exchange index lost 0.74 to 73.85 and the price of an average share decreased 32 cents. Declines topped advances 953–495 among the 1,869 issues traded at 4 p.m.

Big board volume, which picked up in the final hour, totaled 47,500,000 shares compared with 47,280,000 traded yesterday.

Composite volume of NYSE issues listed on all U.S. exchanges and over the counter at 4 p.m. totaled 53,183,200 shares compared with 52,391,400 traded yesterday.

The American Stock Exchange index eased 0.02 to 68.05. There was no change in the price of an average share. The National Association of Securities Dealers' NASDAQ index of over-the-counter issues lost 1.01 to 206.16.

BUSINESS HIGHLIGHTS

JULY 22, 1981.

WASHINGTON, D.C.—The International Monetary Fund predicts world economic conditions will show little improvement through next year.

The IMF also said in its annual "World Economic Outlook," released Sunday, that it sees "significantly more weakness in real and nominal GNP (gross national product) growth" in the United States than does the Reagan administration.

The Reagan administration estimates that real GNP will rise in the United States by 3.5 percent in 1982; the IMF says growth will be 1.25 percent. The administration says consumer prices will be rising by 7 percent in 1982; the IMF says the rate will be 8 percent.

The IMF sees slow growth in the world economy of 1.5 percent this year and a little more than 2 percent in 1982, compared with 1.25 percent in 1980.

World inflation should slow somewhat, according to the report. It said consumer prices in non-Communist industrial countries should rise an average of 9.5 percent this year—compared with 12 percent in 1980—and by less than 8 percent in 1982.

Severely cramped by record interest rates, housing starts plunged 11 percent in June to the lowest annual rate since the bottom of last year's recession, the Government says.

The Commerce Department said new housing started by U.S. builders hit an annual rate of 1.03 million last month, the lowest since the 938,000 annual rate of May 1980. Housing starts have plunged 38 percent in five months since January's annual rate of 1.66 million.

Building permits for future construction also are dropping rapidly, giving little hope for recovery within the next few months.

Permits were issued in June at an annual rate of 976,000, down 16.4 percent from May. The figure was the lowest since May 1980, the Commerce Department said Friday.

All the figures in the report were adjusted for seasonal variations.

Economists, builders and Government officials all agree on the cause of the slump: record-high interest rates, both for home loans and for construction loans.

STOCKS

JULY 20, 1981.

NEW YORK.—The stock market, jolted by prospects of higher interest rates and Middle East tensions, was in a steep decline early today in moderate trading.

The Dow was off 11.42 points to 947.48 around noon. Declines led advances, 1,084–343, among the 1,688 issues crossing the New York Stock Exchange tape.

Big board volume at the two-hour mark amounted to about 19,600,000 shares, compared with 19,080,000 traded during the same period Friday.

The Federal Reserve triggered the heavy selling by reporting late Friday the Nation's money supply surged $6.9 billion. The increase was larger than expected and kept pressure on the fed to maintain tight credit.

A frantic takeover war for Conoco has provided the market with much of its volume the past several sessions. Mobil Corp. Friday bid $7.7 billion for Conoco. Previously DuPont offered $7.5 billion and Joseph Seagram & Sons has bid $3.8 billion for 51 percent of Conoco's stock.

Many analysts said they were concerned about the more than $30 billion in loan commitments the Nation's banks have pledged to support the bids for Conoco and others.

Conoco was the second most active NYSE-listed issue, off 1⅜ to 85⅞, DuPont was down ⅜ to 45⅝, Mobil ½ to 29⅞ and Seagrams Ltd. ¼ to 55.

Sears, Roebuck was the most active, off ½ to 18¼ in trading that included a block of 542,700 at 18¼. Imperial Corp. of America was third, off ⅜ to 19½.

GRAIN MARKET

CHICAGO.—Wheat was lower, corn and soybeans substantially lower and oats irregularly lower at midmorning today on the Chicago Board of Trade.

Wheat was off 2 to 3½ cents; corn off 6 to 6¾; oats unchanged to off 2½; and soybeans off 14¾ to 20 cents.

Increased country movement created price protection and hedge pressure, which accounted for all opening losses this morning.

Protection taken ranged from 3 to 4 cents in corn, 10 to 12 cents in soybeans and 4 to 5 cents in wheat.

Beneficial rain during the week also resulted in lower future prices. Rain was prevalent in Illinois, southeast and southwest Wisconsin, Iowa and Missouri. Forecasters predicted rain over the next few days in the corn and soybean belts.

The midmorning prices included:

Wheat, July 3.86½ off 2; Sept. 4.01 off 2¾; Dec. 4.30½ off 2¾.

Corn, July 3.36 off 6¼; Sept. 3.42¼ off 6½; Dec. 3.50 off 6¾.

Oats, July 1.97½ unchanged; Sept. 1.89 off 2½; Dec. 1.99½ off 2.

Soybeans, July 7.22 off 20; Aug. 7.23½ off 17; Sept. off 15¾.

The outside markets were lower.

SAVINGS PROBLEMS

JULY 17, 1981.

WASHINGTON.—Without congressional help or a fast drop in interest rates, more and more banks and thrift institutions will find themselves facing severe financial trouble, top federal regulators predict.

The head of the Federal Reserve Board says, however, that a rapid drop in interest rates over the next few months "is unlikely" and ailing savings and loan institutions would be "very imprudent" to count on it.

But the chairman of both the Federal Home Loan Bank Board and the Federal Deposit Insurance Corp. say their funds to cover losses should be adequate to protect the tens of thousands of depositors that could be affected.

In the past seven weeks, about another 100 savings and loan associations have been added to the Government's list of most-troubled thrift institutions, according to Richard Pratt, chairman of the Federal Home Loan Bank Board.

At the end of May that list stood at 263 of the 4,700 S. & L.'s across the country, up from 1979 just 17 months earlier. The Board's Federal Savings and Loan Insurance Corp. had no available estimate of the assets held by those problem institutions.

"Assuming interest rates continue on the same path," Pratt said, "there would be substantial pressure (on the industry) this year and again next year."

The exact number of thrifts getting into trouble since May has not been determined yet, he said, but "it will be a substantial increase—a hundred or more."

Irvine Sprague, FDIC Chairman, said volatile interest rates could cause problems for some major banks by the end of 1982. Sprague, whose agency oversees the Nation's nearly 15,000 banks, said bank failures so far have been limited to institutions with less than $100 million in deposits.

If "a dismal economic scenario" occurs, he said, "there is a real possibility that there will be failures of large institutions."

Mr. EXON. Madam President, to look a little bit at the history, let us look at the recent history. I have before me a whole series during the last few days of the Associated Press and United Press International wire stories and a most interesting story from the Washington Post that I think puts this in perspective.

On Friday, July 17, the Associated Press:

"Without Congressional help or a fast drop in interest rates, more and more banks and thrift institutions will find themselves facing severe financial trouble," top regulators predict.

Further down in that same story:

The exact number of thrifts getting into trouble since May has not been determined yet, but it will be a substantial increase—a hundred or more.

Sunday, July 19, from the Washington Post, a most in-depth article written by Hobart Rowen on economic impact. The headline reads "High Loan Rates May Be Too Costly for the Economy."

I quote from that story:

Interest rates are much too high. They threaten a national economic crisis, especially in the auto, housing, and thrift industries.

Even President Reagan's economic advisers, according to one of them, are "puzzled" and "confused" about the persistence of high interest rates, although they propose to stick with present policy, a decision based "more on confusion than conviction."

One gets the feeling that Federal Reserve policymakers are compulsively flirting with economic disaster because they are afraid to shift gears, believing that as bad as things are now, they would be even worse if policy were prematurely eased.

My next newspaper-Associated Press-UPI story is from Wednesday, July 22. United Press International:

The stock market, unable to sustain a rally attempt because of high interest rates and rumors of further hikes, fell for the third consecutive session today to a seven-month low in moderate trading.

Monday, July 20, from UPI:

The stock market, jolted by prospects of higher interest rates and Middle East tensions, was in a steep decline early today in moderate trading.

The same day, Monday, July 20, Chicago, UPI:

Wheat was lower, corn and soybeans substantially lower and oats irregularly lower at midmorning today on the Chicago Board of Trade.

Still later, Madam President, Wednesday, July 22, Washington, AP:

The International Monetary Fund predicts world economic conditions will show little improvement through next year.

A separate story by the Associated Press, on the same day:

Severely cramped by record interest rates, housing starts plunged 11 percent in June to the lowest annual rate since the bottom of last year's recession, the government says.

Further down in the same story:

Economists, builders, and government officials all agree on the cause of the slump: Record high interest rates, both for home loans and for construction loans.

Madam President, it seems to me that, hopefully, this puts into some kind of perspective what the Congress and the administration are currently facing. I emphasize once again that the amendment that I am offering is not a criticism of anyone or anything; it is simply an amendment to face reality when we look to the ruinous future of high-interest rates on our overall economy.

Let us look for a moment, if we might, to the future. Remember, the administration predicts an average T-bill rate of 10.5 percent for fiscal 1982. What do the professional money managers believe? The comparable average T-bill futures for fiscal year 1982 is 2.5 points above, at 13 percent, above the administration's projection.

If the professional money managers are correct, we will be forced, by October 1, 1982, with still another additional interest cost in the approximate amount of $12.5 billion. Putting that another way, if the money managers in the future are correct on T-bill rates, then we are going to be spending on top of the $17 billion plus that we lost in the last projection by the administration another $12.5 billion in taxpayer costs unless somehow we can turn around the high-interest-rate policy that now is running rampant in this country.

No one knows who is right and who is wrong on their prediction. It just seems to me, Madam President, and I hope the majority of those in this supposedly deliberative body will agree, that it is not only prudent but practical to accept this amendment that could not possibly be harmful to the administration's stated economic recovery programs and goals, but provides for a reasonable escape mechanism if they fall short.

Where is our economy going today, Madam President? In Nebraska there were 2,338 bankruptcy actions filed in 1979, the year the new bankruptcy law went into effect. In 1980 they zoomed in Nebraska by 89 percent, to 4,441 cases.

Nationally, 261,818 individuals were involved in bankruptcy proceedings during 1979. That jumped 79 percent to 471,-181 in 1980. Is this a serious signal? I think it is, Madam President.

Madam President, many independent economists and other responsible people are concerned that the 1982 deficit could be in the range of $60 billion under the President's program, rather than $42.5 billion. If this is the case, I predict we will not have a chance to balance the budget in 1984. If my amendment is adopted, Congress will know on October 1, 1982, whether the economic recovery plan is on target and whether or not this amendment will go into effect the following July. The intervening time will give Congress the opportunity, during the spring of 1983, when the 1984 budget is formulated, to make appropriate adjustments in spending and in tax policy.

Madam President, let me repeat that I am sure we all hope that the tax cut bill we pass results in true recovery for our economy. In the case that it does not, I believe we should adopt this amendment so as not to lock current fiscal policy into a policy of no return from excessive deficit spending and high interest rates.

Madam President, I ask the Chair how much time I have remaining on my 1-hour time?

The PRESIDING OFFICER. There remain 43½ minutes.

Mr. EXON. I reserve the remainder of my time, Madam President.

Mr. DOLE. Madam President, I suggest the absence of a quorum, to be charged equally.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask

unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 298

The PRESIDING OFFICER. Under the previous order, the hour of 12:30 having arrived, the amendment of the Senator from Michigan (Mr. RIEGLE) is to be voted on.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BOREN (after having voted in the negative). Madam President, on this vote I have a pair with the distinguished Senator from Nevada (Mr. CANNON). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withdraw my vote.

Mr. STEVENS. I announce that the Senator from Idaho (Mr. MCCLURE), the Senator from New Mexico (Mr. SCHMITT), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 36, nays 57, as follows:

[Rollcall Vote No. 222 Leg.]

YEAS—36

Baucus	Ford	Mitchell
Biden	Hart	Moynihan
Bradley	Hawkins	Pell
Bumpers	Huddleston	Proxmire
Burdick	Inouye	Pryor
Byrd, Robert C.	Jackson	Randolph
Cranston	Kennedy	Riegle
D'Amato	Leahy	Sarbanes
DeConcini	Levin	Sasser
Dodd	Mathias	Tsongas
Eagleton	Matsunaga	Williams
Exon	Melcher	Zorinsky

NAYS—57

Abdnor	Glenn	Murkowski
Andrews	Goldwater	Nickles
Armstrong	Gorton	Nunn
Baker	Grassley	Packwood
Bentsen	Hatch	Percy
Boschwitz	Hatfield	Pressler
Byrd, Harry F., Jr.	Hayakawa	Quayle
Chafee	Heflin	Roth
Chiles	Heinz	Rudman
Cochran	Helms	Simpson
Cohen	Hollings	Specter
Danforth	Humphrey	Stafford
Denton	Jepsen	Stevens
Dixon	Johnston	Symms
Dole	Kassebaum	Thurmond
Domenici	Kasten	Tower
Durenberger	Laxalt	Warner
East	Long	Weicker
Garn	Lugar	
	Mattingly	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Boren, against.

NOT VOTING—6

Cannon	Metzenbaum	Stennis
McClure	Schmitt	Wallop

So Mr. RIEGLE's amendment (UP No. 298) was rejected.

Mr. DOLE. Madam President, I move to reconsider the vote by which the amendment was rejected.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 522

Mr. EXON. Madam President, how much time do I have remaining on my amendment?

The PRESIDING OFFICER. Thirty-nine minutes remain.

Mr. EXON. I yield 5 minutes to the Senator from New Jersey.

Mr. DOLE. Madam President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. BRADLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska has the floor.

Mr. EXON. Madam President, I yield 5 minutes to the Senator from New Jersey.

Mr. BRADLEY. Madam President, I thank my distinguished colleague from Nebraska for yielding and for offering the amendment that is now before the Senate.

The amendment that is offered by Senator EXON is very similar to the amendment I offered in the Finance Committee during our deliberations on the tax package offered by the administration.

Madam President, every engineer knows that a safe mechanical system must have a safety valve to make it safe, if there is a significant risk that that system can do damage to its environment. This is particularly true when the system is untested and the potential damage is large and difficult to remedy.

Madam President, the same safe engineering principles should be applied to an untested and potentially hazardous economic program such as the one proposed by the administration in which this 3-year across-the-board tax cut is a key part.

The administration's program is experimental, particularly its tax component, and I believe it would be improved dramatically if we had built into the program a means by which we could extricate ourselves from a potentially disastrous scenario.

This amendment provides that program with a safety valve. It works automatically to curtail the dangers of a miscalculation without interfering with the program so long as it functions successfully.

The safety valve shuts off the automatic tax cut in the third year only when it can be seen that the automatic tax cuts in years one and two have produced a dangerous leak in the Federal budget, threatening to drown the American economy in high tides of inflation and punitive interest rates.

There is no question that these grave risks exist in the President's program, and there is no respectable economist who will tell you that the program is not experimental. Never in our 30-odd years of experience with macroeconomic management of the economy have we locked the economy into a 3-year personal tax cut on the expectation that it would stimulate supply sufficiently more than demand so as to generate enough real economic growth to close a persistent, large deficit and cover the revenue costs of the 3-year cut, all in conjunction with a tight rein on the money supply.

And never before have we imposed such rigidity on our tools of macroeconomic management, denying ourselves any flexibility in the use of the traditional macroeconomic tools of fiscal and monetary policy in response to the changing needs of the economy.

Never before have we deliberately exposed our economy to large inflationary, budgetary, and monetary shocks from an economic experiment based on unconventional theory. And I strongly believe that never should we consider doing it without, at minimum, putting in place a safety valve to turn off the experiment if it begins to misfire.

Many times I have gone over the potential dangers to the economy arising from this faith-based economic program, and I will go over them again.

This administration's economic program, with the 5–10–10 tax cut as its centerpiece, runs the risk of subjecting the economy to volatile cross current. It locks the economy into a stimulative 3-year personal tax cut and marries them to unexamined accelerations in defense spending to produce an expansionary fiscal policy.

This fiscal policy is at cross-purposes with the restrictive monetary policy that the administration has endorsed, and the Federal Reserve will be driven to pursue, in order to offset the budget's inflationary effects. Chances are high that the tight monetary policy and resulting high interest rates will choke off real economic growth before the tax cut can work its way into stimulating supply. But without the surge of growth, anticipated at 4 to 5 percent after 1982, the budget will fall into hopeless deficit.

I am not saying that this is what will happen. I do not know and cannot know what will happen. Nobody can, and that precisely is the point. What everyone can and should know, based on traditional theory and the historic performance of the economy, is that there is a substantial risk that what I have described will happen.

The financial markets do know this. Our financial and business community of course hopes the President's program will yield noninflationary growth, a balanced budget, and workable interest rates. We all hope this will happen.

But the financial community knows there is a grave risk that the results will be just the opposite, and that is an important reason why interest rates are sticky at historic highs and bond prices are falling. Movements in financial markets tell more about what analysts and brokers and investors think than do their words.

They may like the President's program, be hopeful about it, and want to believe in it, but they do not have confidence in

it—not enough confidence to put their money on it.

A safety valve, as proposed by this amendment, could bolster their confidence and that would give a quick boost to the economy. The safety valve would offer assurance that no tax program, however well intentioned, will be permitted mechanically to drive up deficits and interest rates.

Secure that the third-year cut would be made only if the economic conditions were right, the markets would be more likely to support productive, long-term investment at reasonable rates of interest. This approach would provide the financial and business community with the certainty of the full 3-year cut which the administration claims is central to achieving a positive economic response as long as the cuts were having the expected recovery effect. It would provide all of us with the additional security of knowing that the third-year cuts would be reduced or abandoned if the tax program was exacerbating the economy's ills instead.

In the final analysis, the vast majority of Americans stand to gain far more from robust growth, more and better jobs, and lower price levels than from a a small tax benefit, particularly when that benefit would be swiftly erased by chronic inflation.

Madam President, we cannot permit the development of a situation where the future health of the economy would be held hostage to the dogma of a 3-year tax cut. We must provide a bailout plan, a plan to save our economy, the only economy we have.

The ills of a ballooning Federal deficit are well known to my colleagues and to the American people. In a continuing dialog of dismay, pleas for greater efforts to bring the budget into balance have resounded in this Chamber.

But progress toward a balanced budget is the first victim of a tax cut unwarranted by economic conditions. Such tax cuts translate rapidly and directly into budget deficits, or a reduced surplus, which no one expects we will achieve by 1982 or 1983. These deficits are no different and no less damaging than deficits due to so-called runaway Government spending.

Deficits due to any cause force the Government into debt, and these deficits crowd out private borrowers or pressure the Federal Reserve to "monetize" the debt, to flush more money into the economy. Crowding borrowers drives up interest rates, hindering the private sector growth needed to bring about economic recovery and revitalize the competitiveness of U.S. industries in world markets.

Monetizing the debt can intensify already chronically inflationary demand pressures.

Deepening deficits induced by untimely tax cuts will force us to make larger and larger cuts in spending in the future. Nearly all of these will have to gouge programs for the poor, needy, and for the middle class as long as defense and entitlement programs swell.

This is not the way to build consensus for broadly based efforts to spur economic growth.

Large deficits are widely perceived to be a chronic illness plaguing the economy. Consequently, business and financial markets are inclined to react strongly to persistent deficits by driving up prices, wages, and interest rates. This constitutes the makings of relentless inflation and spiraling interest rates, and this is the perfect formula for obstructing real growth and industrial modernization.

Deficits also raise the national debt. This unfairly and imprudently mortgages the earnings of future taxpayers.

The description of damages done by rising budget deficits could go on, and has gone on time and again in this Chamber. It has been heard enough times to make the point. But this time is different. Now we have the opportunity to do something to protect the economy against uncontrolled deficits.

We can have the tax program that the administration claims is fundamental to bringing about economic recovery at the same time that we build a safeguard permitting us to recoup through tax policies in 1983 the revenue lost if the 1982 deficit rises above the administration's target for moving the budget into balance. We can have a small safety valve on an experimental program.

This Senator happens to believe that the economy requires a different mix of fiscal and monetary policy than the administration plans. Under the administration's program, inflationary tax cuts force the Fed to cut the supply of money and thereby drive up interest rates. High interest rates stifle real economic growth. Fiscal and monetary policy are at cross purposes.

A better mix would avoid the inflationary momentum of a large 3-year, inequitably distributed personal tax cut, thereby permitting faster progress toward a balanced budget and permitting monetary policy to accommodate the necessary growth with lower interest rates.

But this is not the administration's program and it appears that it is not the program the Congress will develop even though I have proposed two amendments to accomplish it. Let us then retain some flexibility, some means of modifying tax policy in response to the actual economic conditions at the time the 3-year cut goes into effect. Let us improve the engineering in this experimental program by adding a small safety valve.

It will improve confidence in the program, and by the administration's own standards stressing the importance of confidence, thereby improve prospects for the success of its economic recovery program.

I would simply commend the Senator from Nebraska for offering the amendment and assure him that as time passes, if this amendment is not adopted, there will be many Senators who will be faced with a very serious dilemma. That dilemma will be to allow interest rates and deficits to grow or to raise taxes.

Mr. EXON. Mr. President, will the Senator yield? Could we have order in the Chamber? There are five or six conversations going on, and I would like to hear the Senator from New Jersey. I wish my colleagues would give him the courtesy to listen to him.

The PRESIDING OFFICER. The Senator from Nebraska is correct. There will be order in the Senate.

The Senator from New Jersey may continue.

Mr. BRADLEY. Madam President, as I was saying, our colleagues in the Senate, without this amendment being part of the bill, will be presented with two very unappetizing choices. One will be if the economy is out of control interest rates are not 10.5 percent in 1982 but much higher, the deficit is not approaching balance but much higher, and they will refuse to do anything because we have locked ourselves into a 3-year tax cut.

Madam President, I would argue that that is not something that Congress wants to find itself in a position of having to defend. At the same time, I would argue that if we lock ourselves into this tax cut, and interest rates skyrocket, and the deficits skyrocket, Congress will be in the position of having to raise taxes.

I know, I have talked to many members of the business community, and they said, "Why don't you go ahead and adopt the 3-year tax cut? If things really deteriorate, and the deficit skyrockets and interest rates get out of control, you can always avoid that third-year tax cut."

Madam President, that would have the effect of raising taxes. Having been on the end of at least one vote on the import fee where Congress did propose to raise taxes, and having been a part of nine Senators who said they thought it was an important thing to do in that respect, I would argue that it would never happen.

The Senator from Nebraska, I think, has called attention to a very serious problem. That very serious problem is embodied in the very concept of the tax cut, and it is that we know today what the economy will be 3 years from now. I think that is patently untrue. The Department of Treasury, the Secretary of the Treasury, says he cannot even predict what the economy is going to be 6 months from now.

The Senator from Nebraska has, I think, wisely urged us to give ourselves a cushion and a safety valve so that if things turn out for the worse, we have an exit from this experimental plan.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. I yield 5 minutes to the Senator from Oklahoma.

Mr. BOREN. Madam President, I thank my colleague from Nebraska. In Sunday's edition of the Washington Post, Hobart Rowen devoted his "Economic Impact" column to an analysis of the outcome of the Ottawa summit meeting attended by President Reagan last week.

In his article, Mr. Rowen makes some interesting observations including, once again, the detrimental effects high interest rates have had on the world economy. As Mr. Rowen explains:

In a closely interlocked world economy, high interest rates in the United States force high interest rates elsewhere, making it difficult to mount a recovery program: The

high interest rates push the dollar higher in foreign exchange markets, which pushes down the value of European currencies. Since all these countries depend heavily on imports—including notably oil—the declining value of their currencies worsens inflation. In the end . . . that affects jobs.

Both the administration and the Federal Reserve have repeatedly stated that a combination of lower inflation with cuts in Federal spending should induce lower interest rate levels. Yet, if we look at the current trends, we see that while inflation is slowing, current mortgage interest rates are not.

The Consumer Price Index declined from the double-digit rate at the high point last year of in excess of 12 percent to 9.6 percent in the first 3 months of 1981, to 7.4 percent in the most recent 3 months, a decline from over 12 percent to over a little over 7 percent in the cost-of-living index in the last several months. Yet current mortgage interest rates have remained at 16 percent. How can one explain that mortgage interest rates have historically exceeded the rate of inflation by about 2 percent, yet the current interest rate/inflation rate spread is in the range of 6 or 7 percent? It would appear to imply that this is a planned and deliberate policy of both the Federal Reserve and now, sadly, Madam President, with each passing day it appears more and more that it has been embraced as a policy of the Reagan administration.

As Mr. Rowen explained in his article:

This (high interest rate) policy—and it's Reagan's not just the Fed's—places the entire burden of controlling inflation on a shrinkage of the money supply. That is what is driving interest rates up.

Madam President, how much longer can we allow this high interest rate policy to threaten the survival of our small business and farming communities, not to mention placing the thrift and housing industries near a point of collapse? Due to the seriousness of the problem, I, along with my colleagues Senators NUNN, CHILES, JOHNSTON, and EXON, have written a letter to President Reagan, asking him to convene a domestic economic summit which would include President Reagan, the chairman of the Federal Reserve, Paul Volcker, and the congressional leadership.

I would point out, Madam President, that those of us who signed this letter did not do it for any partisan political purpose. Most of us have been among the leaders of those who have tried to build bipartisan support for the major thrust of many of the President's economic programs. So it is written in all sincerity.

In that letter we pointed out that there seems to be a total absence of coordination between fiscal and monetary policy. We said that "a head-on collision between the two" appears imminent.

If I could underline one sentence in our letter, it would be the one which reads:

If the high interest rates continue, the administration's supply-side economics cannot work.

And I speak as one who has been sympathetic to the theory of supply-side economics. But let us think about it, Madam President. We are following a tax policy—and, in general, it is a policy I believe in—designed to encourage investment.

That is why we are reducing taxes, to encourage investment and thereby encourage increased productivity.

But the high interest rates are raising the costs of investment and are, therefore, discouraging it; working exactly in the reverse of the tax policy that we are trying to enact into law today.

In conclusion, Madam President, I ask unanimous consent that the text of both Mr. Rowen's article from the Washington Post and of our letter to President Reagan be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OTTAWA ECONOMIC SUMMIT: REAGAN AGAINST THE WORLD

OTTAWA.—In a blaze of lights and whir of cameras at the National Arts Center here, the seven heads of state and Gaston Thorn, president of the European Community, have spoken their pieces and concluded the seventh annual economic summit. But even this traditional linking of arms and closing of ranks could not hide the deep split in philosophy between the representatives of the hard-nosed policies of the Reagan administration and almost everybody else.

Although President Reagan, with the help of a well-oiled publicity machine, is trying to convince one and all that harmony and understanding prevailed, many Europeans departed this gentle capital with a sour taste in their mouths. What troubled them most was the American suggestion that having listened to the Reagan team's explanations, Europe has accepted the reasonableness of American policy that results in high interest rates.

This is far from the fact. What is true is that Reagan took a hard monetarist and supply-side line to Ottawa, and stood firm with it, just as he has done with his economic policy on Capitol Hill. And the Europeans suffered the same fate as the Democrats on the Hill—they were defeated. There is, to be sure, a promise of more effective consultation in the future, but no change in policy.

"The president walked away with the prize," Myer Rashish, undersecretary of state and the president's personal representative for summit preparation, told me with a sense of satisfaction. "If you read the communique, it sounds like a Reagan economic policy statement."

There is an element of truth to this. One could sense the degree of American domination of these sessions when the Socialist president of France, Francois Mitterrand, agreed to language accepting "the role of the market in our economies" and to boost the flow of private capital as a way of aiding the poor countries.

Nor will the United States budge on its policy of not intervening in foreign exchange markets, except in a crisis. "It would take something like a Russian invasion of Poland before we'd interfere," a high official told this reporter.

What was on display in Ottawa was American power and European weakness. Except for Japan, the United States has the strongest economy at the moment, despite some obvious problems. And it is still the biggest economy in the world, even if its global share of GNP and exports is smaller than it used to be.

Much has already been said about the American media blitz, which drowned out some European and Canadian efforts. Secretary of State Alexander Haig, presidential counselor Edwin Meese, Treasury Secretary Donald T. Regan and national security adviser Richard Allen were available continually for in-depth briefings (and selectively for private sessions) that naturally stressed the American view and tended to make Reagan look 10 feet tall.

The U.S. press office flooded the press room with transcripts by the dozen, including full texts of television talk show appearances by American officials. But reporters also complain when officials hide from the press. To be fair, it should be said that the United States also provided a full transcript of German Chancellor Helmut Schmidt's frank words on an "Issues and Answers" show. The media lesson, if there is one, is that the Europeans have to do a better job on their own behalf.

Although the summit was a news management success for the United States, the essential story here was that a powerful and popular American president pretty much had his way, whether the others liked it or not. He couldn't even be budged to join others in a condemnation of the Israeli bombing of Beirut.

Reagan was a bit nervous before the summit started, his aides say, wondering whether he could match strides with the others. Therefore, he arranged to have Meese attend the sessions in the role of note-taker. But he quickly saw he could hold his own, gained confidence, and by the end sensed he was pretty much in control.

It was all in sharp contrast to the summit three years ago in Bonn, where President Carter was overshadowed by Chancellor Schmidt, who played an aggressive role, along with former Japanese prime minister Takeo Fukuda. In the interim, the United States has gained strength—and a new president—while the Germans, hurt by oil prices and alert Japanese competition, have suffered.

Political tensions concerning Poland make the situation worse, spilling money out of European financial centers into New York. Japan is an increasingly powerful force in the international economy, with widely admired economic management. But Japan tends to align itself with and support the United States.

Moreover, language difficulties and cultural differences negate the prospect of a solitary Japanese leadership role at these sessions.

All these contribute to American power, the symbol of which is a mighty U.S. dollar. The mirror image is weak currencies elsewhere. (For the first time ever, the Canadian dollar dropped to 80 cents during the summit sessions.) Bitterly, German Finance Minister Hans Matthoefer told German reporters: "The higher the dollar rises, the harder it will fall."

None of the diplomatic cover-up regarding the communique can disguise the ruffled feelings. Subconsciously, President Thorn let it slip in his final statement that the Europeans view it as an "us-against-them" situation.

"We understand why the United States follows a certain policy while other countries adopt another policy," Thorn said, "and we will have to see how each of us will have to react as well, of course." The "we," of course, is Europe, and the "you" is the United States.

Already, a disgruntled Schmidt has promised that at home, he will deal with continuing high interest rates by cutting the federal budget. This may ease pressure on interest rates in Germany—the highest, he says, "since Jesus Christ"—but presumably at the expense of further depressing German economic activity. As far as the United States is concerned, Undersecretary of State Rashish confides, Schmidt used Ottawa "to lay the blame on us" for his domestic economic and political problems.

But the European economic problem is truly critical, especially the time bomb in-

herent in growing youth unemployment. About a decade after it happened in America, a baby boom has produced a massive shortage of jobs in many countries. The recent British riots illustrate what can happen in a stagnant economy with a burgeoning population. Treasury Secretary Regan admitted that he hadn't fully understood the European unemployment problem until coming to Ottawa.

Mitterrand warned Reagan in a face-to-face meeting last Sunday that France may face "social upheaval" this fall if he can't find some way of slowing down unemployment. Obviously, Mitterrand looks across the channel to England and wants to avoid the kind of economic disaster brought about with the help of Margaret Thatcher's austerity policy.

Europe's basic troubles, to be sure, were not created by high American interest rates—and this is the most responsible answer the Americans can make. But in a closely interlocked world economy, high interest rates in the United States force high interest rates elsewhere, making it difficult to mount a recovery program: The high interest rates push the dollar higher in foreign exchange markets, which pushes down the value of European currencies. Since all those countries depend heavily on imports—including and notably oil—the declining value of their currencies worsens inflation. In the end, as Schmidt said here a half-dozen times, that affects jobs.

The most disingenuous thing the Reagan administration did here was suggest blandly that it doesn't like high interest rates any more than the Europeans do, but they are a necessary response to "a legacy" or "mess" inherited from past administrations. What's more, they repeated in the numerous briefings, the Federal Reserve is responsible for monetary policy, and "after all, the Federal Reserve is an independent institution."

This was a shallow, indeed phony posture. As Canadian Prime Minister Pierre Trudeau said bluntly, the basic reason interest rates are high worldwide is that the United States is pursuing a monetarist policy in a doctrinaire way, leading to social costs that are too high.

This policy—and it's Reagan's, not just the Fed's—places the entire burden of controlling inflation on a shrinkage of the money supply. That is what is driving interest rates up. It was disingenuous for Haig, Meese, Allen and Reagan not to admit that the Reagan administration supports Fed policy.

In fact, the administration has, though Treasury Undersecretary Beryl Sprinkel, publicly egged the Fed on to make the policy even tougher, regardless of what it does to interest rates.

Despite denials by Meese, the Europeans continued to urge that the Reagan administration ease the pressure on monetary policy by adopting a different "mix" of measures (notably a delayed or reduced tax cut) that would lower the federal deficit. They were flabbergasted to read that Meese told an American briefing he and Regan had asked the Europeans to come up with alternatives to Reagan's program, but that they had had none to offer.

The sharp division between the market-oriented Reagan administration and most of its partners was also evident on North-South and East-West issues.

Despite lip service to global negotiations with the Third World, desired by all the others at Ottawa, the Americans watered down the language to almost meaningless phrases because they remain suspicious that global negotiations are a device fostered by leftwingers to redistribute the world's wealth. They would rather let private market, "supply-side" economics be responsible for much of the further development of poor countries.

On East-West matters, the United States pressed hard to make the Europeans relate their commercial trade with Russia to strategic considerations, and got a surprising degree of support, failing only to get specific mention in the communique of West German plans to buy natural gas from Siberia. The United States wants to take a tough anti-Soviet stance on trade, fearing a buildup of Soviet military power. But the Europeans see trade not only in terms of economic necessity, but as a bridge to a peaceful rather than a war-like continent. Schmidt again reminded Reagan that 16 million Germans live behind the Iron Curtain.

Despite this backdrop of disharmony, there have been some pluses in Ottawa. The leaders did, after all, meet, and as ineptly but perhaps accurately put by Thorn, became "aware of the limits of everybody." They reiterated a commitment to an open, "liberal" and multilateral trading system. Over the years, one positive result of such summits has been to delimit protectionism.

The summit also promised, even if it didn't buy the Trudeau-Mitterrand package on global negotiations to increase total aid to poor nations—to support a North-South summit at Cancun, Mexico, in October, and to solicit help from the Organization of Petroleum Exporting Countries for joint financing of energy development in poor countries (but not a new affiliate for the World Bank). It provided a framework in which Reagan discovered that Mitterrand has no horns and is almost as concerned about trade with the Eastern Bloc as he is.

So, several good things happened here. Having an Ottawa summit was better than not having one. It is better to talk than not to talk.

But this is not the millennium. The poor countries will still be dissatisfied with the help offered by the rich. Interest rates will remain high, economic growth low, and unemployment in the industrial world next year—according to the International Monetary Fund—will be at the worst level since the Great Depression. The communique actually tells citizens in the summit nations to lower their "expectations about growth and earnings."

If that's the best that Western leaders can offer, all seven countries represented at the summit may face social upheaval or worse. In that case, the fragile compromise at Ottawa could rip apart in Paris next year.

JULY 24, 1981.

Hon. RONALD REAGAN,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We have given support to the general direction of the Administration's economic program here in the Senate. We share your belief that a reduction of federal spending, federal taxes, and the federal regulatory burden is essential for increased productivity, reduced inflation, and economic revitalization.

We are vitally concerned, however, with the apparent absence of coordination between the fiscal and monetary policies of our government. The current fiscal and monetary policies of our nation appear to be on a path where significant conflict, if not a head-on collision, is imminent.

The continuation of the high interest rate pattern of the past few months, if allowed to persist, will cause irreparable damage to our economy. We are beginning to have a dual economic policy—a boom to those with available capital—a depression for those who must borrow and for businesses depending on long-term credit.

When giant corporations borrow tens of billions of dollars for corporate takeover purposes that make no contribution to job creation and productivity, and potential home buyers cannot find affordable mortgage money, it is time for a reexamination of national economic and anti-trust policy. We also think it would be appropriate in this context for the Administration to reexamine recent policy statements which may have encouraged massive borrowing for merger purposes.

Officials of the Administration and the Federal Reserve have repeatedly said that once inflation abates and the public is shown that federal spending will be cut, interest rates would begin to decline. Just recently on May 8, Federal Reserve Board Chairman Paul Volcker said, "interest rates will come down and stay down as we make progress on inflation."

Today inflation is declining but mortgage interest rates are not. While consumer price increases declined from 9.6 percent in the first three months of this year to 7.4 percent in the most recent three months, the mortgage interest rates remain entrenched at 16 percent. Historically the spread between mortgage interest rates and the rate of inflation has been about 2 percent. Now, however, the interest rate/inflation rate spread has ballooned to 6 to 7 percentage points which implies to many that this is a planned and deliberate policy.

The Administration's economic advisers, according to Mr. William Niskanen, a member of the Council of Economic Advisers, are currently both "confused" and "puzzled" by continuing high interest rates. Yet reports from the recent Ottawa summit indicated you endorsed and vigorously defended the high interest rate policy of the Federal Reserve.

Just today the Washington Post reported that Treasury Undersecretary for Monetary Affairs Beryl Sprinkel told the House Committee on Banking, Finance and Urban Affairs that there is no technical, and no necessary, connection between budget deficits and money growth, or between deficits and inflation.

We could not disagree more. Either the government finances a deficit by printing money or by competing with and crowding business out of the credit markets. Printing money to finance deficits results directly in more inflation. Increasing federal borrowing affects inflation by forcing up interest rates, and increasing business costs. Eliminating federal deficits and reducing federal borrowing requirements are necessary for both psychological and substantive economic reasons, and must be accomplished at the earliest possible time.

If the high interest rates continue, the Administration's supply side economics cannot work. The survival of our small business and farming community is threatened, many thrift institutions are in serious financial trouble, and the housing industry is near collapse. The majority of businesses, particularly small businesses, will not be able to finance inventories, let alone capital improvements. A tax cut will mean little to small businessmen and farmers who make no profit to be taxed because of exorbitant interest rates.

In summary, Mr. President, we urge you to address these serious problems before it is too late to moderate the Administration's fiscal program. As we see it, the question is whether the anticipated stimulative effect of the Administration's fiscal program has so overloaded the system that continued long-term high interest rates are the inevitable result. If your Administration does not advocate a continued high interest rate policy, we hope that it will let its views be known to the financial community and persuade them to take action to moderate interest rates.

In this regard, we respectfully suggest a "domestic economic summit" meeting with a full dialogue between you as President, Chairman Volcker of the Federal Reserve and

Congressional leadership. We would hope out of that meeting there would emerge a coordinated cohesive fiscal-monetary policy which can be clearly understood by the American people.

We do not expect an instant cure, but we do believe it is possible to achieve a moderation of interest rates and avoid major credit shortages if our nation's fiscal and monetary policies are coordinated.

We offer you our bipartisan support in this effort.

Sincerely yours,

BENNETT JOHNSTON.
J. JAMES EXON,
U.S. Senators.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. EXON. Madam President, I yield on my time what additional time the Senator from Oklahoma needs.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BOREN. Madam President, I have given a lot of thought to the amendment of the Senator from Nebraska. I must confess that when he first mentioned it to me, I told him that I could not support it. I voted against a similar amendment in the Finance Committee.

But this is a deliberative body. The term is sometimes used derisively. But I can tell you, Madam President, that I have thought long and hard about my decision to vote for and support the amendment of the Senator from Nebraska. I do so, in part, because I know of no other way of demonstrating to the White House and the administration my sincere concern that they are walking into a trap from which they will not be able to get out; that they are going to bring down the whole house of cards; that they are going to undermine the entire economic policy which they have been advocating of encouraging more investment, getting productivity increased, and supply side economics through this high-interest-rate policy.

I know of no other way of urging the President effectively to immediately begin to jawbone, to persuade, to talk with the leaders of the financial community to try to get the interest rates down and, above all, to talk to the Federal Reserve Board. If they will not give up this foolish policy of overconcentration on completely unrealistic restrictive money supply targets forcing the high interest rates upon this country and ask for whatever powers are necessary to change it, Madam President, I am convinced that, try as we will to support the other aspects of the President's economic program—and I think they are headed in the right direction—that policy will fail.

If we cannot succeed in getting the interest rates down to reasonable levels, to the target suggested in the amendment of the Senator from Nebraska, then another year of tax cutting will do absolutely no good, because we are going to end up destroying the economy in the process and at that point we would only make matters worse by a third year of tax cuts.

I hope, Madam President, that the President of the United States will look at this matter himself and not be misguided by his advisers. I hope that he will realize the grave risk to our economy being run by the Federal Reserve policy. I hope that he will realize that those who are following that policy have absolutely no faith in the very supply-side economics policy that the President has advocated and that he campaigned across this country on. I hope that he will realize that he has serious problems with his own administration from those who do not believe his economic philosophy and who will certainly undermine it if they are continued to be given a free hand as they now apparently enjoy.

The PRESIDING OFFICER. Who yields time?

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 25 minutes remaining.

Mr. EXON. How much time remains on the other side of this question?

The PRESIDING OFFICER. Fifty-six minutes.

Mr. EXON. Madam President, I ask unanimous consent that the name of Senator BOREN, from Oklahoma, be added as a cosponsor on the amendment before us.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EXON. Madam President, I have a few more things I think would be most appropriate to say about this amendment and then I would ask the managers of the bill if they might be prepared to unanimously accept the amendment. If so, we might be able to avoid a rollcall vote. However, if there is opposition, I will be asking for a rollcall vote.

While that matter is being decided, I would simply like to point out that the amendment that I addressed for about 20 minutes or so before the last rollcall vote and the excellent remarks that have been made by my distinguished colleagues from New Jersey and Oklahoma, I think basically puts into perspective the way we see it.

This is a constructive amendment. I would point out, Madam President, that the amendment that is called the Exon-Bradley amendment is also cosponsored now by Senator NUNN, Senator DIXON, Senator PRESSLER, and Senator BOREN.

At this time, Madam President, I yield the floor and reserve the remainder of my time.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Madam President, the Senator from Kansas will not take over a few minutes. As I understand, we are prepared to vote.

Mr. EXON. I will need a few more minutes, but I think extended debate is not necessary on this, I say to my friend from Kansas. There are one or two other Senators that may be coming in and would like to talk on this. But I think, basically, we can wind it down rather quickly.

Mr. DOLE. I thank the distinguished Senator from Nebraska.

Madam President, this amendment would change the 5–10–10 series of individual rate reductions contained in the bill. The revenue effect would be the same as under the committee bill, but revenue loss from the third-year rate cuts would be contingent on meeting the specifications in the amendment. I understand the amendment we are now on is the one of July 24, the latest revision.

Under the amendment, the 10 percent rate reduction due in 1983 would be contingent on meeting the administration's estimates for Treasury bill rates in fiscal year 1982. The expected average rate is 10.5 percent.

If the 10.5 percent goal is not met, the 10 percent tax cut due in 1983 would be reduced. The reduction would be in proportion to the excess of the actual 1982 deficit over that now projected, which is $42.5 billion. However, the rate reduction would still be at least 5 percent. I think that is an appropriate description.

Mr. EXON. The Senator is correct.

(Mr. GRASSLEY assumed the chair.)

Mr. DOLE. Mr. President, this is not the first time we have debated the individual rate reductions contained in the Finance Committee bill and recommended by the President. So far the Senate has shown a strong inclination to adhere to the Reagan proposals, and I expect that will continue to be the case. But certainly the pending amendment raises some interesting issues for us to consider.

The Senator from Nebraska and the Senator from New Jersey would like to condition the third year of individual rate reduction on the achievement of certain improvements in the economy. Specifically, their amendment would cut back the third year of rate reductions unless the Treasury bill rate for 1982 averages 10.5 percent or less. The tax cut would be reduced to the extent the 1982 deficit exceeds the administration projection of $42.5 billion. If T-bill rates average 10.5, the tax cut would not be reduced.

Mr. President, the explicit purpose of this amendment is to allow us to hedge our bets. It says that, if the economy does not perform exactly as we hope and expect it will at this time, we will cut back the last stage of the individual tax reduction program. The underlying assumption must be that, if inflation and the deficit are not reduced sufficiently, the fault must lie in our tax reduction program. There is no suggestion that, if we fail to meet these targets, we should automatically withhold a certain amount of planned Federal spending. Yet the proponents of the amendment would automatically withhold tax reduction.

The fact is that the advocates of this trigger amendment are really proposing a triggered tax increase. Without the tax reductions contained in the pending legislation, taxes would rise by about 22 percent over the next 3 years. Withholding part of the final 10 percent of proposed rate reductions would mean a real tax increase for most Americans over present levels. If that is what we want, we ought to come right out and say so. But there is no reason to incorporate a triggering provision in the present bill in order to guarantee that we will have adequate

revenues in 1983. If we reach a point where it seems we will need more revenues in that year, we can simply vote to increase taxes in some way. All the trigger mechanism would do is avoid the need for a vote at that point: I can understand why some might want to avoid such a vote, but I do not think it is quite fair to the American people. The Senate has already demonstrated its opposition to automatic tax increase by voting for tax indexing. To adopt this amendment would be a step backward in every sense.

Mr. President, I would also note that the amendment is self-contradictory. It attempts to hold the administration to its economic projections, yet by denying the certainty of stable tax rates over the next few years it undermines the chances that those projections can be met. That makes no sense, because stability and certainty in tax, budget, and fiscal policy are key elements of the economic recovery program. If we want to meet these economic goals, and I believe we all do, we ought to accept the recommendations the President has made. If we fall short of those goals, then it will be our responsibility to make necessary changes. No one can predict with certainty the course the economy will take over the next few years, but plotting a consistent course is the policy that makes the most sense. This amendment would force us to reverse policy if we fall short on some of our short-term goals. By so doing it would hinder our ability to meet our long-term economic goals, and I trust it will be rejected.

Mr. President, let me suggest that we are in what I consider to be the homestretch of probably the most memorable week in Congress in the past 50 years. We have an opportunity in the next 5 days both to cut the budget substantially, which has not been done before around this town or by other Congresses, and to pass the largest tax reduction bill, as far as this Senator knows, in history.

I understand the concerns of the Senator from Nebraska and others in this Chamber. I suggest those concerns are shared by the President of the United States.

But Ronald Reagan is the President of the United States, and he has sent us this tax reduction package. Certain amendments have been offered and certain amendments have been accepted.

This bill was passed by a vote of 19 to 1 in the Senate Finance Committee. I know that some are now backing away from that position. I would point out that there was strong bipartisan support. Eleven Republicans and eight Democrats voted for the President's proposal, and one Democrat voted against.

This is not the first time we have debated the individual rate reductions and how we are going to approach them.

This is a little different approach that is based on interest rates. I think perhaps that is a relevant consideration. I am not certain that it is a good way to make tax policy but it is certainly another novel idea to be brought up on this floor. It does, however, try to picture President Reagan as the one responsible for high-interest rates.

At the outset, I might say that Mr. Volcker, and I do not condemn Mr. Volcker, was appointed by President Carter. He is not a Reagan appointee.

I might also suggest that President Reagan has been in office a little over 6 months. We see the inflation rate dropping. We see spending cuts actually being approved in the Congress of the United States, much against the will of some of the liberals in the Senate and the House who voted for all the spending and then do not want to cut taxes.

It would seem to me that this President has taken the right course. You cannot have it both ways. I see a number of Members offering high priced, expensive, costly amendments to the tax bill. I check back and find they voted for every spending increase instead of for spending reduction.

We have been doing that kind of business around here for too long. That is why the country is on the brink of economic disaster. That is why interest rates are 20 percent. It is not because of anything that President Reagan has done. It is because we have lived around here in a dream world. To every special interest, we have said, "Offer your amendment and we will vote for it. I do not care what it will cost, call it a social program and we will vote for it and increase it the next year or double it if necessary."

We have had enough of that leadership. We finally have someone in the White House who is willing to take the hard knocks and willing to take the hard looks at how we are going to get the country back on track.

While I may sympathize with those concerned about interest rates, let us give the President a little bit of time. Let us give the President a chance to have his economic program in place. It all could happen by Saturday of this week. The Congress could pass and the President could sign into law the budget reductions.

The Congress could pass and the President could take action on the tax reduction. He is already working on trying to reduce regulations that have affected everybody's lives on a daily basis. He is keeping a very tight monetary policy trying to put the anti-inflationary pressure on.

I know of no way to make interest rates drop by passing this amendment or any other amendment. I know of no reason to deny the American taxpayer a tax cut because somebody may think in 1983 the interest rate ought to be a certain percent.

This Senator fails to understand the philosophy of some who do not want to give people back their money. You are saying in effect, "We cannot trust you with your money. We want the Government to take all they can get." They are getting most of it now. "We will decide in the Congress, we will decide in the administration, how we are going to spend your tax money."

Why not trust the American people? Why not give the money back to the American people?

I do not understand the opposition of the Senator from Nebraska to that.

I know there are a lot of political games being played and this is another one, an effort somehow to prevent the President from getting the program he took to the American people last year. He has reduced the size of his package. He has made cutbacks in the size of his package. He has added certain features to the tax bill to make it more attractive and to make it better, in the opinion of this Senator.

So I just suggest this is another effort, a last-minute effort, to embarrass the President of the United States, to make a little political cut at the President of the United States. I hope that my colleagues will take a careful look at the amendment. Maybe we can figure out some other way to keep the taxpayers from getting that third year. We considered that an up-or-down vote and could not agree to it. Now we are trying little tricks. "Do not let the people have their money back. Keep it in the Government."

That has been the philosophy of past administrations and I might say past Congresses, but this Senator believes it has gotten us, as I indicated before, into the very deep, difficult economic problems that we have now.

We have a man in the White House who is providing some leadership. We have a man in the White House who is willing to stand up and say, "Let us cut taxes, let us cut spending, let us cut regulations."

Some can find fault with that. No one is perfect. I do hope that we can properly dispose of this amendment by defeating it and by letting the President know, as he prepares to go to the American people tonight to explain his position on tax reduction, that we believe he is working for the people, and that he has more confidence in the American people as far as returning their money than many in this Chamber and many on the other side of the Capitol.

This Senator has been here for some time and I cannot recall a period when we have had such outstanding leadership in trying to give Government back to the people, trying to cut spending, trying to return programs to States, trying to reduce taxes, and trying to get Government off the backs of the American people. I challenge those who want to throw a roadblock every time the President moves, and say "You cannot do this or you cannot do that."

It is time that we recognize that we have a President who wants to provide leadership—despite the objections of some in Congress who would put up one barrier after another.

We have a strong bipartisan bill reported out of our committee. There is no trigger in that bill which was reported out by the votes of 8 Democrats and 11 Republicans. They did not think a trigger was necessary. One was offered but it was soundly defeated.

In this case, I think the judgment of the committee was pretty good. Maybe not perfect. Congress is going to be in session next year and the year after. If in fact we do not meet certain goals as outlined by the Senator from Nebraska, I assume we can take action. We

would like to meet again in the Finance Committee. This is a 3-year tax cut. We would like to go back and provide more tax relief for the downtrodden American taxpayer even this year.

I understand this is the last effort to roll the President, and I hope it fails.

I reserve the reminder of my time.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 25 minutes and 29 seconds.

Mr. EXON. I thank the Chair.

Mr. President, it seems to me that the eloquent remarks which have just been made by my friend, the chairman of the Finance Committee, the Senator from the State of Kansas, more or less begs the basic question.

I assure my friend from Kansas that it is not the goal of this Senator, who drew the amendment, to offer any roadblocks to the President in his efforts to do what the Senator from Kansas has indicated he is trying to do.

I think the Senator from Kansas knows very well that not only in the Budget Committee but on the floor of the U.S. Senate I have been one of those who has steadfastly supported the President in his overall program.

It is true, as the Senator from Kansas says, Mr. President, that we are in the homestretch of a very important tax bill, and it is true that there are those of us who are vitally concerned about the ruinous interest rates that are causing grave damage to our economic structure in the United States today.

I did not, in my amendment, try to find fault. All that I am saying is that if we are going to go ahead with this tax cut bill, which I am sure we are, I do not believe that we should go down a road of no return without making a safety valve that I think is critically necessary.

Mr. President, I frankly am not very much persuaded by the argument of the Senator from Kansas that the Senator from Nebraska does not trust the people, does not want to give the people back their tax money. If I were not standing on the floor of the U.S. Senate, where I try to guard my language a little bit, I might have some more sharply worded explanation for that kind of argument.

I notice that the Senator from Kansas indicates that this bipartisan tax bill was passed, 19 to 1, out of his Finance Committee. This is not the tax bill that passed 19 to 1 out of his Finance Committee. In fact, two of the people who voted for that bill in that committee are cosponsors of the Exon amendment.

Mr. DOLE. Who are they, Mr. President?

Mr. EXON. Senator Boren. Is he a member of the Senator's committee?

Mr. DOLE. Yes.

Mr. EXON. Senator BRADLEY?

Mr. DOLE. Senator BRADLEY voted "no."

Mr. EXON. Oh, I am sorry.

Mr. DOLE. He is the only one who was opposed.

Mr. EXON. Mr. President, do I still have the floor?

The PRESIDING OFFICER. The Senator from Nebraska has the floor.

Mr. EXON. It seems to me when we talk about the Senator from Nebraska not wanting to trust the people, he had better look at the record. I have been through that political talk before about giving money back to the people. I served my State for 8 years as Governor of that State and we balanced the budget each time. We were not always able to do it by giving the people back their money, as much as we would all like to.

I want to correct my friend from Kansas: This is not the last chance to roll the President of the United States and this amendment is not so designed. It seems to me if the President of the United States and those on that side of the aisle were concerned about the people, as they claim to be, they would realize and recognize that they are not cutting the budget and cutting expenditures as the Senator from Kansas said three times in his recent remarks. Indeed, the opposite is true. Because for whatever the reason, this administration is going to raise—raise—the level of Federal expenditures from about $660 billion now to almost $800 billion under their present plans by the year 1984. So let us try to put this cut in proper perspective.

I emphasize again that I have been one who has been voting for those cuts, believing that to be necessary. But I think their rush to say, "Whatever the President wants, the President gets," is not sound economic policy.

Mr. President, the Senator from Kansas made a point that the President of the United States sent us this bill. What bill? Is this the Kemp-Roth bill? Of course it is not. Is it the bill that came out of the Finance Committee on a vote of 19 to 1? Of course it is not. It is the greatest Christmas tree tax legislation ever proposed to be passed by Congress. And I am not saying it is all bad. I am only saying that a great number of changes have been made by the President of the United States on his way to victory on a tax bill. I do not criticize him for that. All I am suggesting, Mr. President, is that in this case, we not change the President's tax plan at all.

I emphasize once again that all my amendment does is simply say we shall take, we shall buy, we shall go along with the President's tax plan completely except that if the President's economic assumptions do not come to pass—and if they do not come to pass, I am going to predict that interest rates are going to remain horrendously high and that the deficit is going to remain horrendously high.

But let us assume that this is not true. Let us assume that the tax package structured by the chairman of the Committee on Finance, my friend from Kansas, works out in every detail. Let us assume that interest rates come down. Let us assume that the deficit goes down. Well and good. The Exon amendment does not come into play and, therefore, nothing is hurt.

All this amendment does, very simply, Mr. President, is say that if the 1982 Treasury bill average is more than the 10.5 percent, as predicted by the economic recovery package designed by the President that we are going to pass, then and only then, on July 1, 1983, the scheduled tax reduction is reduced proportionately to the amount necessary to increase the 1984 revenues by the amount of the 1982 deficit exceeds the President's $42.5 billion of deficit for that particular fiscal year.

Mr. BRADLEY. Will the Senator yield?

Mr. EXON. In just a moment, I will.

Mr. President, it seems to me that those who oppose this amendment have no good reason to oppose it if they believe in what they say. I, for one, do not believe that I was elected by the people of my State simply to come here and push buttons and every time someone down at 1600 Pennsylvania Avenue sends something up here, whether it be a Democratic President or a Republican President, the people of my State, I do not think, want to say to me, "That is right, you vote for it." But that is the philosophy that has prevailed on this floor for the last 6 weeks. I am simply saying that this is a thoughtful amendment. It is not designed to roll anyone. I think that the speech made by the Senator from Kansas was designed to inflame the faithful on that side of the aisle that have, by and large, for the past 6 weeks, been marching down to the well—almost like lemmings, lemmings marching to the sea—voting, not out of intellect but by instinct.

I suggest, Mr. President, that that was the reason for the remarks of the Senator from Kansas. I suspect that they will do the job, but I stand up in defense of this amendment, because it is not designed to roll anyone, it is not designed to hurt anyone; it is only designed to help the economy of this country.

I yield what time is necessary to my friend from New Jersey.

Mr. DOLE. Mr. President.

The PRESIDING OFFICER. Will the Senator from New Jersey suspend for the Senator from Kansas?

The Chair was wrong, the Senator from New Jersey has the floor, yielded to him by the Senator from Nebraska.

Mr. BRADLEY. I thank the Chair and want to make my comment in the form of a question of the Senator from Nebraska.

This amendment is quite modest. This amendment is prudent. This amendment simply says, let us retain some flexibility in case things do not go the way they are expected to go. Is that not right?

Mr. EXON. The Senator is absolutely right.

Mr. BRADLEY. I think there is probably no better example of why this amendment is needed than the difference in the interest rate projections offered by the administration in their first budget and in the midyear review. In the first budget, they said the interest rates in 1982 would be 8.9 percent. Six months later—in fact, 4 months later—they said the interest rates in 1982 will be 10.5 percent.

Mr. President, this clearly illustrates that predicting what the economy will

look like 6 months from now is incredibly difficult; that predicting what it will look like 3 years from now is virtually impossible; and that it is an act of prudence, a responsibility, to have a means of escape, to have a safety value, in the event the economy does not perform as ideologues in the Treasury Department predict it will perform. Is that correct?

Mr. EXON. The Senator is correct.

As I pointed out in my opening remarks, there have been words mouthed on the floor of the Senate this afternoon to indicate that we want to give it back to the taxpayers. The fact is that the changes in the administration's cost figures to which the Senator alluded for those years are going to cost those taxpayers more than $17 billion.

It is nice to talk about giving back funds to people; but we know, like it or not, that the taxpayers of these United States are saddled with paying the interest on the national debt. Among other reasons, that is why it is critical that we get the interests down—not for the harm it is doing Mr. and Mrs. John Q. Citizen of the United States, not for the harm it is doing to the small businesses and farmers of the United States, but for the harm it is doing to those of us who are working very hard to cooperate with the President to balance the Federal budget in 1984.

If we keep seeing the escalating interest rates to which the Senator from New Jersey has alluded, we are going to miss that goal by a long, long way.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Twelve minutes and 31 seconds.

Mr. EXON. I reserve the remainder of my time.

Mr. DOLE. Mr. President, I will say a word or two, and unless the Senator from Nebraska has additional speakers, we may yield back our time.

I say to the Senator from Nebraska that I have no quarrel with him, but I do suggest—and I think properly so—that this is an effort to derail the President's tax reduction program. I do not believe there is any quarrel about that.

The Senator is asking for a trigger, and the President does not want a trigger. Define it any way you wish, but it is an effort to disrupt the President's economic package and to make the third-year tax cut contingent on factors other than Congress meeting in that year and deciding what to do. I believe the record reflects that that is the concern of the Senator from Kansas.

This may not be the precise bill that was reported by the Senate Finance Committee, but I must say that it is very much the same bill. We have added a couple of amendments. I am not certain how the Senator from Nebraska voted on charitable deductions. We added that provision.

We added a fiscal responsibility amendment. I believe both Senators voted for that.

We will have a vote on a day care amendment which would add a substantial amount to the bill, and which we had hoped not to add to the bill, but we found more pros than cons with the proposal.

Beyond that, so far as I know, we added indexing, which was a committee amendment.

The other amendments we agreed to in most cases, are very minor so far as cost is concerned.

So this is substantially the measure that was reported by the Senate Finance Committee by a vote of 19 to 1. That is a fact; that is the record. This Senator is not trying to change it or distort it. The one who voted "no" was the distinguished Senator from New Jersey; and had it not been for the third year, I believe he would have voted "aye."

The point the Senator from Kansas wishes to make is that I have confidence in the President. If he is wrong—and other Presidents have been wrong—then many of us will also prove to have been mistaken. But he is the President and he has asked us to approve his package. He does support this proposal. He does not want a third-year trigger added. He does not want a 2-year tax bill. He has confidence in the American people. He believes we should return as much money as we can to the American people, who are overtaxed now.

What did the last administration leave? They left four more increases in social security taxes which have not even started yet. That is the legacy of the Carter administration.

The President wants to cut taxes to help pay for the increases built in down the line. I do not hear anybody saying we should not pass those increases, or that we should make tax reduction contingent on interest rates.

Mr. SYMMS. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. SYMMS. Mr. President, the reason why I would vote against the amendment—and I hope others will vote against it—is that one of the reasons for the declining productivity of American business is their inability to plan and anticipate for the future.

We have had a policy for years of raising taxes and spending more money. This is the first time there has been a signal that we are going to start rewarding incentive—giving tax breaks to people who work, who save, who invest, who produce tools and equipment.

The working people of this country are participating in the 25 percent, 3-year tax break—the people working for wages, the small businessmen who file tax returns other than corporate returns. They are the ones who need to be able to anticipate that there will be the third-year, 10-percent marginal rate reduction. They need to be able to anticipate that tax cut so that they can make the decisions with respect to running their families, with respect to running their businesses, whether to save more money or spend more money.

I believe that adopting this amendment would be very detrimental to the President's economic package, because it would remove one of its keystones.

Our President is an optimist; he is looking to the future. He does not believe that the greatness of America is in the past. He believes it is in the future.

If we adopt this amendment, we are saying that we are going to try this if it works. That is like saying in a football game, "The quarterback will pass on the third down if everything is all right." That is not the way to play football, and that is not the way to run the economy.

We are going to give the American people a 3-year, across-the-board tax rate deduction that they can plan on, count on, and look forward to a tax cut; and not say, "We will give you a 3-year tax reduction, maybe." That will not enable them to plan or look into the future.

That is why I believe it is important that all my colleagues join the chairman of the committee and vote down this amendment because it will be very detrimental to the economic package.

Mr. DOLE. Mr. President, this is just a basic difference of views. I have no quarrel with the Senator's proposal. It is a modification of an earlier one. This may be a better version.

However, it seems to me that this is the last chance for some to try to roll the President of the United States. I would be glad to modify the word "roll." This is the last chance—the last major amendment coming from the other side to make this a 2-year tax bill. If you want to complicate it, this is the way to do it. Other ways have been tried and all have failed.

I suggest that we proceed to a vote. If the President loses this, we will try to figure out some other way to help the American taxpayer.

It seems to me that the President has the people on his side, particularly the taxpayers. I would be hard pressed to find any taxpayers who feel that their taxes are too low. Maybe they will like higher taxes in 1983; and if they do, this is an opportunity to give them higher taxes in 1983.

My view is that we are going to be in business here in 1982–84, and beyond. Someone will be here, and someone is going to watch the interest rates and the economic projections and everything else that may concern the Senator from Nebraska and the Senator from Kansas. We come from the same part of the country. Interest rates are killing us. They are not Reagan's interest rates. They were here when he arrived. This is not Reagan's Federal Reserve Board Chairman. In any event, we see that inflation is coming down.

I apologize to the Senator. We are not really cutting spending. We are restraining the growth of Federal spending. That is unusual in this body. I cannot remember any other time when we cut anything, and I have been here 20 years.

We have in the past acceded to every spending appeal that someone made, and we are in a heck of a fix because of it.

So the Senator's idea is probably as good as others that have been defeated. I hope that we can do the same to this one.

I yield back the remainder of my time and ask for the yeas and nays.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, first I wish to briefly respond to my friend from Idaho.

As I took it, in his remarks he felt that the third year of the tax cut for business would be rolled back; is that correct?

Mr. SYMMS. That is correct. The Senator is talking about the 10-percent across-the-board tax cut. Most small businessmen file individual tax returns.

Mr. EXON. I say to the Senator from Idaho I might be able to pick up his vote. It is clear in the amendment, and I mentioned this several times during my talk, that any rollback if necessary, if we fail to meet the economic projections of the President, does not affect the business tax, only the individual tax.

Mr. SYMMS. Mr. President, will the Senator yield for a question then?

Mr. EXON. I will on the Senator's time. I am about out of time. If the Senator will yield on his time, I am glad to have him answer.

Mr. SYMMS. Mr. President, will the chairman yield me time off the bill?

The PRESIDING OFFICER. All time on the majority side has been yielded back.

Mr. SYMMS. Mr. President, I wish to take time off the bill.

The PRESIDING OFFICER. The Senator from Nebraska has the floor.

Mr. EXON. Mr. President, I yield 30 seconds of my time to the Senator.

Mr. SYMMS. Mr. President, I know my good friend is a former small businessman. The small businessmen in the United States file individual income tax returns, and they are affected by a 10-percent rate reduction which will be on the last year of this 3-year tax bill, so it does affect the bulk of the business community in the United States. If the Senator's amendment were agreed to, it would be taking away the chance for them to get their tax cut, and that is true for all the people who are working for them. Small businesses are not corporations.

Mr. EXON. Mr. President, I advise my friend from Idaho that he may be right to a degree on that. The point is we have anticipated in the scaling back of the business investment that the large proportion of that on the cost of Federal Government would be on the business side. At least that is what I learned from my reading and interpretation of the Finance Committee bill.

I only wish to reply as to the response of the Senator from Kansas, and then I am going to yield to the Senator from Oklahoma. How much time do I have remaining?

The PRESIDING OFFICER. Ten minutes and thirty-three seconds.

Mr. EXON. Once again, the response by my friend from Kansas was quite similar to the response that he made on the last amendment. It sounded to me as though we were back in the campaign of last November where we are going to try good old Jimmy Carter once again. He is no longer President.

I am not saying that all of the difficulties that we have now are not partially the responsibility of the programs enunciated by the former President. Nor am I here to say that anyone in the Chamber can escape some responsibility for these economic difficulties we are having today.

But partisan politics, I say to my friend from Kansas once agan, despite what he proclaims, is not the reason for the Exon amendment. So far I have heard no good reason, other than support the President, for those calling for the defeat of this amendment.

Mr. President, at this time I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. EXON. Mr. President, I now yield whatever time is necessary to the Senator from Oklahoma.

Mr. BOREN. Mr. President, I thank my colleague from Nebraska.

I wish to comment again briefly, because I was listening earlier over the speaker system to the comments made by both sides.

I emphasize again that I am joining the Senator from Nebraska in this matter not because of any partisan consideration but because of sincere conviction.

I have listened to the Senator from Kansas and the Senator from Idaho both praise the President for trying to lead us in a right general direction. I join in that commendation. I think he deserves all the encouragement and support he can get in trying to bring Federal spending under control and in trying to bring about tax relief for American citizens and the reduction of the regulatory burden. It is refreshing to me to see things beginning to happen around here and beginning to happen in the right direction. I applaud him for it.

I will go even further, and this obviously is not a partisan comment, and say it is a refreshing change from the last administration, which happened to have been of my own party. I applaud that change. Thank God we have begun to move in a different direction. This country could not have stood a continuation of the kind of policies that we had in the past.

So I am not making a partisan comment. There are times that I think all of us know sometimes we are not served well by our own staffs, for example, if we make a comment with which they sincerely disagree or if they see some flaw in it and they say "Yes, you are right." A President very often finds himself in that situation. No one wants to be the bearer of the bad news, and no one wants to give him candid advice. No one wants to give the President the benefit of his or her best thinking because they do not like to bring unpleasantness or criticism of policies of any kind to the attention of the person who bears such a tremendous burden of responsibility.

But there are times and I think all of us know it that the greatest act that any friend can perform or any sincere supporter can perform is to speak the truth.

Mr. President, that is what I have been trying to do in supporting this amendment—speak the truth and give friendly advice to the man in the White House who, I think, is trying to lead this country generally in the right direction, who is extremely well intentioned and has the courage of his convictions, and I applaud him for it.

Mr. President, it is true President Reagan did not appoint Mr. Volcker. That was a responsibility of the last administration, and that was a responsibility which I think the last administration will bear with growing uneasiness as the history books are written.

I recall during the campaign and since Mr. Reagan came to the White House he has on occasion condemned the high interest rate policy. He has on occasion been quite critical of the policies that were being followed. And he even made a critical statement. Wall Street was not responding. The banks were not responding with reduction of interest rates as they should. I agree with those criticisms.

Mr. President, I am very disturbed because at the Ottawa summit the President appeared to endorse the very high interest rate policies which he has been criticizing in the past.

I only say that there are those within the administration, and apparently there are some at the Treasury Department, and we should focus on the statements recently of the Assistant Secretary of the Treasury who has been leading the President down the wrong path.

The final blow which caused me to decide to cosponsor or support this amendment was this morning, and I have been thinking about it for several days, beginning with my deliberations, as I said earlier, by thinking in negative terms toward this amendment, but after I sat through the testimony this morning of a group chaired by Senator MELCHER, of Montana, which included testimony by a member of the Board of Governors of the Federal Reserve Board, I simply could not feel that I in conscience could remain silent any longer.

It is obvious, after listening to Governor Gramley, the Federal Reserve intends to continue the intentional deliberate policy of high interest rates. It is not a matter of having interest rates track the rate of inflation. All of us know that when inflation goes up the interest rates tend to go up. We are talking about not a 1- or 2-percentage-point markup of the interest rate above the inflation rate. We are talking about 6 or 7 percentage points.

Mr. President, I hope the President of the United States will read my remarks. Nothing is going to kill supply-side economics, the very philosophy endorsed by President Reagan, any quicker than a continuation of high-interest-rate policies.

We heard about the small businessman a while ago. Talk to the small businessman. Ask him "Will you increase your investment if you get a tax cut generally?" He will say, "Yes, it will make more money available."

Ask him "Will you increase your investment if interest rates come down?" "Yes, I will," and then when you ask "Which is more important?" every one of

them will tell you that if they can get interest rates down 3, 4, 5 percentage points it will do more to stimulate investment in this country on the part of small business people, farmers, and others who do not have vast resources of capital, than anything else.

We cannot have a fiscal policy aimed at stimulating increased investment and a monetary policy deliberately crafted to make that investment so expensive that it is impossible to undertake. It is going to cause the President's program to fail if something is not done about it.

By cosponsoring this amendment, I am simply trying to say to the President, "Please, Mr. President, focus your attention on this problem before it is too late." How many savings and loans are going to have to go broke? There are 360 as of this morning on the troubled list that face insolvency within the next 12 months.

The head of the insurance fund tells us it may take a $45 billion appropriation by the Congress to the fund to protect the depositors and keep them secure because there is only $5 billion in the insurance fund.

How many farmers are going to have to go bankrupt? How much is the value of agricultural land having to go down? How long are we going to have to wait with only 4 percent of the families in this country now qualified to buy a new house? Sixteen-percent interest rates have forced the average payment per month to go above the $1,000 figure. How long are we going to wait?

The Senator from Nebraska has carefully crafted his amendment. It is not the kind of trigger that says "No tax cut in the third year if interest rate targets are not met." I could not vote for that kind of an amendment because, in my opinion, it would be too extreme.

He has crafted it to say only as individual tax cuts are concerned, not business but individual tax cuts, they will be scaled back, not done away with, but simply scaled back to the degree to which we are not able to meet the interest rate target.

If we do not have a policy to bring down the interest rates, Mr. President, it will not do anybody any good to have additional funds for a tax cut because countless thousands are going to be already bankrupt, and millions more are already going to be unemployed.

INSTALLING A SAFETY VALVE ON KEMP-ROTH

Mr. ROBERT C. BYRD. Mr. President, President Reagan is urging the Congress to enact the larget multiyear tax cut in the Nation's history by August 1. The centerpiece and the costliest part of the program is the 5–10–10 sequence of across-the-board cuts in individual tax rates, 5 percent in 1981, 10 percent in 1982, and another 10 percent in 1983. In 1984, the administration projects that this modified Kemp-Roth proposal would cost the Treasury more than $119 billion.

The Reagan administration predicts that this tax cut and its other economic proposals will result in 1982 in a real rate of economic growth of 4.2 percent, will reduce Treasury bill rates to below 8.9 percent, reduce inflation to the 8.3-percent range, and by 1983 bring about a balanced budget.

One does not have to be a professional economist or a Wall Street money manager to be somewhat skeptical of these claims. If recent economic experience has taught us anything, it should have impressed upon us the unpredictability and volatility of economic variables and the unreliability of economic forecasts. A crisis in the Middle East could send the price of oil, which is now thankfully declining, skyrocketing and reignite inflationary expectations. Or consumers and investors could behave in ways not fully modeled in the supply side economists' computers. It is already glaringly obvious to everyone, including the Secretary of the Treasury, that the Administration's 4-month old forecast that the rate of interest paid in U.S. Treasury bills would average 11.1 percent in 1981 was wildly optimistic. No amount of lambasting of Wall Street or bullishness by Merrill Lynch on a new era for the bond market can alter that fact.

In such a situation it seems reckless to lock the country into a multiyear series of tax cuts regardless of the future state of the economy or the progress made in restoring noninflationary economic growth and reducing interest rates. But unfortunately, Kemp-Roth is blind to future economic reality.

The administration itself saved $7 billion in fiscal year 1981 and $17 billion in fiscal year 1982 by scaling back the 10–10–10 Kemp-Roth proposal it was insisting upon in March of this year to the 5–10–10 proposal it now insists Congress enact by August 1, and by transforming its March 10–5–3 depreciation proposal for business into its June 15–10–5–3 plan. If the administration can reassess its own tax program in 3 short months, Congress is surely not asking too much to assess the situation 2 years hence.

It has been argued that individuals and businesses need the certainty that a programed 3-year tax cut offers. But no prudent business would declare a dividend 3 years in advance without knowing what its profits will be. No prudent household would spend all of its income 3 years in advance. No prudent banker would make a loan without being able to project with some certainty the borrower's financial condition several years down the road.

Most Democrats and responsible Republicans are, however, not far apart on the urgent need to increase incentives to work, save, and invest. We have no quarrel with the necessity to make corrections for inflation's push of individuals into ever high marginal tax brackets or to provide a stable and certain economic environment which will encourage productive investments in modern plant and equipment.

Rather than switching the economy over onto the "automatic pilot" of a programed series of tax cuts, however, I would propose that the Nation earn the 10-percent tax cut proposed for 1983 by meeting the ambitious economic goals laid down by the President in his March budget submission to the Congress. This should not upset planning or budgeting or create uncertainty.

The administration received no mandate from the American people in 1980 to play Russian roulette with this economy. It is my hope that partisan divisions can be laid aside on this important issue, and that a bipartisan group of Senators will support an effort to build a safety valve into the third year of the Kemp-Roth tax plan.

Mr. EXON. Mr. President, I will close by making a very brief statement. Despite what has been said here, and as emphasized by the Senator from Oklahoma, who has just finished speaking, I think there is no clearer signal that we could send to the money markets than to pass this amendment. I think the passage of this amendment will help assure the President's programs for economic recovery rather than try to derail him, as has been inappropriately suggested here this afternoon.

Passage of this amendment would indeed send a signal to Wall Street that we are sincere, that we want to do something about it, and will even hold back partially on the tax cut if necessary to address high interest rates, and what could be an ever-increasing deficit at that time.

Mr. President, do I understand all the time has been yielded back on the other side on this amendment?

The PRESIDING OFFICER. The Senator is correct. The Senator has 22 seconds left.

Mr. EXON. Having no further requests for time, I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator yields back his 17 seconds.

The yeas and nays have been ordered. The question is on agreeing to the amendment of the Senator from Nebraska. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Idaho (Mr. McCLURE), and the Senator from New Mexico (Mr. SCHMITT), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Mississippi (Mr. STENNIS), are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON), would vote "yea."

The PRESIDING OFFICER (Mr. SYMMS). Are there any other Senators in the Chamber wishing to vote? Are there any Senators wishing to change their vote?

The result was announced—yeas 37, nays 58, as follows:

[Rollcall Vote No. 223 Leg.]

YEAS—37

Baucus	Exon	Mitchell
Biden	Ford	Moynihan
Boren	Glenn	Nunn
Bradley	Hart	Pell
Bumpers	Heflin	Pressler
Burdick	Hollings	Pryor
Byrd, Robert C.	Huddleston	Randolph
Chiles	Inouye	Riegle
Cranston	Jackson	Sarbanes
DeConcini	Kennedy	Tsongas
Dixon	Leahy	Williams
Dodd	Levin	
Eagleton	Matsunaga	

NAYS—58

Abdnor	Gorton	Nickles
Andrews	Grassley	Packwood
Armstrong	Hatch	Percy
Baker	Hatfield	Proxmire
Bentsen	Hawkins	Quayle
Boschwitz	Hayakawa	Roth
Byrd, Harry F., Jr.	Heinz	Rudman
	Helms	Sasser
Chafee	Humphrey	Simpson
Cochran	Jepsen	Specter
Cohen	Johnston	Stafford
D'Amato	Kassebaum	Stevens
Danforth	Kasten	Symms
Denton	Laxalt	Thurmond
Dole	Long	Tower
Domenici	Lugar	Wallop
Durenberger	Mathias	Warner
East	Mattingly	Weicker
Garn	Melcher	Zorinsky
Goldwater	Murkowski	

NOT VOTING—5

Cannon	Metzenbaum	Stennis
McClure	Schmitt	

So Mr. EXON's amendment (No. 522) was rejected.

Mr. DOLE. I move to reconsider the vote by which the amendment was rejected.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I am advised that two Glenn amendments which were at the end of the list have been discussed and negotiations have been undertaken which may lead to a substantial reduction in the time required to consider those two. The distinguished manager of the bill and I understand the distinguished ranking manager have suggested that we change the sequence and take up the two Glenn amendments at this time.

If that is agreeable to the minority leader and managers on both sides, I am prepared to make that request at this moment.

Mr. MELCHER. Will the majority leader yield?

Mr. BAKER. I will yield first to the distinguished Senator from Massachusetts.

Mr. KENNEDY. What was the request?

Mr. BAKER. My understanding is that the two Glenn amendments have been worked out and will not require much time. I am about to make the request to sequence the two Glenn amendments in at this point which will put them just ahead of the Kennedy amendment, which will follow thereafter.

Mr. KENNEDY. I have no objection if it has been worked out in terms of a time understanding. We are in conference, as other Members are. The conference started at 2 o'clock. We are trying to work out things in the Budget Committee. They are waiting there now. The majority leader has overall responsibility for all these matters, of course.

Mr. BAKER. Might I inquire of the Senator from Ohio how much time he expects for the two amendments?

Mr. GLENN. I think it will probably be 15 or 20 minutes for both of them. It had been my impression that there were no other amendments immediately available to be called up. That is the reason I suggested to take mine out of order. I am quite happy to await my turn. I did not mean to impinge on anybody else. I did not understand the Senator from Massachusetts was ready.

Mr. DOLE. Will the Senator yield?

Mr. BAKER. I yield.

Mr. DOLE. If it is all right with the Senator from Massachusetts and the Senator from New Hampshire, if we have 20 minutes divided we will not be talking any, so that will be 10 minutes, or maybe less. There had been an agreement on these amendments. I do not see why it would take more than 2 minutes. I would hope we can take them now. It would save us a couple of hours down the line.

Mr. BAKER. Mr. President, I yield to the Senator from Montana.

Mr. MELCHER. I thank the majority leader for yielding. On Tuesday past we delayed taking up an amendment on interest rates to permit a discussion recommended by the distinguished chairman of the Finance Committee with Treasury. We have completed that. It was our thought that whenever any list was arrived at we would be somewhere on that list. I would like to be added to the tail end of the existing list so I do not lose any more time, if agreeable.

Mr. BAKER. I ask unanimous consent that the amendment to be offered by the distinguished Senator be added following on after the Heinz amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Now, Mr. President, I ask unanimous consent that the two Glenn amendments that have been sequenced be taken up at this time and that there be 20 minutes equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 301

(Purpose: To extend the research credit to materials and supplies and leased computer time)

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN), for himself and Mr. DANFORTH, proposes an unprinted amendment numbered 301.

Mr. GLENN. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 125, strike out lines 19 through 22, and insert in lieu thereof the following:

"(A) IN GENERAL.—The term 'research and experimental expenditures' means—

"(i) wages paid or incurred for services performed in conducting research and experimentation,

"(ii) any amount paid or incurred for supplies used in conducting research and experimentation, and

"(iii) under regulations prescribed by the Secretary, any amount paid or incurred to another person for the right to use computers in conducting research and experimentation."

On page 125, line 25, strike out "wages" and insert in lieu thereof "research and experimental expenditures".

On page 126, line 3, strike out "wages" and insert in lieu thereof "expenditures".

On page 140, line 2, strike out "wages" and insert in lieu thereof "amounts".

On page 123, line 9, strike out "wage".

On page 123, line 14, strike out "wage".

On page 123, line 19, strike out "wage".

On page 123, line 23, strike out "wage".

One page 124, line 2, strike out "wage".

On page 124, line 4, strike out "wage".

On page 125, line 13, strike out "wage".

On page 125, line 17, strike out "wage".

On page 125, line 20, strike out "wage".

On page 127, line 23, strike out "wage".

On page 128, line 6, strike out "wage".

On page 128, line 11, strike out "wage".

On page 128, line 19, strike out "wage".

On page 129, line 17, strike out "wage".

On page 130, line 10, strike out "wage".

On page 131, line 2, strike out "wage".

On page 131, line 15, strike out "wage".

On page 139, in the matter between lines 23 and 24, strike out "wage".

On page 140, line 19, strike out "wage".

On page 140, line 15, strike out "wage".

On page 140, line 21, strike out "wage".

On page 127, between lines 3 and 4, insert the following:

"(E) SUPPLIES.—The term 'supplies' means any tangible property other than—

"(i) land or improvements to land, and

"(ii) property of a character subject to the allowance for depreciation."

On page 125, between lines 14 and 15 insert the following:

"(4) MINIMUM BASE PERIOD RESEARCH EXPENDITURES.—In no event shall the average research and experimental expenditures taken into account for purposes of subparagraph (B) of paragraph (1) be less than 50 percent of the research and experimental expenditures taken into account for purposes of subparagraph (A) of paragraph (1)."

Mr. GLENN. Mr. President. my colleague, Senator DANFORTH, and I worked on this in committee. I am happy to submit his name along with mine as sponsors of this amendment. I would add also that there were several people who asked to be cosponsors of the amendment that I have not yet added on because there were negotiations conducted which changed some of the nature of this amendment. I would say to them or their staffs who may be listening that we would welcome their cosponsorship on this but they will have to put those in at the desk since we have not been able to check with everybody who had contacted me earlier.

Mr. President, last Wednesday, the distinguished chairman of the Committee on Finance led off his remarks with the observation that the U.S. share of the world GNP had decreased from 31.4 percent in 1953 to 22.8 percent in 1980—a decline of more than 27 percent. During this same period, Japan's contribution to the world GNP rose from 3.9 to 10.1 percent—an increase of about 259 percent. The chairman used these and other comparative statistics to make a strong case, and one that I agree with, that unless this trend is reversed, the United States will continue to be less of a factor in world markets. Declining economic power could result in declining political influence abroad, as well.

Studies funded by the National Science Foundation and others have produced persuasive empirical evidence that research and development and technological innovation have played a sig-

nificant role in our Nation's economic progress. The economist Edward Denison, in his extensive studies of the causes of economic growth and productivity gains in the United States during this century, finds that the factor which he calls "advances in knowledge" has been the largest source of growth. For the period 1929–69, Denison estimates that about one-third of the Nation's growth in output was attributable to advances in knowledge. Between 1949 and 1969, he estimates that this factor accounted for some 48 percent of our growth—making it even a greater contributor than inputs of capital for that time period. While Denison and others readily admit to the limitations of their studies, their results indicate clearly that the contribution of R. & D. to economic growth and productivity is positive, significant, and large.

It has long been my concern that our Nation has been deficient in its support of R. & D. As many of my colleagues are aware, I have been particularly appalled by the massive cuts this administration has made to the energy R. & D. budget, as well as to the other areas of R. & D.

To illustrate what I consider to be disturbing trends in our national commitment to R. & D., let me cite some statistics for the 12-year period, 1968 to 1980:

STATISTICS

1. R. & D. as a fraction of the Federal budget decreased 36 percent.
2. Basic research as a fraction of the Federal budget decreased 27 percent.
3. R. & D. as a fraction of GNP decreased 19 percent.
4. Basic research as a fraction of GNP decreased 16 percent.
5. Scientists and engineers engaged in R. & D. as a fraction of the labor force is down 9 percent.
6. Investment by industry in basic research as a fraction of net sales is down 32 percent—and this during a period when much of the industrial research has been directed toward meeting regulatory and environmental requirements.

During this same period, however, other nations were increasing their support for R. & D.:

First. While U.S. R. & D. as a fraction of GNP decreased by 19 percent between 1968 and 1980, it increased by 14 percent in the Soviet Union, by 16 percent in West Germany, and by 19 percent in Japan. These figures take on added economic significance when it is recognized that roughly 40 percent of all U.S. R. & D. is defense related, while only about 2 percent of Japan's and only about 8 percent of West Germany's is spent in the same fashion.

Second. Although U.S. scientists and engineers engaged in R. & D. (as a fraction of the labor force) declined by 9 percent from 1968 to 1980, there was an increase of 62 percent in the Soviet Union, an increase of 75 percent in West Germany, and an increase of about 70 percent in Japan.

What has been the result of this failure to meet the R. & D. challenge? It has been a lag in our Nation's productivity gains relative to other nations. Between 1968 and 1980, productivity, or output per worker per hour, increased by about 60 percent in West Germany, by over 70 percent in Japan, but by only 18 percent in the United States.

There is strong evidence that U.S. R. & D. spending improves our competitive position in world markets. Although the U.S. merchandise trade balance has had large deficits, some $30 billion in 1979, for example, R. & D.-intensive manufactured goods have a substantial trade surplus. The United States has had a trade surplus in R. & D.-intensive manufactured goods since 1960, and this surplus increased sharply between 1964 and 1975—from nearly $8 billion to over $29.3 billion. I might add that in recent years, nearly 90 percent of the trade surplus in R. & D.-intensive products has been generated by only three product groups: Nonelectrical machinery, including computers, chemicals, and aircraft.

I could go on and on citing statistics but I think that it is clear that in today's world, America's economic strength largely depends on the strength of our efforts in R. & D. Failure to meet the R. & D. challenge is the surest way to forfeit our claim to word leadership.

In view of declining direct Federal support for R. & D., I applaud the Finance Committee's recognition of the need for additional incentives to stimulate private sector R. & D. I believe that the proposed 25-percent credit for incremental research and experimentation wage expenditures is a welcome first step. However, I do not believe that it goes far enough. Consequently, I am offering an amendment to provide further incentives.

While the Finance Committee's proposal helps to encourage future investment in R. & D. by providing incentives only for increases in research and experimentation wage expenditures, it does little for companies that invest as much in materials and supplies as in the talent to use them. It favors companies that can increase their research efforts by the mere addition of staff but it ignores such items as laboratory supplies and leased computer time.

Mr. President, I want to acknowledge the work that has been done on this proposal by the Senator from Missouri (Mr. DANFORTH), who is a cosponsor of my amendment. Indeed, both of us would prefer to go further than we are at present. But we are pleased to be able to expand the base for research and development credits beyond wage expenditures and thus move an important step toward a sounder tax policy with regard to R. & D.

Our amendment will qualify expenditures for material, supplies, and computer time for the tax credit, and is drafted in a manner that will guard against additional revenue losses. Incremental increases of up to 25 percent in qualified research and development expenditures above a firm's 3-year base level will be eligible for the credit, subject to a limitation to guard against unacceptable revenue losses. The credit would apply to qualifying expenditures made after June 30, 1981.

This amendment, then, comports with the Finance Committee's bottom line on revenue losses, yet expands the concept of research and development credits to take in significant cost factors beyond wage expenditures. In view of the declining direct Federal support for R. & D., I believe that we must do all we can to insure that American industry can meet the challenges of international competition. I would ask my colleagues to join with me in support of this amendment.

Mr. GLENN. I yield for comments to the floor managers of the bill and am prepared to have a voice vote on this matter.

Mr. DANFORTH. Mr. President, this amendment has been cleared with the Treasury. It has also been cleared with both the majority and minority managers of the bill. It is a very valuable expansion of the provision in the bill; yet it has little or no revenue effect. Therefore, it is acceptable to the floor manager.

Mr. GLENN. Mr. President, if there are no other comments, I am glad to yield back the remainder of my time and call for a vote.

Mr. DANFORTH. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment of the Senator from Ohio.

The amendment (UP No. 301) was agreed to.

Mr. DANFORTH. I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 302

(Purpose: To suspend for a one-year period regulations relating to allocation under section 861 of research and experimental expenditures)

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) for himself, Mr. DANFORTH, and Mr. WALLOP, proposes an unprinted amendment numbered 302:

On page 143, between lines 11 and 12, insert the following:

"SEC. 223. SUSPENSION OF REGULATIONS RELATING TO ALLOCATION UNDER SECTION 861 OF RESEARCH AND EXPERIMENTAL EXPENDITURES

"(a) 1-YEAR SUSPENSION.—In the case of the taxpayer's first taxable year beginning within 1 year after the date of the enactment of this Act, all research and experimental expenditures (within the meaning of section 174 of the Internal Revenue Code of 1954) which are paid or incurred in such year for research activities conducted in the United States shall be allocated or apportioned to sources within the United States.

"(b) STUDY.—

"(1) IN GENERAL.—The Secretary of the Treasury shall conduct a study with respect to the impact which section 1.861–8 of the Internal Revenue Service Regulations would have (A) on research and experimental activities conducted in the United States and (B) on the availability of the foreign tax credit.

"(2) REPORT.—Not later than the date 6

months after the date of the enactment of this Act, the Secretary of the Treasury shall submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a report on the study conducted under paragraph (1) (together with such recommendations as he may deem advisable)."

Mr. GLENN. Mr. President, this amendment would suspend the onerous effect of section 861.8 of the Internal Revenue Code—a regulation whose impact has been to reduce the incentive for companies with foreign-source income to do research and development in the United States. Furthermore, the rule also serves as a disincentive for high-technology companies currently without foreign-source income to enter the export market. It is a rule that needs serious study—study that would be insured by acceptance of this amendment.

Department of Treasury regulations which currently implement section 861.8 of the Internal Revenue Code require that R. & D. expenditures be apportioned to both foreign source and domestic income regardless of where the expenditures were made. While the regulations were an attempt to recognize the fact that innovations in the United States often result in revenue from foreign sources, the effect of these regulations are:

To apportion expenses to foreign-source income, even when that income is incidental to the innovation;

To result in double taxation, because foreign governments do not allow this allocation to be taken into account when figuring taxes due to them;

To encourage the location of R. & D. facilities abroad instead of at home for those companies which already have foreign-source income so as to escape the effects of the regulations, thereby diminishing both the amount of R. & D. conducted in the United States and, in the long term, the tax revenue generated by it; and

To discourage the entry into the export market of those high-technology companies without current foreign-source income, thereby reducing potential profitability, long-term R. & D. expenditures, and the tax revenues generated by it.

To make sure that the problem with the current regulations is understood. I shall run through them one more time. When a firm has foreign-source income, only a portion of its domestic R. & D. expenditures can be taken as a deduction on its U.S. tax return. The remaining R. & D. expenses cannot be used to offset foreign taxes, since foreign tax laws will not allow the deductions for R. & D. expenditures made in the United States. Finally, U.S. tax law permits no credit for foreign taxes paid in excess of the applicable tax rate.

This makes the effective foreign tax rate higher because a portion of domestic R. & D. expenditures is deducted from foreign-source income before the foreign tax credit is computed. As a matter of fact, because of the arbitrariness of the rule, there can arise the ludicrous situation where a company may end up paying in excess of 100 percent of its foreign-source income. This would correct that.

The consequences of the regulations have been twofold. First, those companies which already have foreign-source income have a strong incentive to move their R. & D. to countries such as Canada or Switzerland, for example, where they can receive a much bigger tax benefit. This then reduces the amount of R. & D. performed in the United States, and, in the long term, the tax revenue generated from its conduct. Second, high-technology companies which currently have no foreign-source income are discouraged from entering the export trade, particularly because the marginal tax rates on foreign income could exceed 100 percent. In the long term, this will reduce the potential profitability of such firms, lower the amount of R. & D. that otherwise would have been performed, and reduce tax revenues.

The amendment I am offering, on which I wish to recognize the efforts of my colleagues from Wyoming (Mr. WALLOP) and New York (Mr. D'AMATO), addresses these problems by simply excluding domestically performed R. & D. from the application of section 861.8 for 1 year. All R. & D. which is conducted in the United States would be deducted solely from U.S.-source income during this period. At the same time, Treasury would be directed to make a thorough study of this matter so that a rational proposal could be made for Congress to consider.

Mr. President, we clearly have enough economic problems without going out of our way to produce new ones. The current regulations implementing section 861.8 are the economic equivalent of shooting ourselves in the foot. I ask the Senate's support in helping to correct a condition which is at variance with the desired effect of encouraging U.S. R. & D. activity in order to help improve the competitiveness of the U.S. economy—both domestically and internationally.

Mr. President, in addition, I am grateful for the assistance of the distinguished floor manager of the bill, and this amendment is submitted in his behalf, also. The Senator from Missouri (Mr. DANFORTH) is a cosponsor of this amendment with me. He has done a great deal of work in the committee, which I think the Senate should recognize. I look forward to continuing with him in this work in the future.

We can spend hours speaking about this problem, Mr. President, but it is moving ahead with innovativeness, inventiveness, inquiry into the unknown which will give us a better competitive position in the future.

Mr. President, I am prepared to yield back my time and go to a vote following whatever remarks the distinguished floor manager, the Senator from Missouri (Mr. DANFORTH), wishes to make.

Mr. DANFORTH. Mr. President, I appreciate the comments of the Senator from Ohio and his efforts on behalf of this amendment. This amendment also has been cleared with the Treasury Department and with the majority and minority managers of the bill. It has a duration of 1 year. We are pleased to accept it.

I yield back my time, Mr. President.

● Mr. BRADLEY. Mr. President, there are alarming signs that innovation, the mainstay of technological advancement and economic productivity, is declining in the United States. In the last 15 years, R. & D. spending, as a percentage of GNP, has dropped by 27 percent. Furthermore, the decline in R. & D. spending has been accompanied by a drop in productivity. In addition, there has been a serious decline in America's export competitiveness. During the period from 1960–77 the U.S. share of world exports declined from 18 to 11.8 percent. In that same period, Japan's share increased from 4 to 8 percent, while West Germany's share grew from 10.3 to 11.5 percent.

Historically, the U.S. comparative advantage in world trade lay in its abundance of technological skills, nourished by a generous proportion of GNP devoted to R. & D. Our comparative advantage is now being eroded by insufficient R. & D. This poses a long-term threat to our preeminent position in world markets and to our domestic economic well-being.

By contrast, our major competitors actively encourage R. & D. For example, Japan gives a 20-percent tax credit for increases in R. & D. expenditures. West Germany's investment incentives include a 7.5-percent tax-free cash grant for investment facilities and accelerated depreciation allowances for R. & D. plants and equipment. While the R. & D. credit in the Senate Finance Committee bill makes some progress toward improving the investment climate for R. & D., in my judgment it does not go far enough. This amendment is therefore an important supplement to the Finance Committee's provisions.

Section 861 requires corporations to allocate portions of their domestic R. & D. expenditures to their foreign source income. This apportionment of expenses can substantially reduce a U.S. corporation's foreign tax credit limitation, thereby resulting in a higher U.S. tax liability. In 1977, the IRS issued regulation section 1.861–8. The regulation was highly controversial at the time and has continued to be a source of controversy between export-oriented corporations and the Treasury. The reason is that it denies U.S. corporations a full deduction for domestic R. & D. expenses against domestic income and assigns some portion of those expenses to foreign source income, where it is often not allowed as a deduction by foreign tax authorities. The effect of this apportionment can be to deny any tax deduction for at least a part of the taxpayer's R. & D. expenses. Corporations engaging extensively in international business or in the production of technology-intensive products may therefore be subject to significantly higher overall tax on their worldwide income.

Mr. President, this result is clearly anomalous given the importance of R. & D. and export promotion to sustaining adequate rates of economic growth. Since this decade will be a critical one for the future of our international competitiveness it is imperative that we have

a national policy encouraging R. & D. and, in particular, its performance in this country rather than abroad. Section 1.861–8 thwarts this objective. Accordingly, I am pleased to cosponsor this amendment which is a step toward removing existing disincentive to U.S. R. & D.

Finally, no other countries impose this requirement on their companies. Thus, section 861 has disadvantaged U.S. firms relative to their foreign competitors. Given the alarming decline in the U.S. share of international markets, the decrease in the productivity of our industries, and the reduction in resources allocated to R. & D., it is essential that we provide generous incentives for R. & D. I look forward to working with Treasury in the coming months to work out a permanent solution to the section 861 problem.●

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment.

The amendment (UP No. 302) was agreed to.

AMENDMENT NO. 521 (AS MODIFIED)

(Purpose: To provide a credit against tax for certain home heating costs)

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KENNEDY. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) for himself, Mr. RUDMAN, and Mr. PELL, proposes an amendment numbered 521, as modified:

At the end of title I, insert the following new subtitle:

Subtitle C—Residential Heating Credit

SEC. . HOME HEATING CREDIT.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowed) is amended by inserting immediately before section 45 the following new section:

"SEC. 44H. CREDIT FOR RESIDENTIAL USERS OF ENERGY.

"(a) GENERAL RULE.—In the case of an individual, there is allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the product of—

"(1) the amount paid or incurred during such taxable year for all qualified home heating energy sources, multipled by

"(2) a per centum equal to ½ the percent change in the price index (within the meaning of section 8331(15) of title 5) for December of the calendar year preceding the calendar year in which the taxable year begins over such index for December of the second preceeding calendar year.

"(b) LIMITATIONS.—

"(1) MAXIMUM DOLLAR AMOUNT.—The amount of the credit allowed to a taxpayer under subsection (a) for any taxable year shall not exceed the excess (if any) of—

"(A) $300, over

"(B) 3 percent of so much of the adjusted gross income of the taxpayer for the taxable year as exceeds $15,000.

"(2) REDUCTION FOR GRANTS.—The amount of the credit allowed to a taxpayer under subsection (a) (after application of paragraph (1)) shall be reduced by any amount received by the taxpayer for any qualified home heating energy source under any Federal, State, or local program.

"(3) ONE INDIVIDUAL ELIGIBLE PER HOUSEHOLD.—

"(A) IN GENERAL.—In the case of any household, the credit under subsection (a) shall be allowed only to the individual residing in such household who furnishes the largest portion (whether or not more than one-half) of the cost of maintaining such household.

"(B) DETERMINATION OF AMOUNT.—In the case of an individual described in subparagraph (A), such individual shall, for purposes of determining the amount of the credit allowed under subsection (a), be treated as having paid or incurred during such taxable year for qualified home heating energy sources an amount equal to the sum of the amounts paid or incurred for such sources by all individuals residing in such household (including any amount allocable to any such individual under subsection (d)).

"(4) MARRIED INDIVIDUALS FILING SEPARATELY.—In the case of a married individual filing a separate return of tax, the provisions of subsection (b) of this section shall be applied—

"(A) by substituting '$150' for '$300', and

"(B) by substituting '$12,500' for '$25,000'.

"(5) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) for a taxable year shall not exceed the tax imposed by this chapter for such taxable year, reduced by the sum of the credits allowable under a section of this subpart having a lower number or letter designation than this section, other than the credits allowable by sections 31, 39, and 43.

"(c) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) QUALIFIED HOME HEATING ENERGY SOURCE.—The term 'qualified home heating energy source' means any energy source used for a qualified use, including wood.

"(2) QUALIFIED USE.—The term 'qualified use' means use in connection with any principal residence of the taxpayer located in the United States for purposes of heating such residence.

"(3) PRINCIPAL RESIDENCE.—The term 'principal residence' has the same meaning as in section 1034, except that—

"(A) no ownership requirement shall be imposed, and

"(B) the principal residence must be used by the taxpayer as his residence during the taxable year.

"(d) ALLOCATIONS.—

"(1) TENANTS.—

"(A) IN GENERAL.—In the case of a tenant (other than a tenant-stockholder in a cooperative housing association) residing in a dwelling unit which is heated by a qualified home heating energy source and with respect to which the amount paid for such source is not separately stated, the amount determined under subsection (a)(1) for any taxable year for any qualified home heating energy source used for a qualified use shall be equal to the product of—

"(i) the per centum determined under subsection (a)(1)(B) for the taxable year, multiplied by

"(ii) an amount equal to that portion of rent paid by the taxpayer during such taxable year as is equal to the qualified rental portion.

"(B) QUALIFIED RENTAL PORTION.—For purposes of this paragraph, the term 'qualified rental portion' means that percentage of rental amounts paid for principal residences during a calendar year which the Secretary determines, after consultation with the Secretary of Housing and Urban Development or his delegate and after taking into account regional differences in climate and heating costs, to be the average percentage of rental amounts paid in a region of the United States attributable to the payment of the costs of the qualified home heating energy source so used for a qualified use in connection with the principal residence.

"(2) CONDOMINIUMS AND COOPERATIVES.—The Secretary shall provide by regulation for the application of this section to condominium management associations (as defined in section 528(c)(1)) or members of such associations, and tenant-stockholders in cooperative housing corporations (as defined in section 216), in such a fashion that the amount allowed by subsection (a) is allowed, whether by allocation, apportionment, or otherwise, to the individuals paying, directly or indirectly, for the qualified home heating fuel so used.".

(b) CLERICAL AMENDMENTS.—

(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting immediately after the line relating to section 44E the following new item:

"Sec. 44H. Credit for residential users of energy.".

(2) Section 6096(b) (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44G" and inserting "44G, and 44H".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to taxable years beginning after December 31, 1980, and before January 1, 1984.

Mr. KENNEDY. Mr. President, this is a matter which has been considered in the Senate on at least two different occasions. It was accepted in 1977 with only 27 votes in opposition. Again, in 1979, it was accepted by the U.S. Senate. It is a home heating tax credit. It is an issue that is well understood by the Members of the Senate.

The Senator from New Hampshire (Mr. RUDMAN) and the Senator from Rhode Island (Mr. PELL), and I offer this amendment because we believe it is demanded, both out of a sense of equity and fairness and also because, without this amendment, there will be a good deal of anguish and suffering. So, Mr. President, I hope that the Senate, in its good judgment, will accept this amendment. We have strong support for it from both sides of the aisle and we believe that in a tax measure of this significance and importance, this amendment is justified.

Mr. President, if our amendment becomes law, a family would be entitled to a tax credit equal to his or her residential heating bill, multiplied by half the rate of inflation. If, for example, the residential heating bill for oil and gas or electricity is $1,000 and the inflation rate is 10 percent, he or she would be entitled to a tax credit of some $50. That may not seem a great deal to many in this body, but it is extremely important in many different parts of the country.

I would like to make two basic points about this amendment. The first is that this credit is essential to prevent a major tax increase. Second, I want to bring to the attention of my colleagues the human costs of energy prices. This amendment can significantly alleviate these costs.

Reducing taxes is the major objective of the whole tax legislation. We were reading just a few days ago in the Washington Post that OMB Director Stockman was quoted as saying that "he absolutely would not" reduce the Federal deficit by increasing taxes.

But, for the American consumer, that is exactly what has already happened. The first major economic decision of the new administration was its decision to decontrol the price of oil. It is an open secret that one of the major reasons that the price of oil was decontrolled quickly was so that it could increase the revenues from the windfall profit tax.

Oil decontrol is going to cost the American economy $52 billion in 1981. That estimate, prepared by the staff of the Joint Committee on Taxation, means that the average American family will be paying $638 more for their energy costs than they would have if we had kept oil under controls. We normally think of the windfall tax as a tax on the oil companies. Half of it is a tax on the oil companies. The other half is only collected by the oil companies. It is paid by the consumers of the United States.

Unfortunately, because oil was decontrolled, ending the half of the tax that is paid by the consumers would not lower consumer costs, it would just raise oil company profits. Thus, the only way to protect consumers is to return to them a portion of this increased tax through a tax credit.

Thus, when we decontrolled oil, we did two things:

First, we raised the profits of the oil companies; and

Second, we increased the taxes paid by the American people.

That $638 increase in the energy costs for an average family means a $319 increase in the taxes. This tax is paid as an excise tax on their energy bills. This amendment, which will provide up to $300 in a home heating tax credit for incomes up to $25,000—will, in fact, not quite offset the tax increase that American consumers are paying as a result of the decision to decontrol and impose a windfall profit tax.

Thus, tax equity demands passage of this amendment. The American people are paying higher prices. They should not have to pay higher energy taxes as well.

The second point that I should like to make today is that fairness demands passage of this amendment. Two years ago, families in Massachusetts and throughout the Northern States were paying $600 for their home heating bills. Now, 2 years later, they are paying over $1,200. The price of home heating oil has gone from 50 cents to well over $1.30 a gallon. That is a 100-percent increase in the cost of heating homes in less than 3 years.

For millions of Americans, the energy crisis is not a remote discussion about economic policy. It is a clear and present danger to their pocketbooks. While the Government analyzes and procrastinates, the people pay and sacrifice. To an elderly person, the energy crisis is as immediate as the decision to give up the telephone, the lifeline to the outside world, in order to pay for fuel. To a worker commuting to a job, the crisis is as immediate as the tank of gas that can no longer be paid for with a $20 bill. And to a family in the frost belt, it is as immediate as the room or the entire upstairs floor closed off in the home in a desperate effort to balance the family budget.

For the poor, the burden has been especially heavy. Our two primary heating fuels are oil and natural gas. Over the past 5 years, the price of these two necessities of life has risen three times faster than the overall inflation rate.

For the experts who make a comfortable living off of energy in public or private life, these rising prices are a phenomenon of macroeconomics, whose bite can be reduced by the timely application of theories of income redistribution, but for the vast majority of families, the theories do not work and the bite is getting more painful every winter.

And so far, the only redistribution that the recent massive energy price increases have produced is one way, and that is, I believe, a wrong-way redistribution: From the pockets of consumers to the treasuries of the oil companies and the Federal Treasury.

The result is that Americans are working harder and earning fewer dollars. Their lot is becoming a lesser standard of life in a lesser land; in fact, inflation, largely caused by energy, has wiped out all the hard won gains in income of American workers in the past two decades.

Last summer, I held a hearing in which I asked to come to Washington citizens from four States to talk about how rising energy costs were affecting their lives. One of those who testified was Mrs. Evelyn Bennett.

She is a widowed pensioner from Lexington, Minn. She is living in a small trailer on $249 a month. Because she has her own trailer, she is able to take care of two of her nephews. Otherwise they would have to be put up for adoption. Mrs. Bennett's energy bills have gone so high that there is a real danger that she is going to lose her trailer and the two children she is taking care of.

In that hearing, I asked her:

What do you do when energy bills are going up?

Mrs. Bennett replied:

If the kids say "I am cold," I'll say wrap up in a blanket or move around and keep the circulation going. We can't turn up the heat. We can't watch the TV at night because our electric bills can't go up.

She concluded with this comment:

My concern is about what I have to pay for gas and light. I am not going to be able to keep my home so I can keep my kids.

Another of those who testified was Mr. Jesse Fuller—a resident of Essex, Mass. Mr. Fuller is now 80 years old. He worked for the General Electric Co. in Lynn, Mass., for over 20 years. Mr. Fuller, who has had a serious back problem, had to build a makeshift wood stove and now goes down to the town dump to cut wood just so he can make ends meet.

Mr. Fuller's energy problem was not a theoretical macroeconomic problem, it was a question about whether he could simply make ends meet; whether he would have to sell his house and move into an apartment. Let me quote what Mr. Fuller said:

Yes, I am worried about those high energy costs, because if you ever took me out of my house and my little backyard garden, that would be the end of life for me.

This is what higher energy costs mean. They may be good for some in this country—but for many in this country, they are the difference between a decent life and a life that is barely worth living.

So, for economic reasons—because the decontrol program will cause a significant additional tax increase for the American people, particularly in areas where there is significant use of home heating oil, and because of the equity issue, I believe that this amendment, which was tried and tested and reviewed by the Senate on two occasions, and accepted, should be accepted by the Senate today.

Mr. President, I ask unanimous consent that the names of the Senator from New York (Mr. MOYNIHAN), the Senator from Maine (Mr. MITCHELL), and the Senator from Connecticut (Mr. DODD), be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. I yield such time as he requires to the Senator from New Hampshire.

Mr. RUDMAN. Mr. President, I thank the Senator from Massachusetts, and I thank the chairman of the Senate Finance Committee for working hard to try to reach an accommodation on this important amendment.

My regret is that the administration fails to see the wisdom of what this does for a significant part of the country.

Before Senators vote on this measure, I hope they will listen to a few facts.

New England derives 80 percent of its energy from petroleum, as compared to a national average of 47 percent. Seventy-nine percent of the oil we use in New England is imported. The cost of energy in New England is 40 percent higher than the national cost. Of the oil we use in New England, more than 4 billion gallons a year is used for home heating.

In the period 1971 through 1980, home heating costs increased from 19 cents a gallon to $1.26 a gallon. One dollar and twenty-six cents may not seem like very much to some people in this Chamber. We deal in billions every day. Let me put it in percentage terms. The increase in the price of home heating oil for the past 10-year period is in excess of 550 percent. For the same 10-year period, the CPI for all items rose 77 percent.

The increase in home heating oil prices is more than seven times that of the national inflation rate.

I believe that merits special consideration for those who live in the colder regions of this Nation.

To put it in real terms, in 1970, heating costs consumed a negligible part of the incomes of most families. Three percent might have been considered high at that time. Today, there are families spending from 20 percent to 30 percent of their income to heat their homes and keep their families warm.

The fact is that many families cannot carry the burden, and the people this amendment is aimed at are the people who need help from the Senate.

This amendment is not open-ended. It does not seek to roll back energy costs. It does not favor the wealthy. This

amendment favors a limited credit for people who need help.

Put in the most simple and philosophical terms, this amendment offers a simple, 3-year program to ease the unfair burden borne by a significant segment of our country—not just New England, but people in the cold regions of America.

When the windfall profit tax was passed by the Senate several years ago, it was sold to the American people on the basis that a large part of it would be used to help those who suffer the most. There is no evidence that the billions of dollars that have come into the National Treasury from that tax have been used for that purpose.

I simply ask my colleagues to consider that we have had a 550-percent increase in energy costs on people who just cannot afford to keep warm. In northern New Hampshire, there are people who make choices every month, between December and March, between heating and eating, and I do not believe that is what the Senate wants to continue.

I yield the remainder of my time to the Senator from Maine.

Mr. COHEN. I thank the Senator for yielding.

Mr. President, I wish to lend my support to the strong statement of the Senator from New Hampshire.

We have three basic items here. We have a region, especially our region, where the temperature is colder and the cost is higher for heating oil; but one other important point is that incomes are lower. I happen to represent a State which is perhaps one of the poorest in the Union by way of per capita income and has to suffer through long, cold winters. People are spending sometimes more than 30 percent of their budgets for heating oil.

It is ironic that this body has been debating for the past week a proposal to index our tax structure, for example, in order to protect taxpayers against inflation, which is eroding their purchasing power. We have given serious consideration to phasing out the windfall profit tax in order to give oil companies an incentive to produce more energy. I might add that the record to date has not been terribly encouraging, with 70 percent or 80 percent of those profits going into additional assets and diversification.

We are saying that we should be able to provide a measure of equity for people who have to live in the cold regions of our country and pay the highest costs for energy.

I lend my support to the Senator from New Hampshire and the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Three minutes and thirty-five seconds.

Mr. KENNEDY. I yield to the Senator from Rhode Island.

Mr. PELL. Mr. President, I am pleased to support and cosponsor the amendment offered by the Senators from Massachusetts and New Hampshire to assist low- and middle-income families affected by the skyrocketing costs of heating their homes.

The amendment offered by Senator KENNEDY is similar to S. 329, legislation I introduced in January which would provide an income tax credit through 1983 of up to $300 to help ease the burden to consumers of the extraordinary costs of residential heating.

Mr. President, the amendment proposed by Senator KENNEDY attempts to correct an imbalance that has existed for almost a decade with respect to the cost of residential heating for New England and many other States along the northern tier region. As my colleagues know, the cost of residential heating in New England and other Northern States has more than tripled since the 1973 oil embargo. In this regard, I ask unanimous consent that a recent report by the Northeast-Midwest Coalition, which shows the disparity in residential energy costs between regions, be inserted in the CONGRESSIONAL RECORD at the conclusion of my remarks.

THE PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. PELL. Mr. President, in New England and my own State of Rhode Island, where consumers rely on home heating oil for 75 percent of their residential heating requirements, energy costs have made the strain on family budgets acute. Furthermore, the sudden complete decontrol order by the President last January, 9 months ahead of schedule, further strained the ability of families in the colder States to pay their heating bills.

In Rhode Island, for example, a typical family that paid $600 to heat its home 2 years ago, now faces a cost of nearly $1,400. This is a burden that is causing real hardship to many low- and moderate-income families.

Similar dramatic increases in residential heating costs have also affected the bills of consumers in other regions of the country. According to the data available from the Bureau of Labor Statistics, household fuels costs for the Nation as a whole rose by 16.8 percent from a year ago. For those residential users of natural gas, on a nationwide basis, the price rose 15.2 percent; for electricity, 16.8 percent; for home heating oil, 18.6 percent; and for other household fuels (coal and bottled gas) 19.7 percent.

Energy prices, Mr. President, can only be expected to show further increases as the current oil glut disappears and the demand for oil among the industrialized nations increases again.

Mr. President, there is an urgent need for residential energy relief for consumers and families in many parts of this country. That relief is essential and needed as soon as possible.

This tax assistance is justified because to a large extent the sharp increase in home heating costs is the result of national energy policy, enacted by the Federal Government, which permits prices of oil and gas to rise rapidly to levels set by the OPEC nations. This abrupt change in national policy has provided no reasonable time for homeowners to adjust and adapt to the higher costs. The Federal Government has a responsibility to provide some relief during a period of transition while homeowners change heating systems, change to new fuels, and make their homes more energy efficient.

Indeed, the Federal Government has recognized that responsibility by providing home heating assistance grants to the poor who are simply unable to heat their residences at the higher prices. This proposal would extend similar assistance to low- and moderate-income families who do not qualify for the current grant program.

Mr. President, the Federal Government should not become a permanent subsidizer of home heating bills. But this Nation is undergoing an accelerated, revolutionary change in the production, use and pricing of all forms of energy. For many families, these changes are causing more than discomfort; they are causing real hardship. I believe the Federal Government has a real responsibility to help in this transition by returning to the consumers some of the billions of dollars in windfall profits being taxed away from the oil companies.

I hope my colleagues will support this effort to protect families against the economic effect of our colder than normal weather conditions this past winter as well as the extraordinary increase for all forms of residential fuel during the past year.

EXHIBIT 1

NORTHEAST-MIDWEST CONGRESSIONAL COALITION: STATE HOUSEHOLD ENERGY COSTS—APRIL 1981

EXPLANATION OF RESIDENTIAL ENERGY EXPENDITURE DATA

Tables

The State Residential Energy Expenditures Tables give more detailed data on a state-by-state basis for residential energy costs. (Energy costs cover home heating and cooling costs as well as electricity bills. Gasoline and other transportation related energy costs are not included.) All data presented in these tables was derived from the Energy Information Administration's data with the exception that the number of households per state was taken from the Bureau of Census statistics.

The column "Dollars per Billion BTUs" reflects the average state price per billion BTUs consumed. The price index column next to it was calculated by dividing the state price per billion BTUs by the national average price per billion BTUs in order to compare a state's price relative to the national average. For example, in 1974 Connecticut's price for energy was 41 percentage points above the national average. In 1978 it fell to 25 percentage points above the average.

The column "Billion BTUs per household" reflects the average consumption level by household. Even a .01 reduction in average consumption represents a significant savings in energy bills. Many states, such as Massachusetts, Vermont, New York, Iowa, and Michigan have reduced consumption of traditional fuels significantly, resulting in lower relative energy bills.

The column "Total Expenditure per Household" gives the average state household energy cost. The expenditure index was calculated by dividing the state's average energy bill by the national average.

The column "Total State Expenditures in Millions" gives the total amount spent on residential energy by state in millions of dollars.

The average residential energy costs by region for 1970 and 1978 are listed at the bottom of each region's state figures. The 1980 figure reflects the increase in costs if 1980 prices were paid for the same amount of energy consumed in 1978.

STATE RESIDENTIAL ENERGY EXPENDITURES

	Dollars per billion Btu	Price index	Billion Btu per household	Total expenditure per household	Expenditure index	Total State expenditures (millions)

[1] 1980 figures derived by multiplying 1978 consumption figures by estimated 1980 prices.

Mr. DANFORTH. Mr. President, several things should be said about this amendment.

The first is that, of course, there is a cost to it. The cost in 1982 is estimated at $588 million; in 1983, $628 million; and in 1984, $594 million.

We have already voted in this Chamber to stay within the revenue losses projected by the President in his tax program.

We are already $431 million behind the program in 1983 without this amendment. So this amendment would put us more than $1 billion off the target.

Mr. President, I say that if we want to adopt this amendment, then the question is how are we going to pick up that revenue, where is this money going to come from to meet the target that we already said we were going to meet?

We have heard a lot of oratory in this Chamber about the effect of a tax bill and tax cuts on inflation. The argument has been made, particularly in connection with the Exon amendment, that we have to be responsible in tax legislation. We must consider responsibility in adopting all kinds of amendments, including the present one which would put us off the target.

Mr. President, if this were to provide a substantial assistance to low-income people in providing for their heating cost that would be a very compelling argument. But the fact is that half of the CPI increase as applied to heating cost would amount to a very small sum of dollars for an individual taxpayer or an individual who was paying his heating cost.

Assuming that heating costs were $1,000, the CPI went up, say, 10 percent, half of the CPI would be 5 percent or $50. So this would be tantamount to a $50 rebate, an old idea which we have previously entertained in Congress.

Fifty dollars does not go very far in paying for energy bills which are, say, $1,000.

Mr. President, this amendment would apply only to reimbursement for heating costs.

In some parts of the country, including my part of the country, the State of Missouri in the Midwest, last summer there was a terrible heat wave. I see the Senator from Texas in the Chamber. It was certainly true in Texas last year. What was at least as threatening as cold weather in our part of the country was extreme hot weather and the fact that people were literally dying by the scores because they did not have access to air conditioning.

This amendment if it were adopted would provide a $500 million, $600 million or more revenue loss and do nothing for those who are threatened by extreme heat and in fact dying of extreme heat in the summer time.

Finally, if this amendment were adopted, some thought should be given as to how it would be administered because the percentage, that is one-half of the CPI, would be applied to home heating expenses. How is one to determine the cost of home heating? Perhaps if a home is heated only by oil and that is the only use of oil in the home, it would be possible to compute that portion of the oil bill which comprised the cost of heating the home. But in a home which is heated by gas or a home which is heated by electricity, how is it to be computed? What portion of the total fuel bill, the total electric bill, or the total gas bill is comprised of heating costs?

So this amendment would constitute a significant administrative problem. It would provide approximately $50 to people who have heating costs, even in very cold States, approximately $50. It would not cover the problem of the energy bills of people who are threatened by extreme heat and dying of extreme heat, and it would mean that we would somehow have to come up with money in this tax bill in order to meet the revenue targets which we have already set for ourselves.

Mr. BENTSEN. Mr. President, will the manager of the bill yield 3 minutes?

Mr. DANFORTH. I am happy to yield to the Senator from Texas.

Mr. BENTSEN. Mr. President, I rise in opposition to the amendment proposed by the Senior Senator from the State of Massachusetts. He has made some excellent points about the rising costs of heating a home, and his argument is most forceful. I have the utmost respect for the Senator's motivation to assist the least fortunate in our society, and I realize that this is an issue in which he believes very strongly.

His leadership on this issue has been exemplary, and each of us in this body, indeed the Nation, owes him a debt of gratitude for bringing the issue of low-income energy assistance to the forefront. Nonetheless, I have a philosophical disagreement with the Senator as to whether this is an appropriate measure with which to respond to this important problem.

First, I do not think this is the bill that it should be attached to.

Second, we have the problem of what do we do about heat in the South.

I can recall when this issue first came before us it is awfully easy to dramatize the snow on the roof, the icicles hanging over the eaves, and the snowbanks with people trying to go through them, and yet it is not so easy to dramatize for TV a temperature reading on a thermometer.

I stood up here and argued before this body that we should give equal consideration to the poor in the South in areas where heat became so intense that we would have loss of life amongst the

elderly, the aged, and the ill, that we were not talking about big air-conditioning systems and central air-conditioning. We were talking about a window unit and whether the people could afford to have it plugged in or not. We were talking about them having a fan and could they afford to have it plugged in or not.

I, in effect, was almost ridiculed at that point as I debated this particular issue, but then the summer came and we had a heat wave throughout Texas, and we had over 30 days of over 100 degrees in Dallas and Fort Worth, and then through the South we have over 1,200 people die. We had more heat-related deaths than we had cold-related deaths.

We received some consideration of that in some minor changes in the allocation of assistance to the poor on energy, but not enough, and it was not evenly handed out.

To at this time come to this bill and try to attach it here I think would be a serious mistake and one where we are giving consideration to cold and not to heat.

Over the past several years, the Senator from Massachusetts and I have debated the issue of assistance to low-income Americans to help them meet the rising costs of home energy several times. Out of these debates have grown programs to assist in the weatherization of the homes of low-income families, and to provide cash payments to help pay utility bills.

We may have disagreed on how these funds should be distributed, but I think we have both taken long strides to insure that this problem is recognized and dealt with effectively. But I question whether this Economic Recovery Tax Act is the appropriate place to renew that debate.

Mr. President, the present allocation formula for low-income energy assistance utilizes a component called the heating degree day. States earn heating degree days for each day that the temperature drops below 72 degrees Fahrenheit. It earns more heating degree days as a factor of how low the temperature goes, and how long it stays there. This factor is intended to indicate a low-income family's need for heating, and therefore, its cost. But the indicator does not work.

The heating degree day is a poor reflector of need because it neglects the entire energy picture. Heating costs form only part of the total energy budget of a poverty household. The amount of money that a poor family pays for utilities includes costs for cooking, for hot water, for lighting and the rest.

The costs of these utilities are going up no matter if you live in California or Maine. Now some will try to argue that these energy uses make up only a marginal part of the poor's energy bills, but they ought to try to tell that to my constituents in the poorest part of the country, the lower Rio Grande Valley.

I can tell you that these people are hurt by high energies just as much as the indigent in the coldest part of Alaska. And to say that they deserve exponentially less assistance because of where they live is simply wrong.

The present allocation formulas unduly benefit the colder parts of the country, and they are in need of revision. I would be happy to join with any of my colleagues from any part of the Nation to try to work out just such a reform.

The U.S. Tax Code is an inappropriate vehicle for reducing the energy costs in low-income family budgets. Under this amendment, all taxpayers with an income of $25,000 or less—and that is a majority of all Americans—will receive some benefit regardless of their need. In a time when we are reducing the waste and inefficiency in Federal spending, we can ill afford such a shotgun approach. There are much more adequate and targeted methods by which we can directly assist the truly needy with their utility bills.

If those programs are ineffective, let us reform them. If they are not doing enough, let us work together to make them effective. But I would suggest that we can do that job outside of the tax code with much better results.

Therefore, Mr. President, I respectfully urge that the amendment be defeated.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, will the Senator from Virginia be good enough to yield, say, 5 minutes on the bill?

Mr. HARRY F. BYRD, JR. Mr. President, I yield 5 minutes on the bill.

The PRESIDING OFFICER. There is 1 minute and 24 seconds remaining for the Senator from Massachusetts.

Mr. HARRY F. BYRD, JR. Mr. President, I yield 5 minutes to the Senator from Massachusetts on the bill.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KENNEDY. Mr. President, I do not intend to delay the Senate, but I do think it is worthwhile to mention a couple of points. The other evening, when we accepted a change in the windfall profit tax which gave the oil companies an additional $250 million on top of the $20 billion which is already in this bill, and there was no Member of the Finance Committee who was talking about that $250 million.

No one was saying at that time, "we just cannot find it, it is just not right, that we do not know where we will get that $250 million." There were members of that committee who were actually recommending that we spend $1.9 billion a year. No member of the Finance Committee, was standing up saying, "where are we going to find $1.9 billion for the oil companies."

The Senate was prepared to accept $1.9 billion for the oil companies.

What we are asking is a half-billion for the consumers of this country, one-quarter of what was being proposed, for people—not the oil companies but for people—who live in some of the colder climates of this country.

Let me tell my good friend from Texas, who has been concerned about the problems of those who are afflicted by heat, that I have an amendment right here which would also include the cooling systems of this country and would be an additional cost of a half-a-billion. I would welcome the opportunity to perfect the amendment that is before the Senate to also add the cooling systems if we could gain the help and support of those who are most affected by it.

We are prepared to support that kind of effort. We are not trying to work one group off against another. We do think there are some special needs, and if Senators from those areas of the country would support this combined effort I am sure the Senator from New Hampshire, my cosponsor in this proposal, and I would welcome the opportunity to work with those Senators out of a sense of equity and fairness.

We also subscribe to the action of the Senate that we are going to come back with no further outlays in terms of the total dollar figure, and we are prepared to see it go to conference, and if the conferees work their will, we understand we have to make the case before the House conferees.

Beyond that, Mr. President, questions have been raised concerning the administration of this particular proposal. Both NOAA as well as the Energy Department have data State by State on heating days.

So judgments can be made. It is administratively compatible.

Even on the 1040 form there are already two credits that are listed on the 1040, the short form, and we have recommendations about how that 1040 form could include the energy credit with the other two. It would not provide an undue burden either to the IRS or, we think, to the people.

We feel this is a reasonable amendment and it is one which is very much needed.

The final point I would like to make is that for all of these families in this country now their taxes have gone up $319, Mr. Stockman and others said they were not going to fight the battle on the deficit by increasing taxes. Mr. Stockman has said that, but oil decontrol has caused a $319 tax increase for the average family.

All we are asking is that we reduce that $319 by probably about $50 to $75. That is still an important amount of money for people in this country, and we hope this amendment will be accepted.

I yield back the time.

Mr. HARRY F. BYRD, JR. Mr. President, I yield myself 2 minutes on the bill. Mr. President, I think the Senator from Missouri (Mr. DANFORTH) and the Senator from Texas (Mr. BENTSEN) have given adequate reason to oppose this amendment. I shall vote against it.

There has been a sharp increase, of course, in the cost of home heating oil, but there also has been a sharp increase in the cost of food in recent years, a sharp increase in the cost of housing, a sharp increase in the cost of interest, so I do not know why we would pick out home heating oil to be addressed at this point.

I think the arguments are more strongly against the amendment than for the amendment, and I shall vote against it.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I want to say that on Thursday and Friday I said, I think very candidly, to the Senator from Massachusetts and the Senator from New Hampshire, that I would be happy to go to the Treasury and see if there might be some way to work out a portion of this amendment. I hope I was in good faith in that effort.

The distinguished Senator from New Hampshire (Mr. RUDMAN) visited personally with the Treasury Secretary, Don Regan, on Friday afternoon, and I am not so certain why we could not reach an accommodation—well, it is probably a combination of things.

I think as far as the Treasury is concerned it is the tax policy involved as much as the money, and I commend the Senator from Massachusetts for his efforts last week on the oil amendment. I may not have agreed with him, but, as I said to him privately, he saved us a bundle there, and that is a fact.

I do not want the record to indicate that we were not prepared to agree in that area if, in fact, that amendment had survived—which the Senator from Kansas never felt would happen. We were not prepared to find some other source to pay for it.

But I want to make a point that may have been lost in the debate. I agree with the remarks just made by the Senator from Virginia. Everything is going up, so I assume we could build in a credit for food, and a credit for nearly everything. As I understand it, this amendment makes no distinction as to whether there is an increase in cost or not; from a certain level you just get the credit.

But under the President's proposal, which has not been supported by everyone in this body, in 1984, for example, the rate cuts to individuals amount to $104 billion. I suggest that that is a fairly large-sized tax reduction. In addition to that, we have the business cuts, and we have other cuts that help individuals, including the marriage penalty offset that will be very helpful to many whom we are also concerned about.

With respect to the amendment of the Senator from Massachusetts and the Senator from New Hampshire, I must say I am reluctant to oppose the amendment, but the Treasury opposes the amendment. The President of the United States has indicated to us that he sent us a pretty good bill, and I just hope we do not overload the circuit. We did add one or two amendments, including the day care amendment the Senator from Massachusetts had an interest in, as I think did the Senator from New Hampshire.

The vote on the charitable deduction amendment was almost unanimous, as I recall.

So I would just say to the distinguished Senators—and there are a number of Senators concerned about this proposal—that there will be another tax bill this year.

I hope and I pledge to both Senators that I will be willing to find some way, if we cannot do it through the tax credit, to provide the relief, maybe in a different way, that they suggest.

But I hope this amendment will be defeated, based on what has been said here, and I know that does not satisfy everyone in this Chamber. It is going to be my attitude from now on, unless there is some compelling reason—and I think it has been pretty much our policy up to this time—to oppose those amendments which add to the cost of the bill.

But beyond the cost, I must say to both Senators, it is a question as far as the Treasury is concerned of tax policy. They have reduced the amendment in revenue cost from about $1.7 billion or $1.6 billion in the first year to about $600 million the first year, $628 million the second year, and less than about $600 million in fiscal 1984, as I understand.

So I just believe that at this time we cannot accept the amendment, and I hope it will be rejected.

Mr. RUDMAN. Mr. President, will the Senator yield 1 minute?

Mr. DOLE. I would be happy to yield.

Mr. RUDMAN. I want to say to the Senator from Kansas, he was out of the Chamber during debate, I want to express again our appreciation for the Senator's good-faith effort to get us a chance to be heard before the Secretary of the Treasury.

I think it is regrettable that they have rejected this proposal. I hear what the Senator says about the difference between tax policy versus the amount of revenue. As far as tax policy is concerned, I think it is the wrong policy and I want to say it here on the record; that with the billions of dollars we are taking into the Federal Treasury from the windfall profit tax it is wrong that we do not use those funds to help the people in America to meet their energy requirements.

The second thing I want to say is simply this: It seems to me, when we rejected eliminating the tax on newly discovered oil under the windfall profit tax to the tune of several hundred million or about $1.5 billion, that we then, in fact, had funds left to do other things with. Now, I just want to say to the distinguished Senator from Kansas that I appreciate his help and his cooperation.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. DOLE. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Massachusetts has 1 minute and 21 seconds remaining. The time for the Senator from Kansas has expired.

Mr. DOLE. Mr. President, I will yield myself 1 minute off the bill to thank the distinguished Senator from New Hampshire. We do have the low-income energy assistance program, which amounts to about $1.4 billion. This Senator certainly is willing to try to find a solution in the event this amendment fails, and I hope it will fail. I will do the best I can to defeat it, not because of any eagerness to do that but because I think, in the face of the opposition, that it would be doing a disservice to the Senators to stand up here and try to have it both ways. Had the Treasury supported the amendment, certainly this Senator would have been willing to go along.

I recognize the efforts made both to reduce the cost and the impact of the amendment, but I must hope that this amendment will be rejected.

I yield to the Senator from Rhode Island.

Mr. PELL. Will the Senator be good enough to yield for a question?

Mr. DOLE. Yes.

Mr. PELL. Is it quite possible that there will be a hearing and some examination of this problem later on in the year on the question of home heating oil and the cost of home heating oil, both in connection with Senator KENNEDY's amendment and also bill S. 329 that I have introduced to the same effect?

Mr. DOLE. Mr. President, I yield myself another minute. That is a promise, that is not just a possibility that that will be done. I must say to the Senator that I have spent some time up in New Hampshire, a lot of it a couple of years ago. No one knew I was there, but I was.

Mr. KENNEDY. I had the same feeling.

Mr. DOLE. I discussed the need for tax breaks and tax credits for wood-burning stoves. I thought that would catch on up there. It did, but I did not.

So I would remind Members that it is now in the so-called Conable-Hance bill, the tax credit for wood-burning stoves. I would say to those who come from that area that there has been a recognition of the special problems in that area. I would say flatly to the Senator from Rhode Island that I would be very pleased to try to accommodate anyone in this Chamber as far as hearings are concerned.

Mr. PELL. I thank the Senator.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I wish to also express my appreciation to the good-faith efforts of the chairman of the Finance Committee in attempting to negotiate this matter out with the administration and for his statement here that his committee will address this issue as we move through this session. I think it is an important reassurance to the people not only in our part of the country but in other parts of the country that will be affected. I am grateful to him for his statement and for his willingness and good faith efforts in the past.

I still hope, for the reasons that Senator RUDMAN, Senator PELL, Senator COHEN, and I outlined, that this amendment will be accepted.

THE HOME HEATING TAX CREDIT

Mr. CHAFEE. Mr. President, the home heating tax credit proposal by Senator KENNEDY and Senator RUDMAN is a good amendment and I am going to vote for it.

The amendment is drafted in such a way that it will provide modest tax relief to families hit hardest by the increase in energy costs during the last few years, particularly those costs resulting from the decontrol of domestically produced crude oil and the imposition of the windfall profit tax.

As I understand it, the Kennedy-Rudman proposal allows a maximum $300 tax credit to taxpayers earning up to $15,000 a year, phasing out by 10 percent for each $1,000 of income above $15,000. The credit will be calculated by multiplying the family's home heating costs for a given year by one-half of the increase in the Consumer Price Index.

Therefore, a Rhode Island family with fuel oil expenses of $1,200 during a year when the CPI increase measured 10 percent would be entitled to a $60 tax credit if its income was $15,000 or less, but a tax credit of only $30 if its income was $20,000.

Mr. President, in 1977, the Senate passed a similar amendment by an overwhelming margin. The people who needed relief from increased energy costs 4 years ago need and deserve it even more today. In just the last 2 years, the cost of home heating has risen 100 percent—from about $600 in 1978 to $1,200 in 1980 It is expected to go up another 50 percent, or $600, this year. For the poor and elderly living on fixed incomes and many middle-income families as well, this is simply the kind of inflation that cannot be absorbed without drastically reducing their standards of living.

The question I anticipate on the Senate floor, Mr. President, is, "How can we afford this amendment? How can we afford another $500 million a year in this tax bill?"

There are two ways I would approach this question. One is to ask in return, "What was the windfall profits tax for and how much are we going to raise from that tax?" As one Senator who worked on that legislation, it seems to me that the windfall profits tax was imposed to absorb some of the increase in oil revenues resulting from the decontrol of crude oil, and to reallocate some of those revenues to assure that alternative forms of energy are explored and that people who cannot afford the immediate sharp increase in energy costs are protected. This year, the windfall tax will raise about $15.4 billion, and over the next 5 years, about $100 billion. Where is all that money going? So far, I would say the people who are paying the oil bill are not getting the protection they were promised.

Second, let us not forget the billions of dollars this tax bill already contains in tax relief for oil royalty owners and producers of new oil. The way things stand now, we seem to be redefining the word "relief:" First, a $2,500 tax credit for oil royalty owners, worth over $2 billion in the next 3 years which is the time of duration of the home heating tax credit; and Second, a 50 percent reduction of the tax on new oil resulting in a revenue loss of $600 million in 1983 and 1984, and rapidly rising after that. This is a benefit to the oil companies themselves—not exactly hardship cases.

So, Mr. President, I strongly urge my colleagues to support this amendment and congratulate the Senators from Massachusetts and New Hampshire for bringing it to a vote this afternoon.

Mr. MITCHELL. Mr. President, the escalation in heating costs over the past couple of years is no secret to anyone. Millions of Americans—elderly people, young families and middle-income workers—have all found their heating costs rising dramatically since the 1979 doubling of oil prices. That cost increase has been most heavily borne by those using heating oil in furnaces directly, but it has not spared those whose home heating relies on electricity or gas, either, as both fuels have risen in cost along with heating oil.

Coupled with the 100-percent price increase just 24 months ago, the decision to lift crude oil controls gradually—and then to totally abandon them this January—accelerated the speed at which artificially high world oil prices have been translated into an added drain on family budgets. And the people who have felt this cost the most are those living in the Northern tier of the States, where winters are longer, and colder than in other areas of the country.

In Maine, for instance, home heating is not a luxury or even a modest comfort, it is a basic essential without which life itself is endangered.

So heating oil costs cannot be avoided, even though most Maine families are using their oil sparingly, are keeping their homes at temperatures which are far below comfortable, and are closing off portions of their homes when they can, and living in fewer rooms over the course of the winter, just to cut down on the costs of heating. The conservation by Maine families has helped the region reduce its use of heating oil, but there is a point below which further conservation is simply impracticable.

The costs of converting every home to alternative fuels are high; and even were that feasible, the costs of the most widely available alternative, wood, would soon escalate substantially if the entire region came to depend upon it. So it is evident that for the foreseeable future, people in Maine and other northerly States, will be depending on home heating oil for keeping their houses moderately warm in the winter.

At the same time, the massive price increases for this commodity have done more than cause sacrifices in family budgets; they have seriously distorted families' plans for their future, for educating their children, and for saving toward their own retirement. This amendment, which would provide a modest credit to somewhat offset the cost of home heating is an essential means of helping redress the imbalance that these high oil prices have caused for most Maine families.

It would not be such a substantial tax savings as to actually encourage use of heating oil in a profligate fashion—and at $1.22 per gallon, no one in Maine can afford to heat extravagantly. But it would be a modest offset to the rising costs, and it would provide a comparable form of relief to the middle-income wage earner to that which we have tried to extend to the very poor, through the low-income fuel assistance program.

No one begrudges the needy assistance to stay warm when it is essential. But the working families whose taxes help pay for that assistance ought not be ignored either. The increased cost to heat a home in Maine has risen from a range of $400 to $600 per season to around $800 to $1,200 per season today. The family earning $15,000 or $25,000 cannot afford such an outlay without making serious cutbacks in other essentials. This modest credit would not be a total offset for that expense, but it would at least provide some relief for this very sudden price increase. And, just as importantly, it would demonstate to the working families of the Northern States that their Government understands and is concerned with their plight.

The cost of this amendment, according to the Joint Tax Committee, is in the range of $500 million for 1982, rising to $600 million the following year, and tnen decreasing to $500 million again, as more people turn to alternative heating methods. This is not an insubstantial cost, but compared with the level of tax relief that the bill before us provides to many other segments of the economy, it is modest and well justified.

I strongly support this amendment. It would provide welcome relief to working, taxpaying Americans for a price increase for which they are not responsible. It is a reasonable and responsible way to extend that relief without distorting our energy policy or undermining the goal of conservation. It merits the support of every Senator.

● Mr. DODD. Mr. President, as a cosponsor of the amendment by the Senator from Massachusetts, to allow consumers a tax credit of up to $300 to help offset the inflationary effects of rapidly rising home-heating costs, I strongly urge my colleagues' support.

This amendment is vital to millions of middle- and low-income Americans to stem the erosion of living standards caused by skyrocketing energy costs. Home heating and other residential energy costs have escalated much more rapidly than the general rate of inflation. More importantly, they have greatly outstripped the rate of increases in wages and salaries.

Between January 1980, and January 1981, home-heating oil prices in my State of Connecticut increased by 24 percent. By March 3, 1981, another 15 percent had been tacked onto the prices Connecticut consumers were paying for home-heating oil. Similar increases have been witnessed in electricity rates, the other major component of home-heating costs in Connecticut.

New England consumers have made dramatic strides in energy conservation. We have reduced our energy consumption by 6.5 percent since 1978, while the Nation as a whole has reduced energy consumption by 2.3 percent. But our conservation efforts have not been able to keep pace with the rate of price increase.

Many of our poor and elderly citizens are now forced to spend as much as 50 percent of their income to keep their homes adequately heated during the winter. This leaves only meager funds for food, clothing, and other essentials. A tax credit of even a few dollars can alleviate much suffering for many of our hard pressed low-income people.

Middle-income energy consumers, likewise, have had to drastically alter their lifestyles as a result of this drain on their resources. In addition, funds that might well have gone into improving home insulation and other energy con-

servation measures have been consumed by heating bills before families could accumulate the capital to better weatherize their homes.

In effect, higher home heating bills are transferring to oil producing States and OPEC money that is vitally needed by energy consumers to carry out conservation measures.

This proposed tax credit is needed to redress the imbalance that has been created between energy producers and energy consumers by rapidly rising prices. It is needed to provide some measure of relief to low- and fixed-income families who have little flexibility to adjust to such drastic price increases. It is needed to make funds available among middle-income families for investment in much needed energy conservation measures.

I urge all Senators to support this amendment both for the sake of equity and as a modest means of providing temporary relief to the citizens of States who by virtue of geography are carrying a heavy burden under escalating home heating prices.●

Mr. KENNEDY. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Does the Senator yield back his time?

Mr. KENNEDY. I yield back whatever time is remaining.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Massachusetts (Mr. KENNEDY). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CHILES. (After having voted in the negative). Mr. President, on this vote, I have a pair with the distinguished Senator from Nevada (Mr. CANNON). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withdraw my vote.

Mr. STEVENS. I announce that the Senator from Idaho (Mr. MCCLURE), is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Mississippi (Mr. STENNIS), are necessarily absent.

The PRESIDING OFFICER (Mr. JEPSEN). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 47, nays 48, as follows:

[Rollcall Vote No. 224 Leg.]

YEAS—47

Andrews	Glenn	Moynihan

So Mr. KENNEDY's amendment (No. 521), as amended, was rejected.

UP AMENDMENT NO. 303

(Purpose: Providing Inventory Reform for Small Business)

Mr. BAKER. Mr. President, what is the next amendment in sequence?

The PRESIDING OFFICER. The amendment of the Senator from Maine (Mr. MITCHELL).

Mr. MITCHELL. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Maine (Mr. MITCHELL) for himself, Mr. COHEN, Mr. BENTSEN, Mr. BAUCUS, Mr. D'AMATO, Mr. FORD, Mr. RIEGLE, Mr. CANNON, and Mr. BIDEN proposes an unprinted amendment numbered 303.

Mr. MITCHELL. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title II, insert the following new subtitle:

Subtitle G—Inventory Reform

SEC. 261. 5-YEAR AVERAGING PERMITTED FOR INCREASES IN INVENTORY VALUE REQUIRED FOR ADOPTION OF LIFO METHOD.

Subsection (b) of section 472 (relating to last-in, first-out inventories) is amended by adding at the end thereof the following new sentence: "In the case of a taxpayer who changes its method of accounting by reason of an election under this subsection, under regulations prescribed by the Secretary, the net amount of adjustments required by section 481(a)(2) to be taken into account by the taxpayer in computing taxable income shall be so taken into account over 5 years.".

SEC. 262. SIMPLIFICATION OF INVENTORY POOLING REQUIREMENTS.

(a) CERTAIN SMALL BUSINESSES PERMITTED ONE INVENTORY POOL.

(1) IN GENERAL.—Subpart D of part II of subchapter E of chapter 1 (relating to inventories) is amended by adding at the end thereof the following new section:

"SEC. 474. ELECTION BY CERTAIN SMALL BUSINESSES TO USE ONE INVENTORY POOL.

"(a) IN GENERAL.—A taxpayer who is an eligible small business and who uses the dollar value method of pricing inventories under the method provided by section 472 (b) may elect for the taxable year to use one inventory pool for any trade or business of the taxpayer.

"(b) ELIGIBLE SMALL BUSINESS DEFINED.—For purposes of this section, a taxpayer is an eligible small business for any taxable year if the average annual gross receipts of the taxpayer do not exceed $5,000,000 for the 3 taxable years ending with the taxable year.

"(c) SPECIAL RULES.—For purposes of this section—

"(1) CONTROLLED GROUPS.—

"(A) IN GENERAL.—In the case of a taxpayer which is a member of a controlled group, all persons which are component members of such group at any time during the calendar year shall be treated as one taxpayer for such year for purposes of determining the gross receipts of the taxpayer.

"(B) CONTROLLED GROUP DEFINED.—For purposes of subparagraph (A), persons shall be treated as being members of a controlled group if such persons would be treated as a single employer under the regulations prescribed under section 52(b).

"(2) ELECTION.—

"(A) IN GENERAL.—The election under this section may be made without the consent of the Secretary and shall be made at such time and in such manner as the Secretary may by regulations prescribe.

"(B) PERIOD TO WHICH ELECTION APPLIES.—The election under this section shall apply—

"(i) to the taxable year for which it is made, and

"(ii) to all subsequent taxable years for which the taxpayer is an eligible small business, unless the taxpayer secures the consent of the Secretary to the revocation of such election.

"(3) TRANSITIONAL RULES.—In the case of a taxpayer who changes the number of inventory pools maintained by him in a taxable year by reason of an election (or cessation thereof) under this section—

"(A) the inventory pools combined or separated shall be combined or separated in the manner provided by regulations under section 472;

"(B) the dollar value of the taxpayer's inventory as of the beginning of the first taxable year—

"(i) for which an election under this section is in effect, or

"(ii) after such election ceases to apply, shall be the same as such dollar value as of the close of the taxable year preceding the taxable year described in clause (i) or (ii) as the case may be), and

"(C) the first taxable year for which an election under this section is in effect or after such election ceases to apply (as the case may be) shall be treated as a new base year in accordance with procedures provided by regulations under section 472.".

(2) CLERICAL AMENDMENT.—The table of sections for such subpart D is amended by adding at the end thereof the following new item:

"Sec. 474. Election by certain small businesses to use one inventory pool.".

(b) SIMPLIFICATION OF INVENTORY POOLING REQUIREMENTS FOR WHOLESALERS AND RETAILERS.—Section 472 (relating to last-in, first-out inventories) is amended by adding at the end thereof the following new subsection:

"(f) USE OF GOVERNMENT PRICE INDEX CATEGORIES IN DETERMINING INVENTORY.—

"(1) IN GENERAL.—Any taxpayer—

"(A) who is a wholesaler or retailer in any trade or business, and

"(B) who uses the dollar value method of pricing inventories under the method provided by section 472 (b),

may elect to use inventory pools in such trade or business based on the applicable Government price index categories for all

items of inventory of the taxpayer in such trade or business.

"(2) DEFINITIONS.—For purposes of this subsection—

"(A) WHOLESALER AND RETAILER.—The terms 'wholesaler' and 'retailer' mean any taxpayer who purchases goods for resale in the ordinary course of his trade or business without any further manufacturing or processing of such goods.

"(B) APPLICABLE GOVERNMENT PRICE INDEX CATEGORY.—The term 'applicable Government price index category' means any category—

"(i) which is one of the general expenditure categories of consumer goods described in the CPI Detailed Report,

"(ii) which includes the items of inventory being pooled, and

"(iii) which is selected by the taxpayer.

"(C) CPI DETAILED REPORT.—The term 'CPI Detailed Report' means the report so named published by the Bureau of Labor Statistics.

"(3) ELECTION.—

"(A) IN GENERAL.—The election under this subsection, and the selection of applicable Government price index categories—

"(i) shall apply to the taxable year for which made and to all subsequent taxable years,

"(ii) once made, may be revoked only with the consent of the Secretary, and

"(iii) shall be made at such time and in such manner as the Secretary shall by regulations prescribe.

"(B) TRANSITIONAL RULES.—The rules of section 474(c)(3) shall apply to an election under this subsection and to the cessation of such election.".

SEC. 263. USE OF GOVERNMENT PRICE INDICES PERMITTED IN CONNECTION WITH PRICING INVENTORIES UNDER LIFO METHOD.

Section 472 (relating to last-in, first-out inventories), as amended by section 262, is amended by adding at the end thereof the following new subsection:

"(g) USE OF GOVERNMENT PRICE INDICES IN PRICING INVENTORY.—

"(1) IN GENERAL.—A taxpayer who uses the dollar-value method of pricing inventories under the method described in subsection (b) may elect to use the applicable Government price index category for pricing inventories under such dollar-value method.

"(2) APPLICABLE GOVERNMENT PRICE INDEX CATEGORY.—For purposes of paragraph (1), the term 'applicable Government price index category' means—

"(A)(i) any of the general expenditure categories in the CPI Detailed Report (within the meaning of subsection (d)(2)(C)),

"(ii) any of the 2-digit standard industrial classifications in the Producer Prices Data Report, or

"(iii) any subcategory of a category described in clause (i) or any subclassification of a classification described in clause (ii),

"(B) which includes the items of inventory being priced, and

"(C) which is selected by the taxpayer.

"(3) PRODUCERS PRICES DATA REPORT.—For purposes of paragraph (2), the term 'Producers Prices Data Report' means the Producers Prices and Price Indexes Data Report published by the Bureau of Labor Statistics.

"(4) ELECTION.—The election under this subsection, and the selection of applicable Government price index categories—

"(A) shall apply to the taxable year for which made and to all subsequent taxable years,

"(B) once made, may be revoked, only with the consent of the Secretary, and

"(C) shall be made at such time and in such manner as the Secretary shall by regulations prescribe.".

SEC. 264. METHOD OF COMPUTING LIFO VALUE OF DOLLAR-VALUE POOL MAY BE USED WITHOUT SHOWING OTHER METHODS ARE UNSUITABLE OR IMPRACTICAL.

Section 472 (relating to last-in, first-out inventories), as amended by sections 262 and 263, is amended by adding at the end thereof the following new subsection:

"(g) USE OF LINE-CHAIN METHOD, ETC. PERMITTED WITHOUT SHOWING OTHER METHODS ARE UNSUITABLE OR IMPRACTICAL.—Any taxpayer may elect to use a link chain or index method of computing the LIFO value of any dollar-value pool without any showing that any other such method is unsuitable or impractical.".

SEC. 265. CERTAIN SMALL BUSINESSES PERMITTED USE OF CASH RECEIPTS AND DISBURSEMENTS METHOD OF ACCOUNTING WITHOUT REGARD TO INVENTORIES.

(a) IN GENERAL.—Section 471 (relating to general rule for inventories) is amended by adding at the end thereof the following:

"(b) ELECTION BY CERTAIN SMALL BUSINESSES TO USE CASH RECEIPTS AND DISBURSEMENTS METHOD OF ACCOUNTING.—

"(1) CASH RECEIPTS METHOD.—A taxpayer may elect for the taxable year the cash receipts and disbursements method of accounting for a trade or business of the taxpayer without regard to any requirement to use inventories if—

"(A) the average annual gross receipts of the taxpayer do not exceed $500,000 for the 3 taxable years ending with the taxable year, and

"(B) such taxpayer is a qualified small business for each of such 3 taxable years.

"(2) QUALIFIED SMALL BUSINESS DEFINED.—For purposes of this subsection, the term 'qualified small business' means a person engaged in a trade or business as a wholesaler or retailer (within the meaning of section 472(f)(2)(A)), if, at all times during the taxable year, active participants in such trade or business own—

"(A) in the case of trade or business other than a corporation, at least 50 percent of the capital and profits interests in such trade or business, and

"(B) in the case of a corporation—

"(i) stock possessing at least 50 percent of the total combined voting power of all classes of stock of the corporation entitled to vote, and

"(ii) at least 50 percent of the total value of shares of all other classes of stock of the corporation.

"(3) ACTIVE PARTICIPANT.—For purposes of this subsection, the term 'active participant' means an individual—

"(A) who is actively involved in the management of the trade or business, and

"(B) whose principal business activity is such trade or business.

"(4) SPECIAL RULES.—For purposes of this subsection—

"(A) CONTROLLED GROUPS.—

"(i) IN GENERAL.—In the case of a taxpayer which is a member of a controlled group, all persons which are component members of such group at any time during the calendar year shall be treated as 1 taxpayer for such year for purposes of determining the gross receipts of the taxpayer.

"(ii) CONTROLLED GROUP DEFINED.—Persons shall be treated as being members of a controlled group if such persons would be treated as a single employer under the regulations prescribed under section 52(b).

"(B) COORDINATED WITH SECTION 481.—In the case of a taxpayer who changes its method of accounting by reason of an election under this subsection, under regulations prescribed by the Secretary, the net amount of adjustments required by section 481(a)(2) to be taken into account by the taxpayer in computing taxable income shall be so taken into account in each of the 10 taxable years beginning with the year of change.

"(C) ELECTION.—

"(i) IN GENERAL.—The election under this subsection may be made without the consent of the Secretary and shall be made at such time and in such manner as the Secretary may by regulations prescribe.

"(ii) PERIOD TO WHICH ELECTION APPLIES.—The election under this subsection shall apply—

"(I) to the taxable year for which it is made, and

"(II) for all subsequent taxable years for which the taxpayer is a qualified small business and meets the requirements of subparagraphs (A) and (B) of paragraph (1), unless the taxpayer secures the consent of the Secretary to the revocation of such election.".

(b) TECHNICAL AMENDMENT.—Section 471 of such Code is amended by striking out "Whenever in the opinion" and inserting in lieu thereof the following:

"(a) GENERAL RULE.—Except as provided in subsection (b), whenever in the opinion".

SEC. 266. DELAY IN EFFECTIVE DATE OF SECTION 336.

Paragraph (3) of section 403(b) of the Crude Oil Windfall Profit Tax Act of 1980 is amended by striking out "1981" and inserting in lieu thereof "1982".

SEC. 267. EFFECTIVE DATE.

The amendment made by this subtitle shall apply to taxable years beginning after December 31, 1981.

On page 44, beginning with line 8, strike out all through page 77, line 7, and insert in lieu thereof the following:

SEC. 201. SIMPLIFIED COST RECOVERY.

(a) IN GENERAL.—Part VI of subchapter B of chapter 1 (relating to itemized deductions for individuals and corporations) is amended by inserting after section 167 the following new section:

"SEC. 158. SIMPLIFIED COST RECOVERY.

"(a) ALLOWANCE OF DEDUCTION.—In the case of recovery property, there shall be allowed, in lieu of any deduction allowed by any other section of this part, the recovery deduction provided by this section.

"(b) AMOUNT OF DEDUCTION.—The amount of the deduction allowable by subsection (a) for any taxable year shall be the aggregate determined by applying—

"(1) the recovery percentage for each class of property, to

"(2) the balance in the recovery account for such class at the end of such year.

"(c) CLASS AND RECOVERY PERIOD.—

"(1) TABLE.—All recovery property—

"(A) shall be placed in 1 of the classes set forth in the following table, and

"(B) shall have the recovery period set forth for such class in the following table:

"Class	*Recovery period (in years)*
1	3
2	5
3	10
4	15

"(2) ELECTION TO PLACE PROPERTY IN CLASS HAVING NEXT LONGER RECOVERY PERIOD.—The taxpayer may elect to place any item of property in the class having the next longer recovery period than the class in which such item would (but for this paragraph) fall.

"(d) RECOVERY PERCENTAGE.—For purposes of this section—

"(1) IN GENERAL.—The term 'recovery percentage' means, with respect to any class of recovery property for any taxable year—

"(A) the percentage which the taxpayer

elects under paragraph (2) for such class for such taxable year, divided by

"(B) the number of years in the recovery period.

"(2) ELECTION OF PERCENTAGE.—In computing the recovery percentage for any class of recovery property for any taxable year, the taxpayer shall elect to use—

"(A) 100 percent, or

"(B) in the case of property placed in service—

"(i) after December 31, 1980, and before January 1, 1984, 140 percent,

"(ii) during 1984, 150 percent, or

"(iii) after December 31, 1984, 200 percent.

"(e) RECOVERY PROPERTY DEFINED.—

"(1) IN GENERAL.—Except as provided in subsection (g), for purposes of this title, the term 'recovery property' means tangible property of a character subject to the allowance for depreciation (other than a building and its structural components)—

"(A) used in a trade or business, or

"(B) held for the production of income,

which is placed in service by the taxpayer after December 31, 1980.

"(2) CLASSES OF RECOVERY PROPERTY.—Each item of recovery property shall be assigned to one of the following classes of property:

"(A) CLASS 1 PROPERTY.—The term 'class 1 property' means section 1245 class property—

"(i) with a present class life of 4 years or less; or

"(ii) used in connection with research and experimentation.

"(B) CLASS 2 PROPERTY.—The term 'class 2 property' means recovery property which is section 1245 class property and which is not class 1 property, class 3 property, or class 4 property.

"(C) CLASS 3 PROPERTY.—The term 'class 3 property' means—

"(i) public utility property (other than section 1250 class property or class 1 property) with a present class life of more than 18 years but not more than 25 years;

"(ii) section 1250 class property with a present class life of 12.5 years or less; and

"(iii) railroad tank cars.

"(D) CLASS 4 PROPERTY.—The term 'class 4 property' means public utility property (other than section 1250 class property or class 1 property) with a present class life of more than 25 years.

"(f) RECOVERY ACCOUNT.—

"(1) IN GENERAL.—The taxpayer shall establish a recovery account for each class of recovery property.

"(2) ADDITIONS TO ACCOUNT.—The recovery account for any class of recovery property shall be increased by an amount equal to the sum of—

"(A) one-half of the basis of each recovery property in such class which is placed in service by the taxpayer during the taxable year, plus

"(B) one-half of the basis of each recovery property in such class which was placed in service by the taxpayer during the preceding taxable year.

"(3) REDUCTIONS IN ACCOUNT.—

"(A) PROPERTY DISPOSED OF DURING YEAR.—The recovery account for any class of recovery property shall be reduced by an amount equal to the amount realized on each recovery property of such class disposed of by the taxpayer during the taxable year.

"(B) AMOUNT ALLOWED UNDER THIS SECTION.—The recovery account for any class of recovery property shall be reduced by an amount equal to the amount of the deduction allowed under subsection (a) with respect to such class (but not less than the amount allowable).

"(4) TIME FOR MAKING ADJUSTMENTS.—

"(A) IN GENERAL.—Any adjustment under paragraph (2) or (3)(A) shall be made as of the close of the taxable year but before the determination of the amount allowable as a deduction under subsection (a) for such taxable year.

"(B) REDUCTION FOR DEDUCTION.—Any reduction under paragraph (3)(B) shall be made as of the beginning of the taxable year following the taxable year for which the amount was allowed (or allowable) as a deduction under subsection (a).

"(5) COORDINATION WITH OTHER PROVISIONS.—

"(A) DISPOSITIONS NOT TREATED AS DISPOSITIONS FOR CERTAIN PURPOSES.—For purposes of this title (other than this section and section 47), the disposition of any property in a recovery account shall be treated as if it were not a disposition.

"(B) NEGATIVE BALANCE.—If, as of the close of any taxable year, there is a negative balance in any recovery account then, notwithstanding any other provision of this subtitle—

"(i) an amount equal to the amount by which—

"(I) such negative balance (expressed as a positive number), exceeds

"(II) one-half of the basis of all recovery property in the class of recovery property for which such account is established which was placed in service by the taxpayer during the taxable year

shall be included in gross income for such taxable year as ordinary income, and

"(ii) the balance in the account shall be adjusted by adding to the account an amount equal to the amount included in gross income under clause (i).

"(6) SEPARATE ACCOUNTS TO REFLECT PARTNERSHIP ALLOCATIONS AND ADJUSTMENTS.—Under regulations prescribed by the Secretary, separate recovery accounts shall be established to the extent necessary to reflect—

"(A) allocations under subsections (b) and (c) of section 704, and

"(B) adjustments to basis under section 734 or 743.

"(7) SEPARATE ACCOUNTS.—The taxpayer shall establish separate accounts for property with respect to which different percentages apply under subsection (d)(2)(B).

"(c) PROPERTY EXCLUDED FROM APPLICATION OF SECTION.—For purposes of this section.—

"(1) PROPERTY PLACED IN SERVICE BEFORE JANUARY 1, 1981.—The term 'recovery property' does not include property placed in service by the taxpayer before January 1, 1981.

"(2) CERTAIN METHODS OF DEPRECIATION.—The term 'recovery property' does not include property if—

"(A) the taxpayer elects to exclude such property from the application of this section, and

"(B) for the first taxable year for which a deduction would (but for this election) be allowable under this section with respect to such property in the hands of the taxpayer, the property is properly depreciated under the unit-of-production method or any method of depreciation not expressed in a term of years (other than the retirement-replacement-betterment method).

"(3) SPECIAL RULE FOR CERTAIN PUBLIC UTILITY PROPERTY.—

"(A) IN GENERAL.—The term 'recovery property' does not include public utility property (within the meaning of section 167(l)(3)(A)) if the taxpayer does not use a normalization method of accounting.

"(B) USE OF NORMALIZATION METHOD DEFINED.—For purposes of subparagraph (A), in order to use a normalization method of accounting with respect to any public utility property—

"(i) the taxpayer must, in computing its tax expense for purposes of establishing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, use a method of depreciation with respect to such property that is the same as, and a depreciation period for such property that is no shorter than, the method and period used to compute its depreciation expense for such purposes; and

"(ii) if the amount allowable as a deduction under this section with respect to such property differs from the amount that would be allowable as a deduction under section 167 (determined without regard to section 167(l)) using the method (including the period, first and last year convention, and salvage value) used to compute regulated tax expense under subparagraph (B)(i), the taxpayer must make adjustments to a reserve to reflect the deferral of taxes resulting from such difference.

"(C) PUBLIC UTILITY PROPERTY WHICH IS NOT RECOVERY PROPERTY.—In the case of public utility property which, by reason of this paragraph, is not treated as recovery property), the allowance for depreciation under section 167(a) shall be an amount computed using the method and period referred to in subparagraph (B)(i).

"(4) CERTAIN TRANSACTIONS IN PROPERTY PLACED IN SERVICE BEFORE 1986.—

"(A) SECTION 1245 CLASS PROPERTY.—The term 'recovery property' does not include section 1245 class property acquired by the taxpayer after December 31, 1980, if—

"(i) the property was owned or used at any time during 1980 by the taxpayer or a related person,

"(ii) the property is acquired from a person who owned such property at any time during 1980, and, as part of the transaction, the user of such property does not change,

"(iii) the taxpayer leases such property to a person (or a person related to such person who owned or used such property at any time during 1980, or

"(iv) the property is acquired in a transaction as part of which the user of such property does not change and the property is not recovery property in the hands of the person from which the property is so acquired by reason of clause (ii) or (iii).

For purposes of this subparagraph, whether the user of property changes as part of a transaction shall be determined in accordance with regulations prescribed by the Secretary.

"(B) SECTION 1250 CLASS PROPERTY.—The term 'recovery property' does not include section 1250 class property acquired by the taxpayer after December 31, 1980, if—

"(i) such property was owned by the taxpayer or by a related person at any time during 1980;

"(ii) the taxpayer leases such property to a person (or a person related to such person) who owned such property at any time during 1980; or

"(iii) such property is acquired in an exchange described in section 1031, 1033, 1038, or 1039 to the extent that the basis of such property includes an amount representing the adjusted basis of other property owned by the taxpayer or a related person during 1980.

"(C) CERTAIN NONRECOGNITION TRANSACTIONS.—The term 'recovery property' does not include property placed in service by the transferor or distributor before January 1, 1981, which is acquired by the taxpayer after December 31, 1980, in a transaction described in section 332, 351, 361, 371(a), 374(a), 721, or 731 (or such property acquired from the transferee or acquiring corporation in a transaction described in such section), to the extent that the basis of the property is determined by reference to the basis of the property in the hands of the transferor or distributor. In the case of property to which this subparagraph applies, rules similar to the rules described in section 381(c)(6) shall apply.

"(D) RELATED PERSON DEFINED.—Except as provided in subparagraph (B), for purposes

of this paragraph a person (hereinafter referred to as the related person) is related to any person if—

"(i) the related person bears a relationship to such person specified in section 267(b) or section 707(b)(1), or

"(ii) the related person and such person are engaged in trades or businesses under common control (within the meaning of subsections (a) and (b) of section 52).

For purposes of clause (i), in applying section 267(b) and section 707(b)(1) '10 percent' shall be substituted for '50 percent'. The determination of whether a person is related to another person shall be made as of the time the taxpayer acquires the property involved.

"(E) LIQUIDATION OF SUBSIDIARY.—For purposes of this paragraph, a person is not a related person to the taxpayer if such person is a distributing corporation in a transaction to which section 334(b)(2)(B) applies and the stock of such corporation referred to in such subparagraph (B) was acquired by the taxpayer by purchase after December 31, 1980.

"(F) ANTIAVOIDANCE RULE.—The term 'recovery property' does not include property acquired by the taxpayer after December 31, 1980, which, under regulations prescribed by the Secretary, is acquired in a transaction one of the principal purposes of which is to avoid the principles of paragraph (1) and this paragraph.

"(G) SPECIAL RULES FOR PROPERTY PLACED IN SERVICE BEFORE CERTAIN PERCENTAGES TAKE EFFECT.—Under regulations prescribed by the Secretary—

"(i) rules similar to the rules of this paragraph shall be applied in determining which percentages contained in subparagraph (B) of subsection (d)(2) apply with respect to recovery property, and

"(ii) if the percentages contained in subparagraph (B) of subsection (d)(2) do not apply to such property by reason of clause (i), the deduction allowable under subsection (a) shall be computed under the recovery method and period of the person from whom the taxpayer acquired such property.

"(h) SPECIAL RULES.—

"(1) NO ADJUSTMENT WHERE PROPERTY DISPOSED OF BEFORE CLOSE OF TAXABLE YEAR IN WHICH PLACED IN SERVICE.—No adjustment shall be made under paragraphs (2) and (3)(A) of subsection (f) in respect of any property which is disposed of by the taxpayer before the close of the taxable year in which placed in service by the taxpayer.

(2) TRANSFERS AT DEATH.—No reduction shall be made under paragraph (3)(A) of subsection (f) by reason of any transfer at death.

"(3) PROPERTY CEASING TO BE RECOVERY PROPERTY.—If any property taken into account under subsection (f) ceases to be recovery property during any taxable year—

"(A) such property shall be treated as disposed of by the taxpayer during such taxable year, and

"(B) the basis of such property in the hands of the taxpayer after such cessation shall be treated as equal to its fair market value.

"(4) DISPOSITIONS OTHER THAN SALE OR EXCHANGE.—If any recovery property is disposed of in a disposition which is not a sale, exchange, or involuntary conversion and which is not described in paragraph (6) or (7), the reduction under paragraph (3)(A) of subsection (f) for such disposition shall be the fair market value of the property disposed of. In the case of property disposed of by abandonment, the fair market value thereof shall be treated as if it were zero.

"(5) TRANSFERS WHERE BASIS GOES OVER.—

"(A) IN GENERAL.—If any recovery property is transferred and the transferee's basis of such property is determined in whole or in part by reference to the adjusted basis of the transferor, then, under regulations prescribed by the Secretary—

"(i) the transferor's recovery account for the class of property in which the recovery property falls shall be reduced by the transferred amount, and

"(ii) for purposes of determining the transferee's basis in such property, the adjusted basis of such property in the hands of the transferor shall be treated as equal to the transferred amount.

"(B) TRANSFERRED AMOUNT.—For purposes of subparagraph (A), the transferred amount shall be the amount which bears the same relation to—

"(i) the total amount in the transferor's recovery account immediately before the transfer, as

"(ii) the fair market value of the transferred property bears to the fair market value of all property in such account immediately before the transfer.

"(C) AUTHORITY TO PRESCRIBE ALTERNATE METHODS OF ALLOCATION.—The Secretary may by regulations prescribe alternate methods for allocating the balance in any recovery account for purposes of determining the transferred amount of any property.

"(D) COORDINATION WITH SECTION 170(e).—In the case of any charitable contribution of recovery property, the excess of the fair market value of such property (determined at the time of such contribution) over the transferred amount shall be treated as gain described in section 170(e)(1)(A).

"(6) LIKE KIND EXCHANGES; INVOLUNTARY CONVERSIONS.—Under regulations prescribed by the Secretary, in the case of any exchange described in section 1031 or 1033—

"(A) if the properties fall in the same class, changes shall be made in the taxpayer's recovery account for such class only to the extent necessary to reflect the money or other property (within the meaning of section 1031) or property not similar or related in service or use (within the meaning of section 1033), paid, exchanged, or received, as the case may be, and

"(B) if the properties fall in different classes, proper adjustments in the recovery accounts for both classes shall be made to carry out the nonrecognition provided for in such sections.

"(7) MANNER AND TIME FOR MAKING ELECTIONS.—

"(A) IN GENERAL.—Any election under this section (other than under subsection (d)(2) shall be made for the taxable year in which the property is placed in service.

"(B) MADE ON RETURN.—Any election under this section shall be made on the taxpayer's return of the tax imposed by this chapter for the taxable year concerned.

"(C) REVOCATION ONLY WITH CONSENT.—Any election under this section, once made, may be revoked only with the consent of the Secretary.

"(8) SPECIAL RULES FOR LEASES.—

"(A) IN GENERAL.—In the case of an agreement with respect to qualified leased property, if all of the parties to the agreement characterize such agreement as a lease and elect to have the provisions of this paragraph apply with respect to such agreement, and if the requirements of subparagraph (B) are met, then, for purposes of this subtitle—

"(i) such agreement shall be treated as a lease, and

"(ii) the lessor shall be treated as the owner of such property and as in the trade or business of leasing with respect to such property.

"(B) CERTAIN REQUIREMENTS MUST BE MET.—The requirements of this subparagraph are met if—

"(i) the lessor is—

"(I) a corporation (other than a corporation described in section 465(a)(1)(B) or (C)), or

"(II) a partnership all of the partners of which are corporations described in subclause (I),

"(ii) the minimum investment of the lessor—

"(I) at the time the property is first placed in service under the lease, and

"(II) at all times during the term of the lease,

is not less than 10 percent of the adjusted basis of such property, and

"(iii) the term of the lease (including any extensions) does not exceed the present class life of such property.

"(C) NO OTHER FACTORS TAKEN INTO ACCOUNT.—If the requirements of subparagraphs (A) and (B) are met with respect to any transaction described in subparagraph (A), no other factors shall be taken into account in making a determination as to whether subparagraph (A) (i) or (ii) applies with respect to such transaction, including but not limited to, whether—

"(i) the lessor or lessee has title to such property,

"(ii) the lessor must take the tax benefits of ownership into account in order to make a profit with respect to the transaction,

"(iii) any person other than the lessee may use such property after expiration of the lease term,

"(iv) any person has an option or obligation to buy or sell the property at a fixed or determinable price at the end of the lease term, or

"(v) the lessee (or a related party) provided financing for the transaction.

"(D) QUALIFIED LEASED PROPERTY DEFINED.—For purposes of subparagraph (A), the term 'qualified leased property' means recovery property which is—

"(i) new section 38 property (as defined in section 48(b)) of the taxpayer which is leased within 3 months after such property was placed in service and which, if acquired by the lessee, would have been new section 38 property of the lessee, or

"(ii) property—

"(I) which was new section 38 property of the lessee,

"(II) which was acquired from the lessee within 3 months of the time the property was placed in service by the lessee, and

"(III) with respect to which the purchase price paid by the lessor to the lessee does not exceed the adjusted basis of the lessee at the time of the acquisition by the lessor.

"(E) MINIMUM INVESTMENT.—

"(i) IN GENERAL.—For purposes of subparagraph (A), the term 'minimum investment' means the amount the lessor has at risk with respect to the property (other than financing from the lessee or a related party of the lessee).

"(ii) SPECIAL RULE FOR PURCHASE REQUIREMENT.—For purposes of clause (i), an agreement between the lessor and lessee requiring either or both parties to purchase or sell the qualified leased property at some price (whether or not fixed in the agreement) at the end of the lease term shall not affect the amount the lessor is treated as having at risk with respect to the property.

"(F) CHARACTERIZATION BY PARTIES.—For purposes of this paragraph, any determination as to whether a person is a lessor or property is leased shall be made on the basis of the characterization of such erson or property under the agreement described in subparagraph (A).

"(G) CROSS REFERENCE.—

"For special recapture rules in cases where lessee acquires qualified leased property, see sections 47(e) and 1245.

"(9) SHORT TAXABLE YEARS.—The application of this section to taxable years of less than 12 months shall be in accordance with regulations prescribed by the Secretary.

"(10) RRB REPLACEMENT PROPERTY.—

"(A) IN GENERAL.—In the case of RRB replacement property placed in service before January 1, 1985, the recovery deduction for the taxable year shall be, in lieu of the amount determined under this section, the amount determined by using the recovery period determined in accordance with the following table:

"If the year property is placed in service is:	The recovery period is:
1981	1
1982	2
1983	3
1984	4.

"(B) RRB REPLACEMENT PROPERTY DEFINED.—For purposes of this section, the term 'RRB replacement property' means replacement track material (including rail, ties, other track material, and ballast) installed by a railroad (including a railroad switching or terminal company) if—

"(i) the replacement is made pursuant to a scheduled program for replacement,

"(ii) the replacement is made pursuant to personnel or specific track material needing replacement,

"(iii) the replacement is made pursuant to the detection by a rail-test car of specific track material needing replacment, or

"(iv) the replacement is made as a result of a casualty.

Replacements made as a result of a casualty shall be BRE replacement property only to the extent that, in the case of each casualty, the replacement cost with respect to the replacement track material exceeds $50,000.

"(i) DEFINITIONS.—For purposes of this section—

"(1) PUBLIC UTILITY PROPERTY.—The term 'public utility property' means property described in section 167(l)(3)(A).

"(2) PRESENT CLASS LIFE.—The term 'present class life' means the class life (if any) which would be applicable with respect to any property as of January 1, 1981, under subsection (m) of section 167 (determined without regard to paragraph (4) thereof and as if the taxpayer had made an election under such subsection).

"(3) SECTION 1245 CLASS PROPERTY.—The term 'section 1245 class property' means tangible property described in section 1245(a)(3) other than subparagraphs (C) and (D).

"(4) SECTION 1250 CLASS PROPERTY.—The term 'section 1250 class property' means property described in section 1250(c) and property described in section 1245(a)(3)(C).

"(5) RESEARCH AND EXPERIMENTATION.—The term 'research and experimentation' has the same meaning as the term research or experimental has under section 174.

"(6) RBE PROPERTY DEFINED.—For purposes of this section, the term 'RBE property' means property which under the taxpayer's method of depreciation before January 1, 1981, would have been depreciated using the retirement-replacement-betterment method.

"(j) CROSS REFERENCE.—For special rules with respect to certain gain derived from disposition of recovery property, see sections 1245 and 1250.".

(b) DEPRECIATION OF REAL PROPERTY.—

(1) GENERAL RULE.—Section 167 (relating to depreciation) is amended by redesignating subsection(s) as subsection (t) and by inserting after subsection (r) the following new subsection:

"(s) METHOD OF DEPRECIATING CERTAIN REAL PROPERTY.—

"(1) IN GENERAL.—In the case of section 167(s) property, notwithstanding any other provision of this section, the depreciation allowance under subsection (a) shall be computed—

"(A) using a useful life of 15, 35, or 45 years (as selected by the taxpayer),

"(B) treating the salvage value as zero, and

"(C) under—

"(i) the straight line method, or

"(ii) if the taxpayer makes an election with respect to such property under this clause, the applicable declining balance method.

If an election under clause (ii) of subparagraph (C) is made with respect to any property, the taxpayer shall be deemed to have selected a useful life of 15 years for such property.

"(2) APPLICABLE DECLINING BALANCE METHOD.—For purposes of paragraph (1), the applicable declining balance method is—

"(A) in the case of property other than low-income housing, the declining balance method using a rate not in excess of 150 percent of the straight line rate, and

"(B) in the case of low-income housing, the declining balance method using a rate not in excess of 200 percent of the straight line rate, and

"(3) ELECTION.—An election under clause (ii) of paragraph (1)(C) with respect to any property shall be made on or before the due date prescribed by law (including extensions thereof) for filing the return under this chapter for the taxable year in which such property is placed in service. Except as provided in subsection (c), such an election, once made, shall be irrevocable.

"(4) COMPONENTS OF BUILDINGS.—

"(A) IN GENERAL.—Except as otherwise provided in this paragraph—

"(i) an election made under clause (ii) of paragraph (1)(C) with respect to any building shall apply to all components of such building, and

"(ii) no election may be made under clause (ii) of paragraph (1)(C) with respect to any component of a building unless such an election has been made with respect to such building.

"(B) TRANSITIONAL RULE.—In the case of any building placed in service by the taxpayer before January 1, 1981; for purposes of applying subparagraph (A) to components of such building placed in service after December 31, 1980, an election under clause (ii) of paragraph (1)(C) with respect to the first component placed in service after December 31, 1980 (or a failure to make such an election with respect to such first component) shall be treated as an election (or failure to make an election) with respect to such building.

"(C) EXCEPTION FOR SUBSTANTIAL IMPROVEMENTS.—

"(i) IN GENERAL.—For purposes of this paragraph, a substantial improvement shall be treated as a separate building.

"(ii) SUBSTANTIAL IMPROVEMENT.—For purposes of clause (i), the term 'substantial improvement' means the improvements added to capital account with respect to any building during any taxable year, but only if the sum of the amounts added to such account during such year equals or exceeds 25 percent of the adjusted basis of the property (determined without regard to the adjustments provided in paragraphs (2) and (3) of section 1016(a)) as of the first day of such taxable year.

"(iii) IMPROVEMENTS MUST BE MADE AFTER PROPERTY IN SERVICE FOR 3 YEARS.—For purposes of this paragraph, the term 'substantial improvement' shall not include any improvement made before the date 3 years after the building was placed in service.

"(5) DEFINITIONS.—For purposes of this subsection—

"(A) SECTION 167(s) PROPERTY.—Except as provided in subparagraph (B), the term 'section 167(s) property' means any property—

"(i) which is section 1250 property, or which is an elevator or escalator which would be section 1250 property but for subparagraph (C) or (D) of section 1245(a)(3), and

"(ii) which is placed in service after December 31, 1980.

For purposes of the preceding sentence, the determination of whether any property is (or would be) section 1250 property shall be made without regard to section 1245(a)(3)(F).

"(B) EXCEPTIONS.—The term 'section 167(s) property' shall not include—

"(i) any property for which a class life of 12½ years or less is in effect under subsection (m) as of January 1, 1981, and

"(ii) any property for which amortization (in lieu of depreciation) or for which subsection (k) is properly elected.

"(C) LOW-INCOME HOUSING.—The term 'low-income housing' means any property described in clause (i), (ii), (iii), or (iv) of section 1250(a)(1)(B).

"(D) BUILDING INCLUDES OTHER STRUCTURE.—The term 'building' includes any other structure.

"(6) SPECIAL RULES FOR FOREIGN PROPERTY.—In the case of any section 167(s) property outside the United States—

"(A) the taxpayer shall use a useful life of 35 years (in lieu of the amount provided in paragraph (1)(A)), and

"(B) the applicable declining balance method shall be the method described in paragraph (2)(A).".

(2) RECAPTURE UNDER SECTION 1245 FOR COMMERCIAL OR INDUSTRIAL STRUCTURES WHERE DECLINING BALANCE METHOD ELECTED.—Paragraph (3) of section 1245(a) (defining section 1245 property), as amended by subsection (c), is amended by striking out "or" at the end of subparagraph (E), by striking out the period at the end of subparagraph (F) and inserting in lieu thereof ", or", and by adding at the end thereof the following:

"(G) any property—

"(i) with respect to which an election under section 167(s)(1)(C)(ii) applied, and

'(ii) which is not low-income housing (as defined in section 167(s)(5)(C)) and is not residential rental property (as defined in section 167(j)(2)(B)).

If only a portion of a building (or other structure) is section 1245 property, gain from any disposition of such building (or other structure) shall be allocated first to the portion of the building (or other structure) which is section 1245 property (to the extent of the amount which may be treated as ordinary income under this section) and then to the portion of the building or other structure which is section 1250 property."

(c) SINGLE PURPOSE AGRICULTURE OR HORTICULTURAL STRUCTURES AND PETROLEUM PRODUCT STORAGE FACILITIES TREATED AS SECTION 1245 PROPERTY.—Paragraph (3) of section 1245(a) (defining section 1245 property) is amended by striking out "or" at the end of subparagraph (C), by striking out the period at the end of subparagraph (D), and by adding at the end thereof the following new subparagraphs:

"(E) a single purpose agricultural or horticultural structure (as defined in section 48(p)), or

"(F) a storage facility for petroleum or its primary products.".

(d) CLERICAL AMENDMENT.—The table of sections for part VI of subchapter B of chapter 1 is amended by inserting after the item relating to section 167 the following new item:

"Sec. 168. Accelerated cost recovery system."

On page 86, beginning with line 17, strike out all through page 87, line 16, and insert in lieu thereof the following:

"(5) SECTION 1245 RECOVERY PROPERTY.—For purposes of this section, the term 'section 1245 recovery property' means recovery property (within the meaning of section 168).".

On page 87, line 23, strike out "(f)" and insert "(h)".

On page 87, line 25, strike out "(f)" and insert "(h)".

On page 88, lines 21 and 22, strike out "(other than 15-year real property)".

On page 89, in the matter between lines 5 and 6, strike out all matter under the heading "In the case of:" and insert:

class 1 property
class 2 property
class 3 property
class 4 property.

On page 89, line 6, strike out "15-year".

On page 89, lines 7 and 8, strike out "recovery property which is 15-year real property" and insert "section 167(s) property".

On page 89, line 9, strike out "168(a)" and insert "167".

On page 89, line 17, insert "or 167(s)" after "recovery" and insert closed quotation marks and end period.

On page 89, beginning with line 18, strike out through page 90, line 2.

On page 90, line 11, insert "and 167(s)" after "recovery".

On page 90, line 13, after "168)" insert "or section 167(s) property".

On page 90, in the matter between lines 18 and 19, strike out all under the heading "In the case of:" and insert:

class 1 property
class 2 property
class 3 property
section 167(s) property
class 4 property.

On page 91, strike out lines 3, 4, and 5, and insert "such corporation in the case of section 167(s) property, the rules of section 167(s)(6) shall apply.".

On page 95, strike out lines 18 through 22, and insert:

"(A) in the case of class 2, 3, or 4 property (within the meaning of section 168(e)), 100 percent, and

"(B) in the case of class 1 property (within the meaning of section 168(c)), 60 percent.

On page 95, line 24, strike out "(3)" and insert "(10)".

On page 95, line 25, strike out "5-year" and insert "class 2".

On page 98, line 8, strike out "(g)" and insert "(1)".

On page 101, line 20, strike out "(e)" and insert "(g)".

Mr. MITCHELL. Mr. President, I have a detailed statement explaining my amendment. Before getting into my statement, I yield to my senior colleague, Mr. COHEN, who is a cosponsor of this amendment and who has another time commitment. Following his statement, I shall make a detailed explanation of this amendment.

Mr. COHEN. Mr. President, I cosponsor this amendment offered by the distinguished junior Senator from Maine.

Year after year, we pass legislation to provide benefits to businesses in order to encourage investment and productivity. In fact, this is the very purpose of the major tax reforms which we are now considering.

However, in many instances, these tax reforms and the tax code in general discriminate against smaller companies because these firms do not have the expertise to take full advantage of the benefits which it offers.

Hiring experts to assist these businesses in learning about and using these provisions is both costly and time-consuming. Because of these problems, small businesses often pay higher effective tax rates than do large businesses.

One of the most blatant examples of this problem exists in the method of accounting allowed under present law. Current law allows firms to use the LIFO, last-in, first-out, accounting method to allow firms to deal with the impact of inflation on the valuation of their inventories for income tax purposes. This is clearly a tax provision which aids businesses. However, while many larger businesses are converting to the more realistic LIFO accounting system, the vast majority of smaller businesses will not convert to LIFO—because the LIFO rules are very complex and because there are tax penalties associated with converting to the LIFO method.

In fact, the National Federation of Independent Business, in endorsing this amendment, estimated that less than 3 percent of the eligible firms use the beneficial LIFO method.

Thus, many small businesses are forced to comply with an inequitable system of inventory tax regulations, which does not accurately reflect their true inventory costs, and which actually distort their taxable income for a given year.

This amendment ameliorates the burden imposed on these businesses by making the LIFO system of accounting easier to use.

First, it would permit the tax liability for switching to the LIFO amendment to be spread over a number of years. Current law requires the entire value of inventory write-down to be treated as income in the year in which a company changes its accounting method.

Allowing businesses to spread out this write-down will reduce the penalty for switching to the LIFO method and prevent businesses from having concentrated and overstated income all in 1 year.

The amendment also significantly simplifies LIFO pooling regulations. A report by the House Committee on Small Business last year characterized the LIFO pooling requirements under present law as "a nightmare for the small businessman to understand, and as having a negative impact on capital formation."

One of the major objectives of this tax reduction bill which we are now considering is an increase in capital formation. That is the major purpose of the accelerated depreciation system included in the bill, and the purpose of many of the other business reforms in the bill.

To continue regulations under present law which inhibit capital formation for small businesses would be inconsistent with the President's economic recovery and tax reduction plan. This amendment will remove this major obstacle to increased capital formation by permitting businesses with less than $5 million in gross sales to use a single pool for LIFO accounting, and by allowing wholesalers and retailers to pool their goods according to simpler, prescribed categories in the CPI detailed report.

This amendment also allows the smallest businesses, those with sales under $500,000 in 1982, and phased in to $1 million in 1985, to use the cash accounting method. This allows these businesses to expense their inventories as they are purchased.

In this way, the tax effect mirrors the real cost of the inventory. This amendment would allow very small firms to deduct inventory costs in the years they are incurred, rather than waiting until the goods are sold. Although some argue that this is a departure from general accounting principles, it is not a novel concept.

It is currently allowed for small farms on the basis of its simplicity. For this very same reason, I believe that this accounting method can and should be allowed for a limited segment of small businesses.

This amendment—which does not increase the overall cost of this tax bill due to the offset provision—will eliminate some of these inequities of our present tax code which are imposed on small business. It will ease the administrative burdens of small businesses by simplifying inventory accounting, and aid them in dealing with the pressures of double-digit inflation and high interest rates.

I urge my colleagues to vote for this amendment as it is a good complement to the capital cost recovery provisions of the bill and will extend tax relief to the small businesses—which constitute 97 percent of all businesses in the United States today.

Mr. MITCHELL. Mr. President, my amendment will greatly simplify inventory accounting rules. Although businesses of all sizes would be affected by these changes, small businesses would be the primary beneficiaries, because they are the group most discriminated against by current law.

These proposed changes, if passed, would reform and simplify a complex part of the tax code. They would provide greater relief from the effects of inflation. They would broaden the base of the businesses affected by this tax bill.

The bill, as approved by the committee, does contain some provisions benefiting small businesses. This represents a substantial improvement over the original administration proposal, and I commend Senator DOLE for seeing that some provisions targeted to small business are included in the bill.

Yet an examination of these measures shows that an important element of the small business community will benefit little from the current version of the tax bill. Many of the targeted small business provisions are directed to capital-intensive businesses. While these provisions are important to insure that small businesses participate in the capital formation process, many other small businesses whose assets largely consist of inventories will not benefit significantly from the bill.

Most wholesalers and retailers, and even some manufacturers, fall into this category. This exclusion from coverage by the tax bill might be understandable if these firms had no legitimate concerns with their treatment in the tax system.

Yet this is not the case. Current inventory accounting practices are sorely in need of simplification and should be reformed in this bill.

The most compelling argument for inventory reform is the tendency for inflation to raise the tax liabilities of business enterprises. We are all familiar with the way that inflation affects other aspects of the tax system.

Earlier in this debate, the Senate approved an amendment that would index the tax system for the rate of inflation,

in order to prevent "bracket creep." The drive for capital gains tax reductions in 1978 was motivated by the effect inflation has in raising capital gains taxes.

Additional saving incentives are included in this bill, partly because the interaction of inflation and the tax system drastically reduces the financial rewards for saving.

Also, it is widely recognized that inflation reduces the value of depreciation deductions leading to an understatement of the cost of capital consumed in production. To offset this impact of inflation, the tax bill substantially accelerates depreciation deductions.

Unfortunately, the effect of inflation on the valuation of inventories is not well known, even though by some measures it is the most serious tax-related impact of inflation.

The most commonly used method of accounting for inventories, the first-in, first-out, or FIFO method, usually results in an understatement of the cost of goods sold by a firm. FIFO bases the cost of goods sold on the price of goods acquired first by the firm.

During times of inflation, these prices fall short of the replacement costs of the firm's inventory. Consequently, when the cost of goods sold is understated, taxable income and therefore tax liability are overstated.

Inadequate inventory accounting has actually had a more significant impact than inadequate depreciation accounting on taxable income in each year for the last two decades. In 1978 and 1979, for example, inadequate inventory accounting added $25.2 and $42.6 billion, respectively, to taxable profits. Inadequate depreciation accounting added $12.6 and $15.7 billion to taxable income in the same 2 years.

What makes these figures even more alarming is that inventories comprise a smaller portion of total assets than do capital assets. In 1978, corporate structures and equipment were valued at $1.4 trillion, while the value of corporate inventories was $0.4 trillion.

Businesses do have an opportunity to avoid this overtaxation by adopting the last-in first-out, or LIFO, method of accounting. LIFO is not used very widely, however. This leads to another argument for reforming inventory accounting rules, which is that present LIFO rules are too complex for most businesses, particularly small ones, to adopt.

In spite of the substantial tax benefits that result from electing LIFO, only a small percentage of firms use LIFO. In 1976, for example, 3.7 percent of manufacturers, 2.5 percent of wholesalers, and 1.3 percent of retailers used LIFO.

Although the same rules apply to all firms, LIFO accounting creates the greatest administrative burden on small businesses because they tend not to have the resources to handle complex bookkeeping.

In my amendment, I have attempted to identify the greatest barriers to adopting LIFO and to devise appropriate solutions.

First, my amendment addresses the initial penalty associated with adopting LIFO. Under LIFO, the taxpayer may value his inventory at market value if this is less than the cost of the inventory. When electing LIFO, the taxpayer must restate the inventory at full cost. This causes the taxpayer to increase his taxable income to reflect any write-downs of inventory taken in prior years.

As a result, the taxpayer incurs an additional tax bill which must be paid immediately.

This penalty runs counter to the purposes of electing LIFO, which are to increase cash flow and to implement a hedge against the effect of inflation on the replacement cost on inventories. Unfortunately, these long-term benefits often give way to the prospect of a higher initial tax bill.

My amendment would address this problem by allowing firms that elect LIFO to spread out their higher tax bill over 5 years. This 5-year spread is similar to other provisions in the tax code. This type of averaging has been recommended by the American Institute of Certified Public Accountants.

Second, my amendment would simplify LIFO pooling regulations. Under LIFO, a firm's inventory is divided into pools. For retailers and wholesalers, pools must reflect major lines, classes or types of goods. Manufacturers may use a single pool for each natural business unit. The value of a firm's total inventory is determined by adding the value of each of the firm's pools.

Pooling requirements can have a significant impact on businesses. Several pools entail a significant bookkeeping burden. Also, the greater number of pools, the more likely it is that inventory liquidation will take place.

When inventory is liquidated, or reduced, lower costs are included in the business' cost of goods sold. This will result in a higher taxable income and a greater tax liability for businesses.

For example, a retailer decides to sell his inventory of cotton shirts and replace them with an equal number of nylon shirts. If cotton and nylon shirts are in different pools, the tax law treats the sale of cotton shirts as a liquidation. In other words, the retailer would realize taxable income even though there was no decrease in the number of shirts in the inventory. If cotton and nylon shirts are in the same pool, there is no liquidation or realization of income.

My amendment would introduce two changes in LIFO pooling requirements. The first would allow businesses with less than $5 million in gross receipts to use one pool. This is a major simplification which recognizes the limited accounting resources of small businesses.

Also, as long as a business maintains a contant dollar value in inventory, it will not face the possibility of inventory liquidations.

The second change would allow wholesalers and retailers to pool their goods according to general expenditure categories for consumer goods in the consumer price index. This change would put the number of pools required of wholesalers and retailers more in line with that required of manufacturers.

Third, my amendment would reform current indexing requirements. For each pool, a firm's inventory must be valued at both current year prices and at prices during the year in which the firm elected LIFO, often referred to as the base year. An index is necessary to deflate the current year value to the base year value.

Only department stores are currently allowed to use published price indexes. All other businesses must generate their own indexes. This is an expensive and complicated procedure, often requiring sophisticated computer techniques. For small firms, this often represents an insurmountable burden.

Furthermore, certain types of internally generated indexes are subject to challenge by the IRS, creating tremendous uncertainty for businesses that elect these indexes.

My amendment proposes a dual solution to this indexing problem: Businesses would be able to use the change in the components in either the Consumer Price Index, or the producer price index for their categories of inventory. And they could use certain internally generated indexes without showing that other methods of indexing are unsuitable.

Fourth, my amendment would delay the effective date of the LIFO recapture provision approved as part of the crude oil windfall profit tax of 1980.

This provision requires that the benefit of LIFO inventory accounting be recaptured as ordinary income when a corporation liquidates LIFO inventory. This provision is scheduled to affect liquidation plans taking effect after December 31, 1981.

This effective date was adopted in order to give Congress time to study the effects of this recapture. No such study has yet occurred. Therefore, my amendment would delay the effective date until after December 31, 1982.

Fifth, my amendment would also permit the use of cash accounting for certain small businesses. These businesses would have to have a sales level of $500,000 or less and would have to be engaged in wholesale or retail trade.

In this amendment, cash accounting is being presented as an alternative to either LIFO or FIFO. LIFO and FIFO are forms of accrual accounting, which require that expenses be matched with the gross income in the period in which it is earned. Cash accounting requires no such matching. Rather, businesses would be able to deduct the cost of all goods purchased during the year, regardless of whether or not they were sold. This eliminates the need for inventory accounting.

LIFO and cash accounting both serve similar purposes. They provide businesses with a reduction in taxes during periods of inflation.

Simplified LIFO is directed at those firms that require some accounting for inventories for their own business purposes and also have the resources necessary to adopt LIFO. Yet even simplified LIFO is too complex for many small businesses that handle their own bookkeeping. For this group, cash accounting is a much more simple and familiar method of accounting.

This provision parallels another provision included in this tax bill. Under the capital cost recovery section, businesses would be allowed a limited ex-

pensing option for equipment. Businesses would be able to write off up to $5,000 for investment immediately in 1982, rising to $10,000 in 1985. One purpose of this limited expensing option is to free small businesses from needless calculations and bookkeeping requirements.

In the same way, this provision allows small businesses to expense the cost of goods they acquire for sale during a given year. In other words, inventory intensive businesses would be given the same benefit that capital intensive businesses are.

The Tax Code already acknowledges the desirability of the cash method of accounting. In 1976, Congress adopted a provision allowing farms with gross sales under $1 million to use the cash method. When this provision was adopted, the simplification of switching to cash accounting was cited as the major reason.

My amendment would simply apply this logic to all small businesses.

My amendment has broad-based support within the small business community. A list of the groups endorsing these proposals indicates the diversity of interest that this amendment serves:

National Federation of Independent Businesses;

National Association of Wholesale Distributors;

National Automobile Dealers Association;

National-American Wholesale Grocers' Association;

Food Marketing Institute;

National Shoe Retailers;

Jewelers of America;

National Home Furnishing Association; and

National Retail Dealers Association.

This issue is not new to Congress either. Problems that small businesses have with inventory valuation were first raised in hearings before the Finance Committee in 1975. In 1978, the Senate Small Business Committee included cash accounting in its tax policy recommendations to the White House. This year, small business groups endorsed simplification of inventory accounting before the Finance Committee hearings on the President's tax program.

Cash accounting has also received strong bipartisan support. This measure is included in S. 360, the Omnibus Small Business Capital Formation Act. S. 360 has 25 cosponsors with 9 Democrats and 16 Republicans.

Although I believe that these inventory simplification measures should pass on their own merits, I recognize the need to hold down the total revenue loss of the bill. Therefore, I have included another provision in my amendment that would offset the revenue loss of the inventory accounting reform.

This provision would simplify the method that businesses use to account for their depreciation deductions. Under the committee bill, a firm must have a separate account for each asset that is acquired. For example, a 5-year asset and a 3-year asset acquired in the same year would be placed in separate accounts.

Similarly, a 3-year asset acquired in 1981 would be placed in a separate account from a 3-year asset acquired in 1982.

My amendment would replace this asset-by-asset accounting with an open-ended account system for personal property. Under this system, assets with the same recovery period would be placed in the same account regardless of the year in which each asset is acquired. Thus, most businesses would have only two accounts for personal property, one for the 3-year assets and one for 5-year assets.

An open-account system would be a substantial improvement over asset-by-asset accounting. The calculation of depreciation deductions is easier, as the necessary computations would be performed on fewer accounts.

Furthermore, the treatment of dispositions of assets is much more complex under asset-by-asset accounting than it is under an open-ended system. Under the former system, the adjusted basis of each asset would have to be determined in establishing the gain or loss on the disposition of an asset.

Under open-ended accounting, in general there is no gain or loss recognized on the disposition of an asset. Rather, the proceeds from the sale of an asset are subtracted from the balance of the account.

The advantages of open-ended accounting were well-stated by the American Institute for Certified Public Accountants, which endorsed the proposal by stating:

> Adopting the pooled-account concept [an open-ended account system] offers a great deal of simplicity in operation. Not only are the accounting procedures relatively easy to understand and apply, but the handling of dispositions of property is greatly simplified. Of all the alternatives considered, this approach would be the simplest in operation.

That is from the Statement of Tax Policy No. 7, "Analysis of Capital Cost Recovery Proposals," pages 24–25.

The advantages of this type of accounting were recognized by the Finance Committee last year when that committee included open-ended accounting as part of their depreciation reform proposals, and that was adopted by the Finance Committee last year by a vote of 19 to 1. Also, this system has been implemented successfully in the Canadian tax system.

My amendment simplifies depreciation accounting without appreciably affecting the incentives to invest. The mechanisms of open account, therefore, produce a smaller revenue loss than the committee's bill.

This is an appropriate offset for the revenue loss of the inventory accounting measures. The amendment, taken as a whole, provides enormous simplification benefits for small businesses, both in their accounting for depreciable assets and in their accounting for inventories.

In summary, Mr. President, my amendment offers the opportunity to simplify a very complex portion of existing law. By simplifying inventory accounting, Congress would provide greater access to those accounting methods that provide relief from inflation for small businesses, and it is small businesses that need help just as much, indeed more, than the large capital-intensive corporations in the country. Furthermore, my amendment would extend important tax relief to a sector of the economy that currently does not stand to benefit greatly from this tax bill.

We have often been told that our tax system is so outdated that during periods of high inflation it produces inequitable and inefficient results and that is a true statement, but in that process, too little attention has been given to the effect of inflation on inventory accounting and the effect that has on small businesses. My amendment would rectify this wrong and I urge its approval by the Senate.

Thank you, Mr. President.

Mr. BENTSEN. Mr. President, will the Senator yield 2 minutes to the Senator from Texas?

Mr. MITCHELL. The Senator yields to the Senator from Texas.

Mr. BENTSEN. Mr. President, first let me congratulate the Senator from Maine on this amendment. I think he brings up a very important issue.

As I stated in my additional remarks, filed with the committee report, the tax bill in its current form does not do enough spur productivity within the small business sector of our economy. The importance of small business is clear, it employs 60 percent of all workers and accounts for 70 percent of all new jobs being created in our economy.

The magnitude of the problems relating to inventory accounting and their disproportionate impact on small business may not be well known.

In Texas, nearly one-half of the businesses must maintain an inventory. To the individual businessman this means using the accrual method of accounting instead of the simpler cash method. Further, the businessman must choose between the FIFO or LIFO inventory accounting method. The FIFO method is simpler but does not accrue a significant tax benefit for the businessman as does the LIFO method.

So we take some of the sting out of it and let them adjust to that fact. Is that not correct?

Mr. MITCHELL. The Senator is correct.

Mr. BENTSEN. Mr. President, as with depreciation, we are finding that inflation and complexity of the law are working together to distort the tax liabilities of business enterprises. The problem is most acute to small businessmen who have very little capital investment but high inventory cost.

Further, the so-called pooling and indices requirements under LIFO accounting compound the problems for the company that cannot afford the largest accounting firms.

For example, in 1978 there was 3.5 times as much corporate investment in depreciable property as compared to inventory.

However, in that same year depreciation allowances were understated by $12.6 billion while inventory costs were understated by $25.2 billion.

The 10–5–3 depreciation reform adopted by the committee will go a long

way toward insuring the capital costs are not understated. However, 10–5–3, while helping some small businesses primarily helps the larger capital intensive companies—the Fortune 500 on Wall Street.

Our inventory reform proposal will help the small business, the local groceries, clothing stores, lumber dealers, office supply stores, farm equipment sellers, home appliance stores, bookstores, pharmacies and many others. This is not a proposal for Wall Street but for Main Street.

This proposal is necessary, is consistent with the President's economic objectives for 1981 and I encourage all of my colleagues to support this amendment.

Mr. FORD. Mr. President, will the Senator from Maine yield me 60 seconds?

Mr. MITCHELL. I yield to the Senator from Kentucky.

Mr. FORD. Mr. President, this tax bill provides substantial and meaningful tax reduction for American business in the form of accelerated capital cost recovery. I strongly support this effort and I think it necessary to encourage the capital investment that will increase productivity and make America prosper.

However, a substantial segment of the business community is not reached by the accelerated capital cost recovery provisions. The smaller firms in this country who have limited funds tied up in high inventory costs cannot take advantage of the business tax reductions in this bill. There are approximately 27,000 firms in my State alone—some 46 percent of all Kentucky businesses—that are considered inventory intensive firms. They are the main street retailers, wholesalers, and small manufacturers that create most of the new jobs and innovations in this Nation. They are the embodiment of our free enterprise system in America but are being devastated today by inflation and high interest rates.

The cost of holding inventory is a function of the cost of money. And at today's historically high interest rates, this means the small businessman pays an additional premium every day he holds inventory. This bad situation is made worse by inflation, which in a cash accounting system, causes the overvaluation of inventory and the overtaxation of profits.

The inventory reform amendment that the Senator from Maine is offering today will provide needed relief, from high interest rates and inflation, to small inventory intensive firms. It will allow them to switch to a cash method of accounting so that inventory may be expensed as it is purchased.

And it will make it easier for small businesses to utilize a last-in-first-out inventory accounting system so that reported inventory costs will be more relevant to actual replacement costs. The amendment facilitates this changeover by reducing the tax penalty for LIFO election, simplfying LIFO pooling rules, and liberalizing LIFO regulations governing price indexing.

Existing inventory accounting law clearly discriminates against small business. To compensate for the rising value of inventory, the Internal Revenue Code allows businesses to switch from a first-in-first-out accounting system to a last-in-first-out system.

However, LIFO rules are so complex and expensive to utilize that small businesses are, in effect, foreclosed from utilizing them. By simplfying LIFO rules, this amendment will put small businesses on an equal footing with larger businesses. This is not a special favor for small business; it is, rather, a neutralization of the built-in bias in current law.

Mr. President, this is a monumental tax bill; it provides for the largest tax reduction in history and puts the Federal Government back in the right direction of fostering free enterprise and economic growth. However, it fails to direct its benefits toward a substantial segment of the economy; toward those small businesses that carry heavy inventory burdens. The inventory reform package that I am cosponsoring today corrects that oversight; it provides needed relief to small business and I urge this body to vote its approval.

I thank the distinguished Senator from Maine for allowing me this time and again congratulate him on the proposal of this amendment of which I am a cosponsor.

Mr. MATSUNAGA. Mr. President, will the Senator from Maine yield?

Mr. MITCHELL. I will yield but first I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. MITCHELL. I yield to the Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that I be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATSUNAGA. Mr. President, I rise in strong support of the amendment proposed by the distinguished Senator from Maine. I congratulate him for the leadership he has taken in this area.

For too long small business has played a major role in the economy of our country and not been recognized for that role which it has played. This amendment will to a degree provide that long overlooked recognition to that most important segment of our national economy—small business.

I urge the adoption of the Mitchell amendment.

I congratulate the Senator from Maine for offering this worthwhile amendment.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, I rise in opposition to the amendment. We have a number of provisions in this bill with reference to small business. We have lower graduated rates—the bottom two brackets are reduced 2 percentage points. We have the used property limitations for the investment tax credit changed from $100,000 to $150,000.

We allow expensing of up to $10,000; we increase the number of subchapter S shareholders to 25, and allow certain trusts to be eligible shareholders. I think the biggest changes, insofar as small businesses are concerned, are all the provisions in reference to estate and gift tax reductions and, of course, the individual rate cuts which go up into the billions and billions of dollars, along with business cuts.

We are now presented with an amendment which, without the offset, would cost $600 million in 1982, $1.7 billion in 1983; $1.5 billion in 1984; $1.6 billion in 1985; and $1.7 billion in 1986, fiscal year 1986.

I understand this is paid for, but it is paid for at the expense of all the business people. So I think we ought to understand how we pay for this.

It is paid for by changing the depreciation rates for all businesses, by reducing depreciation so that in 1981 and 1982 only 140 percent declining balance depreciation rather than 150 percent declining balance is used.

Also, the depreciation method proposed by the distinguished Senator from Maine does not allow the taxpayer to switch to the straight line method, so the full costs of the assets will not be written off in 5 years. This change now will cost all the businesses $200 million in 1981, $500 million in 1982; about $600 million in 1983; $2.1 billion in 1984; $1.8 billion in 1985; and $5.7 billion in 1986.

So I suggest, and I agree with those who have spoken, that the Senator from Maine played a vital role in the discussion and the amendment of this bill in the Senate Finance Committee. Some of the proposals now before the Senate were in last year's bill passed by the Senate Finance Committee. But, of course, other provisions were not. There are some in this bill now before us that were not in last year's Senate Finance Committee's bill.

In the case this Senator knows that one of the backers of this amendment, the National Federation of Independent Businesses, has indicated at the White House that they support the President, they are for the President's program.

It would seem to me—and I do not quarrel with their coming to the Hill and trying to get all they can from the President and all they can from Congress—that we are again considering changing a basic portion of the President's program. I guess we can say we have paid for it, we have taken it from someone else. I just hope that this amendment can be defeated.

We are in the home stretch as far as this Senator is concerned in the consideration of this bill. We have now been on the tax bill in the Senate for 9 days, and we have considered literally, I would suppose, 60, 70, 80 amendments up to this time, and we have been able to accommodate some of those amendments. Some we cannot. This is one that, as far as I know, we were not asked to try to negotiate and, or to devise the way to pay for it. I do not quarrel with somebody's suggesting they are going to pay for an amendment. But I think the Members should know how it is paid for so that when they vote for "small business" they know it is coming out of another portion that affects business.

With reference to cash accounting, as I understand, just reviewing what we have on the House side, the Ways and

Means Committee bill will provide for a study with reference to cash accounting.

In the so-called Hance-Conable substitute there are some provisions on LIFO. I am not certain I can spell those out. There are some LIFO provisions in that amendment.

I would say with reference to cash accounting, and I can understand why some prefer cash accounting, but it is a very expensive proposition. It does allow taxpayers to reduce their income at year-end by buying more inventory than they would otherwise buy.

There are some who indicate this might be dangerous because it requires the payment of unnecessary carrying and storage costs for the additional inventory.

If, in fact, the taxpayer's business enters into a temporary downturn, he will reduce his purchases and sell off part of his inventory. Since the cost of the inventory has already been deducted, there will be no deduction against the gross sales price. Thus, the taxpayer will pay a tax on the full sales price without deduction for the cost of the goods sold, at a time when there is a downturn in business.

Since taxpayers may receive a deduction for merely purchasing an asset, there is a possibility that the purchase of inventories for high bracket taxpayers may develop into a new tax shelter. Although there are some attempts in the amendment to safeguard against this potential abuse, they are generally not perceived to be effective. For the reasons stated, I hope this amendment will be rejected.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senator from Tennessee (Mr. SASSER) be added as a cosponsor of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I would just like to say that the issue on this amendment is whether or not we are, in this tax bill, going to make some provision for small businesses, retailers, wholesalers, and others.

Now it is true, as the chairman has said, that there are some provisions in this bill for small businesses. I noted that in my opening statement, and I thank the chairman of the Finance Committee, the distinguished Senator from Kansas, for his courtesy and consideration of those small businesses.

But if you look at this bill as a whole, this bill takes care of large capital-intensive corporations. This bill takes care of General Motors and United States Steel and other corporations like that. But for the small business, the druggist on Main Street, the retail store on Main Street, in small towns all over this country, and not thousands of them but hundreds of thousands of them, they are not getting the benefit they need and deserve in inventory accounting reform.

Every argument made before the Finance Committee, every argument made on the floor of this Senate in behalf of depreciation reform applies with even greater force to inventory accounting reform, and that is the area that small business tends to be located in. They do not have large investments in equipment. They have large investments in inventory.

The fellow on Main Street who sells clothes and has a lot of shirts, suits, and pants in his store; the druggist, the wholesaler, the distributor, the retailer, those are the people who are not getting the benefit from depreciation reform. Those are the people who need and deserve the kind of help this amendment provides.

It is a question of whether or not this tax bill is going to be oriented primarily toward large capital-intensive corporations or whether or not we are for once going to say, "The small man, although he does not have the size, the resources to make his voice heard as clearly or as insistently as the large corporations, is going to receive the consideration by this Senate."

I hope very much that Senators will recognize this as the issue. I urge the Senate to approve this amendment and to provide meaningful inventory accounting reform to the hundreds of thousands of small business men and women throughout this country who need and deserve this kind of assistance.

I reserve the remainder of my time, Mr. President.

Mr. DOLE. Mr. President, I suggest the absence of a quorum and ask that the time be charged against my time.

Mr. MITCHELL. I am prepared to vote if the Senator will vote now.

Mr. DOLE. There may be one more speaker. Let me check. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CHAFEE. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. HAWKINS). Without objection, it is so ordered.

Mr. CHAFEE. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. DOLE. Madam President, I suggest that it be taken from the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Madam President, if the pending amendment were temporarily laid aside to permit the distinguished Senator from Colorado to make a statement, it would come back after he finished that statement; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. Is that satisfactory?

Mr. MITCHELL. That is satisfactory.

Mr. DOLE. Then I ask unanimous consent that the Mitchell amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 304

(Purpose: To impose a tax on the importation of crude oil and refined petroleum products, to transfer the revenues from such tax, and from any oil import fee imposed by the President, to the Social Security Trust Fund, and to reduce social security taxes; and to expand lower income energy assistance)

Mr. HART. Madam President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Colorado (Mr. HART) for himself and Mr. BRADLEY, proposes an unprinted amendment numbered 304.

Mr. HART. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 161, between lines 3 and 4, insert the following:

SEC. 243. EXCISE TAX ON IMPORTED CRUDE OIL.

(a) IN GENERAL.—Subtitle E (relating to alcohol, tobacco, and certain other excise taxes) is amended by adding at the end thereof the following new chapter:

"CHAPTER 54—IMPORTED CRUDE OIL AND PRODUCTS THEREOF

"Sec. 5881. Imposition of tax.
"Sec. 5882. Definitions.
"Sec. 5883. Registration.
"Sec. 5884. Procedures; returns; penalties.

"SEC. 5881. IMPOSITION OF TAX.

"(a) IMPOSITION OF TAX.—In addition to any other tax imposed under this title, an excise tax is hereby imposed on imported crude oil (and products thereof) which is sold in the United States.

"(b) RATE OF TAX.

"(1) INITIAL RATE.—The tax imposed by subsection (a) shall be imposed at the rate of $10 per barrel.

"(2) PRESIDENTIAL AUTHORITY TO INCREASE RATE.—If the President determines that it is necessary to increase the rate of the tax imposed by subsection (a) in order to promote sufficient domestic energy conservation and domestic energy production to enable the United States to end the importation of crude oil by January 1, 1990, he may, after notifying the Congress of his determination and the reasons therefor, increase the rate of tax under paragraph (1) to a rate not greater than $30 per barrel. No such increase may take effect less than 30 calendar days after the date on which the President notifies the Congress of his determination.

"(c) TAX PAID BY IMPORTER.—The tax imposed by this section shall be paid by the importer of the crude oil.

"(d) FRACTIONAL PARTS OF BARRELS.—In the case of a fraction of a barrel, the tax imposed by subsection (a) shall be the same fraction of the amount of such tax imposed on the whole barrel.

"(e) REFINED PRODUCTS.—

"(1) REFINING BEGUN BEFORE SALE.—If the manufacture or conversion of imported crude oil into refined products begins before such oil is sold, the oil shall be treated as sold on the day on which such manufacture or conversion begins.

"(2) APPLICATION OF TAX TO REFINED PRODUCTS.—

"(A) IN GENERAL.—In the case of a refined product of imported crude oil, the tax imposed by subsection (a) shall be determined by multiplying the rate applicable under subsection (b) by the barrel-of-oil equivalent of the product attributable to imported crude oil.

"(B) BARREL-OF-OIL EQUIVALENT.—For purposes of subparagraph (A), the term 'barrel-of-oil equivalent' means 5.8 million Btu.

"(C) REFINED PRODUCT.—For purposes of subparagraph (A), the term 'refined product' means only refined oil, fuels, and chemical feedstocks.

"SEC. 5882. DEFINITIONS.

"For purposes of this chapter—

"(1) IMPORTED CRUDE OIL.—The term 'imported crude oil' means crude oil other than domestic crude oil (within the meaning of chapter 45).

"(2) BARREL.—The term 'barrel' means 42 United States gallons.

"SEC. 5883. REGISTRATION.

"Every person subject to tax under section 5881 shall, before incurring any liability for tax under such section, register with the Secretary.

"SEC. 5884. PROCEDURES; RETURNS; PENALTIES.

"For purposes of this title, any reference (other than in chapter 45 or section 6429) to the tax imposed by section 4986 shall be treated, except to the extent provided by the Secretary by regulation where such treatment would be inappropriate, as a reference to the tax imposed by section 5881.".

(b) CLERICAL AMENDMENT.—The table of chapters for subtitle E is amended by adding at the end thereof the following new item:

"Chapter 54. IMPORTED CRUDE OIL AND PRODUCTS THEREOF.".

(c) DEDUCTIBILITY OF IMPORTED CRUDE OIL TAX.—The first sentence of section 164(a) (relating to deduction for taxes) is amended by inserting after paragraph (5) the following new paragraph:

"(6) The imported crude oil tax imposed by section 5881.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to sales of imported crude oil or products thereof in calendar quarters beginning more than 30 days after the date of enactment of this Act.

SEC. 244. TRANSFER OF REVENUES TO SOCIAL SECURITY TRUST FUND.

Section 201(a) of the Social Security Act (42 U.S.C. 401(a)) is amended—

(1) by striking out the period at the end of clause (4) and inserting in lieu thereof a semicolon and "and",

(2) by inserting immediately after clause (4) the following new clause:

"(5) the sum of—

"(A) the tax imposed by section 5881 of the Internal Revenue Code of 1954 with respect to imported crude oil and products thereof, and

"(B) any fee imposed by the President under section 232(b) of the Trade Expansion Act of 1962 (19 U.S.C. 1862) to adjust imports of petroleum or petroleum products.", and

(3) by striking out "clauses (3) and (4)" each place it appears in the last sentence and inserting in lieu thereof "clauses (3), (4), and (5)".

SEC. 245. REDUCTION OF SOCIAL SECURITY TAX RATE.

Notwithstanding any other provision of law to the contrary, the Secretary of the Treasury shall, from time to time, reduce—

(1) the rates of tax imposed by sections 3101(a) and 3111(a) of the Internal Revenue Code of 1954 (relating to old-age, survivors, and disability insurance), and

(2) the rate of tax imposed by section 1401(a) of such Code (relating to old-age, survivors, and disability insurance),

to the extent necessary to reduce the net revenue attributable to the taxes imposed by such sections for fiscal years beginning after the date of enactment of this Act by the net revenues from the tax imposed by section 5881 of such Code, or from any fee imposed by the President under section 232(b) of the Trade Expansion Act of 1962 (19 U.S.C. 1862) to adjust imports of petroleum or petroleum products, for such fiscal years. The rates of tax imposed by such sections, as reduced by the Secretary under the preceding sentence, shall be treated as the rates in effect for such sections for the periods designated by the Secretary at the time of such reductions.

SEC. 246. AID TO LOWER INCOME INDIVIDUALS ADVERSELY AFFECTED BY INCREASED ENERGY COSTS.

There is authorized to be appropriated to the President for the purpose of providing or increasing funding for any program of the United States under which financial assistance (including loans and loan guarantees) is provided to lower income individuals and families adversely affected by increased energy costs, an amount not in excess of $2,000,000,000 for each fiscal year beginning after the date of enactment of this Act. Amounts appropriated pursuant to the preceding sentence shall be obligated or expended only in connection with such programs as may be provided for by law.

Mr. HART. Madam President, even after the painful experience of the 1970's, the United States remains dangerously dependent on Middle East oil. Today, after three supply interruptions and numerous price shocks, we import about 40 percent of our petroleum requirement. We rank as OPEC's largest single customer, taking nearly a quarter of OPEC's entire production.

This excessive dependence on imported oil constitutes a clear danger to the strength and security of the United States. In terms of the economy, excessive dependence on imported oil means more inflation, more unemployment, and a much lower level of real economic output. Excessive dependence on imported oil also imposes severe constraints on American foreign policy and threatens to engage the United States in a war in the Persian Gulf.

The 1980's promise to bring more supply interruptions and further price shocks. The world oil market is now soft due to excessive Saudi oil production, sluggish economic growth in the West, and the impressive conservation efforts undertaken by the oil importing nations since oil prices doubled in 1979. But market conditions could change quickly. More importantly, the so-called "X" factor persists—the revolution, the coup, the war, or the freak accident that could suddenly interrupt oil supplies and bring higher prices.

To prepare for this uncertain future, the United States must develop an energy security strategy. Our Nation needs a strategy designed to alleviate the economic damage caused by supply interruptions in the short-term while reducing Western vulnerability over the course of the eighties.

Today, I am proposing the imposition of a fee on imports of crude oil and refined products. This fee is warranted on both economic and security grounds as a reasonable and efficient way to reduce the level of American oil imports. Working through the price mechanism, the import fee will encourage cutbacks in domestic oil demand which in turn will help to prevent future price increases. Moreover, by holding down energy prices we can minimize the inflationary drag of high oil prices on long-run economic growth. In addition, the oil import fee will reduce the transfer of national income from the United States to oil-producing states and thus improve our balance of payments.

An oil import fee will also enhance our national security. By reducing our dependence on foreign oil, we decrease our vulnerability to future oil supply interruptions. Furthermore, enactment of this proposal will send an unmistakable message to other oil-consuming nations and to OPEC producers of both our willingness and ability to curb our demand for foreign oil. This message will tell the oil exporters that they cannot continue to ratchet up oil prices.

Energy analysts estimate a $10-per-barrel import fee would lead directly to import savings of at least a half million barrels per day over the next 2 or 3 years. More importantly, the import fee would increase oil prices and thereby encourage greater energy efficiency and more substitution of other fuels for oil.

Of course, although an oil import fee encourages import reductions, it will impose certain economic costs. Therefore, in this amendment, I am also proposing to rebate all of the revenues collected under the import fee to taxpayers through reductions in social security taxes. This provision should mitigate any loss of consumer purchasing power induced by the oil import fee.

America's energy problem is clear—an unnecessary, excessive, and dangerous dependence on foreign oil. In spite of oil price decontrol and the response of international oil markets to substantially higher prices, the United States remains dangerously dependent on OPEC oil supplies. Moreover, recent forecasts—including those of the Reagan administration—indicate that under current policies the United States will remain heavily dependent on foreign oil, importing approximately 5 million barrels per day in 1990.

The United States cannot afford to remain dependent on imported oil. The inherent dangers are simply too great.

Just consider the situation in the Middle East today.

While some energy analysts, commentators, and public officials dismiss as alarmists those individuals who point out the dangers of our continued dependence on foreign oil, Iran stands on the verge of political collapse.

While the Reagan administration submits a national energy plan to Congress which includes no oil import reduction program, Israel and Syria grow more entangled in an immediate crisis.

While the Congress cuts back appropriations for a range of energy programs designed to lessen our dependence on foreign oil, Saudi Arabia and other OPEC

members contemplate the advantage of sharply reducing the level of their oil exports to avoid the sort of social discontent which undermined the shah's regime.

Without doubt, even during the current oil glut, the oil supply system remains a crisis-prone system. To restore the strength of our economy, to insure the integrity of our foreign policy, and to enhance our national security, it is imperative that the United States reduce the level of its oil imports. What is more, we should take advantage of the respite offered by current market conditions, when cooler heads can prevail, to agree on a comprehensive oil import reduction program.

The imposition of an oil import fee would represent an important step toward the achievement of our energy independence. Together with efforts to improve the energy-efficiency of the American economy and to increase domestic production of conventional fuels and renewables, an oil import fee can enable our nation to attain greater energy sufficency.

Madam President, I am prepared to yield to the distinguished Senator from West Virginia.

Mr. RANDOLPH. Madam President, the amendment proposed by the able Senator from Colorado is in no sense a shadowboxing. It has substance. It has validity.

I hope it is understood for me to recall the efforts I made in the 1940's when over and over again in speeches, magazine articles, and work in the House of Representatives, I tried to tell the American people that we were in a position where we were going to rely on petroleum from overseas countries that would be unstable and, perhaps, even unfriendly to the United States of America.

I am sure the Senator, who is versed in this subject matter, knows that what I said then was true, and what has happened makes it even more a part of his cogent argument.

In the 1940's we attempted to have an alternate fuels program. It came into being and was signed into law by Franklin Roosevelt in 1944.

I remember that when the program started we were in your State, Senator HART, with a pilot project at Rifle using the shale as one of those alternatives to the petroleum that had been coming into the United States even before World War II.

When World War II was over we went back to doing business as usual. We learned no lesson, even though we were not the mobile country then that we are now, in any degree. What happencd? Our country so very often is a country that acts after the fact rather than before the fact.

The U-boats along our eastern and New England waters, went home and we went back to doing business as usual.

Americans failed to read the signs of the times, and the signs of the times then were very real. Frankly, they are more real today. We march up the hill so often—but do not remain on that mountaintop of responsibility.

I trust the amendment will appeal to Members of the Senate. It is grounded in reality and, if agreeable to the Senator, I would like to join with Senator BRADLEY and his associate in sponsorship.

The OPEC oil embargo of 1973 and 1974 brought home to every American the extent of our dangerous dependence on foreign nations for much of the oil that fuels our economy.

Since then, the price of imported oil has increased 10 times. The price of an imported barrel of crude oil has climbed 1,600 percent over the past 10 years. We send nearly $100 billion abroad each year to purchase the 8.5 million barrels of oil we import each and every day.

Other nations are even more dependent on oil imports for their energy than is the United States. We rely on imports for 50 percent of the oil we consume. This dependence has both strategic and economic consequences for Americans.

Recent events in Iraq, Iran, and Afghanistan have underscored the political instability of the area around the Persian Gulf. Half the world's oil exports travel through the Strait of Hormuz, the narrow passage at the neck of the Gulf. Insuring the stability of that region is a central strategic concern of all nations whose economies depend on oil.

The repeated price increases of imported oil have contributed to the unprecedented inflation now weakening the economy. The lesson of the OPEC embargo and subsequent events is clear. America must reduce its dependence on imported oil. There is no single solution. But America's vast domestic coal reserves serving as a base feedstock for a synthetic fuels industry heavily involved in gasification and liquefaction will play the principal role in our belated, but not serious efforts to achieve energy independence.

We have demonstrated a national preoccupation with minimizing the short-term effects of inadequate domestic energy supplies while failing to forge a policy to solve longer term problems.

Recognizing this fact, the Synthetic Liquid Fuels Act of 1944 was introduced and passed. This legislation again mandated development of new technology to produce ethanol, methanol, and other liquid fuels from coal, oil shale, and agricultural products.

In 1955, the decision was made by the then current administration to eliminate all Government participation in alternate synthetic fuels projects. The assumption was that if needed, private industry would anticipate and respond so that the country would have adequate fuel supplies. The assumption, of course, was incorrect. If we had continued Government support for synthetic fuels initiated in the early forties, as in my bill, we would have realized domestic commercial production today.

This amendment will act as an incentive to accelerating our development of synthetic fuels, as a disincentive to importing foreign oil—while assuring that the money spent on imported fuel will at least have the partial domestic benefit of helping to insure the integrity of our social security system.

Mr. HART. Madam President, before responding, I ask unanimous consent that the distinguished Senator from West Virginia (Mr. RANDOLPH) be added as a cosponsor.

The PRESIDING OFFICER (Mrs. HAWKINS). Without objection, it is so ordered.

Mr. HART. The Senator from Colorado would like to hear what response the distinguished chairman of the Finance Committee might have to this proposal.

This is a controversial and somewhat novel measure although I have supported it for 3 years.

As a principal sponsor, I am undecided as to whether to take the matter to a vote. But I would like to respond briefly to the remarks of the Senator from West Virginia before yielding to my principal cosponsor.

We hear a lot about political leadership these days and very little definition of what that means. But the Senator from West Virginia, on many issues, but particularly on this issue has demonstrated two qualities of leadership that are rarely seen today: One is the quality of being a pioneer, and the other is the quality of being a prophet.

The Senator from West Virginia was a pioneer in synthetic fuels development long before most Americans, and certainly most Members of Congress, gave it a thought. He understood at an early time, nearly 40 years ago, the potential for the reduction of coal and oil shale and other fossil fuels to liquids, gases, and synthetics; the Senator was a pioneer in alternative aviation fuels, as well as other uses of fossil fuels.

But he also has been a prophet. Back when people thought domestic oil supplies were unlimited, when oil was 10 cents a barrel in Texas, the Senator from West Virginia was a prophet; he was urging people to think about the future. I cannot think of any better definition of political leadership.

At this time, I think it is appropriate to remind ourselves of the efforts of Senator RANDOLPH. In recent years, I have been dismayed over how quickly Americans have forgotten about the energy crisis which this Nation faces.

How often have we heard the word "energy" used in this Chamber since we came back? We are a people of short memory; so long as there are no gasoline lines, and seemingly no shortages, so long as the price is reasonable and stable, people forget all about the debates, sessions, and hearings conducted in the attempt to address the problem.

I think we are living in a fool's paradise. Almost overnight, given circumstances in the Persian Gulf, we could find ourselves in a situation so much more stark and drastic than the fall of the Shah of Iran or the 1973 oil embargo, events that have disturbed and destabilized our economy. I hope that by raising this amendment, I can reintroduce the word "energy" into our debate.

So I welcome the Senator from West Virginia as a cosponsor. At this time, I wish to yield to our other cosponsor, the Senator from New Jersey.

Mr. RANDOLPH. I thank the Senator.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. BRADLEY. Madam President, how much time has the Senator remaining?

The PRESIDING OFFICER. The time has expired.

Mr. HART. Madam President, I wonder if the Senator from Kansas, because of his colloquy with our colleague from West Virginia, and because, unfortunately, he permitted the time to run, would yield 5 minutes of his time.

Mr. DOLE. I will be glad to yield 5 minutes or more of my time.

Mr. HART. The Senator from Kansas yields 5 minutes to the Senator from New Jersey.

Mr. BRADLEY. I thank the Senator fram Kansas for his generosity, and I join in supporting the amendment of the Senator from Colorado.

I think it is an important amendment because it calls attention to a problem we seem to have forgotten in the past several months, as we do periodically until a new oil shock jolts our consciousness. That problem is our continued dependence on foreign oil and the vulnerability to oil supply disruptions that accrues from that dependence.

The Senator has offered an amendment which is not an easy one politically. It implies that people should pay a little more at the gasoline pump. But if it were adopted, the result would be that our economy would be healthier, that we would have reduced our vulnerability to oil supply disruptions, that we would be limiting the transfer of wealth from this American consumer to the treasuries of OPEC, and that we would have taken a major step toward setting in motion a permanent conservation ethic in this country.

The Senator's amendment calls attention to all of these aspects. We only have a limited amount of resources in this country. We only have a limited amount of tax cuts to go around. In my view, what we need are tax cuts to increase the productivity of our economy. We need cuts so that individuals do not have to pay more taxes because of social security and inflation. And we need cuts to stimulate savings and investment. But we cannot do everything.

In my view, this amendment very clearly states that an oil tariff is an essential part of our national security policy. It recognizes that energy security is a long-term problem. Even though there is a glut on the markets today, that glut could be snuffed out tonight if there was an oil supply disruption in the Middle East or if the Iraq-Iran war flared up and expanded. We would feel the effects of these events directly in this country in the form of higher prices and in the enormous transfer of wealth from our pockets to the treasuries of OPEC.

The Senator from Colorado has supported tariffs on oil in the past, has been a leader on the issue, and I am pleased and proud to associate myself with him today.

Last year in this Chamber we had a vote that was hardly overwhelming in favor of a form of oil tariff. But I would suggest to the Senator and to my colleagues that the Senate as a whole is beginning to see the energy security issue a little more clearly.

The distinguished chairman of the Finance Committee, the Senator from Kansas, in the debate on the strategic petroleum reserve, has indicated that he would be willing to see an oil tariff or tax if the revenues were dedicated to the purchase of oil for the strategic petroleum reserve, which is the second half of our energy security policy.

Finally, Madam President, I would argue that if we move now with the tariff we could go a long step toward breaking OPEC once and for all.

Madam President, if we impose a tariff now, we would reduce demand for foreign oil sufficiently to create havoc within OPEC and, in fact, we would begin to see the cartel split apart. All of these are critical long-term issues that this amendment addresses. I strongly support the amendment and would urge my colleagues to give it their serious consideration.

If nothing else, the submission of this amendment calls the Senate's attention and the American people's attention to our continuing vulnerability to oil supply disruptions and to the need for an effective energy security policy. Finally, it recognizes that some form of tariff on foreign oil is directly related to our long-term energy security and the security of our allies, and trading partners.

Mr. DOLE. Madam President, I have listened to the distinguished Senators from Colorado, West Virginia, and New Jersey. I might add, I say to the Senator from Colorado, I discussed this amendment this morning with Treasury to see whether or not it might be acceptable to them and it is not.

But it seems to me that with some modification it would have been an easy way to raise a lot of revenue. I understand how the Senator from Colorado would dispose of that revenue.

Again, having been on the other side of this effort last year, an effort to forestall any imposition of any import fee or tax, I would be compelled to oppose the amendment at this time and indicate, based on my conversation with responsible Treasury officials this morning, that that would be their position.

I am not certain whether the Senator from Colorado intends to push this to a vote. As I understand the initial tax, it would be at the rate of $10 a barrel, with Presidential authority to increase that rate to $30 a barrel. At $30 a barrel, that would raise about $60 billion; a substantial sum of money.

Mr. HART. The Senator is correct. The estimates are at $10 a barrel it would raise about $20 billion a year. Of course, the thrust of the amendment is to relate that against the social security tax.

Mr. DOLE. And some low-income energy assistance of about $2 billion.

Mr. HART. That is correct.

Mr. DOLE. Again, I am not in a position to accept the amendment. I am not certain whether the Senator from Colorado wants to have a vote on it or not.

Mr. HART. Madam President, it is the wish of the principal cosponsors to withdraw the amendment. I appreciate the willingness of the floor manager to consider it and take it up with the administration. As much as I would like to bring it to a vote, I, frankly, understand the political realities here and the chance of getting substantial support are practically negligible. I do hope that the record made here and on previous occasions, and the discussions that the Senator from Kansas may have with the administration, causes this proposal, or something like it, to be given some serious consideration in the administration and the appropriate committees.

This is a serious problem. This is one approach to that problem. I hope the problem will not be forgotten.

Unless the Senator from Kansas wishes to discuss it further, it would be the intent of the Senator from Colorado, on behalf of his cosponsors, to withdraw the amendment.

Mr. DOLE. Madam President, before that is done, I will just say it is a serious problem. This is a serious effort to address that problem. Certainly the Finance Committee is willing to explore not only this approach but modifications to this approach. I can assure the Senator of that.

Mr. HART. I thank the Senator from Kansas for that assurance. That is certainly significant.

With that understanding, Madam President, I withdraw the amendment.

The PRESIDING OFFICER. Without objection, the amendment (UP No. 304) is withdrawn.

Mr. HART. I thank the Senator from Kansas, the Senator from New Jersey, my principal cosponsor, and the Senator from West Virginia.

Mr. DOLE. Madam President, we are now in the process of negotiating on the Mitchell amendment which is listed as No. 6 of the amendments to be considered today. It is the opinion of this Senator that may be worked out.

If, in fact, that can be done, it would be my hope that both Senators NUNN and CHILES might be prepared to take up their amendment with reference to the IRS and the Justice Department.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NUNN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Madam President, I ask unanimous consent that, during the debate on the Nunn amendment, which will be later this afternoon, floor privileges be accorded to Marty Steinberg, Elinor Hill, and Randy Knuckles of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Madam President, I ask unanimous consent that the pending amendment, the Mitchell amendment, which is about to be agreed upon, be temporarily laid aside without the Senator from Maine losing any of his rights to reoffer a modified amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Madam President, we are now ready to proceed to the Nunn-Chiles amendment. I wonder, while we are waiting to do that, if the Senator from Georgia would object to the Senator from Alabama bringing up a noncontroversial amendment which we can dispose of.

Mr. NUNN. I have no objection.

Mr. DOLE. It will be about 2 minutes.

Mr. NUNN. That will be fine.

Mr. DOLE. Madam President, I ask unanimous consent that, notwithstanding the order entered into, the distinguished Senator from Alabama, Senator HEFLIN, be permitted to offer an amendment which has been agreed upon at this time.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Alabama.

UP AMENDMENT NO. 305

(Purpose: To require the Congressional Budget Office to monitor the pulse of the Nation's economy and report to Congress its assessment of the Nation's economic situation)

Mr. HEFLIN. Madam President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Alabama (Mr. HEFLIN) proposes an unprinted amendment numbered 305.

Mr. HEFLIN. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 284, line 5, insert the following:

SEC. . ECONOMIC RECOVERY PULSE RATE.—

(a) In order to monitor the progress of the economic recovery, the Congressional Budget Office is directed to develop reports or a series of reports which will indicate if, and to what extent, the purposes and goals of this Act, the Economic Recovery Act of 1981, and its companion measure, the Omnibus Reconciliation Act of 1981, are being accomplished. If, after considering the interplay between the mandated tax cuts, budget cuts, inflation, interest rates, the money supply, the rate of savings and investment, the fiscal integrity of the social security trust funds and other economic factors, the assessment indicates that the Nation's economy is not responding as planned, based on the best data available, and based upon assumptions which are uniformly applied, the Congressional Budget Office will recommend to the Congress what options are available and what actions could be taken to promote the betterment of this Nation's economy.

(b) The report or reports directed to be developed pursuant to section (a) above, shall be transmitted to the Congress at least quarterly; the first such report to be received by Congress not later than January 31, 1982; and during any period in which the gross national product has suffered negative growth for the next previous two quarters, such reports shall be rendered to the Congress monthly.

Mr. HEFLIN. Madam President, the purpose of my amendment is to require the Congressional Budget Office to monitor the pulse of the Nation's economy and report to the Congress its assessment of the Nation's economic situation and its recommendations for action which could be taken in case the economy does not respond as we all hope it will after the passage of the President's economic recovery plan.

My amendment would require the Congressional Budget Office to develop reports or a series of reports which would indicate if, and to what extent, the purposes and goals of this act, the Economic Recovery Act of 1981, and its companion measure, the Omnibus Reconciliation Act of 1981, are being accomplished.

If after considering the interplay between the mandated tax cuts and budget cuts, inflation, interest rates, unemployment, the money supply and the rate of savings and investment, the fiscal integrity of the social security trust funds, and other economic factors, the assessment indicates that the Nation's economy is not responding as planned, based on the best data available and based upon assumptions that are uniformly applied, then the Congressional Budget Office would recommend to the Congress options that are available and what action could be taken to promote the betterment of the Nation's economy.

This amendment would require that the Congressional Budget Office make these reports quarterly, the first one to be received by Congress on January 31, 1982, and during any period in which the gross national product has suffered negative growth for the next previous two quarters, such reports would be rendered to the Congress monthly.

My purpose in offering this amendment is to try to make sure that the Congress is cognizant at all times of how the tax cuts and the budget cuts are impacting on interest rates, inflation, unemployment, and other economic indicators. The Congressional Budget Office would be required to make timely reports showing how the interplay between these vital forces is taking place.

Madam President, on October 1, 1981, the ship of state will be launched into uncharted waters. Never before has the Congress approved such massive spending cuts and such massive tax cuts simultaneously. The administration has used the analogy of the Kennedy tax cuts of the early 1960's. The cuts at that time were about $10 billion and had the desired result. Today's cuts are so massive as to be not only different in degree but, in reality, different in kind. We must have a desire to monitor where we are at practically any given time with respect to these cuts.

Last Thursday, the Senate expressed the sense of the Senate that the tax cuts under this bill should be limited, I repeat limited, to $243 billion from now through 1984. It has been estimated that the revenue loss over the next decade from these tax cuts will be approximately $1 trillion.

The massive budget cuts which are undergoing their final scrutiny by the Conference Committee may have enormous and untold impact upon the economy. The question we all have in the back of our minds is whether it will all work for the benefit of the American people or not. We believe now that it will begin to solve many of our economic ills which I will mention, but which are so familiar to us all that they need little elaboration at this time.

First, Madam President, interest rates today are at unprecedented high levels and have been at these levels for a sustained period of time. Second, inflation, while having moderated somewhat, once again appears to be on the rise. Third, the social security trust fund is under attack as being in a fiscally unsound position.

Because of the precarious state of the economy and because of the importance of being able to make adjustments and fine-tuning changes where appropriate, we cannot wait for yearend reports as are now provided. Congress must keep its pulse on the rate of the Nation's economy. Congress arm for accomplishing this is the Congressional Budget Office, and it should be given a clear ride in this process.

Although the Omnibus Reconciliation Act of 1981 and the Economy Recovery Act of 1981 contain massive tax cuts and spending reforms, there is no mechanism established in either of these measures to monitor and determine whether or not the programs are working. There is a need for a comprehensive report or series of reports to let the Congress know just where the Nation's economy is going at any given point in time.

My amendment will fill this need by requiring the Congressional Budget Office to monitor the pulse of the Nation's economy and report to Congress its assessment of the Nation's economic situation and its recommendations for actions which could be taken if the economy does not respond to the stimuli which are being applied. I think my amendment is a good one, one which all Senators can support.

Madam President, if the gross national product of the economy shows negative growth for two successive quarters, the Nation is said to be in a recession. If the Nation is in a recession, then Congress needs to know more often than quarterly just where we are going and what needs to be done to turn economic conditions around. Accordingly, a quarterly report is called for unless the economy slips into a recession, in which case the Congressional Budget Office must report to Congress on a monthly basis.

I have discussed the amendment with the majority and minority floor managers, and I understand that there is no objection to it.

Mr. DOLE. Madam President, the Senator from Alabama has discussed it with both me and the Senator from Virginia (Mr. HARRY F. BYRD, JR.) or Senator LONG.

This calls for a series of reports. It will be helpful to the Congress. The date of January 31 would give the full month to do an analysis of the first quarter. This Senator has no objection to the amendment.

Mr. HARRY F. BYRD, JR. Madam President, I am glad to support this amendment of the Senator from Alabama.

Mr. DOLE. I yield back the remainder of my time.

Mr. HEFLIN. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Alabama.

The amendment (UP No. 305) was agreed to.

Mr. DOLE. I move to reconsider the vote by which the amendment was agreed to.

Mr. HEFLIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEFLIN. I appreciate the courtesy of the Senator from Kansas and the Senator from Virginia.

Mr. DOLE. Madam President, I thank the distinguished Senator from Alabama.

As I understand, the pending amendment now will be the Nunn-Chiles amendment.

AMENDMENT NO. 492

(Purpose: To insure the confidentiality of information filed by indiivdual taxpayers with the Internal Revenue Service pursuant to the Internal Revenue Code and, at the same time, to insure the effective enforcement of Federal and State criminal laws and the effective administration of justice)

Mr. NUNN. Madam President, I send to the desk amendment No. 492. Is that amendment at the desk?

The PRESIDING OFFICER. The amendment is at the desk.

Mr. NUNN. Will the Presiding Officer inform the Senator from Georgia as to the time allocated to this amendment under the order?

The PRESIDING OFFICER. One hour equally divided.

Mr. NUNN. And who has charge of the time?

The PRESIDING OFFICER. The Senator from Georgia has control of 30 minutes and the Senator from Kansas has control of 30 minutes.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Georgia (Mr. NUNN), for himself, Mr. CHILES, Mr. DECONCINI, Mr. COHEN, Mr. BENTSEN, Mr. LONG, Mr. ROTH, Mr. RUDMAN, Mr. JACKSON, Mr. SCHMITT, Mr. BOREN, Mr. PRYOR, Mr. JOHNSTON, Mr. HOLLINGS, Mr. EXON, Mr. STENNIS, Mr. MATTINGLY, Mr. DANFORTH, and Mr. ROBERT C. BYRD proposes an amendment numbered 492.

Mr. NUNN. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title I, insert the following:

Subtitle C—Confidentiality of Disclosure Information

SEC. 221. CONFIDENTIALITY OF DISCLOSURE INFORMATION.

(a) DEFINITION OF RETURN INFORMATION.—Paragraph (1) of section 6103(b) is amended to read as follows:

"(1) RETURN INFORMATION.—The term 'return information' means—

"(A) any tax or information return, declaration of estimated tax, or claim for refund required by, or provided for, or permitted under the provisions of this title which is filed with the Secretary by, on behalf of, or with respect to any person, and any amendment or supplement thereto, including supporting schedules, attachments, or lists which are supplemental to, or part of, the returns so filed (or information taken therefrom), and

"(B) any information provided to the Secretary by or on behalf of an individual taxpayer to whom such information relates."

(b) DEFINITION OF NONRETURN INFORMATION.—Paragraph (2) of section 6103(b) is amended to read as follows:

"(2) NONRETURN INFORMATION.—The term 'nonreturn information' means—

"(A) any information, other than return information, which the Secretary collects, prepares, obtains, or receives with respect to a taxpayer or return relating to the determination of the existence, or possible existence of liability (or the amount thereof) of any person under this title for any tax penalty, interest, fine, forfeiture, or other imposition or offense (including whether a return was filed and whether the taxpayer's return was, is being, or will be examined or subject to other investigation or processing), and

"(B) any part of any written determination or any background file document relating to such written determination (as such terms are defined in section 6110(b)) which is not open to public inspection under section 6110,

but such term does not include data in a form which cannot be associated with, or otherwise identify, directly or indirectly, a particular taxpayer."

(c) INDIVIDUAL TAXPAYER DEFINED.—Paragraph (3) of section 6103(b) is amended to read as follows:

"(3) INDIVIDUAL TAXPAYER.—The term 'individual taxpayer' means any natural person or a corporation, partnership, association, union, or other entity consisting of no more than two owners, shareholders, partners, or members."

(d) DISCLOSURE OF INFORMATION.—Paragraphs (1), (2), (3), and (4) of section 6103(i) are amended to read as follows:

"(1) DISCLOSURE OF RETURN INFORMATION.—

"(A) DISCLOSURE PURSUANT TO ORDER OF JUDGE OR MAGISTRATE.—Return information shall, pursuant to, and upon the grant of, an ex parte order by a Federal district court, judge, or magistrate as provided by this paragraph, be open, but only to the extent necessary as provided in such order, to inspection by or disclosure to officers and employees of the Department of Justice personally and directly engaged in and solely for their use in preparation for any administrative, judicial, or grand jury proceeding (or investigation which may result in such a proceeding) pertaining to the enforcement of a specifically designated Federal criminal statute (not involving tax administration) to which the United States or such agency is or may be a party. The order may provide for continuous disclosure if such disclosure is justified under subparagraph (B)(iii).

"(B) APPLICATION FOR ORDER.—The Attorney General, the Deputy Attorney General, an Assistant Attorney General, a United States attorney, or the attorney in charge of a criminal division organized crime strike force may authorize an application to a Federal district court judge or magistrate for the order referred to in subparagraph (A). Upon such application, such judge or magistrate may grant such order if he determines on the basis of the facts submitted by the applicant that—

"(i) there is reasonable cause to believe, based upon information believed to be reliable, that a specific criminal act has been committed or is being committed;

"(ii) the information is sought exclusively for use in a Federal crime investigation or proceeding concerning such criminal act; and

"(iii) there is reasonable cause to believe that the information may be relevant to a matter relating to the commission of such criminal act.

However, the Secretary may decline to disclose any return information under this paragraph if he determines and certifies to the court that such disclosure would identify a confidential informant or seriously impair a civil or criminal tax investigation.

"(C) DUTY OF THE SECRETARY.—The Secretary or his designee shall disclose to the appropriate attorney for the Government (referred to in subsection (B) above) such return information ordered disclosed pursuant to paragraph (1)(1)(A) of this subsection as soon as practicable following receipt of an ex parte court order pursuant thereto.

"(D) FURTHER DISCLOSURE.—An attorney for the Government (referred to in subsection (B) above) may further disclose any return information, which has been disclosed to him pursuant to an ex parte order, to such other Federal Government personnel or witness as he deems necessary to assist him during the criminal investigation or in preparation for the administrative, judicial, or grand jury proceeding which formed the basis for such order.

"(2) DISCLOSURE OF NONRETURN INFORMATION.—

"(A) Upon written request from the head of a Federal agency, the Inspector General thereof, or in this case of the Department of Justice, the Attorney General or his designee, the Secretary shall disclose nonreturn information as soon as practicable to officers and employees of such agency personally and directly engaged in, and solely for their use in, or preparation for any administrative, judicial, or grand jury proceeding (or investigation which may result in such a proceeding) described in paragraph (1)(A). Such request shall set forth—

"(i) the name and address of the taxpayer with respect to whom such nonreturn information relates;

"(ii) the taxable period or periods to which the nonreturn information relates;

"(iii) the statutory authority under which the proceeding or investigation is being conducted, and

"(iv) allegations of criminal conduct giving rise to the proceeding or investigation.

However, the Secretary may decline to disclose any nonreturn information under this paragraph if he determines that such disclosure would identify a confidential informant or seriously impair a civil or criminal tax investigation.

"(B) The head of an agency, an Inspector General, or the Attorney General or his designee may further disclose such nonreturn information to such Federal Government personnel or witness as he deems necessary to assist him during the criminal investigation or in preparation for the administrative, judicial, or grand jury proceeding which formed the basis for such request.

"(C) For purposes of this paragraph, the name, address, and social security number of the taxpayer, whether a taxpayer filed a return for a given year or years, and whether there is or has been a criminal investigation of a taxpayer shall be treated as nonreturn information.

"(3) SECRETARY'S DUTY TO DISCLOSE INFORMATION CONCERNING POSSIBLE CRIMINAL ACTIVITIES.—

"(A) The Secretary shall disclose as soon as practicable and in writing nonreturn information which may constitute evidence of a violation of Federal criminal laws to the extent necessary to apprise the head of the appropriate Federal agency or his designee charged with the responsibility for enforcing such laws. For purposes of the preceding sentence, the name and address of the taxpayer shall be treated as nonreturn information.

"(B) In addition to the above disclosures, when the Secretary makes a recommendation to the Department of Justice for prosecution for violation of the Internal Revenue Code, any return or nonreturn information reviewed, developed, or obtained during the tax investigation, which information may constitute evidence of a violation of Federal criminal laws, shall be furnished to the Department of Justice.

"(C) However, the Secretary may decline to disclose any information under the above paragraphs if he determines that such disclosure would identify a confidential informant or seriously impair a civil or criminal tax investigation.

"(4) USE OF JUDICIAL OR ADMINISTRATIVE PROCEEDING.—Any information obtained under paragraph (1), (2), or (3) may be entered into evidence in accordance with the Federal Rules of Evidence or other applicable law in any administrative, judicial, or grand jury proceeding pertaining to enforcement of a specifically designated Federal criminal statute (not involving tax administration) or any ancillary civil proceeding to which the United States or any agency thereof is a party. Any such information may be disclosed to the extent required by order of a court pursuant to section 3500 of title 18, United States Code, or rule 16 of the Federal Rules of Criminal Procedure, or other applicable discovery requirements, such court being authorized in the issuance of such order to give due consideration to congressional policy favoring the confidentiality of return and nonreturn information as set forth in this title. However, any information obtained under paragraph (1), (2), or (3) shall not be admitted into evidence in such proceeding if the Secretary determines and notifies the Attorney General or his designee or the head of such agency that such admission would identify a confidential informant or seriously impair a civil or criminal tax investigation unless a court shall otherwise direct such disclosures."

(e) EMERGENCY CIRCUMSTANCES. — Subsection (i) of section 6103 is amended by adding new paragraphs (5), (6), and (7) and by renumbering existing paragraphs (5) and (6) accordingly as paragraphs (8) and (9):

"(5) EMERGENCY CIRCUMSTANCES.—Under emergency circumstances involving an imminent danger of physical injury to any person, serious physical damage to property, or flight from prosecution, the Secretary or his designee may disclose information, including return information, to the extent necessary to apprise the appropriate Federal agency of such emergency. As soon as practicable thereafter, the Secretary or his designee shall notify the Department of Justice of his actions with respect to this paragraph, and the Department shall thereupon notify the appropriate United States district court or magistrate of such disclosure pursuant to emergency circumstances.

"(6) ASSISTANCE OF IRS IN JOINT TAX AND NONTAX INVESTIGATIONS.—No portion of this section shall be interpreted to preclude or prevent the Internal Revenue Service from assisting the Department of Justice or any other Federal agency in joint tax and nontax investigations of criminal matters which may involve income tax violations, nor shall any portion of this section be interpreted to preclude or prevent the Internal Revenue Service from investigating or gathering relevant information concerning persons engaged in criminal activities which may involve income tax violations.

"(7) REDISCLOSURE TO STATE AUTHORITY OF INFORMATION OBTAINED FOR FEDERAL CRIMINAL INVESTIGATION OR PROCEEDING.—An official authorized to apply for a disclosure under section 6103(i) may make application to a district judge or magistrate for an ex parte order to disclose to the appropriate State attorney general or district attorney any return or nonreturn information in his possession which is relevant to the violation of a State felony statute. The application shall set forth the name and address of the taxpayer, the taxable period or periods to which the information relates; a description of the information sought to be disclosed; and the State felony violation involved. Such judge or magistrate may grant such order if he determines on the basis of the facts submitted by the applicant that—

"(A) there is reasonable cause to believe, based upon information believed to be reliable, that a specific State felony violation has occurred or is occurring; and

"(B) there is reasonable cause to believe that the information may be relevant to a matter relating to the commission of such violation."

(f) INTERNATIONAL CONVENTIONS.—Subsection (k)(4) of section 6103 is amended to read as follows:

"(4) DISCLOSURE TO COMPETENT AUTHORITY UNDER INTERNATIONAL CONVENTION.—Return or nonreturn information may be disclosed to a competent authority of a foreign government which has an income tax or gift and estate tax convention, treaty on mutual assistance, or other convention relating to the exchange of tax information with the United States but only to the extent provided in, and subject to the terms and conditions of, such treaty or convention. When return or nonreturn information is sought pursuant to the terms of a treaty on mutual assistance in criminal matters for use in an investigation or proceeding not related to the tax laws of the requesting foreign country, disclosure may be made for the use of officials of the requesting country, but only after a United States district judge or magistrate issues an ex parte order that there is—

"(A) reasonable cause to believe that the information sought may be relevant to a matter relating to the commission of a specific criminal act that has been committed or is being committed against the laws of the foreign country, and

"(B) that the information is sought exclusively for use in such foreign country's criminal investigation or proceeding concerning such criminal act."

(g) AFFIRMATIVE DEFENSE.—Section 7213 is amended by adding a new subsection (d), as follows, and by relettering existing subsection (d) as subsection (e):

"(d) It shall be an affirmative defense to a prosecution under this section that such disclosure of return or nonreturn information resulted from a good faith, but erroneous, interpretation of section 6103 while a Federal employee was acting within the scope of his employment."

(h) PENALTY FOR DISCLOSURE.—Subsection (a) of section 7217 is amended to read as follows:

"(a) GENERAL RULE.—Whenever any employee of a Federal agency knowingly, or by reason of negligence, discloses return or nonreturn information (as defined in section 6102(B)) with respect to a taxpayer in violation of the provisions of section 6103, such taxpayer may bring a civil action for damages exclusively against such agency. Whenever any person other than an employee of a Federal agency knowingly, or by reason of negligence, discloses return or nonreturn information with respect to a taxpayer in violation of the provisions of section 6103, such taxpayer may bring a civil action directly against such person. The district courts of the United States shall have jurisdiction of any action commenced under the provisions of this section."

(i) CONFORMING AMENDMENTS.—

(1) Subsection (b) of section 6103 is amended by adding a new paragraph (4), as follows, and by renumbering existing paragraphs (4) through (9) accordingly:

"(4) COMBINED INFORMATION.—The term 'combined information' means any combination of taxpayer identity information, return information described in paragraph (1)(b), and, or nonreturn information described in paragraph (2)."

(2) Subsections (a), (b) (7) and (8), (d), (f), (g) (1), (3), (4), and (5), (h), (i) (6) and (7) as redesignated, (j) (3), (4), (5), and (6) of section 6103 are amended by striking "returns or return information" and "return and return information" wherever such terms appear and inserting in lieu thereof the terms "return information and nonreturn information" and "returns and nonreturn information", as appropriate.

(3) Subsections (c), (e)(6), (g)(2), (k)(1), (3), and (6), (p) (2)(B) and (3), (c)(I) and (III), and the last sentence of subsection (d) of section 6103 are amended by striking the term "return information" wherever such term appears and inserting in lieu thereof the term "combined information."

(4) Subsections (h) (2)(B) and (4)(B) of section 6103 are amended by striking the word "such" and inserting in lieu thereof the word "the".

(5) Subsection (l)(1)(B) of section 6103 is amended by striking the word "return".

(6) Subsection (b) of section 6108 is amended by striking the term "return information (as defined in section 6103(b)(2))" and inserting in lieu thereof the term "combined information (as defined in section 6103(b)(4))".

(7) Section 7213 is amended to strike the terms "return or return information" and "returns or return information" wherever they appear and inserting in lieu thereof the term "return and nonreturn information" and "returns and nonreturn information", as appropriate.

(8) Section 7217 is amended to strike the terms "return or return information" and "returns or return information" wherever they appear and inserting in lieu thereof the terms "return information" or "return or nonreturn information," as appropriate.

Mr. DOLE. Madam President, will the Senator yield for a unanimous-consent request?

Mr. NUNN. I yield.

Mr. DOLE. I ask unanimous consent that my time be under the control of the Senator from Connecticut (Mr. WEICKER).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Madam President, I yield myself 10 minutes and ask to be notified at the end of that time.

Madam President, this amendment is offered on behalf of myself and Senators CHILES, DECONCINI, COHEN, BENTSEN, DOMENICI, LONG, ROTH, RUDMAN, JACKSON, SCHMITT, BOREN, PRYOR, JOHNSTON, HOLLINGS, EXON, STENNIS, MATTINGLY, and DANFORTH.

This amendment is designed to restore the Internal Revenue Service to an active and responsible role in the fight against organized crime and narcotics trafficking.

This amendment is identical to S. 732, which I and Senators CHILES, DECONCINI, COHEN, BENTSEN, DOMENICI, LONG, ROTH, RUDMAN, JACKSON, SCHMITT, BOREN, PRYOR, JOHNSTON, HOLLINGS, EXON, and STENNIS introduced on March 17. It is similar to S. 2402, S. 2404, and S. 2405, which I and 10 other cosponsors introduced on March 11, 1980, in the 96th Congress.

The Finance Subcommittee on Oversight of IRS, under the leadership of our distinguished colleague from Montana

(Mr. BAUCUS), held a hearing on those measures on June 20, 1980.

After these hearings, I undertook to revise last year's bills, taking into consideration the testimony of the various witnesses and the views of the Carter administration. The result is embodied in the amendment we introduce today.

I might add that the general issue of IRS' role in law enforcement came before this body on the night of December 10, 1980, in the form of a committee amendment to the continuing resolution. That amendment was designed as an interim measure to be replaced by substantive legislation. Our amendment is that substantive legislation, although it bears little resemblance to the amendment that was tabled last December.

This amendment is an outgrowth of extensive work done by the Permanent Subcommittee on Investigation, of which I was honored to serve as chairman during the 96th Congress.

Our subcommittee spent the better part of 1979 and 1980 investigating various aspects of organized crime, labor racketeering, and narcotics trafficking. As I look on our studies and hearings, I am astounded at the size and sophistication of these triple menaces to the well-being of our Nation.

The underground economy is estimated at upward of $124 billion a year, of which the traffic in illegal narcotics amounts to somewhere between $44 billion and $63 billion. Included in these astronomical figures are an estimated $25 billion to $50 billion in unreported and untaxed profits. In other words, we may not have had a deficit last year if taxes had been paid on all these illegal profits.

All of this money has had a tremendous inflationary impact on the economy of several regions of the country, especially Florida, Texas and the Southwest areas bordering Mexico.

I know I do not have to explain that to the Presiding Officer today because I know she is very familiar with the pervasive effect of this traffic on the State of Florida.

Even my homestate of Georgia has experienced an increase in narcotics trafficking, for as enforcement authorities have cracked down on smuggling into Florida from South America, many traffickers have moved their operations northward.

The permanent subcommittee explored this problem extensively, and in December of 1979 we conducted very thorough hearings on "Illegal Narcotics Profits." We issued a comprehensive report on this investigation in August 1980 (Senate report No. 96-887).

It has long been recognized that financial investigations, relying on financial and tax records, are one of the most effective tools in piercing the veil of secrecy that protects those at the top of any organized crime ring—be it a drug smuggling operation or a traditional organized crime family.

Indeed, it was the ability of the Internal Revenue Service to conduct sophisticated financial investigations that sent such notorious mobsters as Al Capone and Frank Costello to jail on income tax evasion charges when other agencies were unable to gather enough evidence of nontax crimes to have them indicted; much less convicted.

We found, however, that even though organized crime and narcotics trafficking have become bigger and more sophisticated than ever before, the one law enforcement agency that the kingpin criminals fear most—the IRS—had withdrawn from the fray.

Prosecutors and others involved in Federal law enforcement testified before our subcommittee that they were hindered in doing financial investigations by the reluctance of IRS to lend them a hand in attacking those who call the shots in organized crime and narcotics trifficking.

We found that there were two prime reasons for this withdrawal by the IRS. One was the disclosure provision of the Tax Reform Act of 1976. The other was a general attitude on the part of IRS officials that the agency only should collect taxes and not serve in any capacity as a nontax law enforcement agency.

THE TAX REFORM ACT OF 1976

The disclosure provisions of the Tax Reform Act of 1976 are found in section 6103 of the Internal Revenue Code of 1954 (26 U.S.C. 6103). They were enacted in the dying days of the 94th Congress and were intended to avoid future abuses of a "Watergate" nature.

The Tax Reform Act made tax returns and most other information gathered by the IRS confidential and subject to disclosure by IRS only in accordance with very strict procedures. These procedures apply across the board and govern disclosure to all Federal agencies. They are so sweeping that they can be compared to the use of a sledge hammer to kill an ant.

IRS agents are forbidden to disclose, on their own initiative, any tax return or "tax return information," which is any information they gather in connection with a tax return, or "taxpayer return information," which is any information they obtain from a taxpayer or his representative, such as his attorney or accountant.

As a result, there is very little criminal information exchanged today between IRS and other Federal law enforcement agencies. IRS turned over an average of just 32 pieces of criminal evidence per year during 1977, 1978, and 1979. DEA officials testified at our hearings that they received no nontax criminal evidence over that same period.

THE "CATCH 22"

It is possible, of course, for other agencies to obtain tax returns and other IRS-gathered information under section 6103. However, they must apply for a court order in order to get tax returns, and they must make written requests to obtain other IRS information about nontax crimes such as forgery, bribery, or narcotics violations that comes from sources other than tax returns.

In either situation, the requesting agency must describe the information it seeks to obtain.

The court order and written request requirements have created a "Catch 22" situation. Since IRS agents are forbidden to tell the other agencies of the criminal evidence they gather, it is virtually impossible for these other agencies even to know that such information exists, much less to describe that information with such particularity that they can satisfy the requirements for a court order or written request.

In other words, section 6103 requires federal investigative agencies to go through elaborate request procedures to obtain information that they may not even know that IRS has.

This "Catch 22" situation has made it all but impossible for the FBI, DEA, and other agencies to receive the necessary information and cooperation from the IRS.

IRS ATTITUDE

Section 6103 is only a part of the reason why IRS dropped out of the cooperative law enforcement community. Another part is the attitude of the top officials of the IRS and the policies and procedures they adopted in interpreting and applying section 6103.

Between 1974 and 1980, a series of IRS commissioners and their top aides took the view that IRS should stick to "tax administration"—by which they meant tax collection and only tax collection—and out of the general law enforcement arena.

They said that paying attention to ordinary taxpayers was a better way of keeping the voluntary tax collection system working than was cracking down on organized criminals who pay no taxes on their tremendous ill-gotten gains.

In our report on "illegal narcotics profits," the Permanent Subcommittee on Investigations differed with that view of tax administration.

Obviously, IRS must be aggressive in collecting the Nation's taxes, but we understand the skepticism of a small town waitress who is caught for underreporting her tips when organized crime millionaires escape without reporting a cent of their illegal income.

Our subcommittee concluded that if the average taxpayer knows that IRS can successfully collect taxes from the mob, he is a lot more likely to ante up his fair share—if for no other reason than the fear of being caught.

When he sees a drug pusher prosecuted as the result of work by the IRS, he is likely to have confidence in our voluntary tax collection system and feel that his taxes are being well spent, especially on law enforcement. On the other hand, if he sees criminals getting away with tax evasion on top of murder and extortion, his natural skepticism toward our tax policy will increase.

IRS' recent emphasis on ordinary taxpayers has not increased voluntary compliance with the tax laws. In fact, statistics compiled by both the IRS and the General Accounting Office indicate that voluntary compliance with the tax laws actually has decreased since passage of the Tax Reform Act of 1976 and the subsequent withdrawal of IRS from cooperative law enforcement efforts aimed at big-time criminals.

The GAO's findings also refute the contention that voluntary compliance is

in direct proportion to the degree of confidentiality of tax return information. If that is so, then the total confidentiality of the Tax Reform Act would have resulted in total compliance. Obviously, it has not.

Other statistics indicated the extent of IRS' withdrawal: Between 1974 and the first 9 months of 1978, the number of organized crime cases which originated from IRS-developed tax information dropped from 620 to just 221.

Partially as a result of our subcommittee's work, the Carter administration ordered IRS to step up its investigations of suspected narcotics dealers and organized criminals. IRS has devoted more of its resources to these efforts, and it has adjusted some of its policies and interpretations with respect to the disclosure of nontax criminal evidence obtained by its agents.

These are steps in the right direction; however, we still need to fine-tune the Tax Reform Act of 1976 in order to remove some serious and unnecessary roadblocks to IRS active participation in Federal law enforcement.

DISCLOSURE AMENDMENTS

Madam President, our amendment will not scrap the privacy safeguards which were written into the Tax Reform Act, but it will strike a balance so that IRS can and will again cooperate with Federal prosecutors, to whom no documented abuse of tax information has been attributed.

I want to emphasize that, Madam President, because every taxpayer will be much better protected as to privacy than they were before the 1976 act.

Let me try to dispel some of the unfounded fears of our disclosure amendment by explaining how its provisions will protect the privacy of tax returns and other information supplied to IRS. I am sure that once these provisions are understood—and I admit this is an intricate, sometimes confusing area of the law—they will be accurately seen for their privacy merits as well as their attempt to improve law enforcement.

Let us look at the types of information that could be disclosed only by ex parte court order, just as under existing law. This includes individual tax returns and all supporting attachments, such as W–2 forms, lists of donations to charitable and nonprofit organizations, and various other schedules.

It also includes the returns and supporting documentation of small, closely held corporations, partnerships, associations, unions or other entities consisting of no more than two owners or members. In other words, the tax and supporting records of these organizations—in which there is a privacy expectation because they usually are closely owned by only two family members or friends—will be protected just as they are today.

On the other hand, information gathered from other sources, such as from larger corporations or from third parties, such as banks, would not have the same degree of protection. The courts have consistently held that corporate information does not enjoy the same constitutional protections as individual information; nor is there the same practical privacy expectation in corporate records, simply because of the number of people in most corporations who have access to that information. We really cannot expect the same degree of privacy for information about us that is maintained by third parties as we do for information that is in our own possession.

Madam President, the fact of the matter is that other Government agencies, such as the Securities and Exchange Commission and the Department of Labor, have access to similar information concerning entities, but those agencies, unlike IRS, have no disclosure prohibitions to interfere with their referring criminal information to the Justice Department, which they do on a regular basis.

In order to obtain an ex parte order, under this amendment, Justice Department attorneys would have to present information believed to be reliable that establishes reasonable cause to believe that a specific criminal act has been committed. Those attorneys would have to certify that the information is sought exclusively for use in a Federal criminal investigation or proceeding, and they would have to establish to the satisfaction of a district judge or magistrate that there is reasonable cause to believe that the information may be relevant to a matter relating to the commission of the criminal act.

These are essentially the same standards that must be met under Federal law in order for authorities to wiretap our telephones or put listening devices in our homes and offices. It seems to me that if these standards are sufficient to protect the privacy of our most personal conversations, they also are sufficient to protect our tax information.

In other words, Madam President, our disclosure amendment is laden with safeguards for the privacy of all information we can reasonably expect to keep private. There will be no wholesale scrapping of privacy here. There will be no "sell-out" to a few law enforcement authorities who might like to see their work made easier. There certainly will be no attempt here to create a breeding ground for a repeat of the so-called Watergate abuses. And there certainly will be no "meat-ax" attempt to butcher the Tax Reform Act.

On the other hand, we believe we offer a very balanced, well-thought-out effort to fine-tune section 6103 of the Internal Revenue Code, which, as the record clearly indicates, needs to be done.

These amendments are the product of 2 years' hard work on the part of several congressional subcommittees, the Justice Department, and the IRS itself. They have been developed in the broad daylight with the views of all sides considered.

No one who is concerned about the privacy of tax returns or a repetition of the abuses of tax information should fear this amendment. Hard-working, law-abiding taxpayers can rest assured that the information they supply IRS will remain within that agency where it belongs.

The only people that need fear this legislation are narcotics traffickers and organized crime figures and white-collar criminals who are contributing to inflation and who are cheating other taxpayers by not paying their fair share.

Madam President, this amendment would give no additional power or abilities to IRS to gather information about ordinary taxpayers.

The ordinary citizen is and always has been handled "in-house" by the IRS with no need for cooperation with the FBI or DEA. On the other hand, criminal tax evaders, who earn their money by participating in a life of crime, receive different treatment by IRS. In cases where criminal ventures generate profits, IRS must have the capability to cooperate with and exchange information with the Federal investigative and prosecutive agencies.

It is in this very small area—criminal tax evaders—that we seek our primary change so that IRS and other Federal law enforcement agencies can work even more effectively together against these criminals than they can today. As it now stands, the Tax Reform Act makes it much easier for IRS to go after the average taxpayer than the criminal. This is a complete reversal of the societal priorities that we should be encouraging.

CIVIL DAMAGE PROVISIONS

Madam President, the Tax Reform Act of 1976 contains severe criminal and civil penalties for persons who disclose tax returns or related information in violation of the act.

The civil damage provision (26 U.S.C. 7217) makes any person who willfully or negligently discloses a tax return or tax return information in violation of the act personally liable for civil damages in a suit brought against him by the taxpayer.

Existing law provides that there is no civil liability for disclosures which result from good faith, but wrong, interpretations of the act.

Our proposed change to section 7217 provides that the Government will be liable for damages awarded against a Federal official or employee so long as the disclosure occurred within the scope of his employment and was not done corruptly, maliciously, in return for anything of value, or willfully in violation of the disclosure provisions of the act.

We do not believe that IRS agents should be personally liable for damages arising out of disclosures which are not done with wrongful intent, and our proposal spells this out.

CRIMINAL PENALTIES

The criminal penalties of the Tax Reform Act, 26 U.S.C. 7213, make it a felony to willfully disclose tax returns or tax return information in violation of the act. Persons found guilty can be fined up to $5,000 or sentenced to jail for up to 5 years, or both, and assessed the costs of prosecution.

Under existing law, there is no defense available for good faith but wrong interpretations of the disclosure provisions. As a result, IRS agents testified before our subcommittee, they will always stay on the safe side of the law and not disclose any IRS information to other agencies except in the most serious situa-

tions. The disclosure provisions are not always easy to interpret in every situation when an IRS agent comes across evidence of a nontax crime. In fact, even though IRS has issued a number of "clarifying" interpretations and instructions, its agents testified that they never could be sure if they were violating the act when they disclosed information. In fact, IRS' own legal counsel had difficulty interpreting the provisions when asked questions at our hearings.

In order to ease the minds of IRS agents and to encourage them to report nonreturn information to possible crimes, we propose that an affirmative defense provision be added to the criminal penalty section to relieve them of criminal liability when they can establish that they made the disclosure based on a good faith, though erroneous, interpretation of the disclosure provisions.

CONCLUSION

Madam President, for generations the Internal Revenue Service led the way in this Nation's battle against organized crime and narcotics trafficking, but since 1977 it has hidden behind the disclosure provisions of the Tax Reform Act to stay out of the fray.

It is now time for us to decide that IRS shall become once again the effective force for justice that it was in the days of bootleggers and rumrunners. Our proposals will send IRS a clear and unmistakable signal that it should do just that.

We have spent many long hours in drafting what we feel is a very well-reasoned amendment. We will retain very important privacy safeguards that will prevent any repetition of Watergate-type abuses. At the same time, we put a duty on IRS to cooperate once again with the fight against the ever-increasing organized crime and narcotics problems facing the Nation.

Five years of inactivity by this once effective law enforcement agency is enough. It is time to act.

Madam President, a full section-by-section analysis of this amendment and a comparison of it to existing law may be found at page 4514 of the March 17, 1981, CONGRESSIONAL RECORD.

For the benefit of Members, I ask unanimous consent to have the same section-by-section analysis printed in the RECORD today.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION SUMMARY OF PROPOSED AMENDMENTS TO 26 U.S.C. 6103, 26 U.S.C. 7213, AND 26 U.S.C. 7217

This bill would streamline and clarify provisions of the Internal Revenue Code governing access to tax information for use in non-tax criminal investigations and prosecutions. The bill combines the salient features of Senate-initiated proposals and those developed by the Carter administration. This compromise measure is based on more than eight months of study and hearings by four Congressional committees. Generally, the bill would clarify ambiguities in existing law, refine needlessly cumbersome procedures, and distinguish between privacy rights of individuals as contrasted with those of legal entities such as corporations. The modest changes proposed would substantially assist federal law enforcement authorities in combatting narcotics trafficking, organized crime and white-collar offenses involving large sums of money. At the same time, the bill preserves the safeguards for taxpayer privacy established in 1976.

Definitions of Protected Information [26 U.S.C. 6103(b)(1-3)]:

Existing law uses a baffling series of four terms to describe information held by IRS, i.e., "returns," "return information," "taxpayer return information," and "return information other than taxpayer return information." S. 2402 would clarify the law by adopting a workable two-part definitional structure.

Section 1. The new § 6103(b)(1) would describe the first category of protected tax information, "return information," which includes (A) returns of all taxpayers and (B) underlying records and information submitted by or on behalf of "individual taxpayers," to support the filing of a tax return.

Section 2. The second category of information held by IRS, "non-return information," is defined to encompass all information held by IRS not covered by the definition of "return information."

Section 3. The bill defines the term "individual taxpayers" as an individual or a legal entity with no more than two owners, shareholders, or members, such as a small, family-owned business.

Taken together, these three definitions simplify existing law by reducing the number of categories of information from four to two; moreover, the two new categories of information conform to the methods of obtaining access: "return information" requires a court order while "non-return information" may be obtained pursuant to a formal law enforcement request under (i)(2) or pursuant to a report of crime under (i)(3). The only substantive change made by the revised definitional structure is that the books and record of legal entities, such as banks and corporations, are made available under (i)(2) or (i)(3); they are now available only under (i)(1), as are books and records of individuals.

The rationale for the distinction is that natural persons have greater privacy rights than do corporations or other entities. A similar distinction is made in the Privacy Act of 1974 (5 U.S.C. 552a) and the Financial Privacy Act of 1978 (12 U.S.C. 3401-3422), neither of which applies to corporate records. Moreover, records of corporations and other entities are normally subject to inspection by shareholders and others with an interest in the entity, as well as federal, state and local authorities; individual books and records are not. Furthermore, books and records of legal entities are normally maintained for purposes other than tax requirements; individual books and records are frequently maintained solely to comply with tax laws. Finally, the Fifth Amendment privilege against self-incrimination does not extend to legal entities.

For these reasons, S. 2402 accords a higher degree of protection to underlying books and records of individuals than to those of legal entities. Because legal entities comprised of only two persons, such as small, closely held businesses, are usually the alter ego of an individual, they are treated as individuals. Again, it should be noted that all tax returns are accorded the higher degree of protection without regard to the nature of the taxpayer; the distinction between individuals and entities applies only to underlying information, primarily financial books and records.

Disclosure Pursuant to Court Order [26 U.S.C. 6103(i)(1)]:

Section 4, Part 1. The revised § 6103(i)(1) preserves the structure of the existing court order provision. The modifications are intended only to clarify existing law and to make the literal terms of the statute comply with actual practice.

For example, the standards in existing (i)(1), if read literally require a factual showing that cannot be made unless the prosecutor seeking access is already in possession of the information sought. Courts have interpreted this language in a commonsense fashion to require proof only of those facts a federal prosecutor can realistically be expected to demonstrate: that there is reasonable cause to believe a specific federal crime has occurred or is occurring, that there is reasonable cause to believe tax information is relevant to that offense, and that the information will be used exclusively for investigation and prosecution of that offense. S. 2402 would substitute these standards for those of existing law. Because this merely codifies present practice, it has no practical effect on taxpayer privacy or tax administration. It does, however, reduce the potential for widely varying judicial results and the extreme chilling effect that the unrealistic language of current law has on federal prosecutors who need tax information for legitimate law enforcement purposes.

The proposed standard is more reasonable, with the added safeguard of prosecutorial intervention. The main criticism of the present standard was that it was impossible to meet. Therefore, no one used it. Also, the proposed would eliminate the third requirement that the Government prove the financial information cannot be obtained from any other source. The fact is that the financial information is "available" elsewhere, but the Government would have to completely reconstruct a taxpayer's bank records to duplicate the information on the return. This third requirement of the present act also requires the Government to prove that the tax return was the most probative evidence of the crime to be proven. Since this section deals only with non-tax crimes, the tax return itself would never be the most probative evidence of the crime. Only the actual financial records would qualify. Thus an impossible standard would be deleted.

The new (i)(1) modifies the class of federal officials who may authorize an application for a court order. Existing law requires all such applications to be routed through Washington for approval before being presented to the court, a requirement which results in substantial delay and paperwork. The new (i)(1)(B) would permit United States Attorneys and Attorneys-in-Charge of Organized Crime Strike Forces in the field to present applications directly to the appropriate federal court for consideration.

S. 2402 would delete the authority currently possessed by all heads of federal agencies to approve (i)(1) applications, thereby centralizing application authority in a single agency, the Department of Justice, where it can be more effectively coordinated. Since 1978, only five applications for (i)(1) orders have been signed by non-Justice Department entities; this change will not, therefore, adversely affect federal agencies.

The revised (i)(1)(D) also clarifies existing law by explicitly providing that redisclosure can be made to those support personnel necessary to prepare for a criminal prosecution. This would not change existing practice.

Finally, the new (i)(1) provides that court orders may be granted by U.S. Magistrates as well as U.S. District Judges. Magistrates are now authorized to grant analogous applications such as those for search and arrest warrants.

Disclosure Pursuant to Formal Law Enforcement Request [26 U.S.C. 6103(i)(2)]:

Section 4, Part 2. The revised § 6103(i)(2) clarifies existing law governing requests for non-return information. As amended, (i)(2) would permit requests to be made by Justice Department officials in the field, as designated by the Attorney General, to avoid the necessity of routing all requests through

Washington. It is anticipated that the Attorney General would authorize Assistant United States Attorneys and supervisory-level officials of investigative agencies to request non-return information, i.e., officials not directly involved in an investigation. In addition to the heads of agencies now authorized to request (i)(2) information, S. 2402 would grant similar authority to the fifteen Inspectors General whose mandate is to combat fraud, waste and abuse in federal programs.

The new (i)(2)(C) also authorizes these federal law enforcement officials to inquire whether a taxpayer filed a return for a given year and whether there is or has been a criminal investigation of the taxpayer. This will help avoid the waste of resources which has occurred where a court order is sought and obtained only to find that the taxpayer did not file a return for the year in question.

Finally, the revised (i)(2) would modify the factual showing required to support a disclosure of non-return information by substituting "the allegation of criminal conduct giving rise to the proceeding or investigation" for "the specific reason or reasons why such disclosure is or may be material to the proceeding or investigation." Like the (i)(1) court order requirement, a prosecutor cannot show the materiality of tax information to a case without access to the information sought.

IRS initiated Disclosure [26 U.S.C. 6103 (i)(3)]:

Section 4, Part 3. S. 2402 proposes two improvements to the procedure by which IRS initiates reports of non-tax crime to law enforcement authorities. First, the new § 6103(i)(3) would make such reports mandatory rather than discretionary. Second, the new (i)(3)(B) provides that when the IRS refers a tax case to the Department of Justice, it must also refer any evidence it has of non-tax crimes committed by the taxpayer. The purpose of the non-disclosure rule is to encourage taxpayers to report their incomes fully and honestly; taxpayers who evade taxes should not benefit from a policy enacted to encourage honest reporting. The proposed section requires the IRS to disclose criminal information it uncovers except return information. Under the present act, IRS is not required to disclose the information [and the evidence at PSI's hearing disclosed that they do not]. This section eliminates the Catch-22 situation of requiring an agency to request information without ever knowing what information exists. It also requires IRS to alert the Justice Department to criminal information.

Admissibility of Tax Information [26 U.S.C. 6103(i)(4)]:

Section 4, Part 4. Finally, section 4 of the compromise bill would amend (i)(4) of § 6103 to provide that tax information is admissible in judicial and administrative proceedings like other evidence rather than pursuant to special rules. The bill also clarifies the tax information is admissible in proceedings "ancillary" to criminal proceedings, i.e., those arising from the same course of conduct and involving the same parties. Civil proceedings ancillary to criminal proceedings include civil forfeiture or damage actions which may be pursued in addition to or in lieu of criminal prosecution.

The amendments to (i)(4) also clarify that tax information may be disclosed to a defendant pursuant to the Jencks Act, discovery provisions of the Federal Rules of Criminal Procedure or other discovery requirements. This explicitly protests a defendant's Due Process rights and is consistent with current practice.

EMERGENCY DISCLOSURE

Section 5, Part 1. S. 2402 would add three new paragraphs to § 6103(i). The new paragraph (i)(5) would permit IRS, in its discretion, to report to the appropriate federal agency any circumstances involving an imminent danger of physical injury to any person, serious property damage or flight from prosecution. This authority for disclosure in rare emergency situations is patterned on the similar provisions of the Financial Privacy Act of 1978 (12 U.S.C. 3414 (b)) and, like the Financial Privacy Act, requires that all such disclosures be reported promptly to the appropriate federal district court.

JOINT INVESTIGATIONS

Section 5, Part 2. The new (i)(6) merely states that §6103 does not preclude or prevent IRS from assisting or working jointly with federal law enforcement agencies in the investigation of non-tax crimes which may involve violations of federal tax laws. This does not change current law, but clarifies the law which now discourages such cooperation by the vague and uncertain language in the act.

DISCLOSURE TO STATE AND LOCAL AUTHORITIES

Section 5, Part 3. S. 2402 also proposes a new (i)(7) authorizing carefully limited redisclosure of tax information to State and local law enforcement authorities. This limited redisclosure would be permitted only as to information already obtained by federal law enforcement officials for a federal non-tax criminal investigation. If such information reflects a State felony violation, the federal official obtaining access would be authorized to go back to court and seek an order authorizing redisclosure to the appropriate State attorney general or district attorney exclusively for use in the investigation or prosecution of that State felony violation. Like other persons receiving tax information, the State attorneys general and district attorneys receiving tax information under (i)(7) would be subject to civil and criminal sanctions for any unauthorized use.

DISCLOSURE PURSUANT TO MUTUAL ASSISTANCE TREATIES

Section 6. S. 2402 would amend § 6103(k)(4) to permit disclosures to foreign governments pursuant to mutual assistance treaties for use in nontax criminal matters such as narcotics trafficking, thereby making it possible for federal officials to obtain reciprocal disclosure of foreign tax information. Such treaties, of course, must be ratified by the Senate. To further regulate this foreign access to tax information, the amended (k)(4) would require entry of an order by a U.S. district court, similar to that required by § 6103(i)(1), before a disclosure could be made. Paragraph (k)(4) presently authorizes similar disclosures to foreign governments for tax use pursuant to international tax conventions.

CRIMINAL PENALTIES

Section 7 would amend the criminal provision of the Internal Revenue Code, 26 U.S.C. 7213, to create an affirmative defense to prosecution where the disclosure of tax information in question was made pursuant to a good faith but erroneous interpretation of the law.

The new subsection would make it clear to federal employees that they need not fear criminal prosecution if they proceed reasonably and in good faith. Actually, this makes no practical change in existing law which requires a "willful" violation to sustain a conviction. It would, however, reduce the extreme chilling effect which present law has on legitimate disclosures.

CIVIL REMEDY

Section 8 would amend the civil remedy section of the Internal Revenue Code, 26 U.S.C. 7217, to make federal agencies, rather than individual federal employees, the defendants in suits alleging unauthorized disclosures of tax information. This change would conform § 7217 to the Financial Privacy Act of 1978 (12 U.S.C. 3417) and the Administration's proposed Tort Claims Act amendments.

Under present law, civil suits may be filed against both the federal agency and the employee involved. This creates a potential conflict of interest requiring retention of private counsel to represent the employee. Moreover, it is unduly harsh to place federal employees who work with tax information regularly in the position of risking financial ruin daily for any mistaken disclosure.

Of course, federal employees would continue to be subject to administrative sanctions, including dismissal, for any negligent disclosure as well as criminal prosecution for any willful, corrupt or malicious abuse of tax information.

CONFORMING AMENDMENT

Section 9. The final section of the compromise bill is a technical conforming amendment to make the remaining provisions of § 6103 consistent with the new two-part definition of tax-related data held by IRS.

Mr. NUNN. Madam President, I see the Senator from Florida in the Chamber. He has worked for hundreds of hours on this amendment. He has been in all the hearings, has heard about the terrible problems in his own State firsthand. He knows about them. He is an equal cosponsor of this amendment. I yield him such time as he may desire.

Mr. CHILES. Mr. President, I thank the distinguished Senator from Georgia, my colleague. I associate myself with the remarks he has made.

I am pleased to join Senator NUNN in sponsoring this amendment, which seeks to return the Internal Revenue Service to its former role as a full-fledged partner in the Federal law enforcement effort. If we are serious about fighting organized crime, particularly the sophisticated and well-financed narcotics traffickers, it is essential that the IRS actively and aggressively participate. In recent years, this has not been the case. Part of the reason for IRS's noninvolvement is the disclosure provisions enacted in the Tax Reform Act of 1976. The measure we are proposing today aims to remove the statutory restrictions that have hamstrung the IRS, while maintaining adequate safeguards to protect the privacy of individual tax returns.

The failure of the IRS to join in nontax law enforcement efforts and the crippling effects of this nonparticipation were graphically illustrated in a series of hearings by the Permanent Subcommittee on Investigations concerning illegal narcotics profits and in a hearing on the IRS which I chaired for the Appropriations Subcommittee on Treasury, Postal Service, and General Government. As we examined the illegal drug trade and its unchecked growth, it was apparent the resources of the IRS are sorely missed. Equally apparent was the unique and indispensable function the IRS can perform in identifying and immobilizing narcotics traffickers.

Madam President, I am vitally concerned that the staggering growth in the drug trade be stopped. I am alarmed just as any citizen should be, but the problem takes on a special significance for me since my State is on the cutting edge in the drug war. Florida is where the smugglers land and the murders occur and the illicit dollars buy everything in sight. Florida is now where the TV news shows

go to portray the violence and huge profits of organized crime. Florida is now the subject of magazine articles with titles like "Miami's Murderous Drug War." My State has been invaded by the traffickers, the hoodlums, and the hired killers and I do not like it one bit.

Madam President, the locale may be Florida but the problem is a truly national one. If the flow of narcotics is not stopped and the drug smuggling rings are not smashed, then no one in this country is safe from the specter of illicit drugs in their community and even in their family. As the drugs flood this country in ever greater amounts, there is no segment of society, no income level, no age group that is immune. If we do not step out of complacency and commit every resource to this battle, then each of us must be ready to face the price of defeat.

It is difficult to look at the immense scope of the drug trade and the formidable task of containing it and then attempt to talk of a solution. Obviously there is no one solution. There is no single step we can take that will assure success. Rather, the point is we should be taking every step possible that promises to improve our drug law enforcement capacity. Getting the IRS, with its unique capability to pierce the financial transactions of the big-time drug dealers, back into the act is one action we should take right away. To accomplish this, we must undo those restrictions which have prevented the IRS from playing an effective role in drug law enforcement.

In the Tax Reform Act of 1976, Congress took necessary steps, in light of the Watergate disclosures, to insure the privacy of tax returns. However, the unintended effect of these provisions has been to severely limit the cooperation of the IRS with the Justice Department and thus greatly hamper Federal narcotics investigative efforts. The General Accounting Office has pointed out that the financial expertise and knowledge of money flow, which only IRS possesses, is vital in pursuing major narcotics traffickers. Former Attorney General Benjamin Civiletti, in delivering the Alfred P. Murrah lecture on the administration of justice, "Post-Watergate Legislation in Retrospect," stated:

> Before the Tax Reform Act of 1976, financial information in the possession of the Internal Revenue Service—information filed by taxpayers as well as information collected by the service in the course of its audits and investigations—was an important resource for criminal investigators and prosecutors in the Justice Department. Money is the medium in which most crimes are transacted, and this is especially true of the Federal crimes that merit the greater part of our investigatory effort—organized crime, and white collar crime and narcotics trafficking. Before the Tax Reform Act of 1976, financial information in the possession of the Internal Revenue Service helped us to piece together and prove in court the paper trials—the illicit financial transactions—that are characteristic of these crimes. Moreover, the skilled personnel of the Internal Revenue Service were and still are the best and most numerous financial investigators in the Federal Government, and before the Tax Reform Act of 1976 we relied upon them heavily to unravel the complex transactions that conceal both tax and nontax crime. But the disclosure restrictions imposed by the Tax Reform Act of 1976 have limited our access both to the financial information in the possession of the IRS and to the assistance of these experts.

The task of pursuing and prosecuting the drug smuggler is difficult enough without first having to face the challenge of penetrating what Attorney General Civiletti characterized as the "Wall of Secrecy" between the IRS and the Department of Justice.

As a result of the Tax Reform Act and its implementation by the Internal Revenue Service, a number of negative effects from an enforcement standpoint have developed.

The IRS is now unable to adequately advise other Federal agencies of the cases it is working on, thus precluding close coordination and encouraging needless duplication of effort.

It has become unreasonably difficult for prosecutors and investigators from other agencies to obtain financial information held by the IRS that would significantly assist in the prosecution of major criminals.

It is extremely difficult for the IRS to provide prosecutors or other Federal investigative agencies evidence concerning nontax criminal violations which the service obtains in the normal course of its investigations.

In those relatively few instances when other agencies are able to work with the IRS, the time delays involved often undermine the benefits to be derived.

Perhaps the ludicrousness of the entire situation is best summed up by GAO's report that the IRS had literally a file drawer full of evidence of serious Federal nontax crimes which the Service had uncovered but which the statute prevents from being transmitted to Justice for investigation and prosecution.

The thrust of the legislation we are introducing is to remove the unnecessary impediments to effective law enforcement while protecting legitimate taxpayer privacy interests. This measure, similar to legislation we proposed in the previous Congress, has been refined and clarified, taking into account testimony received in both House and Senate hearings and input from the Carter administration. Our approach fully recognizes the primary function of the IRS, namely, to collect taxes, and the need of the American citizen to be assured of the confidentiality of his or her tax return.

This amendment will allow the Justice Department access to tax information if such information is material to a lawful investigation. It will continue the important protection that a judge or magistrate review the legitimacy of such requests, but will eliminate the current "Catch 22" situation in which the only way the Justice Department can gain access to such information is to prove that they already know what the information will show.

The amendment provides that disclosure of information will be done in a timely fashion so as to end the delays that in the past have jeopardized criminal trials.

It mandates that the Internal Revenue Service has an affirmative duty to report to law enforcement agencies evidence of crime derived from information falling within one of the nonprotected categories.

Finally, the amendment makes it clear that the IRS is free to work jointly with other Government agencies in combating crime.

If the growth of drug trafficking is such a threat to this Nation, as I am convinced it is, and if we are to reverse our current failure to contain the drug trade, there can be no higher priority than insuring that the full resources of the Federal Government are dedicated to combating this problem. With its unique capabilities and information, it is vital that the IRS be a full partner in the drug law enforcement effort. Redirecting the IRS to this task is something we can do right now that will materially improve our ability to fight the big-time drug operators.

We have had hearings on this approach in three committees. It is time to act. I urge my colleagues to adopt this amendment.

Madam President, I say to my colleagues that we have held three hearings, specifically on this matter, taken all manner of testimony, listened to all kinds of witnesses. This matter has been debated on the floor on two occasions. I think what it boils down to, as I see it, is: Are we serious about law enforcement and are we really going to try to do something to win the battle against organized crime and drug pushers, especially the drug kingpins? Are we serious about that?

If we are, obviously, we have to do something to get the Internal Revenue Service back into the fray. One of the most meaningful things we can do is the amendment that we have before us.

It is obvious, Madam President, that this amendment does protect a taxpayer's legitimate right to privacy. There is not going to be any political use made of this by a vengeful Chief Executive. We are maintaining the same protections as if we were going to place a wiretap. We would have to have a hearing before a Federal judge and explain why it is necessary to make the wiretap. If, getting that information, the judge approved, then we could impose that wiretap. What we are talking about here is information which could be released only if there is a hearing and the Federal judge looks to the protection of that information; that certainly is going to protect the privacy of the taxpayer.

As the distinguished occupant of the chair knows, in our State, we are overrun with drug traffickers. We are not going to catch these people, especially at the top, in the actual delivery of the drugs. We are not going to catch them in the sale of the drugs, because they insulate themselves with so many soldiers that they are protected. The one thing they are in it for is the money and the one way we can catch them is to trace the money. The best people we have in this country to trace money are in the IRS. They can smell money in its faintest odor. We all know that from our individual experiences with them in tax returns.

With regard to these people who should be targeted and who we should go after, this act has prevented it. We have prevented ourselves from having the skills of these trained people. The net result is that the people at the top, whether they be organized crime figures or a drug baron are simply escaping prosecution. That is something we cannot allow to continue. If we are going to put the heat on and really try to do something about organized crime and drugs, we have to be able to make these cases against the people at the top. Those are conspiracy cases, they are the paper trail, they are the tracing money cases. We will get that information if we get the Internal Revenue Service working in that regard.

Madam President, I associate myself with the Senator from Georgia and many others on both sides of the aisle who have joined in this amendment. I think it will be one of the strongest steps we can take in saying that we are serious; that we are going to take away the initiative from the drug barons and that we are going to do something about reversing the clear advantage that they now have. I urge the Senate to adopt this amendment.

Mr. HARRY F. BYRD, JR. Will the Senator from Florida or the Senator from Georgia yield for a question?

Mr. NUNN. I am happy to yield.

Mr. HARRY F. BYRD, JR. Does the Senator from Virginia understand the pending amendment correctly in this respect, that before any tax return can be released by the Department of Justice, a court order signed by a Federal judge must be obtained?

Mr. NUNN. The Senator is entirely correct.

Mr. WEICKER. Will the Senator yield on the answer to that question?

Mr. HARRY F. BYRD, JR. Yes.

Mr. WEICKER. Individual returns would require a court order. The Senator's amendment, as I understand it, does not apply to corporate returns.

Mr. NUNN. The Senator from Connecticut is not correct on that point. The amendment provides that all tax returns have to be turned over only by court order, including corporations, including the biggest corporations. The distinction is between books and records. Individual books and records also require a court order, but corporate books and records do not have to have a court order.

Mr. WEICKER. The Senator is correct.

Mr. NUNN. But they also have to have a written request, so that there is a written track record of the information turned over. The distinction is between an individual and a corporation.

Mr. HARRY F. BYRD, JR. Would the tax return of a corporation require a court order?

Mr. NUNN. It would require a court order.

Madam President, how much time have I used?

The PRESIDING OFFICER. The Senator has used 14½ minutes.

Mr. NUNN. I yield to my colleague from Georgia. I am proud that he is a cosponsor of this amendment. He has voiced his concern for several years about narcotics traffic. He lives in a coastal area of our State, and he is familiar with the problems in Georgia and Florida.

I yield my colleague 3 minutes.

Mr. MATTINGLY. I thank the Senator from Georgia.

Madam President, I am happy to support and add my name as a cosponsor to the Nunn-Chiles amendment to House Joint Resolution 266, the comprehensive tax reduction package, to amend the provisions of the Tax Reform Act of 1976 which govern the disclosure of information by the Internal Revenue Service. This amendment, by removing certain procedural roadblocks which have effectively taken the Internal Revenue Service out of cooperative, nontax criminal law enforcement efforts, would substantially improve Federal law enforcement.

Certainly, no one can disagree that crime is running rampant in our society today. This is a serious problem which affects us all and one to which we must seriously address ourselves. With the exception of legislation to prevent our economic bankruptcy, there is no single issue which deserves quicker and more comprehensive consideration than does legislation aimed at abating criminal activities.

I commend Senator NUNN for his efforts to bring before Congress legislation aimed at reducing crime. Certainly, efforts like the Nunn-Chiles amendment will go far toward resolving some of the many problems which threaten our existence.

Being from the coastal area of Georgia where the problem of drug traffic is alarming, I support legislative efforts to short circuit the activities of drug smugglers, who in the past have too frequently used governmental loopholes to their advantage. With enactment of this amendment, the only revenue loss would be to organized criminals and narcotics traffickers.

I am happy to support the Nunn-Chiles amendment and ask my colleagues to do likewise.

Mr. NUNN. I thank my colleague from Georgia for his cosponsorship of this amendment and for his interest in trying to improve our drug enforcement procedures.

Madam President, I yield 3 minutes to the distinguished Senator from New Hampshire, who has had tremendous experience in the law enforcement area. He is vice chairman of the Subcommittee on Investigations. He has spent many years on this subject, involving organized crime and labor racketeering. He is an expert in these areas.

Mr. RUDMAN. I thank the Senator from Georgia.

I wish to say at the outset to my good friend from Connecticut that I have looked very carefully at the hearing record of the measure that the Senator from Connecticut had introduced, and I believe very deeply in all the protections contained within that measure.

I can say that I do not believe that what we are proposing today in any way does violence to the substance or the intent of that legislation.

As one who has been in law enforcement for a number of years, it has always seemed ridiculous to me that the 1976 Tax Reform Act, intentionally or unintentionally, precluded the IRS from sharing information concerning nontax-related criminal activity with the Justice Department and other law enforcement officials. Clearly, the 1976 law was a response to the Nixon administration use of the IRS for improper purposes.

New Hampshire had a similar problem in 1970, one with which I am familiar. I do not believe that the way to remedy those abuses is to adopt so-called safeguards, such as those that were adopted in 1976, which are a complete bar, if you will, to the kind of interchange of information that I believe is necessary to law enforcement.

Under present law, IRS agents are forbidden to tell other agencies of criminal evidence in their possession unless requested, and then only upon a court order. It is beyond my ken to know how we can expect law enforcement agencies to be so bright as to be able to ask for information they do not know exists. I believe that is not reasonable.

The amendment offered by Senator NUNN does not allow the IRS blanket publication privileges. I could not support it if it did. Tax returns and related information will remain confidential unless there is a compelling reason for its disclosure. Under those circumstances, a court hearing will be necessary to determine whether or not the information may be disclosed. This restriction would not relate to the substantial amount of nonreturn information pertaining to criminal activity that the IRS collects each year.

I recall working in 1974 with IRS and strike force personnel in the State of New Hampshire on a drug-related case. The information they shared with us was very important for our eventual prosecution. Once the 1976 law was passed, those channels of communication were closed to us.

I hope that the way this amendment has been carefully drawn will suggest to those who care deeply about civil liberties, as I do, that we are not treading on the rights of law-abiding citizens. We are going to make it easier to prosecute those individuals involved in drug-related crimes, so prevalent in the Southeastern part of our country.

I thank the Senator from Georgia for yielding time.

Mr. NUNN. I ask unanimous consent that the names of the Senator from West Virginia (Mr. RANDOLPH) and the Senator from Nebraska (Mr. ZORINSKY) be added as cosponsors of the amendment.

The PRESIDING OFFICER (Mr. COCHRAN). Without objection, it is so ordered.

Mr. NUNN. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Nine minutes and ten seconds.

Mr. NUNN. I yield 1 minute to the Senator from Oklahoma, who has been a leader in the fight and is a cosponsor of this amendment.

Mr. BOREN. I thank the Senator from Georgia.

Mr. President, I am happy to join my colleagues in cosponsoring this amendment to the tax bill. I want to commend Senator NUNN for taking the initiative in this area and for shepherding this amendment through all the hearings and revisions over the past several years.

I want to emphasize something that has already been said. This amendment has no revenue impact, but it is an amendment that should be addressed in this bill.

Organized crime and illegal narcotics trafficking has experienced a phenomenal growth over the past 5 years since the IRS has been reluctant to use tax information to help fight these illegal activities. The IRS reluctance to use this information has been the result of interpretations of the Tax Reform Act of 1976. The provisions of this act were enacted with worthy ideals in mind to prevent abuses of privacy that were evident during the Watergate era.

Unfortunately, the Tax Reform Act of 1976 has had the effect of removing the IRS from the fight against nontax criminal activity. This amendment seeks to strike a balance between the still protected rights to privacy and efforts by law enforcement agencies to fight organized crime and narcotics trafficking with tax information. It is important to note that this amendment does not remove privacy safeguards. It only makes easier the proper disclosures of tax information to Federal prosecutors for criminal investigations.

Mr. President, Senate hearings have documented that organized crime and illegal drug trafficking generate literally billions of dollars in unreported income. The Federal Government is losing the tax benefits from all these illegal, untaxed profits. Furthermore, it has been shown that the average taxpayer is more likely to pay his fair share of taxes, if he realizes that the Government is able to collect millions in taxes from organized crime figures.

Our Nation is finally realizing how widespread organized crime has become. We are becoming a fearful Nation, even to the point of literally being hostages in our own homes. We must take effective steps to counteract this growing problem, and adoption of this amendment is a big step in the right direction.

Mr. President, it is time that we once again return the IRS to its effective crime fighting form. The changes we are proposing to the Tax Reform Act of 1976 will still allow for privacy safeguards but will also make it easier for the IRS to provide information in criminal prosecutions.

I am proud to join in this effort with my colleagues. Next to inflation and high interest rates, organized crime is one of our most serious problems and we must begin to address the solutions immediately. I urge the adoption of this amendment.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield?

Mr. NUNN. I yield.

Mr. HARRY F. BYRD, JR. The Senator from New Hampshire used the word "disclosure" and the Senator from Georgia used the word "disclosure." Ordinarily, one associates that with public disclosure. Do I correctly understand that it is not public disclosure, that it is only disclosure to the Department of Justice via the Federal judge?

Mr. NUNN. That is absolutely correct. That is an excellent point. The disclosure is only to the Justice Department.

Mr. President, I yield the floor.

Mr. WEICKER. Mr. President, I oppose the amendment of the distinguished Senator from Georgia, as I have opposed it in the last session of Congress, and as I opposed it earlier in 1979.

I should like to make a few points to some of my colleagues who are cosponsors of this measure.

First of all, let us understand that whatever we do on the floor of the U.S. Senate is not restricted to organized crime and drug traffickers. Those are great buzz words. Whatever we pass here certainly applies to them, but it applies also to ministers, it applies to teachers, it applies to laborers, it applies to Senators, it applies to all of us.

This is not a bill that is geared toward organized crime and drug traffickers. It is general legislation that applies to all citizens of this country.

Indeed, if privacy is to be violated, it is not just the privacy of drug traffickers and organized crime. The privacy of all of us will be whittled away to some degree by this amendment, if it is adopted.

Second, I should like to commend my friend from Georgia and my friend from Florida for the style in which this amendment has been proposed. This not a lameduck session. We are in full cry here, right at the beginning of a session. This is not midnight, which was one of the other times I had to get on my feet and oppose it. This is a perfectly reasonable hour of the day, during a regular session of Congress.

Third, I commend him because it is a lot tighter than the legislation that was defeated last year. There is no question that there is some tightening up. This legislation is a lot tighter than that which I opposed the year earlier.

The arguments have not changed, that is, to fight organized crime and drug trafficking. The arguments have not changed in several years. But, the legislation has been changed; it has been gradually tightened.

So obviously the arguments against the passage of this type of legislation have had their effect and well they should.

My good friend from New Hampshire mentions the fact these were the abuses of the Nixon administration. See what the key word is there—"administration."

Richard Nixon did not go running around town engaging in the types of abuses which we sought to protect the American public against. It was the Justice Department. It was the Internal Revenue Service. It was the Agriculture Department. It was the Department of Commerce. It was these agencies of Government which were abusing the tax privacy of American citizens.

So let us understand that this activity was not geared at some particular individual in the Nation's history but rather against massive institutional abuse which had gone on even prior to Richard Nixon.

The last point that I think is important to be made to my colleagues, and probably the most important, is that the IRS is not a law enforcement agency. It is a revenue collecting agency. And, indeed, in testimony before the Finance Committee chaired by BOB DOLE back in 1976 we had every single Commissioner of Internal Revenue up to that time appear before the committee and every one of them testified that there would be a direct relationship between the amount of moneys collected by IRS and the degree of confidentiality of tax return information. Every single one of them said that the more confidential the information, the greater the revenue collection. The less confidential, the greater the revenues would decline.

The Internal Revenue Service, and I repeat, is not a law enforcement agency. The only laws which it is charged to enforce are the tax laws, period, and that for purpose of collection.

It is not the same as the Federal Bureau of Investigation. It is not the same as the Drug Enforcement Agency. It is not the same as any of the law enforcement agencies. It is a revenue collection agency.

Mr. President, in 1976, Congress enacted strict safeguards to protect the tax privacy rights of Americans. The 96th Congress twice, in December 1979 and December 1980, rejected efforts to weaken these statutory safeguards. Today, the 97th Congress is presented with new legislation incorporating many of the provisions previously debated and rejected in the last Congress. I, therefore, would like to voice once again the concerns I raised with my colleagues in opposing this unwise assault on the rights of privacy of taxpayers.

As this is a new Congress, with new Members, I think it would be appropriate to review the history surrounding this important privacy issue.

The starting point is the fourth amendment to our Constitution. This amendment provides that:

> The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

I am certain that my colleagues are familiar with the amendment. However, how many of my colleagues are aware of the fact that a principal reason for the adoption of this safeguard was the abuse of privacy rights perpetrated by English monarchs in the name of tax collection? These abuses were discussed by Mr. Justice Blackmun in *G. M. Leasing Corporation* v. *United States*, 429 U.S. 338 (1976); he concluded that:

> Indeed, one of the primary evils intended to be eliminated by the Fourth Amendment was the massive intrusion on privacy undertaken in the collection of taxes pursuant to general warrants and writs of assistance. 429 U.S. at 355.

James Madison realized the necessity of placing restrictions on the powers given to the Government for the purpose of collecting taxes. In arguing for the

adoption of the Bill of Rights to restrain the U.S. Government, Madison said:

The General Government has a right to pass all laws which shall be necessary to collect its revenues; the means for enforcing the collection are within the direction of the Legislature: may not general warrants be considered necessary for this purpose, as well as for some purposes which it was supposed at the framing of their constitutions the State Governments had in view? If there was reason for restraining the State Governments from exercising this power, there is like reason for restraining the Federal Government. 1 Annals of Congress, 438 (1834 ed.).

Thus, our Founding Fathers wrote safeguards into the Constitution because they understood that the protection of the basic liberties of our citizens must be founded on law and not on the assurances of Government officials. They realized that there is a tendency among those who govern to justify the use of ignoble means to achieve noble objectives. As Samuel Johnson observed, "Patriotism is the last refuge of a scoundrel."

Unfortunately, subsequent generations forgot the lesson that our Founding Fathers had so painfully learned. Despite attempts to limit disclosure, by 1934 income tax returns and information were deemed to be "public records." Federal law enforcement officials were able to obtain tax information simply by stating that, in their discretion, it was "necessary in the performance of * * * official duties." The Internal Revenue Service, for all intents and purposes operated a lending library.

In 1976, Congress was confronted by overwhelming evidence of abuses similar to those which prompted our Founding Fathers to adopt the fourth amendment. The statutory rules governing the disclosure of tax information were reviewed for the first time in over 40 years and tax privacy safeguards were enacted in the Tax Reform Act of 1976 as a result of four interrelated developments.

First, abuses uncovered during the Watergate investigations, documented use of the IRS as an intelligence body to derive information harmful to enemies of the Nixon administration and helpful to its friends. These abuses were summarized by the House Judiciary Committee in article II, subparagraph 2 of the articles of impeachment of President Nixon:

He has, acting personally and through his subordinates and agents, endeavored to obtain from the Internal Revenue Service, in violation of the constitutional rights of citizens, confidential information contained in income tax returns for purposes not authorized by law and to cause, in violation of the constitutional rights of citizens, income tax audits or other income tax investigations to be initiated or conducted in a discriminatory manner.

Among the most egregious violations of individuals' rights were those committed by the "special service staff," a semisecret unit operating within the IRS which was charged with collecting information on so-called activist organizations and individuals. Because there were no limitations at that time on the dissemination of tax return information, the special service staff traded tax information freely with the Justice Department in an attempt to establish nontax statute violations by these "enemies." Senator Ervin described the questionable activites of this group:

The special service staff was tasked with collecting, analyzing and disseminating information on individuals and groups publicly promoting what the IRS considered to be "extremist views and philosophies." What began with an initial list of 77 organizations mushroomed to an intelligence file on approximately 3,000 organizations and 8,000 individuals who openly disagreed with Government policies. . . .

Special cooperation with other Government agencies with regard to non-tax statute violations was high on the list of special service staff responsibilities. For example, the Internal Security Division of the Justice Department sought out a special informal working arrangement with the staff whereby it would have access to such information. A listing of 14,000 entities which "posed a threat and probability of tax violations was sent by the Internal Security Division to the special service staff. . . ."

The special service staff's political intelligence activities went far beyond the Internal Revenue Service's proper function of enforcing the tax laws. . . .

In short, abuses of tax privacy rights in the name of nontax criminal violations were a prime reason for enactment of the disclosure safeguards contained in the Tax Reform Act.

Second, violations of Americans' constitutional rights were discovered by the Church Committee on Intelligence Activities and the Rights of Americans. The committee found that there was nothing to insure the limitation of the subsequent use of tax information to the purpose for which it was disclosed, and concluded in its 1976 report that:

The FBI has had free access to tax information for improper purposes . . . The FBI used as a weapon against the taxpayer the very information the taxpayer provided pursuant to his legal obligation to assist in tax cases and, in many cases, on the assumption that access to the information would be restricted to those concerned with revenue collection and used only for tax purposes.

Third, disclosures were made that special powers of the IRS were being misused to collect information for purposes well beyond tax administration but related to other law enforcement activities. These led to a series of congressional hearings on the propriety of various uses of tax information. In the 93d Congress, the Senate Judiciary Committee held hearings and numerous hearings were conducted by the Senate Finance Committee and House Ways and Means Committee in the 94th Congress.

Fourth, recommendations were made by the Privacy Protection Study Commission for more stringent safeguards with respect to disclosures of records made by the IRS. The Commission stated that the taxpayer's disclosures to the IRS * * *

cannot be considered voluntary because the threat of criminal penalties for failure to disclose always exists. The fact that tax collection is essential to government justifies an extraordinary intrusion of personal privacy by the IRS, but it is also the reason why extraordinary precautions must be taken against misuse of the information the Service collects from and about taxpayers.

The Privacy Commission concluded that:

Federal law enforcement officials should not have easier access to information about a taxpayer when it is maintained by the IRS than they would have if the same information were maintained by the taxpayer himself.

Mr. President, I have taken the time to review this history because it is important to remember the events surrounding and consideration given the formulation of the existing standards governing disclosure of tax information. Based upon this substantial record, Congress carefully drafted legislation which balanced the rights of Americans to certain privacy standards with the needs of Government in enforcing the law.

Now, less than 4 years after the striking of this balance, attempts have been made to tip the scales in favor of law enforcement, at the expense of the taxpayer's privacy right. In December 1979, an unprinted amendment was offered to the windfall profit tax bill which would have removed the safeguard of a court order for disclosure of tax return information. That attempt failed by a 65 to 8 vote. In December 1980, on a rider to a continuing appropriations bill that supporters were rushing through a lame-duck session of Congress, language to weaken the tax privacy safeguards was offered and tabled by a vote of 43 to 34. This end run was made despite the fact—or perhaps because of it—that the Finance Committee held hearings on legislation to amend the Internal Revenue Code and decided not to report a bill to the full Senate.

Similar legislation is now being proposed as an amendment to House Joint Resolution 266, the Economic Recovery Tax Act of 1981. S. 732, a revised version of legislation offered in the 96th Congress, was introduced on March 17, 1981, by Senator NUNN and others. No hearings have been held on this new legislation in the Finance Committee although Senator GRASSLEY, chairman of the Subcommittee on Oversight of the Internal Revenue Service, has expressed his intention to examine these complex disclosure issues in a series of hearings. In a letter to Senator NUNN dated June 16, 1981, Chairman GRASSLEY wrote:

U.S. SENATE,
Washington, D.C., June 16, 1981.

Hon. SAM NUNN,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR NUNN: Thank you very much for your letter expressing concern over the disclosure provisions contained within Section 6103 of the Internal Revenue Code. I apologize for the delay in responding to your important request, but I was hoping to answer with a specific hearing date. Due to scheduling problems with the Finance Committee, I am unable to provide you with that information.

Both Senator Baucus, the Ranking Minority Member of the Subcommittee on Oversight of the Internal Revenue Service, and I are concerned with the problems of law enforcement and the mushrooming underground economy which is presently escaping taxation. There are a host of other issues

which fall beneath the general rubric of disclosure. This fall, I would like to examine these issues in a series of hearings. Given your extensive involvement in the investigation of organized crime and drug trafficking, I would be honored to have the benefit of your testimony at these hearings. Your expertise on these issues will greatly enhance our hearings.

Be assured I will notify you as soon as a hearing date is set. Again, I greatly appreciate your patience in awaiting this response, and your willingness to participate in these hearings.

Sincerely,

CHARLES E. GRASSLEY,
Chairman, Subcommittee on Oversight of the Internal Revenue Service Committee on Finance.

In addition, the new administration has had no opportunity to present its position on these sensitive matters. Whereas, under the previous administration, the Justice Department and the Internal Revenue Service opposed the Nunn legislation, there is no indication of what their position is now relative to S. 732. Since the legislation fundamentally affects the relationship of Federal agencies to the IRS, I believe that at the very least, the executive branch should be heard before the Congress acts on this controversial proposal.

Mr. President, I am pleased to see that Senator NUNN, in introducing legislation similar to that rejected by the Senate on two separate occasions last Congress, has made some changes in his proposal. Although for the most part minor in nature, these changes do address some of the concerns I expressed during floor debate in the last Congress and while testifying before the Senate Finance Subcommittee on IRS Oversight and the House Ways and Means Subcommittee on Oversight. I applaud these changes. but clearly they are inadequate and fall far short of maintaining the delicate balance achieved under current law between the taxpayer's privacy rights and law enforcement's information needs.

The law presently requires that a court order be obtained by law enforcement officials before the IRS can turn over a taxpayer's return or any information supplied in support of the return. The Nunn proposal, however, would completely erode this protection now granted to any business, corporation, partnership or association consisting of three or more persons. Why?

As evidenced by the privacy hearings held by the Small Business Committee. businesses are quite concerned about their privacy rights. Tax return information on small businesses invariably contain personal information about the principal of the firm.

There is no reason to relax the burden on the Government when it comes to access to records of small or large corporations. For example, there is no lesser standard for search warrant orders for corporate records than for individual's records. The standard is the same because the public as a whole want to protect privacy rights by preventing unreasonable searches and seizures under the fourth amendment. Similarly, the Supreme Court has established that speech does not lose its protection under the first amendment because it has a corporate rather than an individual origin.

Under Senator NUNN's proposal the taxpayer's privacy rights would further be eroded by relaxing the standards necessary for the Justice Department to prove in order to obtain an ex parte order. This standard, which would only require that there be reasonable cause that information sought may be relevant to the commission of a crime, is not even as strong as the evidentiary standard proposed in the Nunn bill rejected by the Senate last year which required both relevance and materiality.

The Nunn proposal also eliminates the requirement that the Justice Department exhaust all other sources before it can turn to the IRS to obtain information. This safeguard, which was suggested by former IRS Commissioner Donald D. Alexander, is similar to the requirement deemed necessary by Congress in 18 U.S.C. 2518(1)(C) that investigative procedures be attempted before a court may order a wiretap or other form of electronic surveillance. With the erosion of such essential standards, it is likely that the IRS would simply become another automatic, investigative tool to be used by Federal law enforcement agencies in their investigation of criminal activity—much like the taking of photographs or the conducting of surveillances.

Furthermore, the provisions in S. 732 which would require the IRS to disclose under emergency circumstances to the appropriate agency information to the extent necessary contain insufficient safeguards to insure that the taxpayer is not stripped of his privacy rights. The broad standards of this provision could give the IRS the unbridled discretion to turn over any information in their files to anyone in the Government, and threatens to mark the return of the days of the IRS lending library. This proposal does not even afford the taxpayer the protections contained in 18 U.S.C. 2518(7), which require notification to and approval of a court within 48 hours after a wire or oral communication has been intercepted in an emergency situation.

The loosely drafted provision in S. 732 which would permit disclosure to State law enforcement officials also gives me grave concern. The abuses which I enumerated earlier in my statement were not confined to high level Federal employees. There is ample documentation that State and local officials were responsible for equally appalling abuses.

Finally, I am worried about the provision which would authorize disclosure of information on American citizens to foreign countries. The thought that personal information on Americans can be disclosed to other countries which do not have the guarantees of individual rights which are contained in our Constitution is simply repugnant to the principles upon which our Nation was founded.

Mr. President, what is the rationale for this back door encroachment upon the rights of Americans? It is done under the banner—which all good citizens willingly carry—of the fight against organized crime, mobsters and narcotics traffickers. Why? Because one is best able to obfuscate the true issues by arguing in an inflammatory way that a change in the law is the only solution to these evils.

One must look behind the rhetoric to ascertain the reason for this legislation. It is expediency. It is not that the Justice Department does not have the means of obtaining evidence other than from tax return information in its fight against crime. The Justice Department, as evidenced by the great number of its successful prosecutions, does. But it is far simpler—and more expedient—to go directly to the tax return and related information than to the other sources.

Jerry Litton, the late Congressman from Missouri who coauthored the disclosure protections in 26 U.S.C. 6103, succinctly rebutted the expediency rationale. In testimony before the House Ways and Means Committee in January of 1976 he said that—

> If we are only looking for expediency, let's wiretap every one thousand homes, open the mail of every one thousand citizens, if we are only looking for expediency.

But this country does not look simply for expediency when dealing with the rights of citizens. Our heritage is otherwise.

Two hundred years ago our Founding Fathers authored a Constitution premised on the principle that individuals—as human beings—are more important than the conveniences of society. A greater importance was placed on individual liberties than on Government efficiency. That was the philosophy underlying the Bill of Rights.

The existing tax information disclosure provisions reflect the fact that Americans are compelled to surrender the constitutional rights guaranteed by the fourth and fifth amendments—the right to "be secure in their * * * papers, and effects, against unreasonable searches and seizures" and the right against self-incrimination. In order to facilitate the effective administration of our tax laws, each American voluntarily surrenders certain rights and assumes the duty of self-investigation, factfinding, and reporting. This baring of private papers and matters is an accommodation by citizens to their Government for tax purposes—not for scientific purposes, not for nontax justice purposes, not for sociological purposes, not for political purposes, not for statistical purposes.

The method in which taxpayers voluntarily comply with our tax laws and, in most cases, fully report their earnings is the envy of most other nations where dishonesty is often the rule rather than the exception. If taxpayers become convinced that confidential data they submit each year is used for other than tax purposes, how long will it be before cheating is commonplace? Widespread cheating would be beyond the capacity of the IRS to control and our entire system of voluntary self-assessment would collapse.

Mr. President, those who advocate diluting existing tax privacy safeguards claim that the Tax Reform Act of 1976

has led to a flourishing of illegal narcotics trading. They seem to ignore, however, the deficiencies of the agency entrusted with enforcement of the criminal statutes—the Justice Department. In its March 1977 report entitled "War on Organized Crime Faltering—Federal Strike Forces Not Getting the Job Done," the GAO concluded that, and I quote:

The Government still has not developed a strategy to fight organized crime.

There is no agreement on what organized crime is and, consequently, on precisely whom or what the Government is fighting.

The strike forces have no statements of objectives or plans for achieving those objectives.

A subsequent report in October 1979, went on to elaborate that government drug enforcement and supply control efforts were hampered by poor coordination, a failure to use available enforcement tools and poor training. The report also concluded that—

The adverse impact on the law enforcement community, as a result of the disclosure provisions (enacted as part of the Tax Reform Act of 1976), had not been sufficiently demonstrated to justify changing the law.

Mr. President, as I have said, I have testified at great length before the Senate Finance Committee and House Ways and Means Committee concerning legislation which would amend the disclosure provisions of the Internal Revenue Code. I will not repeat myself here today, other than to say that the few years that have transpired since enactment of the Tax Reform Act have not shown that Congress erred in enacting needed tax reform legislation or that provisions of the law have unfairly or unduly burdened law enforcement efforts.

What time and experience have shown is not that the law is burdensome, or wrong, or unfairly restrictive, but that those who have interpreted the law have done so incorrectly. For example, in testimony in the last Congress before the Senate Permanent Subcommittee on Investigations, Peter B. Bensinger, the Administrator of the Drug Enforcement Administration, commented with respect to the authority given IRS under 26 U.S.C. 6103(i)(3) to disclose to other law enforcement agencies information it has regarding violations of criminal law. Astonishingly, his testimony revealed that DEA records do not show ever having received such disclosures from IRS. This indicates not a problem with the law, but a problem with the agency empowered to act pursuant to the law. How can one profess that the provisions of the Tax Reform Act prohibit effective law enforcement when a provision of the act designed to assist law enforcement is not properly put to use?

Mr. President, respect for the Constitution and respect for individual liberties should be the prime concern to each one of us here. The protections that are in the present act certainly allow the proper enforcement of our tax laws and the maximum collection of taxes, but at the same time, assure that history will not repeat itself in this instance, and that Americans' tax privacy rights will be unabridged.

Mr. President, the new legislation introduced by my respected colleague from Georgia, Senator NUNN, and others, should be carefully considered by my colleagues. I believe any legislation making significant changes in statutory tax privacy safeguards requires thorough debate. I would certainly welcome the opportunity to testify on the new legislation, and I will urge the Finance Committee to schedule hearings at an early date. I caution, however, that this is not a matter for hasty action in the name of more effective law enforcement. My colleagues should clearly understand the constitutional and legislative history compelling strict safeguards of taxpayer rights of privacy. I believe there is an overwhelming burden on those who seek to balance away these fundamental rights.

Though tightened up, there are still glaring deficiencies in what is permitted in this legislation as it applies to the privacy of each one of us.

I do not distinguish between the individual and corporations. The Senator was entirely correct when I rose to question as to whether or not his amendment applied to corporate returns as well as individual returns in saying that it applied to both.

On the other hand, they do not need a court order to get the accompanying information insofar as the corporate side is concerned. So it is deficient in that area.

As I have said, this amendment would go even beyond what we deem as proper in the area of privacy in allowing foreign countries access to our tax returns as individuals. If under some sort of a mutual assistance pact this information is called for, foreign governments would have access to the individual tax returns of Americans.

I can go down the whole checklist. As I said before, this amendment is a little bit better than presented to the Senate last Congress, but it still is a long way shy of what should be achieved in an appropriate balance between tax privacy and the legitimate use of information in the pursuit of law enforcement.

Those changes in the Tax Reform Act of 1976 were the first in several decades—I think perhaps even 30 or 40 years—so this legislation was not something that was hastily gotten together. The Congress went through extensive hearings before the Tax Reform Act of 1976 was enacted into law.

I know the bleating that goes on among the law enforcement establishment here in Washington; they want a shortcut to many things.

But let me assure the Senators that the Constitution, the Bill of Rights, and the fourth amendment impose clear obligations on the Government before any American can be convicted of a crime. That is what these documents are all about. Does anyone here know the basis for the fourth amendment? It is ironic that we have to raise this right now. That amendment states that the right of people to be secure in their persons, houses, papers, and effects against unreasonable searches and seizures shall not be violated. Does anyone know the basis for that historical amendment?

It was to protect the people of Great Britain against the abuses of their monarch specifically in the area of tax collection. That is the historical basis of the fourth amendment to the Constitution of the United States.

All sorts of mischief are conceivable in this area in the name of law enforcement and using the inflammatory words of drug traffickers and organized crime. But I have to remind each one that there is nothing restrictive about what is being proposed here; whatever is enacted applies to every one of us.

It was the late Congressman from Missouri, Jerry Litton, and myself who drafted this legislation.

In this instance it was not a Nixon administration gone wild. In that case it was the Department of Agriculture using these returns for various and sundry purposes against farmers—clearly outside the scope of the proper use of tax return information. Those farmers took upon themselves the duty of complying with the tax laws of this Nation and in effect gave up their fifth amendment right, and everything else, to go ahead and comply with the law; but it was not contemplated that the information they gave was going to be used in that fashion. This was not Richard Nixon.

Certainly is there anyone in this Chamber who will deny, recognizing the increasing use of great banks of computers and all the information that is sought in every area of life, that privacy is the issue? It is becoming one of the greatest issues of our generation, and instead of reassuring that right to privacy, will this Congress go ahead and expose it even further to the intrusions of Government?

In any event, I have tried to sketch out the basis of the argument for my colleagues. My arguments have not changed since 1976 and neither have the arguments on the other side.

All that has managed to happen is that the Senate has turned these efforts down one by one as the amendments offered have become tighter and tighter.

What if I had not fought on this floor 2 years ago or 1 year ago? I am again entirely confident of the action this body will take and rather than have one of these pieces of legislation slapped onto essentially a tax bill—I understand my good friend, Senator GRASSLEY, and my good friend, Senator BAUCUS, the chairman and the ranking member of the subcommittee whose responsibility it would be to hear legislation on this subject—have agreed to hold hearings on this subject.

A lot of Senators were not around here in 1976 when the now Finance Committee chairman, Senator DOLE, held hearings on the subject. Maybe it is time we had such hearings again and brought before Congress the Commissioner of the Internal Revenue Service to find out what would happen to the collection of revenues if the law were changed.

I am perfectly satisfied to have this

bill go before that subcommittee for hearings. And I will support whatever result comes out of the Finance Subcommittee in the way of a recommendation. I think I can do that and I would support their recommendation.

But just in a procedural sense to go ahead and make a major revision in this magnificent piece of legislation simply flies in the face of the entire history of this legislation and flies in the face of the past record before this body. To pass this measure this evening without studied and just consideration would be a grave error.

So I hope that the sponsors of the amendment would agree—first of all I hope Chairman GRASSLEY would agree to hold hearings on this—and that the sponsors of the amendment would forebear in any action here this evening. After holding hearings on this legislation, we would have a very complete and thorough recommendation to this body before taking any action to improve the Tax Reform Act of 1976.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator from Connecticut yield for a question?

Mr. WEICKER. Yes.

Mr. HARRY F. BYRD, JR. I think the Senator from Connecticut is making a good argument. I think the fact that this proposal is tighter than had been the previous proposal is a great tribute to the Senator from Connecticut.

But to get back to this precise legislation, it has been mentioned that the records of corporations are in a different category under this legislation than tax returns would be. I frankly am not familiar of how records can be obtained today under the present law.

Does the Senator from Connecticut know how they can be obtained today? How does this legislation differ in that respect?

Mr. WEICKER. Such information would have to be obtained by virtue of an ex parte order, by a court order.

Mr. HARRY F. BYRD, JR. Today?

Mr. WEICKER. That is correct.

Mr. HARRY F. BYRD, JR. What about under this proposal?

Mr. WEICKER. You do not need a court order to obtain the information of corporations that append corporate returns.

Mr. HARRY F. BYRD, JR. The Justice Department could go directly to the corporation and merely by that action obtain the record of the corporations?

Mr. WEICKER. Could the Justice Department without the necessity of a court order obtain this information? The answer is, yes.

Mr. RUDMAN. Mr. President, will the Senator from Connecticut yield?

Mr. WEICKER. Yes.

Mr. RUDMAN. I think the Senator from Virginia asked the question of whether or not the Justice Department could go to the corporation and get the records from the corporation. I do not think the Senator understands the question. I know you understand it better than I do, but this deals only with records in the hands of the IRS, not in the hands of the corporation. The same restrictions would apply to any Justice Department request to a private corporation for their records as apply now.

Mr. WEICKER. That is correct.

Mr. HARRY F. BYRD, JR. This legislation then does not differ in the respect from what is on the books today?

Mr. WEICKER. No, that is incorrect. It does. The present legislation, under that legislation, the IRS would not by virtue of a request of the Justice Department, it would not. That is the law today.

Mr. HARRY F. BYRD, JR. The Senator is speaking of tax returns?

Mr. WEICKER. No, not the return, the information that appends to the return.

Mr. HARRY F. BYRD. JR. The information that appends.

Mr. WEICKER. The information, that is right.

The PRESIDING OFFICER. Who yields time?

Mr. WEICKER. I suggest the absence of a quorum, Mr. President.

Mr. NUNN. Will the Senator withhold?

Mr. WEICKER. Yes.

Mr. NUNN. May I clarify that? The question was under the present law what is required. I say to the Senator from Virginia nonreturn information can be gotten today under the present law without a court order. The difficulty is the way they get it, the law requires that they describe exactly what it is they want. If they can describe exactly what it is they want with the detail required by the law they would not need it to begin with.

Then they also have have to describe that there is no other information that could be used in lieu of that information, so it is a Catch-22 situation. The IRS cannot in any way insinuate what they have. The Justice Department does not know and, therefore, the standards are what preclude that.

There is no difference between the present law and this amendment as far as the procedure. You still have to go to court—there are some differences but not the major procedure. You still have to go to court to get a return information. Nonreturn information you can get through a request. Those two things are the same, but it is the standards of proof in order to get that that are the major and fundamental difference.

The PRESIDING OFFICER. Who yields time?

Mr. GRASSLEY. Does the Senator from Connecticut yield?

The PRESIDING OFFICER. The Senator from Connecticut has 13 minutes.

Mr. WEICKER. I yield 5 minutes to the Senator from Iowa.

Mr. GRASSLEY. I thank the Senator from Connecticut for yielding to me.

I feel compelled to rise as chairman of the Subcommittee on Oversight of the IRS, a subcommittee of the Finance Committee, to tell this body that I have had correspondence with the Senator from Georgia. I answered his request for hearings on this subject, after considerable thought and deliberation on the subject matter. To me as a freshman Member of this body, I felt compelled to look at the issue myself, and I have written back to him assuring him that we would have hearings on this subject.

I think with the assurances the Senator fom Connecticut has given this body are important, that after the Finance Committee has taken a look at it that he would support the product of the entire Finance Committee. I hope my assurances as well as those of the Senator from Connecticut, would be enough to convince the Senator from Georgia that now is not the time to deal with this subject, especially in this fashion.

I have had some private conversations with the Senator from Montana, the ranking Democrat on the committee, and I know that he has some misgivings about this use of the amendment procedure, even though we both agree that this is a subject matter that legitimately ought to be considered. Whether this legislation is the exact route to go I am not prepared to say at this time.

I would implore the Senator from Georgia to be cognizant of the fact that there are about 18 or 20 Members of this body who were not here a year ago as Members and need time to study this issue in depth. I know the Senator from Georgia has a reputation for doing his homework thoroughly not only on defense matters but he has demonstrated that on this issue as well. He has done considerable homework on this subject.

I can say, just listening to this debate, that the Senator's arguments are very persuasive. But, I also feel as a Member of this body and as chairman of this subcommittee and as a member of the Finance Committee that I have some responsibilities to the rest of the body to show some leadership in this area, as chairman of that subcommittee.

There is some deference on the part of other Members, particularly of my party, to individual subcommittee chairmen, and I do feel an obligation to carefully study this issue. I do not know whether the ranking Democrat even feels prepared to move forward.

Any additional assurances the Senator from Georgia needs beyond what I said in my letter and my assurances now, may I state I am more convinced than ever before that this issue should have hearings in my subcommittee?

I know, as I visited with the Senator from Georgia privately, he suggests that: "Well, it just may never happen or it may take too long to get the process going." I will assure the Senator that I will hold hearings on this, if they can be worked out, in the month of September; if they cannot be worked out in the month of September, then in the first half of October, I am sure we can find a suitable time.

I do not do that in a defensive way. I think the Senator brought up an issue. If the Senator would happen to decide not to withdraw his amendment or he should decide that it should go to a vote and it should be favorably voted. I am not going to be offended by his actions.

At this point, I think the Senator should be cognizant of the fact that one-fifth of this body are new Members and we are dealing with a very sensitive subject on the privacy of individuals' financial records. This must be carefully con-

sidered. I never would take a position that privacy ought to be used as a defense so that organized criminal activity can run rampant through our economy as it has in this way. I just feel the issue requires additional study.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. GRASSLEY. Will the Senator yield me just 30 more seconds?

Mr. WEICKER. I yield 30 seconds to the Senator.

Mr. GRASSLEY. I would simply say, in conclusion, that I told the Senator in correspondence that there would be hearings on this. I want to assure him from the floor that I meant what I said then. But even though I said it fairly casually at that time, listening to his rationale for the necessity of approaching this problem by the use of income tax records, I look more favorably on this legislation than at the time the bill was introduced. Hence, I feel more compelled than ever to have hearings on it.

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER (Mr. DURENBERGER). The Senator from Connecticut.

Mr. BAUCUS. Will the Senator from Connecticut yield 2 minutes to the Senator from Montana?

Mr. WEICKER. I yield 2 minutes to the distinguished Senator from Montana.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. I thank the Senator from Connecticut for yielding. This is a difficult issue. We all very much agree that it is way too much; almost any drug traffic is too much. There certainly is too much in our country today. It has become rampant. We know particularly about the problems in some States of our country.

Here we are faced with a bill designed to address that problem but which addresses it in a way by changing the privacy provision in the Internal Revenue Code. Essentially, the amendment before us will provide that it would be far easier for law enforcement officials to go to the IRS to get information concerning taxpayers, whether it is direct taxpayer returns or whether it is information that is relevant and associated with a taxpayer's return; all that information is much more easily available to any law enforcement officer.

The Senator from Connecticut, I think, put his finger right on the point; that is, this applies not only to drug traffickers, who we all want to lock up, frankly, but also applies to every other individual in America.

We have had hearings on this subject. We had hearings last year. In those hearings, we tried to address the balance here—to balance, on the one hand, the needs of law-enforcement officials to get the information and, on the other, the privacy protection that we in the Congress have a duty to uphold in enacting this kind of legislation.

Frankly, I have mixed views on this, because I feel we should proceed. This problem has been with us now for several years. The Senator from Georgia has worked hard and has worked diligently. He has been very patient. He has worked with this Senator over the last year, specifically in trying to address this situation.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. BAUCUS. Will the Senator yield 1 additional minute?

Mr. WEICKER. I yield an additional minute.

Mr. BAUCUS. Mr. President, I feel, frankly, compelled to support the Senator from Iowa in voting against this amendment. But, in the event the amendment passes, I wonder if I could ask the Senator from Georgia a question or two as it applies to the amendment. I have three major problems. One is the standard by which law-enforcement officials would get an ex parte order as it applies to tax returns and relevant information. The second is the emergency procedures that are quite loose. Third is the large amount of information that is available to law-enforcement officials who do not have to get an ex parte order.

I am wondering, if the amendment is agreed to and this bill goes to conference, if the Senator is in a position to work with this Senator, as well as others, to try to tilt the balance a little bit more toward privacy in trying to find a better balance than is now present in the bill.

Mr. NUNN. Mr. President, I would certainly respond to my friend from Montana and say yes; I would never be locked in concrete. We have negotiated this with the Treasury Department and the Justice Department for about 2 years. We think this language strikes the balance. But I would never preclude having some change that would strike a better balance.

The important thing here is that in setting up the standards for proof before a judge, you have to remember that the Justice Department in making the request does not know what the information is specifically. If they knew every detail of the information, then we would have a different situation. But if they know the details of the information, if they got that from the Internal Revenue Service, someone would have already breached the Tax Reform Act. So it has to be drawn in a way that allows them to go in.

It is not drawn in a way that they can have a fishing expedition. They have got to show that there is a reason to believe that a specific crime has been committed. They have got to show that the information is sought exclusively for the use in a Federal criminal case. And they have got to show that there is reasonable cause to believe the information may be relevant to a matter relating to the commission of such criminal act. We believe that is a reasonable standard.

But I certainly would work, if we are so fortunate as to pass this, in conference, both with the Senator from Montana and the Senator from Connecticut. I want to continue to work with my friend from Connecticut. We may never agree on this. But any time he points out anything which we can improve on, which he has done and his staff has done—there have been many things to improve this that have come from the Senator from Connecticut. We thought it would be in a form that we could satisfy him. We may never be able to do that, but we have tried. Nevertheless, I would say the answer is "yes."

The PRESIDING OFFICER. The 1 minute allotted to the Senator from Montana has expired.

Mr. NUNN. I yield a minute to the Senator from Montana.

Mr. BAUCUS. Mr. President, one particular problem here is the standard of getting an ex parte order. As the Senator's amendment is presently drafted, it provides for a standard that is even more loose than the standard that applies to a law-enforcement officer who tries to get a wiretap.

It seems to me that there is an analogy here. If a wiretap standard is tighter than the request on the part of the law-enforcement officer to get information from the IRS, that is going to pose a problem.

As we work with the Senator in whatever form, in either committee hearings, markup, or in conference, I hope that the Senator is sensitive to that difference and will work with the conferees and this Senator in trying to address that imbalance.

Mr. NUNN. I certainly will be glad to work on that. I would say that is a situation where the Government already has the particular evidence that is involved. It is one branch of Government that has the wiretap and is an act by the Government to interfere with a private individual and should have a very strict standard.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. NUNN. I will be glad to work with the Senator on that.

Mr. WEICKER. Mr. President, I wonder if I might, in response to the Senator from Virginia who raised an important point, respond more precisely to the question he raised.

The present law divides information into three separate categories:

First, return—tax returns and related documents; second, taxpayer return information—taxpayer's books and records, including corporate records filed with IRS by or on the taxpayer's behalf; and third, return information—third-party items collected by the IRS.

For disclosure of the first and second, an ex parte order must be obtained from the court.

The Nunn bill divides the IRS material into two categories: First, return information—all information the taxpayer is required by law to file with the IRS and any information filed with the IRS by or on behalf of an "individual taxpayer," which is defined as a "corporation, partnership, association, union, or other entity consisting of no more than 2 owners, shareholders, partners or members."

Second, nonreturn information—all other information IRS discovers.

An ex parte order would be required for disclosures of the first definition of return information.

The problem is that although Senator NUNN—and I will now talk to my distinguished friend from New Hampshire—has "tightened up" his definitions of re-

turn and nonreturn information, his bill still greatly expands the material that Justice can obtain without an ex parte order. Under his bill any business, partnership, association, or other entity with three or more members is now no longer protected by the requirement of an ex parte order. Therefore, if a business taxpayer—consisting of three or more persons—is audited and provides books and records to IRS, the material provided could be turned over to Justice without an ex parte order.

There is and should be no lesser standard for search warrant orders for corporate records than for individual records. The standard is the same because of the interest of the public as a whole to protect privacy rights by preventing "unreasonable searches and seizures" under the fourth amendment. Similarly, the Supreme Court has established that speech does not lose its protection under the first amendment because it has a corporate rather than an individual origin.

That is the precise answer to the question raised by the distinguished Senator from Virginia.

I am prepared to yield back the remainder of my time.

Mr. HEINZ. Vote.

Mr. WEICKER. Does the distinguished Senator from Pennsylvania care to comment?

Mr. NUNN. Mr. President, I know the distinguished Senator joins me in asking for the yeas and nays.

Mr. DOLE. Mr. President, I have not had the opportunity to look into the merits of this proposal. I have been trying to check with the administration to see whether this amendment could be accepted or modified and accepted. In my most recent visit with the Secretary of the Treasury, the position is, until the administration has a chance to look at it, what is the rush?

It has been around here for a long time. There have been no hearings this year. There are a lot of serious questions raised by this amendment which have not been addressed. The Senator from Kansas does not recall participating in hearings before the Senate Finance Committee. It is unclear how the proposal would aid the Federal Government in the war against crime. It could have an adverse effect on taxpayers' voluntary compliance.

There is no revenue impact so I cannot dispute or quarrel with that.

It would also allow, as I understand it, the State criminal law enforcement officials to have access to Federal tax information. I think the need for such disclosure must be fairly carefully examined.

Had we not had a time agreement, where is opportunity for a long debate, we may have been able to talk about this amendment and then at a later time have hearings on the Nunn amendment and bring it out and have a vote on it as the Nunn amendment. There is nobody that I know of who is trying to capture the amendment.

I would suggest, based on this Senator's discussions with Treasury, that they are not opposed to the concept. They might well support the efforts of the distinguished Senator from Georgia and the Senator from Florida, the Senator from Arizona, and others. But it would seem to me that they ought to be given that opportunity. Unless they have indicated some resistance, this Senator does not understand the need to push them to the wall before they have had a chance to study the amendment, before we have had hearings. The distinguished Senator from Iowa promised hearings earlier.

I would hope that we might table this amendment, take a serious look at it in our committee, and offer it at the first opportunity. At that time we would make a determination as to whether or not it should go forward.

All of us, I think I can say, want to use every tool we can which is available to the Government to ferret our crime and those who avoid taxes, and whatever. It does seem that we ought to give Don Regan, the Secretary of the Treasury, and the Commissioner of the IRS, the Justice Department, and other officials in this new administration, the opportunity to comment and testify. This Senator feels that there are some probably strongly opposed to anything we do in this area. But that is not my view.

Having said that, Mr. President, I wonder if we might reach some agreement to maybe have back-to-back votes on a motion to table this amendment and a modified amendment to be proposed by the distinguished Senator from Maine. As I understand, we have reached an agreement, negotiating with Treasury and other Senators. If the distinguished majority leader and the Senator from Georgia have no objection, we could vote on the motion to table the Nunn amendment and then have a vote on the amendment of the distinguished Senator from Maine. It might save some time.

Mr. NUNN. I would have no objection, but I would hate to have the comments of the Senator from Kansas not include the possibility that the motion to table might fail. I knew he has been very successful in the last 10 days. I am sure he wants to be successful. I would like to leave that open, however. I would like very much to vote up or down on the amendment. Then we will know one way or another. If the motion to table fails, I would be happy to have a rollcall.

Mr. DOLE. I might say that it is not that I am opposed to an up or down vote. In fact, we have had very few motions to table. But there are many of us, including this Senator, who have not even read the amendment of the Senator. That is my fault. I know, not the problem of the Senator from Georgia.

Mr. NUNN. We have tried in every way to get the staff, Treasury, and everyone else in the last week or so. I met with the Attorney General on this several months ago and the President of the United States on this. We worked on it with the last President for 2 years. We have been working on it for 3 years now. Narcotics are flooding into the country. I understand people who say let us wait and have hearings, but I disagree with it. We cannot continue to wait and make it the second priority to everything else. This is the single most important law enforcement action we can take to try to curb narcotics and organized crime, the single most important.

The Senator can offer a motion to table, if that is what he would like. But I would hope if it fails we would vote up or down on the amendment. I would hope that the Senator will entertain that fact, that if the motion to table fails we would vote up or down.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

Mr. NUNN. Before the Senator does that, can I yield to the Senator from Maine? He has worked on this for a long time, and he is a cosponsor of the amendment.

The PRESIDING OFFICER. The Senator from Maine.

Mr. COHEN. Mr. President, I have joined my distinguished colleague Senator NUNN and other cosponsors in proposing an amendment designed to correct a legitimate problem in our law enforcement system.

As the hearings which the Senate Permanent Subcommittee on Investigations held documented, the Internal Revenue Service, once an abundant source of information in legitimate investigations of criminal behavior, no longer cooperates to the best of its ability in lawful government efforts to gather evidence of organized or white-collar criminal activity.

To a certain extent, the problem reflects an attitude within the IRS that that agency should concern itself only with tax collection and not be involved in assisting general law enforcement. There is nothing which Congress can do directly to change this inhouse attitude, except highlight the deleterious effect it has upon the fight against organized and white-collar crime.

What Congress can do is amend the Tax Reform Act of 1976 and other laws which govern the flow of information between IRS and law enforcement agencies. These laws have failed to resolve the tension between effective exercise of Federal investigatory power and protection against invasion of privacy through illegitimate use of information held by the Government.

Clearly, there must be checks on the flow of information from IRS to other agencies. The 1976 act attempted to provide such controls by requiring a court order for the release of any information submitted voluntarily to IRS by or on behalf of a taxpayer. Moreover, any tax or other information acquired through "independent" IRS investigations may be turned over upon written request of an Assistant Attorney General.

The 1976 act was a significant effort at reform. However, the problem of distinguishing between the two categories of tax information has proved unsurmountable in practice, resulting in nearly every law enforcement request taking the form of an ex parte order.

Another disturbing feature of the 1976 act is that it has resulted in a "Catch-22" situation for Department of Justice attorneys: the existing standards require the Department of Justice to describe with specificity in their ex parte

order applications tax information which its attorneys have never seen. Moreover, through no direct fault of the act itself, there has been a marked failure of the IRS to volunteer clear evidence of nontax criminal activities to jurisdictional agencies. The power to do so was explicitly granted in the act. But, because of severe penalties for unintentional, improper disclosures, IRS agents have been reluctant to disclose any information, regardless of its probative value in future criminal prosecutions.

The Constitution's silence on the issue of interagency disclosure of sensitive information has complicated the necessary tasks of achieving a workable balance of oft-times competing interests. Our fundamental law values both privacy and effective law enforcement, but, in this instance, it is up to us to accommodate these interests through the legislative process. Experience has shown us that a number of changes in the present law are necessary to achieve this delicate balance.

The amendments to the 1976 act which I cosponsor today will alleviate the difficulty which law enforcement agencies have experienced in their attempts to obtain IRS information for legitimate investigations. The amendments clarify ambiguous definitions of the existing law by adopting a workable two-part definitional structure. Under this scheme, "return information" would be afforded a high degree of privacy by being available to the Department of Justice only upon issue of an ex parte order, while the IRS could disclose "nonreturn information," for example, corporate books and records, upon written request of selected investigative officials.

This distinction reflects the greater privacy rights and fifth amendment privilege against self-incrimination which natural persons enjoy above corporations and other legal entities. In addition, the amendments would require the IRS to disclose to relevant law enforcement officials nonreturn information indicating nontax criminal activity. Finally, they would restructure penalties for improper disclosure of tax information by establishing a "good faith" defense in criminal actions, and by conforming civil remedies to the structure of the Federal Torts Claims Act.

All these are welcome reforms. I believe that the amendment we propose today is necessary to reaffirm our commitments to the goals of effective law enforcement, maximum protection of privacy rights, and confidentiality of tax information. By its controlled disclosure provisions and criminal sanctions for knowingly improper disclosure, this proposal insures the highest degree of protection of the public safety, while safeguarding legitimate privacy interests as well.

Let me summarize why I think the urgency is there. After extensive hearings held before the subcommittee chaired by Senator NUNN last year it was determined that we have a problem of gigantic proportions that threaten to overwhelm this society. I know I would not be adding any insult to my friend from Florida, Senator CHILES, who seems to have a State, an entire State, that is virtually hooked or addicted to illegal drugs coming into his State. They have a multibillion-dollar drug industry that is virtually out of control.

They have people in Florida now, the cocaine cowboys, who are blowing people apart on the streets. We have a system that is completely out of control.

This, in my judgment, is a legitimate attempt to address concerns with regard to the right of privacy, as well as doing something to have an aggressive and more effective law enforcement effort.

I want to lend my support to the efforts of the Senator from Georgia in offering this amendment.

Mr. NUNN. I thank the Senator from Maine.

How much time remains?

The PRESIDING OFFICER. The Senator from Georgia has a minute and a half.

Mr. NUNN. I yield to the Senator from Delaware.

Mr. BIDEN. In a minute and a half, Mr. President, let me say that there are reasons to be concerned, and I understand why the Senator from Kansas may be concerned about not having had time to consider this bill. But it has been considered for some time. It is not without its flaws, but it makes sense. The bill permits a carefully limited redisclosure of information to State and local law enforcement authorities.

Mr. President, I must admit that I can understand why people would be concerned on the surface, but if they look more closely, I do not think we are in the area of having to worry about the kind of abuse that the Senator from Connecticut so articulately and wisely spoke of during the Watergate era and the kind of momentum that produced the legislation in the first place.

Right now, they are in a Catch-22 position. That is, the IRS is. The very information that needs to be had by law enforcement authorities, to be of any consequence to them, would require them to have access to the records and they cannot meet the test to have access the way things are now. Although I acknowledge that we are taking some chance with this, it is a chance that I think, on calculation, is worth taking.

I know my time is up, Mr. President, so I yield the floor.

Mr. DECONCINI. Mr. President, I am pleased to join my colleague from Georgia in sponsoring and speaking in favor of this much needed amendment to reform the disclosure provisions of the Internal Revenue Code. Its passage will represent one of the most significant steps in the fight against organized crime and white-collar crime in recent years.

The present disclosure provisions were added to the Tax Reform Act of 1976 and were in response to abuses by the White House in the use of tax returns and tax information.

Unfortunately, the reaction to these abuses was probably overboard and although I support the vast number of changes to the disclosure provisions made in 1976, the time has come to refine them in light of the experience of the past 4 years.

Extensive hearings before the Subcommittee on Improvements in Judicial Machinery on the issue of organized crime and fraud and before Senator NUNN's Permanent Subcommittee on Investigations has built a convincing record that the major beneficiaries of the 1976 amendments are the criminal element of our society. Witness after witness came forward with horror stories about the chilling effect of the 1976 amendments on law enforcement. Let me quote from the testimony of two witnesses:

I find the Tax Reform Act and interpretations that have been put on the Tax Reform Act by the IRS have devastated us in our efforts to conduct financial investigations—I think for the record it has been the worst thing that ever happened to law enforcement.—Jeremiah O'Sullivan, Chief, New England Strike Force on Organized Crime, Department of Justice.

And—

I can tell the Committee that many of these (tax disclosure) abuses were overblown and that the legislation that was passed did nothing to remedy the particular abuses but, in fact, made it easier for white collar criminals to get away with the crimes that they have been committing. In effect, it (the Tax Reform Act) has been legislation that has helped the white collar criminal.—Nick Ackerman, former Assistant, Watergate Prosecutor for Tax Related Abuses and presently an Assistant U.S. Attorney, Southern District of New York.

The modest adjustments made by today's amendments will fine tune the disclosure provisions to allow law enforcement officials to make the maximum use of information legally within their possession while maintaining protections against unreasonable intrusions on an individual's privacy.

Two years ago I drafted potential legislation on this subject similar to the amendment before us, and circulated it to interested parties. Among the responses I received was a letter from Nick Ackerman, assistant U.S. attorney in the Southern District of New York, and a former member of the Watergate prosecution team in charge of the tax-related abuses.

His comments are noteworthy and represent the views of a person who has seen abuses, and then had to prosecute under them. His remarks follow:

As I testified before your Subcommittee last month, before becoming an Assistant United States Attorney in the Southern District of New York, I was an Assistant Special Watergate Prosecutor under Archibald Cox, Leon Jaworski and Henry Ruth. One of my prime responsibilities during the two and a half year tenure with the Watergate Special Prosecution Force was to investigate the allegations surrounding the Nixon Administration's misuse of the Internal Revenue Service and its compilation of an enemies list to harass opponents of the Administration through the IRS.

Unfortunately, the reform legislation which the Congress enacted to remedy these abuses and to prevent them from reoccurring was overly broad and has resulted in severely impeding effective criminal investigations by federal law enforcement officials. This post-Watergate reform legislation unwittingly created two major problems for the federal prosecutor.

First, it has made the securing of federal tax returns so cumbersome and enmeshed with red tape that is has hampered the Government's ready access to these returns in

investigations where speed can make the difference between success or failure.

Second, in a number of instances where tax returns would assist a criminal investigation, the Government has not been able to obtain returns because of the restrictions imposed by the Act.

Obviously, the reforms aimed at curing the Watergate abuses did not contemplate the impeding of legitimate law enforcement goals.

In that connection, federal tax returns are an extremely invaluable investigative tool in prosecuting crime and are particularly useful in ferreting out complicated business and financial crimes. By impeding the federal prosecutor's access to tax returns, this reform legislation of 1976 has ironically made it more difficult for the Government to prosecute the very kind of white collar criminal which was so successfully prosecuted by the Watergate Special Prosecution Force. Your narrowly drafted amendment to that legislation would remove the benefits presently enjoyed by the white collar criminal while at the same time maintaining those reforms which were designed to protect the privacy of law-abiding citizens.

Mr. President, I give great credence to the experience and remarks of Mr. Ackerman and I believe the amendment proposed today be fully in accord with his thoughts and suggestions. The 1976 changes were well intentioned. Their purpose was to eliminate some of the unsavory practices engaged in by the Nixon administration.

However, by making it extremely difficult—almost impossible, in a practical sense—for other Federal law enforcement agencies to obtain tax information from the IRS or for the IRS to share information with these agencies relating to nontax criminal offenses, a severe handicap has been placed on the Government's overall ability to protect the public welfare and fight organized crime.

I am certainly committed to the principle that tax information should not be abused or used for political harassment. I am equally committed, however, to the investigation and prosecution of criminals who prey on the American people.

These are not incompatible objectives. I urge the Senate to support this vitally needed amendment that represents one of the most important anticrime measures we will vote on this year.

● Mr. STENNIS. Mr. President, I rise in support of the amendment offered by the distinguished Senator from Georgia (Mr. NUNN).

The pending amendment is identical to S. 732 which was introduced by the distinguished Senator from Georgia and others and has been referred to the Committee on Finance, which has not yet acted on it.

The general purpose of S. 732 and the pending amendment is to enhance the effective enforcement of Federal and State criminal laws and the effective administration of justice while, at the same time, maintaining the proper and necessary degree of confidentiality of information filed by individual taxpayers with the Internal Revenue Service.

The purpose of the amendment is to restore the Internal Revenue Service to the role it once played in cooperative law enforcement efforts aimed at organized criminals and those dealing in drugs.

It has long been recognized that financial investigations, relying on financial and tax records, are one of the most effective tools in piercing the veil of secrecy that protects those at the top of any organized crime ring. It will be remembered that the notorious Al Capone was finally convicted and sent to prison on income tax evasion charges.

Organized crime and trafficking in drugs have become bigger and more sophisticated than ever before. Despite this, the one law enforcement agency that organized crime fears most—the IRS—is now sitting on the sidelines.

One of the reasons for this is the disclosure provisions of the Tax Reform Act of 1976. This act made tax returns and most other information gathered by the IRS confidential and subject to disclosure by the IRS only in accordance with very strict procedures.

With this act, severe restrictions apply across the board and control disclosure to all Federal agencies. This has resulted in very little information being exchanged today by the IRS and other Federal law enforcement agencies, and the enforcement of criminal laws has thereby been greatly impaired.

The pending amendment will not do away with the privacy safeguards contained in the Tax Reform Act, but there is a great need and necessity to amend that act so that a balance will be struck which will enable the IRS to again cooperate with Federal prosecutors. I believe that the pending amendment will strike the necessary balance and will still give adequate protection to the privacy of tax returns and other information supplied to the IRS. I hope that the amendment will be adopted.●

Mr. NUNN. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. All time has expired.

Mr. WEICKER. I ask the Chair, has the time in opposition expired on this amendment?

The PRESIDING OFFICER. It has also expired.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, I yield myself 1 minute on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I understand that certain modifications have been negotiated to the Mitchell amendment, which have been agreed to by the managers of the bill as well, and that we are about to have a vote on the Nunn amendment or a motion in relation to the Nunn amendment. I wish to put this unanimous-consent request at this time.

Mr. President, I ask unanimous consent that it be in order for the authors to modify the Mitchell-Cohen amendment notwithstanding that the yeas and nays have been already been ordered; that there be 10 minutes of additional debate on that amendment, to be equally divided and controlled in the usual form; and that the vote on that amendment occur immediately following the vote on the Nunn-Chiles amendment or motion in relation thereto, back-to-back.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, what that means is that, as soon as we dispose of the 10 minutes of additional debate and reach the point where we put the question on the Nunn-Chiles amendment, we shall have two votes, back-to-back. I notify Senators that it is by no means certain—as a matter of fact, it is unlikely—that that is the last vote for the evening. I expect further votes tonight.

UP AMENDMENT NO. 303, AS MODIFIED

The PRESIDING OFFICER. The Senator from Maine is recognized.

Mr. MITCHELL. Mr. President, I send to the desk, pursuant to the unanimous-consent agreement, a part of my amendment and ask that it be laid before the Senate, with all of the cosponsors of my original amendment.

The PRESIDING OFFICER. The amendment is so modified.

The amendment, as modified, is as follows:

At the end of title II, insert the following new subtitle:

Subtitle G—Inventory Reform

SEC. 235. SIMPLIFICATION OF LIFO BY USE OF GOVERNMENT INDEXES TO BE PROVIDED BY REGULATIONS.

Section 472 is amended by adding at the end thereof the following new subsection:

"(f) USE OF GOVERNMENT PRICE INDEXES IN PRICING INVENTORY. (1) In general—The Secretary shall prescribe regulations providing for simplification of the use of the method described in subsection (b) by an eligible small business (as defined in section 474(b)) through the use of suitable published government indexes in such manner and circumstances as determined by the Secretary."

Such regulations shall allow the use of 100 percent of the appropriate indexes determined by the Secretary and may require the use of these indexes in the case of an eligible small business which elects the use of the method described in subsection (b).

(2) Suitable published government indexes defined.—For purposes of paragraph (1) suitable published government indexes shall be the appropriate components of the consumer price indexes and the Producer Price Indexes as determined by the Secretary.

SEC. 236. 3-YEAR AVERAGING PERMITTED FOR INCREASES IN INVENTORY VALUE.

Subsection (d) of section 472 is amended to read as follows: "The closing inventory of the taxable year preceding the taxing year for which the method described in subsection (b) is first used shall be at cost. Any adjustment to income resulting from the application of the preceding sentence shall be taken into account ratably in each of the three taxable years beginning with the first taxable year the method described in subsection (b) is first used."

SEC. 237. ELECTION BY SMALL BUSINESS TO USE ONE INVENTORY POOL WHEN LIFO IS ELECTED.

(a) IN GENERAL.—Subpart D of part II of subchapter E of chapter 1 of the Internal Revenue Code of 1954 (relating to inventories) is amended by adding at the end thereof the following new section:

"SEC. 474. ELECTION BY CERTAIN SMALL BUSINESSES TO USE ONE INVENTORY POOL.

"(a) IN GENERAL.—A taxpayer which is an eligible small business and which uses the dollar-value method of pricing inventories under the method provided by section 472 (b) may elect to use one inventory pool for any trade or business of such taxpayer.

"(b) ELIGIBLE SMALL BUSINESS DEFINED.—For purposes of this section, a taxpayer is

an eligible small business for any taxable year if the average annual gross receipts of the taxpayer do not exceed $3,000,000 for the 3 taxable years ending with the taxable year.

"(c) SPECIAL RULES.—For purposes of this section—

"(1) CONTROLLED GROUPS.—

"(A) IN GENERAL.—In the case of a taxpayer which is a member of a controlled group, all persons which are component members of such group at any time during the calendar year shall be treated as one taxpayer for such year for purposes of determining the gross receipts of the taxpayer.

"(B) CONTROLLED GROUP DEFINED.—For purposes of subparagraph (A), persons shall be treated as being members of a controlled group if such persons would be treated as a single employer under the regulations prescribed under section 52(b).

"(2) ELECTION.—

"(A) IN GENERAL.—The election under this section may be made without the consent of the Secretary and shall be made at such time and in such manner as the Secretary may by regulations prescribe.

"(B) PERIOD TO WHICH ELECTION APPLIES.—The election under this section shall apply—

"(i) to the taxable year for which it is made, and

"(ii) to all subsequent taxable years for which the taxpayer is an eligible small business,

unless the taxpayer secures the consent of the Secretary to the revocation of such election.

"(3) TRANSITIONAL RULES.—In the case of a taxpayer who changes the number of inventory pools maintained by him in a taxable year by reason of an election (or cessation thereof) under this section—

"(A) the inventory pools combined or separated shall be combined or separated in the manner provided by regulations under section 472;

"(B) the dollar value of the taxpayer's inventory as of the beginning of the first taxable year—

"(i) for which an election under this section is in effect, or

"(ii) after such election ceases to apply, shall be the same as such dollar value as of the close of the taxable year preceding the taxable year described in clause (i) or (ii) (as the case may be), and

"(C) the first taxable year for which an election under this section is in effect or after such election ceases to apply (as the case may be) shall be treated as a new base year in accordance with procedures provided by regulations under section 472."

(2) CLERICAL AMENDMENT.—The table of sections for such subpart D is amended by adding at the end thereof the following new item:

"Sec. 474. Election by certain small businesses to use one inventory pool."

SEC. 238. STUDY OF ACCOUNTING METHODS FOR INVENTORY.

(a) STUDY.—The Secretary of the Treasury shall conduct a full and complete study of methods of tax accounting for inventory with a view toward the development of simplified methods which minimize the effect of inflation. Such study shall include (but shall not be limited to) an examination of the last-in first-out method and the cash receipts and disbursements method.

(b) REPORT.—Not later than June 30, 1982, the Secretary of the Treasury shall submit to the Committee on Ways and Means of the House of Representatives and to the Committee on Finance of the Senate a report on the study conducted under subsection (a), together with such recommendations as he deems appropriate.

SEC. 6. METHOD OF COMPUTING LIFO VALUE OF DOLLAR-VALUE POOL MAY BE USED WITHOUT SHOWING OTHER METHODS ARE UNSUITABLE OR IMPRACTICAL.

Section 472 of the Internal Revenue Code of 1954 (relating to last-in, first-out inventories), as amended by sections 2, 4, and 5, is amended by adding at the end thereof the following new subsection:

"(f) USE OF LINK-CHAIN METHOD, ETC., PERMITTED WITHOUT SHOWING OTHER METHODS ARE UNSUITABLE OR IMPRACTICAL.—Any taxpayer may elect to use a link chain or index method of computing the LIFO value of any dollar-value pool without any showing that any other such method is unsuitable or impractical."

The provisions of this bill will be effective for taxable years beginning after December 31, 1981.

Mr. MITCHELL. I shall take just a few minutes to explain the provisions of my modified amendment as they relate to the original amendment.

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. MITCHELL. My original amendment had five provisions, Mr. President. The first dealt with the tax penalty on the election to use the last in, first out method of inventory accounting. The amendment provided that the penalty would be spread over 5 years under the agreement reached with the distinguished chairman of the Committee on Finance and the Treasury Department. That would be modified to 3 years.

The second part of my amendment dealt with pooling. My amendment would have provided a single pool for firms with less than $5 million a year in sales. Under the agreement, the $5 million in sales would be reduced to $3 million.

The third provision of my amendment dealt with the use of Government indexes. Under my amendment, provision was made for the use of general categories of the Consumer Price Index and it called for liberalized use of the link-chain method of indexing. Under the agreement, the Internal Revenue Service would be required to complete by November regulations which will include a requirement of 100 percent of inflation adjustment, measured by either the Consumer Price Index or the Producers Price Index, or subcategories thereof, and the amount also accepts the link-chain reform.

The fourth provision of my amendment dealt with the delay of the effective date of the LIFO recapture provision. That provision will not be included as part of the amendment.

The fifth provision of my amendment dealt with cash accounting. Under the agreement, there will be a study by the Treasury, to be completed by June 30, 1982. I understand that the chairman of the Committee on Finance is prepared to make a commitment to hold hearings as soon thereafter as is feasible.

Mr. DOLE. That is correct, Mr. President. That is an accurate statement.

Mr. MITCHELL. Mr. President, I urge, then, all of my colleagues in the Senate to accept this amendment. I understand that it now has the support of the distinguished chairman of the Committee on Finance and the minority manager of the bill. While it does not include everything that was contained in my original amendment, it does represent a substantial step forward for small businesses in the area of inventory accounting. It will not be the last step, Mr. President. We shall proceed after the study, after the hearings, to complete the gains that we started here today.

I urge approval of the amendment by all the Members of the Senate, Mr. President.

Mr. DOLE. Mr. President, I thank the distinguished Senator from Maine (Mr. MITCHELL), and also the Senator from Iowa. This is a step forward, in the opinion of the Committee on Finance. I appreciate the fact that we were able to work it out.

I think it is positive. There is no dissent with Treasury, no dissent in the committee itself. I do not think there is any dissent on the floor.

I also thank the distinguished Senator from Iowa (Mr. JEPSEN), who was working with us and Treasury and who has a great deal of expertise in this area.

I yield 2 of my 5 minutes to the Senator from Iowa.

Mr. JEPSEN. I thank the Senator from Kansas, Mr. President.

Will the Senator from Maine yield for a question?

Mr. MITCHELL. Yes, I yield to the Senator from Iowa.

Mr. JEPSEN. I ask the Senator from Maine, it is my understanding now that the revised amendment will allow small businesses with less than $3 million in gross receipts to use one pool. Is that the Senator's understanding?

Mr. MITCHELL. That is correct, Mr. President.

Mr. JEPSEN. I also am advised and understand that his revised amendment permits business to use 100 percent of the regular published Government price indexes. Is that correct?

Mr. MITCHELL. That is correct.

Mr. JEPSEN. I thank the Senator from Maine.

Mr. President, in times of inflation, those businesses using last in, first out accounting are paying taxes on unrealized profits. Last in, first out accounting would reduce this burden. However, it is currently too complicated for many small businesses to use. The real solution to this problem is to reduce inflation so that complicated accounting procedures are not necessary. The solution is not to relieve the burden on one sector and increase the burden on another sector. I do now support the amendment, and I ask the Senator from Maine to add my name as a cosponsor of the amendment.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the names of the Senator from Iowa (Mr. JEPSEN) and the Senator from Oregon (Mr. HATFIELD) be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEPSEN. Mr. President, although I conceptually supported inventory reform, I could not support the initial amendment of the Senator from Maine in that it provided that some of the loss of income would be made up by taking away from another part of our business sector. This has been corrected.

I also have been assured that the Treasury Department will study the issue and will come up with solid recommendations for inventory reform to insure that LIFO is simple enough to allow universal usage.

I assure the Senate that if inventory reform cannot be accomplished by the Treasury, I and several of my colleagues will accomplish it through law.

Mr. WEICKER. Mr. President, if I may have 1 minute on the bill, I commend the distinguished Senator from Maine for his very positive contribution to the well-being of the small business community.

I ask unanimous consent that my name and that of the distinguished Senator from Minnesota (Mr. DURENBERGER) be added as cosponsors of the amendment.

I hope the amendment is adopted. I believe that anything we can do for this most productive segment of our economy—and yet the most neglected segment of our economy—we should do. I am all for it, and I hope the vote is unanimous.

Mr. DOLE. I yield to the Senator from Maine.

Mr. COHEN. Mr. President, I join my colleagues in commending my colleague from Maine on his efforts to help bring about a compromise of the original amendment we offered earlier this afternoon. I believe it does represent the best that could be accomplished this afternoon. But it represents, as my colleague from Maine indicated earlier, only a first step forward in bringing about reform that is going to benefit the small businesses of this country and make them more competitive than they are today with large corporations.

First in, first out (FIFO) inventory which declines in value below its original cost may be written down to that lower value with a deduction allowed for the amount of the writedown. However, a taxpayer going from FIFO to the last in, first out (LIFO) method must include in income, in the year prior to the first year of LIFO, any writedowns taken on any items currently in the inventory.

Under dollar-value LIFO, the inventory is divided into natural business pools and accounted for on the basis of base-year—that is, year of change to LIFO—dollars. In general, a natural business pool consists of the entire production activity of the enterprise within one product line. Base-year dollars are used to provide a constant measuring unit for each year's inventory to determine if there has been an increase or decrease in the inventory. The base-year dollar equivalent of an item in the current inventory is determined by calculating the cost of the item as though it were constructed in the base year. This can be very difficult if the item did not exist in the base year.

The link-chain method and the index method can be used to compute dollar-value inventory, but only if the double-extension method is shown to be unsuitable or impractical.

Taxpayers changing to LIFO will be allowed to spread the income attributable to previously taken inventory writedowns over the 3 succeeding years.

A taxpayer with average annual receipts for the preceding 3 years of not more than $3 million may elect to use only one inventory pool.

Taxpayers with gross receipts of less than $3 million may use the Consumer Price Index or the Producer Prices and Price Indexes to discount current inventory to base-year dollars rather than have to compute the base-year cost of the inventory.

The link-chain method and index method of computing dollar-value LIFO may be used without the necessity of showing that the double-extension method is impractical or unsuitable.

The amendment would reduce revenues by $130 million in 1982, $145 million in 1983, $160 million in 1984, and $175 million in 1985.

Mr. DOLE. Mr. President, I support the amendment.

The amendment makes a number of changes in the tax accounting rules regarding LIFO inventory accounting and more specifically dollar-value LIFO inventory accounting. LIFO inventory accounting most effectively mitigates the effect of inflation on small businesses engaged in the purchase and sale of merchandise. In this period of high inflation, greater efforts should be made to simplify LIFO and make it more available to the small businessman.

The amendment allows small businesses with gross receipts of under $3 million to use 100 percent of the Consumer Price Index or the Producer Price Index to compute the base-year cost of their inventory under dollar-value LIFO. Such a small business can also use one inventory pool in computing its dollar-value inventory. The amendment also expands the use of the link-chain and index method of computing dollar-value inventory. Additionally, those taxpayers adopting LIFO may spread over 3 years the income attributable to writedowns in inventory taken prior to the LIFO election.

Finally, the Treasury is directed to study and report to the Congress on methods of simplifying inventory accounting with a view to minimizing the impact of inflation.

Again, I commend all Senators who participated in the negotiations. It is a step in the right direction so far as small business is concerned.

Also, it will give us an opportunity to have hearings on the other proposal with respect to cash accounting. I pledge my effort to do that at the earliest possible time.

I thank both Senators from Maine.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield?

Mr. MITCHELL. I yield.

Mr HARRY F. BYRD, JR. Mr. President, I commend the able Senator from Maine for the development of this amendment.

I know he has worked long and hard on this matter, and I believe he has achieved a great deal to obtain the approval of so many different groups and individuals and the Treasury Department. It is a fine achievement, and I congratulate and commend the able Senator and am glad to support the amendment.

Mr. MITCHELL. I thank the Senator.

Mr. President, I ask unanimous consent that the name of the Senator from Oklahoma (Mr. BOREN) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SASSER. Mr. President, I rise in support of the Mitchell inventory reform package amendment which simplifies the rules for converting to the last in, first out, or LIFO, accounting method and allows small businesses to use cash accounting.

Mr. President, this amendment will benefit the many small businesses of this country that are inventory, as opposed to capital, intensive in nature. This includes the thousands of small wholesalers, retailers and manufacturers that contribute so much to our economy.

I want to congratulate the Senator from Maine (Mr. MITCHELL) for the fine effort he has made on this amendment, and, indeed, for his devoted work on small business issues in general. His efforts in the Finance Committee, particularly with regard to proposing a small business direct expensing amendment which the committee has included in the tax bill, are especially appreciated by this Senator who also has concerns about the plight of small business in the United States today.

I would also like to commend the National Federation of Independent Business for its diligent efforts on behalf of this amendment. NFIB has done a great service to its small business constituency through its strong support of this inventory reform package.

Mr. President, this amendment would greatly simplify the rules with regard to the conversion from first in first out, or FIFO, accounting to the LIFO method. Though FIFO is the more commonly used accounting method, inflation causes it to understate the cost of goods sold by a business and therefore overstate a business' taxable income. This also overstates the tax liability of the firm in question.

In 1979 alone, inadequate inventory accounting added $42.6 billion to taxable profits. This overtaxation could be avoided through the use of LIFO accounting if small businesses could only convert to it without incurring great conversion costs.

But the LIFO rules are extremely complicated. Despite the obvious benefits from the use of LIFO, only small percentages of those businesses who could make use of this tool do so. Of all corporations in 1976, only 2.5 percent of wholesalers, 1.3 percent of retailers and 3.7 percent of manufacturers used LIFO accounting. The present rules are simply too complicated for a small firm to handle without extensive assistance from outside accounting firms.

Mr. President, this amendment also provides for a study of the small business use cash accounting. This system recognizes income and expenses when

they actually occur, much as we do in our personal checking accounts. Income tax is then paid only on income actually received and not on inflation bloated inventories. Under present law, only certain farm operations are allowed to use cash accounting.

Mr. President, I commend this amendment to my colleagues who are interested in the plight of small business sector of our economy. It is the small business that produces most of the new jobs in this country. It is the small business that does that most efficient job of coming up with more productive ways of doing things in this economy.

Yet small business is beset with a long list of problems, most of which are not encountered by their larger competitors. We must take a firm step in the direction of equitable treatment for small firms, Mr. President, by the adoption of the Mitchell amendment.

● Mr. LEAHY. Mr. President, I have asked that I be added as a cosponsor of the amendment offered by the junior Senator from Maine. Adoption of this amendment will result in important tax relief for small businesses, particularly retailers, wholesalers, and manufacturers.

The tax reduction bill before us today already contains much needed improvements in methods of capital cost recovery accounting. I commend the junior Senator from Maine for recognizing that inflation has also made inventory accounting reform a matter of high priority for many firms, particularly those which are not capital-intensive.

Although businesses presently can avoid the overtaxation which results from use of the first in first out (FIFO) accounting method by adopting the last in first out (LIFO) method, experience has proven that LIFO rules are too complex for most small businesses to adopt. For example, of all corporations in 1976, only 3.7 percent of manufacturers, 2.5 percent of wholesalers, and 1.3 percent of retailers used LIFO.

The inventory simplification and reform amendment now before us offers a reasonable and fair solution to the problem of inadequate inventory accounting for small firms. I believe the amendment will complement the capital cost recovery provisions of the bill and will extend tax relief to a broader base of businesses. I urge the adoption of this amendment.●

Mr. BAKER. Mr. President, has all time expired—the additional time for debate?

The PRESIDING OFFICER. The Senator is informed that 1 minute and 33 seconds remain.

Mr. DOLE. I yield back the time, if it is my time.

Mr. BAKER. Mr. President, I ask unanimous consent that on the back-to-back votes that are about to occur, the first vote be a 15-minute vote and the second vote be a 10-minute vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask for the yeas and nays on the Mitchell-Cohen amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 492

The PRESIDING OFFICER. The question is on agreeing to the amendment by the Senator from Georgia (Mr. NUNN).

Mr. DOLE. Mr. President, I move to table the Nunn amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The question is on agreeing to the motion to table the amendment by the Senator from Georgia (Mr. NUNN). On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), and the Senator from IDAHO (Mr. MCCLURE) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Ohio (Mr. METZENBAUM), the Senator from New Jersey (Mr. BRADLEY), and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

I further announce that if present and voting, the Senator from Nevada (Mr. CANNON) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who have not voted who wish to vote?

The result was announced—yeas 28, nays 66, as follows:

[Rollcall Vote No. 225 Leg.]

YEAS—28

Andrews	East	Quayle
Armstrong	Gorton	Specter

NOT VOTING—6

Bradley	Goldwater	McClure
Cannon	Kennedy	Metzenbaum

So the motion to lay on the table amendment No. 492 was rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Georgia. (Putting the question.)

Mr. NUNN's amendment (No. 492) was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHILES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, the next rollcall will be a 10-minute rollcall.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. Mr. President, reserving the right to object—it has already been ordered.

Can the majority leader give us some idea of the program for the remainder of the evening?

The PRESIDING OFFICER. The Senate will be in order.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, in response to the inquiry of the distinguished chairman of the committee, let me say that the minority leader and I have been in consultation about the amendments that remain and how they will be disposed of.

According to the count I have before me there are 38 amendments left on the list of qualified amendments. I am advised by the minority leader that it is his understanding that of that number 14 will be called up and will indeed be debated according to the order in the timeframe provided. There are 5 amendments of the 38 that are currently in one stage of negotiations or the other and it is possible none of them will be called up. It is, perhaps, more possible that some of them will be acceptable, others will not. But in any event, five are in limbo.

It would appear at this time that there are 16 amendments on the list of qualified amendments that will not be called up or otherwise disposed of by the Senate. Those amendments have not yet been designated, but that is the estimate by the Democratic side, based on the canvass of their members.

Mr. President, in addition to that, I am advised by the minority leader that two amendments will be offered and debated, but votes will not be required. I presume that means they will be taken down. This is the report I received from the minority leader, and based on that report I hope we can proceed shortly to the next rollcall vote, which will be the vote on the Mitchell-Cohen amendment, and then following after that we can schedule business for in the morning and avoid a late session this evening.

If I may inquire of my distinguished chairman of the committee his preference in that respect I will be prepared to make a further statement.

Mr. DOLE. I might advise the majority leader I guess there are nine amendments on the Republican side, and I am not certain how many of those will be called up. Hopefully none of them will be called up, but I assume there will be some

of those called up, and that would be 47 amendments left.

I would say that if half of those are called up, that is 19 amendments. The Senator from Kansas is not certain we can finish 19 amendments tomorrow.

It is my understanding that, after we dispose of this rollcall, the Senators from California have an amendment we can accept. The Senator from Arkansas would like to speak for about 5 minutes on an amendment. If there are others who could give us some amendments that we could dispose of, that would be helpful. I am not certain there are many of those left.

But that is a big order, if we intend to finish tomorrow, to dispose of 40-some amendments, unless we stay late this evening.

Mr. BAKER. Mr. President, if the Chair would indulge me just for a brief moment.

Mr. DOLE. If the majority leader will yield, if we could agree that we would have votes starting early in the morning and not wait until noon, because if that happens, no one is going to show up until noon except the distinguished Senator from Louisiana and the Senator from Kansas. If we could have a vote in the morning on the motion to reconsider the Metzenbaum-Durenberger-Packwood-Hawkins amendment, if we could do that and if we could ask everyone here, as the Senator has been asking in the past, to cooperate—it is not necessary that you call up your amendment. We would be glad to put it in the record and say something nice about it. You do not have to call it up. It will keep. There will be another bill. This is not the last tax bill in history.

Mr. ROBERT C. BYRD. Will the distinguished majority leader consider scheduling the vote on the motion to reconsider that Mr. LONG and Mr. METZENBAUM agreed to at a fairly reasonably early hour on tomorrow?

Mr. BAKER. Mr. President, I am perfectly willing to do that. Let me consult with the distinguished chairman one more time.

Mr. BAKER. Mr. President, let me make a unanimous-consent request and if it is granted then I am prepared to announce there will be no more rollcalls after the next rollcall if we proceed in the way I am about to present.

ORDER FOR RECESS UNTIL 8:15 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate recesses today it do so until the hour of 8:15 in the morning; that after the recognition of the two leaders under the standing order and after the recognition of the Senator from South Carolina (Mr. THURMOND) and the Senator from Connecticut (Mr. DODD) on special orders, there be a brief period for the transaction of routine morning business and that the Senate resume consideration of the tax bill at 9 a.m. tomorrow; that at 9 a.m. tomorrow a motion to reconsider the vote on the Metzenbaum, et al., amendment be in order and that a vote occur thereon immediately after the bill is laid down; that the Chair entertain a motion to reconsider and that a vote occur thereon without further debate or motion.

I ask unanimous consent, Mr. President, that it be in order to ask for the yeas and nays at this time.

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. BAKER. Mr. President, I thank the Chair. Mr. President, I put that request.

The PRESIDING OFFICER. Is there objection?

Mr. SARBANES. Mr. President, do I understand the vote would be at 9 o'clock?

Mr. BAKER. The vote would come within minutes after 9 o'clock tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the Chair.

Mr. President, after this vote, which will be a 10-minute vote, there will be no more rollcall votes tonight.

Mr. DOLE. Mr. President, we will be able to take care of the two amendments I have just mentioned.

Mr. BAKER. There will be more business transacted, but no more rollcall votes this evening.

UP AMENDMENT NO. 303, AS MODIFIED

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maine (Mr. MITCHELL). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Idaho (Mr. MCCLURE) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Nevada (Mr. CANNON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Ohio (Mr. METZENBAUM) are necessarily absent.

I further announce that if present and voting, the Senator from Nevada (Mr. CANNON) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 94, nays 0, as follows:

[Rollcall Vote No. 226 Leg.]

YEAS—94

Abdnor	Dole	Johnston

NOT VOTING—6

Bradley	Goldwater	McClure
Cannon	Kennedy	Metzenbaum

So Mr. MITCHELL's amendment (UP 303), as modified, was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WALLOP. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WALLOP. Mr. President, will the Senator yield?

Mr. DOLE. Mr. President, I promised the Senator from Arkansas I would yield 5 minutes to him.

Mr. WALLOP. My statement will require about the same length of time. Please let the Senator from Arkansas proceed, by all means.

Mr. PRYOR. I was going to say that I do not have anything to do this evening and I would enjoy listening to the Senator from Wyoming.

The PRESIDING OFFICER. Under the previous order, the Senator from Pennsylvania is to be recognized.

Mr. WALLOP. Mr. President, in the absence of the Senator from Pennsylvania——

Mr. BAKER. Mr. President, I wonder if the Senator from Wyoming will permit the minority leader and I to take care of a few details.

Mr. WALLOP. Mr. President, I yield to the majority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, may I inquire of the distinguished minority leader if he is in a position at this time to consider items on the Executive Calendar and on the Legislative Calendar?

Mr. ROBERT C. BYRD. Yes, Mr. President, I am prepared to do so.

Mr. BAKER. On the Executive Calendar, I especially invite the attention of the minority leader to the nominations of Edward L. Rowny, U.S. Arms Control and Disarmament Agency, William C. Lee under Judiciary, and all the new reports on the Executive Calendar, including nominations placed on the Secretary's desk. Is the minority leader in a position to state the status of his calendar in that respect?

Mr. ROBERT C. BYRD. Mr. President, the nominations to which the distinguished majority leader has referred have been cleared on this side of the aisle and we are ready to proceed.

Mr. BAKER. I thank the minority leader.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session to consider the nominations just referred to.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations of Edward L. Rowny, of Virginia, to be a Special Representative for Arms Control and Disarmament Negotiations and to have the rank of Ambassador while so serving; the nomination of William C. Lee, of Indiana, to be U.S. district judge for the northern district of Indiana; and all nominations under new reports and placed on the Secretary's desk be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

Edward L. Rowny, of Virginia, to be Special Representative for Arms Control and Disarmament Negotiations, and to have the rank of Ambassador while so serving.

THE JUDICIARY

William C. Lee, of Indiana, to be U.S. district judge for the northern district of Indiana.

CONSUMER PRODUCT SAFETY COMMISSION

Nancy Harvey Steorts, of Maryland, to be a member of the Consumer Product Safety Commission.

Nancy Harvey Steorts, of Maryland, to be Chairman of the Consumer Product Safety Commission.

DEPARTMENT OF ENERGY

Anthony G. Sousa, of Hawaii, to be a member of the Federal Energy Regulatory Commission.

Jan W. Mares, of Connecticut, to be an Assistant Secretary of Energy (Fossil Energy).

Alvin W. Trivelpiece, of California, to be Director of the Office of Energy Research.

DEPARTMENT OF THE INTERIOR

J. Robinson West, of Pennsylvania, to be an Assistant Secretary of the Interior.

U.S. ARMY

Maj. Gen. Hugh Joseph Clausen, [redacted] to be The Judge Advocate General, U.S. Army.

Brig. Gen. Hugh Robert Overholt, to be the Assistant Judge Advocate General.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION AND THE NAVY

National Oceanic and Atmospheric Administration nominations beginning Eric S. Davis, to be lieutenant, and ending Amy E. Orris, to be ensign, which nominations were received by the Senate on July 6, 1981, and appeared in the CONGRESSIONAL RECORD of July 8, 1981.

Navy nominations beginning Phillip T. Angelini, to be ensign, and ending Louis W. Arny III, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 15, 1981.

By request of Mr. BAKER, the following statement was ordered to be printed in the RECORD.

NOMINATIONS OF J. ROBINSON WEST, JAN W. MARES, ANTHONY G. SOUSA, AND ALVIN W. TRIVELPIECE

● Mr. McCLURE. Mr. President, today the Senate considers the Presidential nominations of J. Robinson West to be Assistant Secretary of the Interior for Policy, Budget and Administration; Jan W. Mares to be Assistant Secretary of Energy for Fossil Energy; Anthony G. Sousa to be a member of the Federal Energy Regulatory Commission, and Alvin W. Trivelpiece to be Director of the Office of Energy Research, Department of Energy.

Mr. J. Robinson West is the nominee for Assistant Secretary of the Interior for Policy, Budget and Administration. In this position, Mr. West will have broad responsibilities related to interagency and interdisciplinary subjects including natural resource management, environmental quality, Outer Continental Shelf coordination, budget management, planning, and policy analysis. Mr. West has financial and investment background in the private sector, and has served as a senior official in the Department of Defense during the Ford administration.

Jan W. Mares has been nominated to be Assistant Secretary of Energy for Fossil Energy. Mr. Mares has received degrees in chemistry and chemical engineering, and he also holds a law degree. He has been employed by Union Carbide Corp. since 1963. He has held a number of positions within the corporation, including business manager in the hydrocarbons department, and since 1979, he has been a division vice president and general manager.

As Assistant Secretary for Fossil Energy, Mr. Mares will be responsible for research, development, and demonstration programs involving fossil fuels. These programs cover applied research, technology development, engineering development and technology demonstration related to fossil fuel extraction, supply, conversion or utilization. As indicated by his background and his managerial experience, Mr. Mares is well suited to fulfill the responsibilities of the Assistant Secretary for Fossil Energy.

Anthony G. Sousa has been nominated to be a member of the Federal Energy Regulatory Commission. Mr. Sousa has extensive academic and professional experience in public utility law and regulation. He is a graduate of the University of San Francisco Law School, and he holds a master of laws degree in public utility regulation and antitrust law. He has served as a rate analyst, counsel and administrative law judge with the California Public Utilities Commission, and he also served as an assistant to the Chairman of that Commission. Since 1973 he has been vice president and general counsel of the Hawaiian Telephone Co.

It would be difficult to overstate the importance of the responsibilities Mr. Sousa will have as a member of the FERC. The Commission has the responsibility for implementing the Natural Gas Act, the Natural Gas Policy Act of 1978, the Federal Power Act, and certain other statutory requirements. The Commission must deal with a wide range of financial and environmental issues, and it must also make decisions concerning the adequacy of our Nation's supplies of natural gas and electric energy.

Dr. Alvin W. Trivelpiece has been nominated to be Director of the Office of Energy Research in the Department of Energy. Dr. Trivelpiece has been a professor of both electrical engineering and physics. He has extensive experience in the areas of plasma physics and fusion research and he has published numerous technical papers in those areas.

Since 1976 he has served as vice president of two research firms in California, Maxwell Laboratories, Inc., and Science Applications, Inc. During the period from 1973 to 1975, Dr. Trivelpiece served as assistant director of research, Division of Controlled Thermonuclear Research, at the Atomic Energy Commission.

As Director of DOE's Office of Energy Research, he would advise the Secretary on the technical aspects of the research and development programs of the Department. He would also be responsible for administering the Department s education and training programs in basic and applied research.

On Thursday, July 23, 1981 the Senate Energy and Natural Resources Committee held a hearing on the four nominations and the following day, by unanimous consent, favorably reported each candidate to the full Senate by a vote of 20 to 0. Each of the nominees has submitted financial disclosure and information statements to the committee and they have answered all questions submitted to them. Each has taken appropriate actions to avoid any potential conflicts of interests.

I believe each of the candidates has been found to be well qualified for the positions to which they have been nominated. I thank each of them for the cooperation they have shown during the confirmation process and recommend that their nominations be approved by the full Senate.●

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONSIDERATION OF CERTAIN MEASURES ON THE CALENDAR

Mr. BAKER. Mr. President, I invite the attention of the minority leader to the three items on today's Calendar of Business—Order No. 216, Senate Resolution 188; Order No. 231, Senate Resolution 180; Order No. 232, Senate Resolution 189. I inquire of the minority leader if he is in a position to clear those items for passage at this time.

Mr. ROBERT C. BYRD. Mr. President, those items have been cleared on this side of the aisle and we are ready to proceed.

PURCHASE OF CALENDARS

The resolution (S. Res. 188) relating to the purchase of calendars, was considered and agreed to, as follows:

S. RES. 188

Resolved, That the Committee on Rules and Administration is authorized to expend from the contingent fund of the Senate, upon vouchers approved by the chairman of that committee, not to exceed $58,240 for the purchase of one hundred and four thousand calendars. The calendars shall be distributed as prescribed by the committee.

Mr. BAKER. I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ADDITIONAL EXPENDITURES FOR THE TRAINING OF PROFESSIONAL STAFF

The resolution (S. Res. 180) increasing the limitation on expenditures by the Committee on Banking, Housing, and Urban Affairs for the training of professional staff, was considered and agreed to, as follows:

S. RES. 180

Resolved, That section 2(2) of S. Res. 75, Ninety-seventh Congress, agreed to March 3 (legislative day, February 16), 1981, is amended by striking out "$1,000" and inserting in lieu thereof "$6,100".

Mr. BAKER. I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ADDITIONAL EXPENDITURES FOR TRAINING OF PROFESSIONAL STAFF

The resolution (S. Res. 189) authorizing expenditures by the Committee on Commerce, Science, and Transportation for the training of professional staff, was considered and agreed to, as follows:

S. RES. 189

Resolved, That section 2 of S. Res. 52, Ninety-seventh Congress, agreed to March 3, 1981, is amended (1) by inserting "(1)" after "amount"; and (2) by inserting before the period at the end thereof the following: ", and (2) not to exceed $7,000 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such Act)".

Mr. BAKER. I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF TIME FOR COMMITTEE TO FILE REPORT

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Commerce be authorized to file a report until 12 midnight tonight.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMOVAL OF INJUNCTION OF SECRECY—TREATY DOCUMENT NO. 97–14

Mr. BAKER. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from a 1979 amendment to a regulation of Annex II of the International Convention on Load Lines, 1966 (Treaty Document No. 97–14), transmitted to the Senate today by the President of the United States; and ask that the treaty be considered as having been read the first time; that it be referred, together with accompanying papers, to the Committee on Foreign Relations and ordered to be printed; and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The President's message is as follows:

To the Senate of the United States:

I transmit herewith, for the advice and consent of the Senate to acceptance, an amendment to regulation 49(4)(b) of Annex II of the International Convention on Load Lines, 1966. The report of the Department of State is also transmitted for the information of the Senate in connection with its consideration of this amendment.

The International Convention on Load Lines established uniform principles governing the safe loading of ships on international voyages. The annexes, which form an integral part of the Convention, embody the regulations for determining the location of ships' load lines and divide the world's oceans into regions in which particular load lines must be observed depending upon the season of the year in which they operate. The amendment to regulation 49(4)(b) of the Convention, which was proposed by the Government of Australia, would redefine the seasonal tropical area in the South Indian Ocean to include waters in the new offshore oil development area off the northwest coast of Australia.

I believe that the proposed amendment will not be detrimental to American shipping and should be accepted. I recommend that the Senate give early and favorable consideration to this amendment.

RONALD REAGAN.

THE WHITE HOUSE, *July 27, 1981.*

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I believe that concludes the requests I am prepared to make at this time. I thank the minority leader for his cooperation. I thank the distinguished Senator from Wyoming for forebearing to begin his presentation while the leadership attended to these details.

Mr. President, I yield the floor.

ECONOMIC RECOVERY TAX ACT OF 1981

The Senate continued with consideration of the joint resolution.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. WALLOP. Mr. President, I have agreed to yield to the Senator from California.

Mr. CRANSTON. I thank the Senator very much. I thank the Senator from Arkansas.

Are we back on the tax bill, Mr. President?

The PRESIDING OFFICER. The Senator is correct.

UP AMENDMENT NO. 306

Mr. CRANSTON. Mr. President, I send an amendment to the desk on behalf of my distinguished colleague and myself and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON) for himself and Mr. HAYAKAWA, proposes unprinted amendment numbered 306:

On page 55 strike lines 13 through and including line 19 and insert in lieu thereof the following new language:

"(C) AUTHORITY TO PRESCRIBE REGULATIONS.—Until Congress acts further, the Secretary is authorized to prescribe such interim regulations as may be necessary or appropriate to determine whether the requirements of subparagraph (B) have been met with respect to property placed in service after December 31, 1980.

"(D) PUBLIC UTILITY PROPERTY WHICH IS NOT RECOVERY PROPERTY.—In the case of public utility property which, by reason of this paragraph, is not treated as recovery property, the allowance for depreciation under section 167(a) shall be an amount computed using the method and period referred to in subparagraph (B)(i)."

The PRESIDING OFFICER. The Chair notes this amendment will be considered out of order.

Mr. CRANSTON. Mr. President, the amendment I am offering is intended to assist in clearing up a problem in California affecting the interpretation of the normalization method of accounting for accelerated cost recovery for public utility property as provided in the Finance Committee bill.

This amendment has been requested by Mr. John Bryson, chairman of the California Public Utilities Commission, and the electric utilities of California. The purpose of the amendment is supported by the telephone companies of my State, too.

The amendment provides an interim solution to a volatile and difficult problem facing California's public utilities and the State regulatory body with regard to the proper treatment and of the investment tax credit of the rapid depreciation incentive which is about to be voted by this body.

Since this problem is quite complex, I ask unanimous consent that a statement delivered by former Deputy Assistant Secretary for Tax Legislation Daniel I. Halperin on April 15, 1980, before the

House Committee on Ways and Means, be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF DANIEL I. HALPERIN

Mr. Chairman and Members of this Committee: I am pleased to have the opportunity to appear before this Committee to discuss H.R. 6806 and H.R. 3165. Both bills deal with aspects of the rules of the Internal Revenue Code that require the investment credit and the tax deferral attributable to accelerated depreciation to be "normalized" in establishing rates for regulated public utilities. Last year the Treasury presented extensive testimony on this subject before the Committee's Oversight Subcommittee. For the record of these hearings I am attaching a copy of our previous testimony, which I will not reiterate in detail.

As we testified last year, the Treasury regards the investment credit, and the tax deferral attributable to the excess of accelerated over economic depreciation, as subsidies to investment that are delivered through the tax system. As we also testified at those hearings, the Treasury has concluded that it is appropriate for those tax subsidies to be made available to regulated public utilities, which are among the most capital-intensive industries in the country; but that, as long as these benefits are available to regulated public utilities, they should be treated as subsidies to investment rather than as simple tax reductions.

This point should be underscored. We would not be here today if the cash equivalent of the investment credit and the loan equivalent of the tax deferral attributable to accelerated depreciation were delivered directly rather than through the tax system. We do not believe that accounting for comparable, but appropriated, subsidies would be controversial. The fact that they are cleared through the tax system does not change—and should not be permitted to obscure—their essential character.

Thus, in regulated ratemaking, they should be treated in the same manner as any comparable appropriated capital subsidy. Neither should be considered to reduce current regulated tax expense. The investment credit should be treated as a 10 percent reduction in the price paid for equipment, and the tax deferral attributable to accelerated depreciation as an interest-free loan. We believe that this treatment—"normalization"—is unquestionably the correct method of accounting for these subsidies; and that, in the long run, such treatment is in the interests of ratepayers as well as owners of equity in regulated utilities. On balance, we also concluded last year that the normalization requirements of the Internal Revenue Code constitute an appropriate means to ensure proper accounting for these subsidies.

Quite obviously there are those who do not share our point of view. Specifically, the regulatory authorities in the state of California have accounted for the subsidies in a manner that is the equivalent of their being "flowed through" to income (i.e., as a reduction of current tax expense), a result that does not comport with the rules of the Code. But we recognize that the forces that have led to the existing situation in California are both complex and politically charged. Consequently, while we believe the method of regulatory accounting adopted by California unquestionably violates the applicable provisions of the Code and regulations, the Treasury is willing to offer its cooperation in attempting to arrive at a solution to this difficult situation. But we must insist that one can expect as part of any legislative solution a reduction, if not the elimination, of further major disputes about the operation of these rules.

It is with that point of view that we approach H.R. 6806. H.R. 6806, as we understand it, has two objectives. First, under existing law, failure to normalize results in a loss of the benefits of the investment credit and accelerated depreciation. Sections 3 and 4 of H.R. 6806 would operate to absolve those companies, which have been required by California to flow through improperly the investment credit and the tax deferral attributable to accelerated depreciation, from the loss of those benefits. Second, recognizing that the improper flow-through stemmed primarily from an estimating procedure adopted by the California Public Utilities Commission, sections 1 and 2 of H.R. 6806 would amend the investment credit and accelerated depreciation rules to state specifically in the statute that such procedures are impermissible.

We believe that the statutory clarifications of sections 1 and 2 of H.R. 6806 are consistent with existing law and, therefore, are appropriate. The balance of H.R. 6806 we view with reservation. Regulated public utilities are among the most capital-intensive industries and therefore are among the most significant recipients of capital subsidies delivered through the tax system. Consequently, retroactive disallowance of these subsidies exposes the companies subject to the California rate orders to tax deficiencies that by any measure are substantial. If, by reason of legislation, the difficult circumstances as they have developed in California could be defused and the normalization rules made to operate properly there as elsewhere, we see no policy that would be served by collecting such deficiencies.

The difficult question is whether H.R. 6806 can achieve this goal, which both we and its sponsors seek. In our judgment, legislative relief for past violations would be preferable if it preserved some measure of sanction short of collecting the full tax deficiencies or insisting on complete abatement of the rate refunds that already have been ordered by California. Such legislation might serve to defuse the existing situation while making clear that the normalization rules cannot be disregarded with impunity.

But the Treasury is not unalterably opposed to H.R. 6806. If, as the result of its enactment, the situation in California could be defused and the California authorities persuaded to accept normalization; and if it was considered unlikely that other state regulatory authorities would be induced to start down the road taken by California; and if, finally, this Committee and the Congress were to make it clear that attempts to circumvent these rules in the future would meet with no sympathy on the part of the Congress, then a measure such as H.R. 6806 could be desirable.

Whether it is realistic to have such expectations—which, Mr. Chairman, I emphasize are in our judgment essential to the Treasury's acquiescing in this legislation—it is not yet possible to say. If the California authorities, and those public lawyers whose intervention in the California rate proceedings has been an essential feature of this controversy, were prepared to accept normalization for the future, that action would go far toward alleviating our concerns. We say this recognizing that the Supreme Court of California, which we assume cannot speak to the question outside the confines of a judicial proceeding, also has played an essential role in California. But we also point out that, in considering the wisdom of H.R. 6806, this Committee must also reach a judgment about the possibility that its enactment would induce other state regulatory authorities to follow California's lead. We are not in a position to express an independent judgment on the likelihood that this will happen. Perhaps the Committee will hear from witnesses, subject to regulation by states other than California, who will make their views on this subject known.

We must point out, however, that if H.R. 6806 were enacted, and if, contrary to the Committee's expectations, California persevered in the course that it has staked out, or other public utility commissions were persuaded to follow California's lead, the consequences could be quite serious. Our testimony last year to the effect that retention of the normalization rules was appropriately rested on several fundamental premises, among them that the subsidies provided by the investment credit and accelerated depreciation were appropriate for regulated public utilities as long as they were properly accounted for through normalization; that, in general, the tax normalization rules seemed to operate properly; and that, absent such rules, benefits that are intended as subsidies to investment well might be converted into rate subsidies.

But we also pointed out that these rules do not operate well when they are the focus of controversy. If, either as the result of California's continued pursuit of flow-through or because of efforts by other public utility commissions to follow suit, the normalization rules prove to be a source of even further controversy, the Treasury might feel constrained to recommend a review of Congressional policy toward the provision of these investment subsidies to regulated public utilities. It might prove necessary to reexamine the wisdom of retaining the normalization rules. Or, recognizing that flow-through operates to convert investment subsidies into direct rate subsidies, the inability to achieve normalization accounting might warrant reconsideration of allowing these tax subsidies to regulated utilities. We do not mean to suggest that the time for such reconsideration has arrived; only that, if these rules cannot be made to work properly, the underlying policy may have to be reconsidered.

As I mentioned at the outset, Mr. Chairman, the Treasury is prepared to work with this Committee and other interested parties in an attempt to remedy this difficult situation. At this moment we are not confident that H.R. 6806 will provide a solution. We look forward to seeing how the situation develops, and in particular to the views to be expressed before this Committee in the balance of its hearings today.

The other bill dealt with in this hearing, H.R. 3165, addresses the appropriate technique of normalizing the investment credit. It is the Treasury's view that the investment credit was intended to stimulate investment in productive capital by reducing the cost of capital goods. Such a reduction means that investments will become feasible at a lower level of expected returns than would be the case in the absence of the credit. Thus, we believe that proper normalization of the credit would result in its being accounted for in regulated ratemaking in exactly the same way as any other 10 percent reduction in capital costs. First, the regulated taxapayer's "rate base," to which its "fair rate of return" is applied in determining the allowable return to equity investors, would be reduced by the amount of the credit. This would reflect the fact that a portion of the taxpayer's investment had been financed by the government. Second, the base for determining regulated depreciation expense would also be reduced by 10 percent (to reflect the actual cost of the investment), thus reducing annual depreciation charges (and, hence, regulated "cost of service") by 10 percent as well.

In its current form, section 46(f) may not quite accomplish this goal. It provides two alternative methods of normalizing the investment credit, neither of which unam-

biguously permits both a rate base reduction and a reduction in regulated depreciation base. Under one method—section 46(f)(1)—the regulatory body establishing rates may require the regulated taxpayer's rate base to be reduced by the amount of the credit. However, under section 46(f)(1), it is not clear that any other reduction, for example a reduction in depreciation expense, is permitted in the taxpayer's regulated cost of service. Under the alternative—section 46(f)(2)—regulated "cost of service" may be reduced by a rateable portion of the credit earned each year (the equivalent of reducing the taxpayer's base for computing regulated depreciation expense), but the taxpayer's rate base may not be reduced. Consequently, section 46(f)(2) permits the regulated taxpayer to earn a return on the portion of its investment that is paid for by the government through the credit. Most regulated utilities elect section 46(f)(2).

As we testified last year, we believe that the correct technique by which to normalize the investment credit involves a combination of the two existing methods, under which, through reduced depreciation, the regulated taxpayer's cost of service is reduced by a rateable portion of the credit each year; while, simultaneously, the taxpayer's rate base is reduced (to exclude the government's contribution) by the amount of the allowable credit. This treatment would recognize the investment credit as providing a 10 percent reduction in capital costs.

We are convinced that the arguments in support of retaining section 46(f)(2) are based on a misunderstanding of the way in which the investment credit was intended to operate. Many of those who have considered this issue agree that conceptually we are correct, but attempt to justify section 46(f)(2) on other grounds. Specifically, it has been said that allowing a regulated utility to preserve the investment credit in its rate base, as permitted by section 46(f)(2), to some extent mitigates the consequences of "regulatory lag" (i.e., the inability of current ratemaking orders to keep up with financial demands on a regulated utility), a phenomenon that is aggravated by high rates of inflation. We believe that it simply is improper to justify improper normalization of the investment credit as an antidote to deficiencies in the ratemaking process. Those deficiencies, if they exist, should be remedied by the regulators.

In sum, Mr. Chairman, H.R. 3615 attempts to correct what we regard as a deficiency in the existing investment credit normalization rules. While we have some technical reservations, the Treasury supports the objective of H.R. 3615 and would be happy to cooperate with the Committee or its staff to work out suitable revisions.

Mr. CRANSTON. Mr. President, the bill—H.R. 6806, 96th Congress—to which Mr. Halperin refers in his testimony has been reintroduced in the Senate by my colleague Senator HAYAKAWA and me as S. 232.

The amendment I am offering will not affect the overall objective of S. 232 in any way whatsoever. The amendment is merely an interim compromise which is intended to assist the California Public Utilities Commission in complying with the expressed intent of Congress that tax subsidies made available to regulated public utilities be treated as subsidies to investment rather than as simple tax reductions.

The difference is considerable.

Mr. Halperin's testimony makes this point clear.

A reduction in a public utility's taxes simply results in a reduction of charges to the ratepayer since taxes are passed through to the customer. This flow-through treatment, of course, deprives the utility of retained earnings for investment in new equipment and technology.

On the other hand, as Mr. Halperin explained:

> The investment credit should be treated as a 10 percent reduction in the price paid for equipment, and the tax deferral attributed to accelerated depreciation as an interest-free loan. We believe that this treatment—"normalization"—is unquestionably the correct method of accounting for these subsidies; and that, in the long run, such treatment is in the interests of ratepayers as well as owners of equity in regulated utilities.

This statement should be self-evident and reflects accurately present law. As one would expect, the present administration has expressed no disagreement with the statement of policy.

The language of the amendment is indeed innocuous. But it will help the California Public Utilities Commission extricate itself from a situation which is adversely affecting the ability of utilities and the PUC to serve the best interests of ratepayers and the State's economy.

I urge adoption of the amendment.

Mr. President, I shall not delay the Senate with any more detailed explanation of this measure. It has been discussed in great detail with the Senator from Kansas. It deals with a problem peculiarly related only to California and telephone companies and utilities there. It has been worked out to the total satisfaction of all concerned.

I yield now to my colleague (Mr. HAYAKAWA).

Mr. HAYAKAWA. Mr. President, as the principal sponsor of S. 232, the permanent legislation to correct the problem in the State of California, which this amendment attempts to redress temporarily, I am concerned that action on this amendment, which requires additional action on the part of the Congress, might prejudice consideration of S. 232. I wonder if the distinguished chairman of the Committee on Finance will respond to the concern of the Senator from California with respect to any prejudice this amendment would cast upon consideration of S. 232.

Mr. DOLE. Mr. President, let me say to both distinguished Senators from California that, certainly, the Senate Committee on Finance, in our role on the measure, will give every consideration and do all it can to expedite the resolution of this very serious concern of both Senators.

Mr. HAYAKAWA. Mr. President, further, I wonder if the distinguished chairman of the Committee on Finance will consider S. 232 when the Finance Committee considers the next tax measure?

Mr. DOLE. That will be a matter to be considered. I have indicated that to both Senators from California.

We hope to have a second tax bill before the Senate sometime later this year. I cannot, of course, guarantee that the Senators' interests or their amendment will be a part of the package, but we will consider the concerns of both Senators and try to accommodate their wishes.

Mr. HAYAKAWA. I am grateful to the distinguished chairman of the Finance Committee. I am also grateful to the distinguished senior Senator from California.

Mr. DOLE. Mr. President, under the bill, public utilities are eligible to use the investment credit and to elect accelerated depreciation for the tax purposes only if the tax benefits from accelerated depreciation and the investment credit are normalized for ratemaking purposes. The amendment would give the Secretary authority to prescribe such interim regulations as are necessary or appropriate to determine whether certain ratemaking procedures are in compliance with the normalization requirements under the bill.

I yield back the remainder of my time.

Mr. CRANSTON. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment (UP No. 306) was agreed to.

Mr. CRANSTON. I move to reconsider the vote by which the amendment was agreed to.

Mr. HAYAKAWA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CRANSTON. Mr. President, I thank all concerned very much, particularly the chairman of the committee.

UP AMENDMENT NO. 307

(Purpose: Relating to the definition of qualified person for purposes of the at risk rules)

Mr. WALLOP. Mr. President, I send an amendment to the desk on behalf of myself and Senator DURENBERGER.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

> The Senator from Wyoming (Mr. WALLOP), for himself and Mr. DURENBERGER, proposes an unprinted amendment numbered 307.

Mr. WALLOP. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 100, strike out lines 12 through 17, and insert in lieu thereof the following:

"(ii) CERTAIN FINANCING.—In the case of a taxpayer who at all times is at risk (determined without regard to this clause) in an amount equal to at least 20 percent of the basis (determined under section 168(d)(1)(A)(i) of property described in subparagraph (A) and who acquired such property from a person who is not a related person, such taxpayer shall for purposes of this paragraph be considered at risk with respect to any amount borrowed in connection with such property (other than convertible debt) to the extent that such amount—"

On page 101, beginning with line 9, strike out all through page 102, line 2, and insert in lieu thereof the following:

"(D) QUALIFIED PERSON.—For purposes of this paragraph, the term 'qualified person' means any person—

"(i) which—

"(I) is an institution described in subparagraph (A), (B), or (C) of section 123(c)(2) or an insurance company to which subchapter I applies, or

"(II) is a pension trust qualified under

section 401(a) or a person not described in subclause (I) and which is actively and regularly engaged in the business of lending money,

"(ii) which is not a related person with respect to the taxpayer, and

"(iii) which is not a person who receives a fee with respect to the taxpayer's investment in property described in subparagraph (A) or a related person to such person.

On page 102, between lines 2 and 3, insert the following:

"(E) SPECIAL RULE FOR CERTAIN TRANSACTIONS.—

"(i) IN GENERAL.—For purposes of subparagraph (D), in the case of a taxpayer which acquires property for fair market value from a person who acquired such property from the taxpayer, then such person shall not be treated as the person from whom the taxpayer acquired the property.

"(ii) SUBPARAGRAPH NOT TO APPLY.—Clause (i) shall not apply if the taxpayer had acquired such property from such person (or a related person to such person) before such person acquired it from the taxpayer.

"(F) RELATED PERSON.—For purposes of this paragraph, the term 'related person' has the same meaning as such term is used in section 168(e)(4), except that in applying section 168(e)(4)(D)(i) in the case of a person described in subparagraph (D)(i)(II), sections 267(b) and 707(b)(1) shall be applied by substituting '0 percent' for '50 percent'.

At the end of the bill, insert the following new section:

ADDITIONS TO TAX IN THE CASE OF VALUATION OVERSTATEMENTS

SEC. . (a) VALUATION OVERSTATEMENTS.—Subchapter A of chapter 68 (relating to additions to tax) is amended by redesignating section 6659 as section 6660 and by inserting after section 6658 the following new section:

ADDITION TO TAX IN THE CASE OF VALUATION OVERSTATEMENTS FOR PURPOSES OF THE INCOME TAX

"SEC. 6659. (a) ADDITION TO THE TAX.—If—

"(1) an individual, or

"(2) a closely held corporation or a personal service corporation,

has an underpayment of the tax imposed by chapter 1 for the taxable year which is attributable to a valuation overstatement, then there shall be added to the tax an amount equal to the applicable percentage of the underpayment so attributable.

"(b) APPLICABLE PERCENTAGE DEFINED.—For purposes of subsection (a), the applicable percentage shall be determined under the following table:

"If the valuation claimed is the following percent of the correct valuation—	The applicable percentage is—
150 percent or more but not more than 200 percent	10
More than 200 percent but not more than 250 percent	20
More than 250 percent	30

(c) VALUATION OVERSTATEMENT DEFINED.—

(1) IN GENERAL.—For purposes of this section, there is a valuation overstatement if the value of any property, or the adjusted basis of any property, claimed on any return exceeds 150 percent of the amount determined to be the correct amount of such valuation or adjusted basis (as the case may be).

"(2) PROPERTY MUST HAVE BEEN ACQUIRED WITHIN LAST 5 YEARS.—This section shall not apply to any property which, as of the close of the taxable year for which there is a valuation overstatement, has been held by the taxpayer for more than 5 years.

"(d) UNDERPAYMENT MUST BE AT LEAST $1,000.—This section shall not apply if the underpayment for the taxable year attributable to the valuation overstatement is less than $1,000.

"(e) AUTHORITY TO WAIVE.—The Secretary may waive all or any part of the addition to the tax provided by this section on a showing by the taxpayer that there was a reasonable basis for the valuation or adjusted basis claimed on the return and that such claim was made in good faith.

"(f) OTHER DEFINITIONS.—For purposes of this section—

"(1) UNDERPAYMENT.—The term 'underpayment' has the meaning given to such term by section 6653(c)(1).

"(2) CLOSELY HELD CORPORATION.—The term 'closely held corporation' means any corporation described in section 465(a)(1)(C).

"(3) PERSONAL SERVICE CORPORATION.—The term 'personal service corporation' means any corporation which is a service organization (within the meaning of section 414(m)(3)).".

(b) CLERICAL AMENDMENT.—The table of sections for subchapter A of chapter 68 is amended by striking out the last item and inserting in lieu thereof the following:

"Sec. 6659. Addition to tax in the case of valuation overstatements for purposes of the income tax.

"Sec. 6660. Applicable rules.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to returns filed after December 31, 1981.

Mr. WALLOP. Mr. President, today I am offering an amendment to the investment tax credit at risk rules which should go a long way toward restoring the availability of the investment credit in genuine business transactions, while at the same time, providing sufficient disincentives to limit tax shelter abuse.

The Finance Committee bill provides that, for the first time, the at risk rules will be applied to the investment credit.

Under present law, investors may receive a full investment tax credit without regard to the amount they have at risk in the investment. This is so despite the fact that their other deductions are limited to the amount they have at risk.

For example, an individual could buy property subject to a nonrecourse loan, receive an investment credit and subsequently fail to repay the loan. The seller would foreclose on the property, but, if the property's value did not cover the outstanding loan, the seller could not obtain the difference from the buyer. However, the buyer still would receive the full ITC.

The committee was right in attempting to solve this abuse. At the same time, we made an effort to provide a safe harbor for valid business transactions. If the lender is a regulated financial institution or an insurance company, the at risk rules will not apply. This was done to exempt transactions where there was a regulated third-party lender which would act in true arm's-length fashion.

While there was some concern that this rule was too restrictive, there was also concern that any further widening of this exception could create a major loophole in the provision.

This Senator is very concerned that valid third-party lenders will be prejudiced by these provisions. There are a number of lenders, other than banks and insurance companies, which provide capital for economically productive investment rather than tax shelter schemes.

My amendment would allow loans for any business which is actively and regularly engaged in lending money to qualify for the exception from the "at risk" provisions.

In this provision it is specifically intended that, if a transaction involves a lease which would be treated as a sale for tax purposes, the lessor will be considered to have made a loan in determining whether the lessor is actively and regularly engaged in a lending business.

This Senator recognizes that this amendment could possibly create greater opportunities for creative tax planning by parties which structure their transactions to look like real business transactions, but which are, in reality, merely tax shelters. To eliminate the benefit of tax shelter schemes based upon overvaluation of property to increase the amount of investment credit, my amendment will provide a substantial penalty. If property is overvalued by 150 percent or more, a 10-percent penalty will be applied to any underpayment attributable to the overvaluation. If the property is overvalued by 200 to 250 percent, the penalty will be 20 percent. If the property is more than 250 percent overvalued, the penalty will be 30 percent.

This penalty provision is identical to the provisions included in the revised Conable-Hance tax cut bill as well as in the Ways and Means bill. It will not prohibit tax shelters in this area, but it will definitely make them much less attractive.

Mr. President, this amendment has been cleared with the Senator from Kansas (Mr. DOLE) and the Senator from Louisiana (Mr. LONG). It is my understanding that they know the contents of this amendment.

Mr. DOLE. Mr. President, this amendment has been discussed with me and with the Senator from Louisiana. I understand that it has been discussed with Treasury officials and that in its present form they have no objection to the amendment. Is that correct?

Mr. WALLOP. It is my understanding that that is correct. It is also my understanding that the Senator from Ohio finds it satisfactory.

Mr. DOLE. That would indicate considerable improvement over the previous amendment, I suppose, as the Senator from Ohio might look at it. The Senator from Kansas was for the original amendment.

Mr. WALLOP. Mr. President, I yield back the remainder of my time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment (UP No. 307) was agreed to.

Mr. WALLOP. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WALLOP. Mr. President, I thank the Senator from Kansas and particularly the Senator from Arkansas, who seems to have been rolled back in this process.

Mr. PRYOR. I say to the distinguished Senator from Wyoming that I am glad I stayed and listened to him. It was well worth it.

Mr. President, I have an amendment at the desk, and I say to my colleagues that I am not going to offer this amendment or push it for a vote.

The only reason I speak this evening is to tell my colleagues and, basically, to put the U.S. Senate on notice that, at the proper time, I plan to present this amendment for full consideration and debate and an up and down vote.

Mr. President, I will present a little background, if I may, and I will take only a few moments. Today, when a 65-year-old citizen of this country is working in a plant, working in any capacity in which that person has participated in the social security system, that worker is faced with a strange and punitive ceiling. It is a ceiling on earnings. It is a disincentive to continue working.

Today, there are some 11 million Americans who find themselves in this category. Today, this strange disincentive to work, which we passed in years gone by, is certainly a candidate for removal, and a candidate for removal immediately.

I applaud President Reagan for facing this issue, because the President, in a recent proposal to Congress and in the discussions he has had with congressional leaders, and so forth, is proposing that this earnings limitation upon social security recipients be phased out by 1986. Once again, I commend the President for doing this.

If Congress would face reality and sense what this particular earnings limitation is doing to our society, and even to our economy, I believe we would be exercising sound, responsible logic and good judgment—and, I might also say, wisdom—in striking, once and for all, this unfair and this very debilitating amendment and section of the social security law which is causing some 11 million Americans to be stripped of their freedom of choice in deciding whether or not they will continue working.

Mr. President, for the last several years, I have heard argument after argument, and I have heard expert after expert testify and discuss this particular section of the social security law which causes these 11 million Americans, today, to be placed under this constraint—or, I might say constraint—against further earnings over $5,500.

Mr. President, the fact we are beginning to see now is that if we stripped away this earnings limitation, approximately 75 percent of any losses we might have incurred in the social security trust fund are going to be recoverable. In fact, more than $1 billion in new income taxes are going to be produced if only 1 out of 10 of the workers in this category continues to work.

Second, we are looking at the probability of $700 million to $800 million generated to put back into the social security trust fund because these individuals when they continue working after 65 they are going to continue paying into the social security program.

Even once again using the figure of 1 out of 10 or 1 out of 11 new workers continuing in the system, we are going to see $1.7 billion generated by these individuals who utilize this freedom of choice and decide to continue working and making a contribution to their society, this society, and to our country.

Mr. President, I think, too, it is a sad fact to realize that for that 65-year-old worker if that individual decides today to earn more than $5,500 a year for every $2 that individual earns over $5,500 then that individual is penalized $1 in social security benefits that he has been paying into all of his working life.

I have only four points, Mr. President, and I will quickly conclude.

This particular area of the law I feel, as do many of our colleagues, needs to be removed once and for all from our entire tax structure and social security law.

First, this legislation would help to return a freedom of choice, a right to work, a right to continue making a contribution to this society.

Second, the present statute which sets up this penalty goes against everything this country stands for. It goes against the free enterprise system. It goes against the thrust of what we are trying to do in this day and time to keep our elderly citizens active, constructively employed, in the free enterprise system and in making a constructive contribution to that particular economic and social system.

Third, I do not think there has ever been a greater disincentive or a greater dehumanizing piece of legislation than that earnings limitation that we now place upon that 65-year-old citizen who suddenly finds himself or herself on that 65th birthday faced with a penalty imposed by Congress upon that individual's right to earn and that individual's desire to earn.

Fourth, I wish to state that in a hearing not long ago it gave me a great opportunity to hear two of the great organizations of this country, the American Association of Retired Persons and the National Retired Teachers Association, testifying that this earnings limitation to the social security recipient and to the elderly citizen of this country was one of the most detestable features of the entire body of law that we have surrounding social security benefits today.

Mr. President, at the proper time, perhaps in September or maybe in October, when the Finance Committee, or wherever it might emanate from, comes forward with the social security legislation that we are so anxiously looking forward to grappling with, as complex as it might be, I do put my colleagues on notice that at that time and in the proper environment and in the proper context I will introduce legislation, hopefully supported by a majority of this great body, to remove once and for all this debilitating aspect of the limitation on earnings that we now find in the present law.

I do appreciate so much the distinguished chairman of the Finance Committee cooperating with me, yielding to me to allow me to make these few short remarks on this issue, and I once again appreciate his help and the help of his very capable staff.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. PRYOR. I am proud to yield to the Senator.

Mr. DOLE. I say, first of all, I appreciate the Senator staying this evening to discuss this amendment. I am very sympathetic with what he said and what he proposes. We have made some progress. The distinguished Senator from Arizona, Senator GOLDWATER, has been out in the forefront with the Senator from Arkansas, and others, in this area.

It is also an amendment I think the administration will support, and hopefully when we put together the so-called social security package something close to what the Senator from Arkansas has proposed will be a part of that package.

I do thank the Senator for discussing it and finally withdrawing the amendment at this time.

Mr. PRYOR. I appreciate the distinguished chairman of the Finance Committee, and I once again say, and I have said it many times in public, I wish to reiterate it here tonight in the Chamber that Senator GOLDWATER of Arizona, the distinguished senior Senator from that State, has been a leader in this particular field, and very hopefully all of us can join hands and put our best minds together to try to work this out.

I also thank the distinguished Senator from Kansas for his comments and for his support of this concept. I hope, I will say to my friends from Kansas, that perhaps the Committee on Aging and perhaps the Finance Committee will possibly hold hearings on this matter to get the true feeling of the elderly community of America, and I think it is overwhelming that they wish to see this obstacle in this punitive tax removed from the statute books once and for all and give them a freedom of choice and an opportunity to continue in the mainstream of our society and economy, if it is their option.

I thank the Senator.

Mr. DOLE. I thank the Senator from Arkansas.

TAX INDEXING A GOOD BET

Mr. President, on behalf of the Senator from Colorado (Mr. ARMSTRONG) and myself I make the following statement:

There has been some comment in the press in the past week or so concerning the action of the Senate on July 16 agreeing to index the individual tax rates beginning in 1985. While there have been observations both pro and con, up until now none of the commentators have really touched on the heart of the issue. Now the New York Times has come to the rescue, with an editorial in its edition of Sunday, July 26.

The Times editorial stresses what many of us have said for some time: That tax indexing simply means that the Members of Congress are willing to bet on their own abilities to control fiscal policy and raise the level of revenues

necessary to meet our obligations, without letting inflation do the job for them by lifting taxpayers into higher brackets. As the Times suggests, to stabilize tax rates in periods of inflation is to express confidence in the ability of a representative democracy to meet its responsibilities to its citizens. In the final analysis, this is the most compelling reason for the Senate action.

Mr. President, tax indexing is now included in the bipartisan substitute tax bill that will be offered in the House of Representatives. We hope it will be adopted, and ask that the New York Times editorial be printed at this point in the RECORD so that the significance of this issue will be made clear.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A TAX INDEX BETS ON DEMOCRACY

If you are truly weary of politicians "cutting" taxes every other year but nonetheless collecting ever larger sums for Federal spending, take heart from a live proposal to end the shell game. It is called "indexing" the income tax, and the Senate has voted to try it starting in 1985.

The idea, first embraced by Ronald Reagan during his Presidential campaign and now part of the Administration tax bill, is annually to index, or raise, the income that determines tax bracket—as well as taxpayers' personal exemptions and standard deductions—by an amount that offsets inflation. In other words, the prevailing tax rate would be roughly constant in relation to purchasing power; it would stop creeping upwards simply because of inflation. If it takes an income of $33,000 this year to buy what $30,000 bought last year, the proportion going to Uncle Sam would no longer automatically increase.

It is a worthy idea that would restore honest packaging to Federal tax policy. If Government spending increases, Congress would have to actually vote to raise taxes to finance it. And merely holding the true tax rate constant could no longer be misrepresented as tax reduction.

The main argument for the change is integrity. Six times since 1969, Congress has flattered itself by passing what were called income tax cuts, when it was merely turning back revenues generated by the inflationary creep of taxpayers into ever higher tax brackets. And some of this windfall was not returned at all, but spent. So the legislators could boast not only of cutting taxes but also of increased Federal benefits. The Senate's indexing plan would end that game this year. Future tax cuts would really have to be cuts; increased spending would have to come from real economic growth or candidly acknowledged tax increases.

The strongest argument against the idea is that protecting taxpayers against inflation in this way would weaken their already feeble will to resist inflation. But that puts a policy premium on trickery. The fact is that taxpayers learn soon enough that their tax rates have been going up, no matter what the politicians say, and then join much riskier "tax revolts" of the kind that have now spread from the states to Washington.

Indeed, it may turn out that Government will more quickly fight inflation if it is among the first victims. Indexing the income tax would sensitize Congress and all Federal agencies to the declining value of the dollar. To avoid a true tax increase for new works, both President and Congress would have a new incentive to resist waste and the costly subsidies that still lie buried in the tax code.

Liberals have good reason to fear that in its present conservative mood, the nation would be driven by a tax index to resist important new social programs. But that is an argument to perpetuate good works by sleight of hand.

It is just as valid to argue that social programs lost political support precisely because they were too long financed with the inflation's tax windfall and did not have to be openly defended as meriting tax increases.

There are risks in tax indexing. If applied in 1985 after repeated reductions in social spending, it might wind up skimming an additional $13 billion from tax receipts and lead Congress to squeeze the budget even harder. Congress might still refuse to face up to inflation. And it might shortchange both military and civilian obligations rather than raise tax rates. But that would only perpetuate honest debate over priorities. The risk, in the end, is no greater than betting on democracy.

INTERFUND BORROWING

● Mr. HART. Mr. President, when the Senate voted last Friday on the very important subject of funding for the social security system, I opposed the amendment offered by the Senator from Tennessee (Mr. SASSER). I want to insure there is no misunderstanding of my vote.

The amendment was originally designed to require the Senate Finance Committee to report legislation by September 30, 1981, authorizing interfund borrowing as a short-term solution to the financial problems facing the system. However, the amendment was altered at the last minute, by not only changing the date, but requiring legislation be reported authorizing interfund borrowing or "such other provisions as may be required."

This wording was far too open ended. There are numerous solutions for reforming the system, ranging from using general revenues to reducing benefits for recipients. The solvency of the social security system is a significant problem, and we have an obligation to seek the very best reform measures for this ailing income security system. Theoretically, this open-ended language could even be read to permit reduction in overall social security benefits. Without knowing specifically which provisions might be authorized by this amendment, I could not give it my support.●

PENDING AMENDMENTS

Mr. DOLE. Mr. President, just let me quickly review. As I understand, there are eight Republican amendments.

Let me indicate for the record in case we made a mistake. As we understand, and the staff is checking the list of amendments, there are still eight Republican amendments pending. The Senator from Pennsylvania, Senator HEINZ, has an amendment; the Senator from Delaware, Senator ROTH, has two amendments, one on railroad rolling stock, which I understand will not come up, another one on depreciation for structures which is in negotiation; the Senator from Iowa, Senator JEPSEN, has two amendments, one on adoption tax credit which we are negotiating and another related to parity rule for farmers, which I do not believe he will offer to this bill; the Senator from Idaho, Senator SYMMS, has two amendments on estate taxes, modification of the estate tax provisions in the bill, and I understand either those will be accepted or not brought up; the Senator from Kansas has one amendment that is pending on stock options which will be brought up and an amendment on cash management which will help us balance our books before we leave for conference.

As far as this Senator knows, the Senator from Kansas will be asking along with the Senator from Louisiana unanimous consent to offer whatever technical amendments may be necessary.

The Senator from Kansas is certain there are additional Republican amendments because I do not see the amendments of the Senator from New York, Senator D'AMATO. So there may be an amendment by the Senator from New York (Mr. D'AMATO) and possibly others.

As I understand on the Democratic side there are some 30 amendments pending, but also I understand only about half of that number or less will be called up. Several of these are in negotiations including one of the Senator from Hawaii. We think we can work that one out.

So for anyone who may still be listening at this hour, hopefully we will start at 8:15 a.m. tomorrow, have a vote at 9 a.m. We will then proceed in rapid fire order to dispose of the remaining amendments. The Senator from Kansas is prohibited from offering a motion to table them all en bloc. If he could the Senator from Kansas would. But hopefully we can dispose of these amendments rather quickly and have either third reading or some vote by early afternoon to indicate our support for the President's proposal.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL ARCHIVES

Mr. PRYOR. Mr. President, a measure was recently introduced by the distinguished Senator from Missouri (Mr. EAGLETON) and the distinguished Senator from Maryland (Mr. MATHIAS) to remove the National Archives and Records Service from the General Services Administration and make it independent.

As the ranking minority member of the Governmental Affairs Subcommittee which has jurisdiction over matters affecting the Archives, I commend Senators EAGLETON and MATHIAS for calling the Senate's attention to this important issue.

The Washington Post recently commented on this legislation in an editorial entitled "Free the Archives." In order that my colleagues be more familiar with this matter, I ask unanimous consent that the July 4, 1981, Washington Post editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

FREE THE ARCHIVES

When better than the Fourth of July to urge Congress to restore independent status to the National Archives, keeper of the American documentary legacy? The Archives began as an independent agency in 1943 but found itself vacuumed into the General Services Administration in 1949 as a result of the Hoover Commission's report on government reorganization. Today, General Services still acts as overseer of the National Archives, despite the anomaly (in Sen. Mathias' words) of GSA's having become the "guardian of history as well as the custodian of washrooms, storerooms and workrooms." To remedy this strange state of affairs, Sens. Mathias and Eagleton have just introduced the National Archives and Records Administration Act, which would restore independence to the Archives.

As matters now stand, the public interests itself in conditions at the National Archives mainly on the infrequent occasions that the Archives becomes tarnished by political controversy. For example, the agreement between President Nixon and GSA administrator Arthur Sampson—an agreement arrived at, it should be remembered, without either the awareness or approval of the National Archives staff—brought the roof down on GSA, once Mr. Nixon's questionable deed of gift for his vice-presidential papers and the massive tax deduction it "allowed" became news. Nor was the Archives consulted later when aides in the Ford White House helped GSA draft another agreement, this one with President Nixon then out of office, for the donation of his presidential tapes and papers—one that would have allowed Mr. Nixon to withhold or destroy vital material had the U.S. District Court not enjoined the GSA from allowing that. The Presidential Recordings and Materials Preservation Act of 1974 provided more acceptable procedures for administering the Nixon tapes and papers, and Congress passed the measure because a majority of legislators did not consider GSA capable of dealing with the situation in a dispassionate and nonpolitical manner.

Not every president, of course, will try to exploit GSA's control of the Archives as shamelessly as did Mr. Nixon. Nor will every GSA administrator have the belligerent insensitivity of President Carter's appointee, Adm. Rowland Freeman, whose order to "decentralize" many of the Archives' records to regional repositories, based in part on how frequently they were used, was blocked finally by the White House after scholars protested. Still, the dangers of political abuse remain inherent in the shotgun marriage between GSA and the Archives, and an early divorce—for that and many other reasons—would benefit both parties.

Because of such political hanky-panky, GSA intrusions and pre-Reagan budgetary starvation, the professionals at the Archives had become badly demoralized until appointment last year of the current archivist, Dr. Robert Warner, formerly director of the Ford presidential library. First reports indicate that since Dr. Warner's arrival, both morale and performance levels have risen. Lately, however, there has been a certain amount of lobbying for appointment of a "Reagan" archivist, as if the job should change with each administration. In the past, the post has been impeccably non-political, and it would set a bad precedent if Mr. Reagan did anything but reaffirm his confidence in Dr. Warner.

That and more should be expected from the administration on the matter of preserving the national heritage. The president has displayed on many occasions his awareness of the American historical experience. His speeches alone contain a range of reference that extends from John Winthrop to John Kennedy and from the Founders to FDR. Now Mr. Reagan should commit his administration to prompt passage of this independent archives act. Only then, freed finally of GSA ham-handedness, can the National Archives begin to keep its rendezvous with destiny.

EXTENSION OF THE VOTING RIGHTS ACT

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Alaska State Legislature relating to the extension of the Voting Rights Act.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

LEGISLATIVE RESOLUTION NO. 29

Be it resolved by the legislature of the State of Alaska:

Whereas the key provisions of the 1965 Voting Rights Act will expire August 6, 1982, unless renewed by Congress; and

Whereas the Voting Rights Act is rightly considered the most effective civil rights legislation ever enacted in the United States; and

Whereas the Voting Rights Act has substantially increased the number of individuals voting in state, municipal and national elections; and

Whereas the extension of the Voting Rights Act as the law of the land constitutes the single best assurance to all citizens of the United States that their right to participate in the American political process will be guaranteed; and

Whereas the extension of the Voting Rights Act will allay the fears of many groups that a regression of voting rights may occur if the Act is not extended;

Be it resolved by the Alaska State Legislature that Congress is urged to extend the Voting Rights Act in its present form.

COMMUTER RAIL LINES

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Pennsylvania State Legislature relating to commuter rail lines and the proposed dissolution of Conrail.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION

Whereas, Conrail has announced its intention to discontinue operation of Commuter trains in the five-county area serviced by the Southeastern Pennsylvania Transportation Authority (SEPTA) at the end of August 1981; and

Whereas, One hundred and twenty-four thousand people rely on these commuter lines daily to ride to and from their place of employment; and

Whereas, Alternative forms of transportation would exacerbate traffic congestion and in pollution problems and create additional expenses for commuters; and

Whereas, The discontinuation of these trains would represent a broken commitment to mass transportation in urban and suburban areas as an economical and publicly desirable mode of transportation; and

Whereas, the Reagan administration has indicated that responsibility for the operation of these commuter lines may eventually be given to Amtrak; therefore be it

Resolved, That the Senate of the Commonwealth of Pennsylvania express its support for the continued operation of these commuter rail lines which remain the most viable and efficient form of mass transit; and be it further

Resolved, That the Senate implore Federal, State and local officials to devise and implement a short term solution to keep the rail lines open; and be it further

Resolved, That the Senate memorialize the President and the Congress of the United States to address those conflicts between labor and management that impact on the operation of the commuter rail lines and the proposed dissolution of Conrail; and be it further

Resolved, That a copy of this resolution be transmitted to the President, Speaker of the House of Representatives and President pro tempore of the Senate of the United States Congress, to each Congressman and Senator from Pennsylvania, and to the appropriate State and local officials.

THE 28TH ANNIVERSARY OF KOREAN ARMISTICE

Mr. KENNEDY. Mr. President, 28 years ago today an armistice agreement was signed which brought an end to the Korean war. Four million lives were lost on both sides, as the United Nations Command successfully resisted the Communist attempt to subjugate the Korean Peninsula by force.

A total of 33,629 Americans died so that Koreans could live in freedom. After a half century of struggle against Japan, and almost three decades after the massive death and devastation of the Korean war, the Korean people have succeeded in reconstructing their land. But North has remained cruelly divided from South, sister from brother, parent from child.

On June 27, 1953, the combatants agreed to stop the Korean conflict, "with its great toll of suffering and bloodshed on both sides," and to establish a complete armistice "until a final peaceful settlement is achieved."

Despite frequent violations of the armistice, war has been avoided in Korea since 1953. But progress has not been made toward a final peaceful settlement and the eventual reunification of Korea.

We must never forget that peace and unification remain objectives of fundamental importance to the Korean people, whether they live in the South or the North. These are worthy goals, which the United States and the international community should share.

The search for unification in Korea must be peaceful and by consent of both sides. It must never be permitted to be twisted once again into a fratricidal attempt to impose one system on the other.

Mr. President, I have joined with my colleagues in reaffirming our strong support for the security of the Republic of Korea. I have also joined in seeking to prevent violations of human rights and deprivation of liberties in the South, and even more so in the North—just as such abuses should be prevented wherever they occur in the world.

On this 28th anniversary of the Korean armistice, it is our duty to recall that the brave soldiers of the United Nations command shed their blood in Korea not for war, but for peace; not for dictatorship but for democracy; not for repression but for human rights—and not for violent confrontation, but for a peaceful settlement by consent of free men and women.

Last January 12, South Korean President Chun Doo Hwan proposed that he and North Korean President Kim Il-Sung meet in either South or North Korea anytime, free of any conditions or obligations. On June 5, President Chun expanded his proposal to meet anywhere, inside or outside Korea. In addition, he proposed that each side open its society to the other—

If the situation in North Korea does not permit the prompt and complete opening of their society, I hope that exchanges can begin just in the athletic, cultural, academic, postal and economic fields, with gradual progress made toward all-out exchanges and a complete opening.

I believe that these proposals now make it possible for both the Democratic People's Republic of Korea and the Republic of Korea to agree on constructive steps which they can take by mutual consent. Both South and North should begin a process of direct communication and mutual understanding, as a first and important step toward a peaceful settlement and eventual unification of their nation.

I request that the full text of a speech by President Chun Doo Hwan, at the inauguration on June 5 of the Advisory Council on Peaceful Unification Policy, be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ADDRESS BY PRESIDENT CHUN DOO HWAN, JUNE 5, 1981

Honorable members of the Advisory Council on Peaceful Unification Policy, distinguished guests, and the 60 million fellow Koreans at home and abroad.

We have gathered here today in response to the desire of the entire Korean people to seek the peaceful reunification of the homeland.

Having received the constitutional mandate to unflaggingly pursue the goal of peaceful unification, I hereby announce the inauguration of the Advisory Council on Peaceful Unification Policy, together with the over 8,000 members of the Council, I pledge to make this organization the rallying point for efforts to achieve the peaceful unification of our land.

This Council takes its historic first step forward a full thirty-six years after the division of Korea. Almost before the agony of colonial subjugation was over, the country was partitioned, with numerous families suddenly separated, soon leading to a fratricidal war.

Looking to the past, the Korean nation has maintained an uninterrupted history as a unified independent state for thousands of years in spite of numerous trials and ordeals. The Korean people have jealously preserved a sense of community and cultural homogeneity in the face of repeated invasions and harassments by foreign forces from the northern continent and the southern oceans.

But since the turn of the 20th century our illustrious tradition has been broken twice by national tragedy, although Korea was a unified sovereign entity for so long, we lost our sovereignty in the early 20th century, and in mid-century, just when we had regained sovereignty we were divided. Although the great tragedy of national subjugation has ended, the equal tragedy of national division still continues. The thirty-six year duration of the pain of division has this year exceeded the duration of the sorrow of subjugation. Territorial division is like torture to the whole nation. For all Koreans, whether in the south or in the north, the paramount historic task of our time is to save the nation from the pain and sorrow of division.

We in the south have not even for a fleeting moment forgotten our compatriots in the north, while we sweat and toiled to build the economy in only half of our land. It is our fervent wish that the Seoul-Pusan Expressway will soon be extended to Pyongyang and further the Sinuiju on the Manchurian border. But reality is still far from fantasy. Even the railroad that once linked Seoul and Pyongyang is disconnected, with only weeds growing in the track.

Furthermore, a dialogue that began after so much spadework has been cut off, adding to the heartbreak of all Koreans longing for unification. The south and the north cannot remain strangers in this way: having always been a single entity, we cannot survive for long divided. Our blood bonds, our pride and our history will not tolerate eternal division.

Fellow citizens, as you know, the division of Korea did not occur by the will of the Korean people, but stemmed from a decision taken by outsiders at the conclusion of World War II. But we must realize that even if outside powers were responsible for the division, it is our responsibility to remedy it. We are the ones who suffer the pain of division. We are the ones who will most enjoy the benefits of reunification. Unification is our business and nobody else's. Only the Korean people can be the prime movers of unification. The ideal of unification cannot be borrowed from others but must be rooted in the national spirit that flows in our blood.

Fellow citizens, we have spent so many fruitless years discussing unification formulae. But the path to unification is self-evident, when we accept the fact that the entire people of Korea must be the prime movers. Unification must be achieved in accordance with the free will of the entire people and by peaceful methods. Attempts to decide the issue by force of arms will inevitably lead to a bloody war—a course of national self-destruction which no Korean wants and which can never serve the interests of the people.

But there exists in the northern half of the Korean peninsula a ruling group that persists in a dream of unifying Korea by communizing the entire peninsula. The yearning of the Korean people for unification has not been fulfilled because their dream of unification by military force has not been abandoned. Such a dream runs counter to the reason of civilized men. Moreover, it is totally unrealistic.

War means the destruction of human lives and property and the ravaging of the land. We have already experienced the horrors of war. Should another such war break out now, the achievement, construction and progress out of the debris of war in both South and North Korea over the past thirty years would be wiped out overnight. War among ourselves must be prevented by all means. To prevent war, we must eliminate prejudice, self-righteousness, distrust and miscalculation that are the cause of war.

Once again I urge those advocating unification through communization by force of arms to correctly understand the people's demand for peaceful unification, and abandon their delusions about war. For each of us to grasp accurately the true intentions and real situation of the other is essential to dispelling prejudice, self-righteousness, distrust and miscalculation.

Because of this conviction, I proposed on January 12th an exchange of visits between the highest authorities of South and North Korea. I do not have the slightest doubt that this proposal will provide a breakthrough toward unification. My faith has been further strengthened by the broad domestic and international support and encouragement I received following the announcement of that proposal. It is truly regrettable, however, that the North Korean authorities have yet to make an affirmative response.

On this occasion, I renew my call to President Kim Il-Sung of North Korea to accept my January 12th proposal that we visit each other free of any obligation and without any condition attached. It does not matter whether President Kim visits Seoul first or I visit Pyongyang first. The North Koreans can choose.

Furthermore, I would like to extend the scope of my invitation. Should some unavoidable circumstance prevent President Kim from accepting my proposal or from inviting me to visit North Korea, I suggest that we meet each other at some other place for frank face-to-face talks. I leave the choice of venue to the North Korean authorities. It could be either Panmunjom, or a third country, or any other place convenient to them.

If such a summit meeting is realized, I hope to discuss frankly all questions raised by both sides, including the proposed exchange of visits and both South and North Korea unification formulae. I will leave it to the North Koreans to choose the date for the meetings but the sooner the better.

We have made all the necessary preparations for a dialogue with the North Korean authorities. It is our hope, therefore, that the North Koreans will consult constructively with any person representing the Republic of Korea at any place in the world. One way to deal with the matter would be to work through an authoritative international organization or institution, including the Secretary General of the United Nations. Sixty million fellow Koreans.

I want to emphasize again that all of us—that is, the entire Korean people—must be the prime movers of unification. Unification is a task for the whole nation: it cannot be the exclusive preserve of a specific political party, or a specific political system, or a specific ideology. Nor is it an exclusive concern of the Presidents of South and North Korea.

The proposed summit would be a catalyst fusing the determination of the entire Korean people, as well as a conduit to channel unification efforts. We shall be able to reap the desired fruit when the entire Korean people forge an unflinching determination to achieve unification and when that determination is properly reflected through dialogue.

Accordingly, it is of paramount importance that the 60 million compatriots have a sense of historical mission as the prime movers of unification and the masters of a unified country. All citizens of the Korean nation have the right to determine how unification should be achieved and what system should be adopted for a unified Korea. All Koreans ought to be given ample opportunities to observe, examine, analyze and compare the situations and systems in South and North Korea, if that right is to be exercised judiciously.

An old saying goes: hearing a hundred times is inferior to seeing once. That emphasizes the importance of first-hand observation in understanding and assessment. Unification of our land is an exceeding grave issue on which the glory and prosperity of the entire Korean people is staked. It would be totally unreasonable to even deny the people the opportunity of seeing once. In fact, the oftener one takes a first-hand look, the wiser a decision can be made.

Precisely for that reason, I advocate that both South and North Korean authorities humbly open both Korean societies to the eyes of the entire people who have the right to make decisions concerning unification. If the situation in North Korea does not permit the prompt and complete opening of their society, I hope that exchanges can begin first in the athletic, cultural, academic, postal and economic fields, with gradual

progress made toward allout exchanges and a complete opening.

This would not merely serve to broaden the outlook and thinking of the Korean people regarding unification. The opening of the South and North Korean societies to each other would restore and enhance mutual trust and brotherly love between the two halves. I am confident that this would result in a grand national reconciliation based on a united spirit and determination.

Fellow Koreans, it will be only twenty more years before the end of the 20th century, during which long nights of gloom have shrouded Korean history first with the loss of sovereignty and then with the division of the land.

The national spirit of the 60 million Korean people will never tolerate the great national tragedy being carried into another century. When we bring the tragedy of the 20th century to an end before the century is out and lay plans for the future growth and advance of the whole nation, we will have achieved a great triumph in the history of the nation, we will have achieved a great triumph in the history of the nation and of the world as well.

It is my firm belief that the activities of the members of this Council will be instrumental in speeding the arrival of the day of triumph. I hope you will all devote your full energies to the cause of peaceful unification.

Thank you.

DEDICATION OF THE REMBERT C. DENNIS BUILDING IN COLUMBIA, S.C.

Mr. THURMOND. Mr. President, it is a great pleasure for me to commend the naming of a building in the Columbia, S.C., capital complex after State Senator Rembert C. Dennis of Berkeley County.

I have known this outstanding leader during the many years he has spent serving his State and Nation so well, and I have had the opportunity to see, firsthand, the foresight and effectiveness with which he has performed.

It is especially fitting, too, that the Dennis Building is located next to the L. Marion Gressette Building, named after another distinguished South Carolina legislator and statesman, who is a long-time friend of Senator Dennis.

Senator Gressette, in speaking at the building dedication, emphasized that—

> The legacy of Rembert Dennis won't be passed on just by his name on this building. His legacy is not yet written. The state needs his leadership too much to let him go.

This is so true. Just a glance at some of the awards the influential Berkeley County lawmaker has received is a good indication of his wide range of activities. He is the recipient of tourism, conservation, veterans, and legislative awards. In 1980, he was named Senator of the Year by the Association of Retarded Citizens of South Carolina. The National Guard of South Carolina has honored him with its Legislator of the Year Award. Perhaps one of his most prestigious honors, however, came last year when he was named 1 of 10 outstanding legislators in the United States by the National Assembly of Governmental Employees.

The list of activities Senator Dennis is engaged in reads almost like a novel. He is a lawyer, a family man, a Mason, a Shriner, a Baptist, and a member, since 1944, of the executive committee of the South Carolina Democratic Party. He has also served on the board of trustees of Baptist College in Charleston and Furman University at Greenville, reflecting his continued interest in education.

I commend all of those who launched and completed the project of naming the Rembert Dennis Building. It is highly fitting that this outstanding South Carolina native son be honored in the city where he is serving so effectively as a legislator.

SENATOR PERCY IS A LEADER IN THE FOREIGN POLICY ARENA

Mr. MATHIAS. Mr. President, I have the great privilege and the personal pleasure to serve on that committee of the Senate presided over by the distinguished senior Senator from Illinois, Mr. PERCY. As chairman of the Foreign Relations Committee, Senator PERCY has in the last few months had to take a leading role on a number of difficult and sensitive foreign policy issues. He has done a superb job as chairman and as a leader in the foreign policy arena.

A recent article in the National Journal by Christopher Madison entitled "Percy Tests His Bipartisan Style at the Foreign Relations Committee," examines the early months of the Senate Foreign Relations Committee under Chairman PERCY. I commend it to my colleagues and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PERCY TESTS HIS BIPARTISAN STYLE AT THE FOREIGN RELATIONS COMMITTEE

(By Christopher Madison)

With Charles H. Percy, R-Ill., at the helm, it's been a rough shakedown cruise for the Senate Foreign Relations Committee.

The most obvious problem has been confirming President Reagan's State Department appointees. Although the committee acted swiftly on Secretary of State Alexander M. Haig, Jr. and deputy secretary William P. Clark, many of the other nominees were not confirmed until more than three months into the Administration. Justly or not, Percy, chairman of the committee since January, bore the brunt of the criticism.

It is a post that Percy probably did not expect to occupy. But the Republican takeover of the Senate and the defeat of ranking committee Republican Jacob K. Javits of New York thrust him into the prestigious chairmanship.

Percy, who has been in the Senate since 1967, has been closely identified with foreign policy and international affairs. But he had been out of the Senate spotlight for almost four years, ever since, as ranking Republican on the Governmental Affairs Committee, he helped lead the opposition to Bert Lance, President Carter's Office of Management and Budget director.

The Lance affair turned nasty, with the mild-mannered Percy accused by Democrats of using McCarthy-style tactics and by the White House of using a corporate plane for political purposes. His aides still describe the Lance affair as a "rough" experience.

That entire incident was unusual for Percy, who isn't a flashy, controversy-seeking politican. He has, in fact, made a career out of moderation and avoidance of the rough political edges.

But not all of them. Last December, as he prepared to assume the chairmanship, he was embarrassed by the publication of confidential State Department cables describing his talks with Soviet leaders in Moscow and revealing his controversial views on arms control and the conflict in the Middle East.

Percy's image suffered again when Sen. Jesse A. Helms of North Carolina, the committee's third-ranking Republican, succeeded in delaying some key State Department nominations.

Percy, urged on by Republicans and Democrats on the panel, finally forced a vote on April 28 on a group of the nominees, who cleared the committee without a single negative vote.

That didn't stop the criticism. Several days later, an anonymous White House official was quoted in The Wall Street Journal as saying, "There's a feeling we just can't rely on Chuck Percy."

The judgment expressed in that article and others that Percy is not up to his new job probably was a little premature. Some Senate observers think that Percy's performance has improved and that he is beginning to lead the committee.

They also note with irony that part of his problem in the early going was the *carte blanche* given by the White House to Helms to voice his concern whenever errant moderate Republicanism shows up in potential nominees. This slowed the confirmation process.

Another irony is that soon after the White House attacks, the committee approved a foreign aid bill that gave Reagan most of what he asked for, including repeal of prohibitions on aid to Angola and Pakistan. Some Senate observers called the Percy-led sessions on the bill some of the most efficient they had seen at the committee.

IN THE MIDDLE

Unfortunately for the Administration, Percy's growing confidence coincided with the committee's consideration of the nomination of Ernest W. Lefever as assistant secretary of State for human rights and humanitarian affairs. In pushing through the Haig and Clark nominations, Percy played the role of the President's loyal chairman even though, in Clark's case, he had private doubts about the nomination.

Well before Lefever was formally nominated, Percy again privately, expressed his reservations about the appointment. As the hearings drew near in May, Percy sent word to the Administration that he was uncommitted and would decide how to vote on the basis of Lefever's performance before the committee.

At the hearings, surprisingly, Percy questioned and challenged Lefever aggressively and initiated several exchanges that proved embarrassing to the nominee. By the close of public hearings on May 19, it was obvious that Lefever was in trouble and that Percy would not commit himself to support him.

Though Percy himself appears unconcerned, there is some fear among his aides that the Lefever incident will permanently damage his relations with the White House. On the other hand, Percy's success in getting control of the committee in the past month probably was helped by his independence from Reagan.

This points up a somewhat paradoxical situation. Percy, along with most of the other committee members, is somewhat out of step on foreign policy issues with the rest of the Senate and the Administration as well. To lead the 16 other panel members effectively, he may be better off pursuing a middle-of-the-road course.

But at the same time, observers in the Senate and in the Administration believe that the criticism Percy has drawn from Reagan's aides stems more from this bipartisan approach than from any single incident or event. Nor is this likely to change

much. Throughout his career, Percy has had enemies on the Republican right, a political faction now influential in the Administration, and he has declined to alter his views to win their support.

It is obvious so far that in running the committee, he intends to seek bipartisan support; he firmly believes, as an Administration official put it, that "politics stops at the water's edge." The question is whether the Administration is sincerely interested in a bipartisan foreign policy, and the answer is not available yet.

Another relevant factor in judging Percy's political strength is the committee's own standing. Foreign Relations traditionally is a prestigious panel, in part because of the importance of the issues it deals with and in part because some of the great names in the Senate have used it as a forum.

Its influence probably peaked in the mid-1960s, when J. W. Fulbright, D-Ark., used it to challenge the Johnson Administration on the Vietnam war. Through a series of "educational" hearings—the committee has very little legislative jurisdiction—Fulbright was able to force the public airing of dissenting views on the war.

Since Fulbright's defeat in 1974, the committee has played a less prominent role, and the succeeding chairmen, John W. Sparkman, D-Ala., and Frank Church, D-Idaho, lacked Fulbright's presence and ability. It would be easy for Percy to fall into that mold.

But at least one of his colleagues on the committee believes Percy, realizing that the tradition of the committee is more important than doctrinaire Republican beliefs, will try hard to make something of his tenure as chairman.

"The Percy you see today is different from the man of two weeks ago," said Sen. Paul E. Tsongas, D-Mass. "He's a much stronger person. He's carving out his independence from the Administration."

Tsongas, a freshman who joined the committee last year when Sen. Edmund S. Muskie, D-Maine, resigned to become Secretary of State, is not the only fresh face on Foreign Relations. Although the new committee members have been criticized as lacking stature, it is not inconceivable that the committee could develop a character of its own.

Percy's fellow Republicans are as diverse as the party itself. Helms and S. I. (Sam) Hayakawa of California represent the party's ultra-conservative wing. In the recent Lefever hearings, for example, they were the only ones offering unqualified support for the nominee.

At the other end of the Republican scale is Charles McC. Mathias Jr. of Maryland, a veteran liberal Senator but also a newcomer to the committee. In between are Majority Leader Howard H. Baker Jr. of Tennessee, Richard G. Lugar of Indiana, Nancy Landon Kassebaum of Kansas, Rudy Boschwitz of Minnesota and Larry Pressler of South Dakota.

Any attempts to put together a strong Republican majority on the committee are hampered not only by this diversity but also by the fact that only a few of the Republicans show a sustained interest in the committee's work. Baker, whose duties keep him busy on the Senate floor, participates primarily through his aide, Cranwell G. Montgomery, Helms is chairman of the Agriculture, Nutrition and Forestry Committee and Mathias leads the Rules and Administration Committee.

Absent members can and do vote by proxy. But at a key hearing or work session, the committee sometimes seems to be dominated by the Democrats. The ranking minority member, Claiborne Pell of Rhode Island, is low-keyed, aristocratic and seemingly more interested in lecturing witnesses than leading the Democrats. A committee member described Pell's leadership style as egalitarian. But the result is that the committee's liberal Democrats are free to pursue their own policy goals.

In addition to Tsongas, who is an aggressive, press-conscious young Senator with growing expertise in the problems of developing countries, the committee's Democrats include Alan Cranston of California, an early Vietnam dove; John Glenn of Ohio, who is an expert on nuclear proliferation; and Joseph R. Biden Jr. of Delaware, Christopher J. Dodd of Connecticut and Paul S. Sarbanes of Maryland, three activists who are not shy about defending liberal causes against long odds. Edward Zorinsky, a former Republican, is harder to classify but shares his fellow Democrats' concern about human rights.

FOREIGN AID TEST

Percy, with his moderate views, cool, almost stuffy style and courtly way of conducting committee business, is in the middle of these diverse political views and ambitious personalities.

A Senate staff aide who watches the committee carefully said the Republican leadership, as well as the Administration, probably would like to see Percy exercise more control over the committee. But instead of running the committee along strict partisan lines, Percy is more interested in finding a bipartisan consensus.

This was clear in the committee's first major legislative effort of the session: the $5.8 billion foreign aid bill. The draft bill placed before the committee for amendments carried both Percy's and Pell's sponsorship.

The problem came to a head in late April. The committee had scheduled a meeting on April 27 to discuss the nominations that had not been brought to a vote and, according to one member of the committee, Helms failed to show up. Republicans and Democrats then caucused separately and both groups voiced their support for Percy. The following day, when Helms again failed to show, the nominations were approved unanimously. One Senator suggested Helms had overplayed his hand and lost.

In some ways, this appears to have been a turning point for Percy and the committee. In any event, the chairman seems to have had little trouble since then.

A committee member suggested that Percy's early troubles were caused by his non-confrontational approach. In seeking consensus, he was caught between Helms and Hayakawa on the right and the Democrats on the left. The problem was compounded by the fact that the Democrats were more unified than the Republicans.

According to this Senator, Percy began to succeed when he started dealing with the Democrats as well as the Republicans, as he did during the markup of the foreign aid bill. This also brought praise from Democratic staff director Christianson, who said: "He's been moving things along, doing a good job. He's been working well with us."

In a way, Percy and the Democrats need each other. The divided Republicans don't provide enough of a base for Percy's view or his consensus style, and he must turn to the Democrats for help. The Democrats, in turn, will get a better hearing from Percy than they will on the Senate floor. So it's in their interest to negotiate with him, a committee member said.

AIRING ISSUES

Percy's future problems with the Administration will be slightly different. Unlike most congressional committees, Foreign Relations has relatively few legislative responsibilities and serves more as a forum for issues by holding educational hearings.

Percy said he plans to concentrate on the Soviet Union to "see where they are going, what are their goals that will affect us." He also expects to look at U.S. relations with Canada, Mexico and Japan and relations between the developing and industrialized worlds.

But the Soviet Union—and the status of U.S.-Soviet arms control negotiations—will be the overriding issue, as it is with the Administration's foreign policy makers.

A Senate aide predicted that Percy and the committee will take a broader, more middle-of-the-road approach in this area than the Administration. He said Percy feels strongly that the committee has a major role in helping the Administration shape an over-all response to Soviet challenges. There is a feeling at the committee, he said, that the Administration views the Soviet issue too narrowly as a bipolar relationship rather than one involving U.S. allies as well.

On arms control, Percy believes his role is to keep the momentum going, according to an aide. The committee already has had closed briefings from the Administration on the issue, and Percy has agreed to give Reagan more time to develop a policy before pressing the issue. Eventually, however, he will start to push the Administration publicly.

"They're always a litle more reluctant" on this issue, Percy said in an interview, and they "know that I'm pressing hard." He called "dangerous and wrong" the view held in some quarters of the Administration that the United States should not even try to negotiate an arms control agreement or have anything else to do with the Soviets.

Percy has for years maintained good relations with Anatoly Dobrynin, the Soviet ambassador to the United States, and he clearly sees one of his roles as keeping the lines of communication open between Moscow and Washington.

This attitude got him in trouble with the Administration last December, when confidential cables containing the substance of his discussions with the Soviets were leaked to the New York Times. But he views this incident as only embarrassing and is not likely to be deterred from trying to communicate U.S. views to the Soviets or vice versa.

THE CHAIRMAN'S STYLE

This high-level, very personal diplomacy is an important part of Percy's style—and his substance. He is something of a name dropper who will let you know quickly where he was invited the night before or which world leaders he will see the next day at lunch.

But along with this goes a genuine, deep, even passionate interest in foreign affairs. "He's a deeply interested and concerned internationalist," a committee staff member said.

He will, for example, discuss the problems of nuclear proliferation in India and Pakistan with considerable emotion and even pound his fist for emphasis. But he will also add a personal note about what he told Indian Prime Minister Indira Gandhi on the subject in their private meeting.

A staff aide said Percy has some trouble relating personally to other Senators, perhaps because his colleagues are put off by his millionaire status, Georgetown lifestyle and formal manner.

But the aide added that Percy has a warm and easy-going relationship with his staff and is considered good to work for because he works hard and is considerate. "The courtesies come naturally to him," he said.

Percy's personal relations with the Administration are spotty. Asked whether he was well-acquainted with any of Reagan's key staff members, Percy's aides come up with no one closer than Max L. Friedersdorf, assistant to the President for legislative affairs.

But Percy has much better relations with the State Department. He talks frequently by phone with Haig—as do his aides with Haig's personal staff—and there is said to be some degree of mutual respect.

Percy and the committee staff also work closely and amicably with Richard Fairbanks, assistant secretary for congressional affairs, and his staff. In fact, in the aftermath of the controversy over the delay in the confirmation process, Fairbanks' staff made a point of stating that the delays were not caused by the committee.

The underlying issue on the foreign aid bill was whether to repeat the limits on presidential authority over foreign aid that Congress imposed in the post-Vietnam era.

The Nuclear Non-Proliferation Act, for example, was amended so that countries outside the "nuclear club" would not receive U.S. aid if they tested nuclear devices.

Similarly, there was a ban on U.S. military aid to Angola, enacted after the disclosure that the Ford Administration was covertly supporting a rebel anti-Marxist faction. Another restriction, enacted in 1978, banned military aid to Argentina.

Reagan wanted these restrictions lifted. He also wanted to increase military aid to El Salvador, one of his Administration's early causes, and in general to be given more flexibility in handing out economic and military aid.

For the most part, Percy and the committee complied. But they did so in a bipartisan way, fashioning some remaining restrictions on the aid program to satisfy their own collective concerns. The process, a series of orderly yet free-flowing sessions, was not what might be expected from a Republican-run committee in a Republican Administration, and it may be an early sign of Percy's own style.

Another may be Percy's position on El Salvador. The committee approved an amendment by Dodd that ties increased aid to progress in the human rights and economic reform areas. The only Republican voting against the proposal was Lugar. Helms did not attend the session.

In an interview, Percy explained that his support for Reagan's El Salvador aid package "was conditioned on not relying on just a military solution."

Nor did the committee want to send the wrong signal on Angola. Even some Democrats on the committee were prepared to acknowledge that the Clark Amendment banning aid to that country probably should be repealed. But they did not want to suggest to African nations that the United States was immediately going to supply arms to the anti-Marxist rebels or support similar regimes in the region.

After several hours of complicated maneuvering, a compromise was worked out that would lift the aid ban but also link aid to a presidential finding of progress toward settlement of the conflict in neighboring Namibia. The measure, sponsored by Tsongas, carried, 10–2.

Percy also tried to compromise with the Democrats on the issue of aid to Pakistan, which has been denied because of that country's insistence on testing nuclear devices, even though he had the votes to repeal the restrictions. In fact, the committee was about to vote when Glenn, with whom Percy has worked closely on the non-proliferation issue, suggested another compromise. This led to 20 minutes of negotiations that failed to produce a consensus. So the committee adopted an Administration-backed proposal on a partisan 10–7 vote. But it was a rare display of partisanship.

WHITE HOUSE RELATIONS

It is difficult to tell exactly how the Administration feels about Percy's style. Administration officials interviewed about Percy all noted his interest in a consensus foreign policy and seemed to accept it as something they will have to work with. One official, asked directly whether the Administration sought a bipartisan foreign policy, said, "It depends on what you have to give up to get bipartisan support." The Administration hopes it will be able to agree with Percy on when to stop compromising.

When asked what he thought Reagan's intentions were, Percy said, "I can only believe partisanship is less in foreign policy." He noted that Reagan has picked Democrats for foreign policy posts, including Jeane J. Kirkpatrick as ambassador to the United Nations, and has sought Democratic support for his economic program. "He certainly has reached out from his party. . . . He certainly must be saying something there."

To be fair, it must be stated that Percy presents himself as the Administration's chairman on most issues that come up before the Foreign Relations Committee, although not at the cost of abandoning his commitment to reach bipartisan accommodations. Often during the foreign aid bill negotiations, he urged the committee to give the new Administration a chance to try out its policies. And most of the time, the committee went along.

One issue on which there was considerable misunderstanding between Percy and the Administration was the delay in filling the political slots at the State Department. Percy and his committee staff feel that they have been unfairly maligned; the committee itself didn't hold up any of the nominations, they point out.

In most cases, they argue, there was a long delay between the time Reagan announced an appointment and the formal submission of the nomination to the Senate. Even after that, elaborate and time-consuming procedures established to check possible conflicts in a nominee's background have held up action, and, Percy's staff says, many of the nominees took weeks to complete the committee's questionnaires. The lengthy questionnaire was developed because Percy feels he was "burned" on the Lance nomination.

Only in the case of three nominees did the committee delay a vote because of "political problems," postponing action for one week on confirming Myer Rashish as undersecretary for economic affairs, John H. Holdridge as assistant secretary for East Asian and Pacific affairs and Chester Crocker as assistant secretary for African affairs, because some Senators were out of town and had questions, according to Percy's staff.

But in all the other cases, it was not the committee that caused the delay, aides said. One suggested that there was an "honest misunderstanding" at the White House about how much paperwork was involved.

The State Department officials who must work with Percy try to put some distance between themselves and Percy's critics in the White House and elsewhere. They emphasize, for example, that Helms deals directly with the White House rather than through the State Department and that he "has his own interests" that may differ from the department's.

These officials also emphasize that the White House has few formal dealings with Percy, whose contacts with the Administration are mostly at the State Department. This implies that Percy's White House critics may be motivated by ideological concerns, not problems based on a working relationship.

Despite these efforts to minimize the problems, however, there is no doubt that Percy has his enemies in the Administration, and that the antipathy toward him is based in large part on his divergent foreign policy views—particularly on arms control and the Middle East—and his willingness to work closely with Democrats.

But at the same time, the Administration has made a tentative judgment that he is running the committee better than he did in the beginning. It has not been overlooked, for example, that Reagan got most of what he wanted in the foreign aid bill.

This view, along with the awareness that Percy is the only chairman they have, has led to a White House effort to minimize the criticism.

Soon after the first negative stories appeared, for example, James A. Baker III, the President's chief of staff, met with Percy and his aides to discuss the nomination problems. White House officials then began denying that there was any friction, and Baker called Chicago Sun-Times columnist Irv Kupcinet to issue a vote of confidence in Percy and deny the reported dissatisfaction.

A Senate aide said the White House realized that there had been mistakes on both sides and that relations needed to improve.

There probably will always be some tension, however, particularly if Percy grows more confident in his role and continues to push for arms limitation talks with the Soviets. If the Lefever incident is any guide, tension and conflict may not bother Percy very much.

When he was asked, for example, whether the Lefever dispute would permanently hurt his relations with the White House, Percy replied with a smile that the Administration's "batting average [on nominations] is pretty good. . . . The Senate is part of a separate branch of government. Your loyalties must be to the Senate and the Constitution first, then to the Administration."

ROGER WILKINS ON VOTING RIGHTS: HE KNOWS WHEREOF HE SPEAKS

Mr. MATHIAS. Mr. President, in view of the fact that our colleagues in the other body this week will be considering the bill to extend the Voting Rights Act of 1965, as amended, it seems timely to insert in the RECORD a particular persuasive article on the subject written by Roger Wilkins which appeared in the Washington Star on June 21, 1981. It adds a dimension to Mr. Wilkins' cogent examination of the subject to know that he comes from a family that can testify first-hand to the importance of the protections provided by the Voting Rights Act. I ask unanimous consent that Mr. Wilkins' article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MISSISSIPPI REVISITED: A CASE FOR VOTING RIGHTS

Mississippi. For a black person, that word is like a dagger in the heart. It raises the ugliest fears we have about our country, but for many of us, it is home. Now, this story is not just about Mississippi, but also about the Voting Rights Act of 1965, but it will take a little while to get to the last part, so stay with it.

The plane was gliding west toward Jackson, Mississippi, and the only thing I wanted to do was to read the story in the Atlanta paper that I had picked up at the airport about a black man who some cops said shot himself in the chest while his hands were cuffed behind his back. But there was this guy who wouldn't stop talking to me. He was a white man who described himself as a "redneck" from Mississippi; who hadn't finished high school, but who had learned how to drill oil wells and who was working in the high hills in Argentina, 28 days on and 28 days off, and making a great deal of money.

He was happy to be coming home, so we talked, the redneck and I. We got on well. As his wife, a small, pretty woman in a yellow T-shirt and tight jeans, met him at the gate, I thought how good it would be if

Mississippi white people like that man and Mississippi black people like me could all get on so well. And I also thought about another American, another Mississippi man, who lived a long time ago. His name was Mound Jeffries. Now, I don't know whether Mound Jeffries ever lived even one day as a free man. I do know that some people in South Carolina owned him and that they sold him to a white man in Mississippi. I don't know whether they sold him with his family or whether he even had a family at that point. All I know is that the white man who bought him for his life's labor was named Wilkins and that the white people of the time not only believed that it was proper to own other human beings, but also thought it was proper to stick their names on the people they "own." So that white man made Mound Jeffries a Wilkins and we have carried his name ever since.

My grandpa, William De Witt Wilkins, who was Mound Jeffries' grandson, did something good walking down a road in Holly Springs, Mississippi, one day near the turn of the century. Grandpa was about 20, and as was the custom in that place then, a white man driving a wagon told Grandpa to get off the road.

Now, for some reason, Grandpa didn't feel like getting off the road just then, so the white man hit Grandpa with his horsewhip. Grandpa grabbed the whip and pulled the man off the wagon and beat the stew out of him.

His father, my great grandfather, Asbury Wilkins, must have been something of an accommodationist, because the white folks liked him. So the elders of the town of Holly Springs went to great grandpa and said:

"Uncle Asbury. You're a good nigger, but your boy Willie is crazy. If it wasn't for you we'd have killed him by now and if you don't get him out of town by sundown, we will."

So it came to pass that my father, Earl Wilkins; and his sister, Armeda Wilkins; and his brother, Roy Wilkins, were born in St. Louis, Missouri. Roy, who was the oldest, can remember going back to Mississippi when he was a little boy and seeing his grandmother.

"She had a big scar on her forearm," Uncle Roy told me once. "When she was a little girl, she was a slave and the mistress told her to iron some clothes. And as little girls will, she didn't pay close attention and she burned some of the clothes. And the mistress got angry and put the hot iron on that little girl's arm."

My father and his sister died too young to have very much to do with America's struggles except to be hurt by discrimination. But Uncle Roy went on to work for many years with honor and dignity for the NAACP. Some of that work was dangerous work in Mississippi when they still lynched black people there and he almost got himself killed.

Years later, in 1963, Medgar Evers, the NAACP field secretary for Mississippi, was killed by a white man. My Uncle Roy had cried when Medgar was killed and I knew that he didn't cry very often.

In 1965, I was a 33-year-old GS 17 in the Commerce Department when a group of mounted Alabama Highway Patrolmen waded into a group of freedom marchers on the Edmund Pettis Bridge at Selma and beat some of them to within an inch of their lives. Vice President Hubert H. Humphrey was in charge of a civil rights council in the government and President Johnson told him to convene the council to get its advice on what he should do.

COMMUNIST ISSUE RAISED

In his opening statement in the Indian Treaty Room in the Executive Office Building the vice president told us what the president wanted and made a gratuitious comment about possible communist influences in the Selma movement. I knew that was wrong because I had been to Selma a few weeks earlier. I wondered whether I would have the courage to tell him so.

The Justice Department had been drafting and redrafting a voting rights bill for a long time. Willard W. Wirtz, then secretary of labor, was the first to speak. He said Justice should stop fooling around and should get a bill up to the Hill right away. Nobody else said anything of much consequence and it was getting to be my turn, but I was afraid to cross one of my great political heroes, who happened to be vice president of the United States. Then a clear thought cut across my fear.

"There is no reason for you to be here in this room of power except to say, for poor black people who can't be here, the things they would say for themselves if they had access to this power."

So, when it came my turn, I told the vice president that if he had been to Selma, he would know that people lived such hard lives that no Communist needed to motivate them to rebel against what was happening to them.

Humphrey responded that he hadn't talked about communist influences. His knuckles were white and his face was hard.

"Yes, sir," I said. "You did."

And then I went on to say that I agreed with Secretary Wirtz that we should get a voting rights bill up to the Hill right away and that the president should make it clear that voting rights was only a part of what our administration intended to do to get freedom and justice for people.

A few more people spoke after that and when the contributions were over, the vice president turned to the president's counsel, Lee White, who was there to report to President Johnson, and asked him what he thought.

"Nothing much," Lee said, "except that we probably ought to do what Roger Wilkins said."

And a couple of days after that, President Johnson went up to the well of the House and spoke to the nation and did just that. I am pround of what I had to do with the Voting Rights Act, so when Sen. Strom Thurmond of South Carolina decided we didn't need it anymore or maybe we should just gut it. I decided to go back to Mississippi to see if it were really needed.

HEARING IN JACKSON

The Rev. Jesse Jackson and Rep. John Conyers, D-Mich., were holding a hearing at the Masonic temple on John R. Lynch St. in Jackson. Jesse Jackson had told me before he went to Mississippi about some of the problems black people were having when they tried to exercise the franchise in the South. He said that in Sen. Strom Thurmond's home county in South Carolina, though 70 per cent of voting age population is black, no blacks hold elected offices. He also said that in Sunflower County, Mississippi, there is a requirement that people register twice, once at the county seat and again in their own town. It meant, he said, that some poor black people, who had no cars, had to make a 100-mile round trip to the county seat in order to do the double registration.

Jesse Jackson mentioned three other devices white Mississippians used to dilute the power of the black vote. One was simple gerrymandering and he produced a map of congressional districts that were absolutely ridiculous and which could only have been drawn for the purpose of rigging the vote. He also said that in Jackson and other Mississippi cities, governments were using the tactics of annexing white suburbs to dilute the black vote in the city. Finally, he mentioned the tactic of constructing low income, government subsidized housing for blacks just outside city limits in predominantly white counties so that the black vote was outside the city and could be lost in the county.

The first person I saw when I walked into the auditorium where the hearing was to be held was Charles Evers, the mayor of Fayette, Mississippi, Medgar Evers' older brother. Charles is a big man and when he saw me he came over and grabbed me in a bear hug and I hugged him back. There was memory, love and sorrow in those hugs and Charles asked me:

I said, "Not good. The strokes have hurt him a lot."

Charles looked sad then and I thought about Medgar. Then Charles sat down to testify.

"Whatever I am in Mississippi is due to the Voting Rights Act of '65, and the black vote," he said, "and we still need it. When I ran for the Senate, they moved 17 voting boxes in Jackson so that the black people were confused and didn't know where to vote."

David Jordan, who has been president of the Greenwood, Mississippi, Voters League for 17 years, recalled that in 1963, dogs were put on black people in the Mississippi Delta who wanted to vote.

"There's a lot of blood on the ballot here," he said. "The Voting Rights Act has meant everything to the people in the Delta. The white people cheat, they gerrymander, they defy the law, they do everything to keep black people from voting, but as long as we have the law, we can complain to the Justice Department and we can bring suits to protect our rights."

GERRYMANDERED DISTRICTS

Dr. Les Maclemore, a professor of political science at Jackson State University, who made a close run for Congress in '80, told how congressional districts had been gerrymandered to keep blacks out of Congress and about how fearful many of the black voters he had campaigned among still were. He also said that many rural white farm bosses still told their black workers how to vote and then load them in trucks, take them to the polls and watch them as they vote. Jasper Neely, a city councilman from Grenada, Mississippi, told how the board of elections in his town had jimmied the books to move black voters out of his ward in an effort to prevent his election.

"They even put my wife in another ward and she lives in the same house with me," he said.

Every single witness at that hearing talked eloquently of the need for the continued protections of the Voting Rights Act. Some said that it needed strengthening.

A few days after I got back from Mississippi, I took my daughter, Amy, to visit with Uncle Roy before she goes off on her first real job. I am very proud of Amy. She just graduated from college and she decided on her own to go up to Springfield, Mass., to organize poor black people to help them deal more effectively with their problems.

Uncle Roy is old now and he bends over in his chair. He sees best to his left and Amy sat on the floor holding his hand and kissing his arm. He loves her so. When she would move away, he would put out his left hand, looking for her and she would come back and that fine old man would smile at her and that splendid young woman would smile at him.

Looking at them, loving them, I realized something. Because some white people are so resistant to those changes and some powerful white people dissemble and misuse power so, Uncle Roy believes that we will achieve America's constitutional promises more than I do; and I believe more than Amy does.

That is not a promising trend, so I would say to Senator Thurmond and others who would destroy the Voting Rights Act: Let my people vote or there is apt to be great American sorrow in the time of my grandchildren and also yours.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Armed Services.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON EAST-WEST TRADE—MESSAGE FROM THE PRESIDENT—PM 67

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Finance:

To the Congress of the United States:

In accordance with Section 411(c) of the Trade Act of 1974, as amended (19 U.S.C. 2441), I herewith transmit the report on East-West Trade.

The report discusses United States trade relations with the Soviet Union, the People's Republic of China and the Eastern European countries.

RONALD REAGAN.

THE WHITE HOUSE, *July 27, 1981.*

ANNUAL REPORT OF THE SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION—MESSAGE FROM THE PRESIDENT—PM 68

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Environment and Public Works:

To the Congress of the United States:

Pursuant to the requirements of Section 10 of the Saint Lawrence Seaway Act of May 13, 1954, I hereby transmit the Saint Lawrence Seaway Development Corporation's Annual Report for 1980. The period covered by this report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *July 27, 1981.*

MESSAGES FROM THE HOUSE

At 3:56 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its clerks, announced that the House has passed the following bill, without amendment:

S. 1104. An act to amend the International Investment Survey Act of 1976 to provide an authorization for further appropriations, to avoid unnecessary duplication of certain surveys, and for other purposes.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 4144. An act making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes.

At 6:51 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolutions:

S.J. Res. 28. Joint resolution designating the week beginning March 7, 1982, as "Women's History Week"; and

H.J. Res. 308. Joint resolution making an urgent supplemental appropriation for the Department of Health and Human Services for the fiscal year ending September 30, 1981.

The enrolled joint resolutions were subsequently signed by the President pro tempore (Mr. THURMOND).

HOUSE BILL REFERRED

The following bill was read twice by unanimous consent, and referred as indicated:

H.R. 4144. An act making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes; to the Committee on Appropriations.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1662. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Perishable Agricultural Commodities Act of 1930, as amended, to increase the statutory ceiling on license fees, to remove the limitation on branch fees, and to increase the level of damages claimed which require the opportunity for oral hearing; to the Committee on Agriculture, Nutrition, and Forestry.

EC–1663. A communication from the Deputy Assistant Secretary of the Interior for Indian Affairs, transmitting, pursuant to law, a proposed plan for the use of Seminole Nation of Oklahoma Judgment Funds in Docket 247 before the United States Court of Claims; to the Committee on Appropriations.

EC–1664. A communication from the Chief of the Legislative Division, Office of Legislative Liaison, Department of the Air Force, transmitting, pursuant to law, the Air Force report on experimental, developmental, and research contracts of $50,000 or more, by company, for the period January 1 through June 30, 1981; to the Committee on Armed Services.

EC–1665. A communication from the Secretary of Commerce, transmitting, pursuant to law, the annual report of the Secretary of Commerce for fiscal year 1981; to the Committee on Commerce, Science, and Transportation.

EC–1666. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Consumer Products Advertised to Save Energy—Let The Buyer Beware"; to the Committee on Energy and Natural Resources.

EC–1667. A communication from the Administrator of the General Services Administration, transmitting, pursuant to law, a proposed prospectus for a succeeding lease for space located at 500 Dallas Avenue, Houston, Texas; to the Committee on Environment and Public Works.

EC–1668. A communication from the Administrator of the General Services Administration, transmitting, pursuant to law, reports of building project surveys for (1) Huntsville and Decatur, Alabama, and (2) Florence, Alabama; to the Committee on Environment and Public Works.

EC–1669. A communication from the Assistant Secretary of the Treasury (Legislative Affairs), transmitting, pursuant to law, reports dealing with the adequacy of IMF resources and IMF borrowing from oil exporting countries and the private markets; possible IMF incentives to promote direct "recycling" by oil exporting countries; IMF cooperation with commercial banks; and proposals for a "substitution account" in the IMF; to the Committee on Foreign Relations.

EC–1670. A communication from the Director of the Mission Analysis and Systems Acquisition Division, General Accounting Office, transmitting, pursuant to law, a questionnaire and report on the financial status of major federal acquisitions, September 30, 1980; to the Committee on Governmental Affairs.

EC–1671. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the annual report on Drug Abuse Prevention, Treatment, and Rehabilitation; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–337. A resolution adopted by Washington, D.C. Local 209 of the National Alliance of Postal and Federal Employees, relating to the right of postal employees to select their representative in collective bargaining; to the Committee on Governmental Affairs.

POM–338. A resolution adopted by Washington, D.C. Local 209 of the National Alliance of Postal and Federal Employees, opposing any reduction of the Federal funds received by the Postal Service; to the Committee on Governmental Affairs.

POM–339. A resolution adopted by Washington, D.C. Local 209 of the National Alliance of Postal and Federal Employees, opposing any reductions or cut-backs of cost of living adjustments for retirees who were Federal workers; to the Committee on Governmental Affairs.

POM–340. A resolution adopted by Washington, D.C. Local 209 of the National Alliance of Postal and Federal Employees, opposing any merger between Civil Service Retirement and Social Security Funds; to the Committee on Governmental Affairs.

POM–341. A resolution adopted by Washington, D.C. Local 209 of the National Alliance of Postal and Federal Employees, opposing any reductions in the Postal Program, which aid the less fortunate citizens of our nation; to the Committee on Governmental Affairs.

POM–342. A resolution adopted by Washington, D.C. Local 209 of the National Alliance of Postal and Federal Workers, opposing the contracting out of any work which is being performed by Federal employees; to the Committee on Governmental Affairs.

POM–343. A resolution adopted by Washington, D.C. Local 209 of the National Alliance of Postal and Federal Employees, favoring legislation to make the birthday of Dr. Martin Luther King a national holiday; to the Committee on the Judiciary.

POM–344. A resolution adopted by Washington, D.C. Local 209 of the National Alliance of Postal and Federal Employees, favoring local entities to petition their state legislatures in support of the consti-

tutional amendment granting the District of Columbia voters representation in both Houses of Congress; to the Committee on the Judiciary .

POM-345. A resolution adopted by Washington, D.C. Local 209 of the National Alliance of Postal and Federal Employees, supporting all efforts to oppose the illegal activities of the Klu Klux Klan; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOLE, from the Committee on the Judiciary, without amendment:

S. 1365. A bill to amend the Bankruptcy Act regarding farm produce storage facilities, and for other purposes (Rept. No. 97-168).

By Mr. PERCY, from the Committee on Foreign Relations, without amendment, and with an amendment to the preamble:

S.J. Res. 65. Joint resolution proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union, the whereabouts of Raoul Wallenberg and to secure his return to freedom (with supplemental views) (Rept. No. 97-169).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, with an amendment:

S. 898. A bill to amend the Communications Act of 1934 to provide for improved domestic telecommunications, and for other purposes (with minority views) (Rept. No. 97-170).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

Thomas Patrick Melady, of Connecticut, to be Assistant Secretary for Postsecondary Education, Department of Education;

Donald J. Senese, of Virginia, to be Assistant Secretary for Educational Research and Improvement, Department of Education;

Anne Graham, of Virginia, to be Assistant Secretary for Legislation and Public Affairs, Department of Education;

William E. Mayer, of California, to be Administrator of the Alcohol, Drug Abuse, and Mental Health Administration;

George A. Conn, of Maryland, to be Commissioner of the Rehabilitation Service Administration;

Marie P. Tolliver, of Oklahoma, to be Commissioner of Aging;

Thomas L. Lias of Iowa, to be Assistant Director of the ACTION Agency; and

William M. Otter, of Kentucky, to be Administrator of the Wage and Hour Division, Department of Labor.

(The above nominations were reported from the Committee on Labor and Human Resources with the recommendation that they be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. TSONGAS:

S. 1519. To designate certain national wildlife refuge lands; to the Committee on Energy and National Resources.

By Mr. HEINZ:

S. 1520. A bill for the relief of Edmund Ing-Ming Ko, Ph. D.; to the Committee on the Judiciary.

S. 1521. A bill for the relief of Rosario L. Clarin; to the Committee on the Judiciary.

By Mr. CHILES:

S. 1522. A bill to combat the importation of large amounts of marihuana by increasing the penalties for an offense involving the importation of a quantity of marihuana exceeding 1,000 pounds; to the Committee on Commerce, Science, and Transportation.

By Mr. RIEGLE:

S. 1523. A bill for the relief of Stephen Hassan Abdul; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. TSONGAS:

S. 1519. A bill to designate certain national wildlife refuge lands; to the Committee on Energy and Natural Resources.

DESIGNATION OF CERTAIN NATIONAL WILDLIFE REFUGE LANDS

● Mr. TSONGAS. Mr. President, I am today reintroducing legislation to facilitate the exchange of land between the Department of the Interior and the Charles River Breeding Laboratories of Wilmington, Mass.

This bill is identical to S. 2553 which I introduced last year. The bill (H.R. 6218) was passed last year by the House of Representatives.

The primary purpose of the exchange authorized by this legislation is to make the whole of Raccoon Key in Florida available to the Charles River Laboratories for the purpose of breeding rhesus monkeys for medical and scientific research.

In 1971, Charles River Laboratories initiated a breeding project at Key Lois (formerly Hoggerhead Key) in Monroe County, Fla. The time needed to establish the initial breeding stock and the demand in the research field combined by 1976 to make evident that the space available on Key Lois would be insufficient. Charles River Laboratories purchased a privately owned island of sufficient size and proximity to Key Lois to allow for the economical development of a second monkey colony in the keys. Since the purchase of Raccoon Key, the island has been under contract to the FDA's Bureau of Biologics which is utilizing the animals bred on Raccoon Key in its national polio vaccine testing program.

Unfortunately, Charles River Laboratories was not aware of the fact that some 24.6 acres of Raccoon Key belonged to the Federal Government as part of the Great White Heron National Wildlife Refuge and the Florida Keys Wilderness Area established by Congress. The confusion apparently was caused by the fact that the 24.6 acres had never been in private ownership since the time that Florida became a State. The only time "title" had changed hands was in 1938 when the acreage on Raccoon Key became a part of the Great White Heron National Wildlife Refuge, as did much of the property previously in the public domain and under the general auspices of the State of Florida.

In early 1977, Charles River Laboratories was informed by the Federal refuge manager in Monroe County that the company was making an illegal use of Federal property. After reviewing various parcels suggested by Charles River Laboratories, the Fish and Wildlife Service responded that a privately owned 73-acre piece of land known as North Cudjoe Key would be suitable for an exchange on an equal-value basis in order to allow the Charles River Laboratories to obtain use of the whole of Raccoon Key if the details of an agreement could be worked out that would result in long-term benefits to the wilderness area. Charles River Laboratories purchased North Cudjoe Key in March of 1979.

The agreement reached between the parties, as I understand it, is: First, the Fish and Wildlife Service will transfer title to 24.6 acres of Raccoon Key under its jurisdiction to Charles River Laboratories; second, Charles River Laboratories will transfer title to 24.6 acres of North Cudjoe Key to the Fish and Wildlife Service for inclusion in the Florida Keys Wilderness Area; third, the Fish and Wildlife Service will purchase the balance of 48.4 acres of the North Cudjoe Key from Charles River Laboratories and include it also in the Florida Keys Wilderness Area; and fourth, Charles River Laboratories will convey title to the whole of Raccoon Key (approximately 203 acres) to the Fish and Wildlife Service for inclusion in the Florida Keys Wilderness Area at some point in the future when the corporation determines that the Key is no longer suited for simian breeding. Thus the Fish and Wildlife Service will immediately realize the benefits of the inclusion of 73 acres of North Cudjoe Key in the wilderness area and will eventually realize the donation of 200-plus acres of Raccoon Key for inclusion in the same system.

Mr. President, I believe that this legislation reflects a very responsible agreement and one which is beneficial to the wilderness system. I hope the Energy Committee and the Senate can consider this legislation promptly.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1519

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) That certain lands known as North Cudjoe Key, Monroe County, Florida, which comprise approximately seventy-three acres, will be designated for purposes of the Wilderness Act (16 U.S.C. 1131-1136) as wilderness at the time those lands are included in the National Wildlife Refuge System, and shall become part of the existing "Florida Keys Wilderness".

SEC. 2. That notwithstanding any other provision of law, on the date that certain

lands referred to as Raccoon Key, Florida, comprising approximately twenty-five acres, and depicted on a map entitled "Florida Keys Wilderness and Great White Heron National Wildlife Refuge (West Part)" dated July 1975, are excluded from the National Wildlife Refuge System, they shall be excluded from the National Wilderness Preservation System.

SEC. 3. As soon as practical after this Act takes effect, the Secretary of the Interior shall file a map and legal description of the Florida Keys Wilderness with the Committee on Energy and Natural Resources of the Senate and the Interior and Insular Affairs Committee of the House of Representatives and such map and description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal description and map may be made. A map and legal description of the Florida Keys Wilderness shall be on file and available for public inspection in the Office of the Director, Fish and Wildlife Service, Department of the Interior.

SEC. 4. The lands designated by this Act as the Florida Keys Wilderness shall be administered in accordance with the applicable provisions of the Wilderness Act governing areas designated by that Act as wilderness areas, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act and, where appropriate, any reference to the Secretary of Agriculture shall be deemed to be a reference to the Secretary of the Interior.●

By Mr. CHILES:

S. 1522. A bill to combat the importation of large amounts of marihuana by increasing the penalties for an offense involving the importation of a quantity of marihuana exceeding 1,000 pounds; to the Committee on Commerce, Science, and Transportation.

INCREASING PENALTIES FOR IMPORTATION OF LARGE QUANTITIES OF MARIHUANA

● Mr. CHILES. Mr. President, today I am introducing S. 1522, a bill to increase penalties for large-scale marihuana traffickers.

Until last year, the Federal criminal statutes did not distinguish between small marihuana dealers who sell an ounce on the street corner and the well-financed, highly organized traffickers who deal in tons of marihuana. Until then, the penalty for individuals convicted of marihuana trafficking was a maximum of 5 years in prison and/or a $15,000 fine, regardless of the amount involved. For persons involved in smuggling boatloads of marihuana, this small penalty was hardly likely to make would-be smugglers think twice about the possible consequences of their actions.

Last year, however, Congress adopted, and the President signed into law, an amendment which I offered that increases the penalties for persons convicted of dealing in more than 1,000 pounds of marihuana. That amendment to the Controlled Substances Act raised the penalties for bigtime dealers to a 15-year jail term and/or a $125,000 fine; for repeat offenders, the penalties are doubled to 30 years in jail and/or a $250,000 fine. Unfortunately, Congress did not extend these tough new penalties to those big marihuana smugglers who are apprehended at sea. When the High Seas Seizures Act (Public Law 96-350) was passed by Congress last year, the old, soft penalty provisions were inadvertently retained; the tough, new penalties were not adopted.

The legislation I am proposing today is a necessary second step in creating strong deterrents against large-scale marihuana trafficking. What this legislation does is to extend the tough penalties for big time marihuana dealers to smugglers who are caught on the high seas.

Mr. President, Peter Bensiger, the outgoing head of the Drug Enforcement Administration, singled out marihuana as the primary drug problem in the United States today. Indeed, between 1971 and 1977, use of marihuana by teenagers increased by over 100 percent; for persons between the age of 18 and 25, marihuana use increased by 50 percent. The National Institute on Drug Abuse recently estimated that there are 26.6 million marihuana users in the United States today. In light of the mounting evidence that marihuana is far from a harmless substance, these are alarming statistics. They argue for more vigorous law enforcement, and most certainly stronger measures against those who make marihuana trafficking their business.

The narcotics intelligence estimate sets out the smuggling and distribution patterns for marihuana coming into the United States. The picture it reveals underscores just how important it is to strengthen penalties for marihuana traffickers who are apprehended at sea. Fully 75 percent of this Nation's marihuana supply comes from Colombia, and another 11 percent comes from Mexico. The vast majority of that is smuggled in on ships which come north through the Caribbean and unload their cargo on Florida's shores. In fact, it is now estimated that 70 percent of all the marihuana that flows into this country—as much as 7,000 metric tons a year—comes through Florida. The smugglers who bring it in are bigtime operators: They have the boats, the planes, and the modern communications which has enabled them to slip through undetected by our beleaguered local law enforcement officials. It is no longer surprising to hear that drug smuggling and dealing has become a major enterprise in Florida, with revenues estimated at between $7 and $10 billion a year. This is a far cry from the street corner dealer, or from the young person who tries to sneak an ounce or two of marihuana through Customs on the way home from a trip overseas.

Yet, under current law, the large-scale operator who is apprehended at sea with thousands of pounds of marihuana is subject to the same penalties as that young person. That simply does not make sense. If we are serious about trying to break up these smuggling rings, then we need to have strong penalties on the books. We need penalties which will deter would-be smugglers and which will insure that those who are brought to justice will serve a sentence commensurate with the serious nature of the crime they committed.

The Federal Government can and must play a greater role in stemming the flow of marihuana and other illegal drugs in this country. We are not doing that good a job now, but at least we have started down the road to turning this situation around. Congress is on the verge of approving a law that will enable the military to become involved in the war on drug smuggling by allowing them to pass on radar sightings and other information as to the whereabouts of smugglers' boats and planes to local law enforcement officials. We are getting the Coast Guard more involved in intercepting drugs on the high seas. We have earmarked $300 million in additional funds for the Coast Guard to be used to modernize its fleet and to get more aircraft to track down smugglers. That is important, because we need to have the resources in place to intercept the drugs before they reach our shores.

But more than additional resources are needed to stop the large-scale marihuana smugglers. We also need to have tough sentences in place, so that smugglers know that if they are caught, they will face long prison terms. We already took the first step toward establishing those strong sentences last year, when we increased the sentences for those convicted of trafficking more than 1,000 pounds of marihuana.

It is now time to take the next step, and to increase penalties for those who are caught on the high seas. A person who is trafficking thousands of pounds of marihuana should not be able to get off with a light sentence simply because he was arrested at sea, and not on the land. We can rectify this situation, and move ahead quickly to create the effective deterrents we need in order to win the war against drug traffickers.

Mr. President, I ask unanimous consent that the text of S. 1522 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1522

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (g) of the first section of the Act entitled "An Act to facilitate increased enforcement by the Coast Guard of laws relating to the importation of controlled substances, and for other purposes", approved September 15, 1980 (Public Law 96-350) is amended by adding at the end thereof the following new paragraph:

"(3)(A) Notwithstanding paragraphs (1) and (2) of this subsection, any person convicted of an offense under this Act involving a quantity of marihuana exceeding 1,000 pounds, shall be sentenced to a term of not more than 15 years or fined not more than $125,000, or both.

"(B) Any person who violates subparagraph (A) who has been previously convicted of an offense punishable under section 401(b)(1)(A) or other provision of title I or title III of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 841(b)(1)(A)), for a felony under any other law of the United States relating to narcotic drugs, marihuana, or depressant or stimulant substances, shall be sentenced to a term of imprisonment of not more than 30 years or fined not more than $250,000, or both.".●

ADDITIONAL COSPONSORS

S. 408

At the request of Mr. CHAFEE, the Senator from Georgia (Mr. MATTINGLY) was added as a cosponsor of S. 408, a bill to amend the Internal Revenue Code of 1954 with respect to the income tax treatment of earned income of citizens or residents of the United States earned abroad; and for other purposes.

S. 708

At the request of Mr. CHAFEE, the Senator from Iowa (Mr. JEPSEN) was added as a cosponsor of S. 708, a bill to amend and clarify the Foreign Corrupt Practices Act of 1977.

S. 719

At the request of Mr. PRYOR, the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 719, a bill to amend section 3109 of title 5, United States Code, to clarify the authority for appointment and compensation of experts and consultants, to provide statutory guidelines concerning the award of contracts for the procurement of consulting services, management and professional services, and for other purposes.

S. 732

At the request of Mr. NUNN, the Senator from Georgia (Mr. MATTINGLY), the Senator from Nebraska (Mr. ZORINSKY), and the Senator from Missouri (Mr. DANFORTH) were added as cosponsors of S. 732, a bill to insure the confidentiality of information filed by individual taxpayers with the Internal Revenue Service pursuant to the Internal Revenue Code and, at the same time, to insure the effective enforcement of Federal and State criminal laws and the effective administration of justice.

S. 777

At the request of Mr. TOWER, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 777, a bill to amend the Federal Water Pollution Control Act to restrict the jurisdiction of the United States over the discharge of dredged or fill material to those discharges which are into navigable waters, and for other purposes.

S. 811

At the request of Mr. DOLE, the Senator from New York (Mr. D'AMATO) was added as a cosponsor of S. 811, a bill to amend the Powerplant and Industrial Fuel Use Act of 1978 to permit local distribution companies to continue natural gas service to residential customers for outdoor lighting fixtures for which natural gas was provided on the date of enactment of such act; and for other purposes.

S. 857

At the request of Mr. TOWER, the Senator from Montana (Mr. BAUCUS) was added as a cosponsor of S. 857, a bill to impose quantitative restrictions on the importation of lamb meat.

S. 895

At the request of Mr. MATHIAS, the Senator from Arizona (Mr. DECONCINI) and the Senator from Minnesota (Mr. DURENBERGER) were added as cosponsors of S. 895, a bill to amend the Voting Rights Act of 1965 to extend certain provisions for an additional 10 years, to extend certain other provisions for an additional 7 years, and for other purposes.

S. 966

At the request of Mr. SASSER, the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 966, a bill to amend chapter 13 of title 18 of the United States Code.

S. 1091

At the request of Mr. ZORINSKY, the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 1091, a bill to provide an entitlement for educational institutions for the reimbursement of the reasonable costs incurred in responding to compliance reviews conducted by the Office for Civil Rights of the Department of Education, and for other purposes.

S. 1326

At the request of Mr. SASSER, the Senator from Idaho (Mr. MCCLURE) and the Senator from Nevada (Mr. CANNON) were added as cosponsors of S. 1326, a bill to amend title 38, United States Code, to authorize a service pension of up to $150 per month for veterans of World War I and for certain surviving spouses and dependent children of such veterans.

S. 1351

At the request of Mr. SYMMS, the Senator from Washington (Mr. JACKSON) and the Senator from Washington (Mr. GORTON) were added as cosponsors of S. 1351, a bill to amend section 164 of the Water Resources Development Act of 1976.

S. 1373

At the request of Mr. DECONCINI, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 1373, a bill to authorize the President to call a White House Conference on Veterans.

S. 1394

At the request of Mr. DECONCINI, the Senator from Washington (Mr. JACKSON) was added as a cosponsor of S. 1394, a bill to improve the ability of the Secret Service to protect the President and other designated protectees.

SENATE JOINT RESOLUTION 65

At the request of Mr. THURMOND, his name was added as a cosponsor of Senate Joint Resolution 65, a joint resolution proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom.

SENATE CONCURRENT RESOLUTION 21

At the request of Mr. THURMOND, the Senator from Utah (Mr. GARN) was added as a cosponsor of Senate Concurrent Resolution 21, a concurrent resolution expressing the sense of the Congress on the Baltic States question.

SENATE RESOLUTION 194

At the request of Mr. PRYOR, the Senator from Arkansas (Mr. BUMPERS) was added as a cosponsor of Senate Resolution 194, a resolution relative to "sense-of-the-Senate resolutions."

AMENDMENT NO. 110

At the request of Mr. CHILES, the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of amendment No. 110 intended to be proposed to S. 951, a bill to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1982, and for other purposes.

AMENDMENT NO. 492

At the request of Mr. NUNN, the Senator from Maine (Mr. COHEN), the Senator from Texas (Mr. BENTSEN), the Senator from New Mexico (Mr. DOMENICI), the Senator from Louisiana (Mr. LONG), the Senator from Delaware (Mr. ROTH), the Senator from New Hampshire (Mr. RUDMAN), the Senator from Washington (Mr. JACKSON), the Senator from New Mexico (Mr. SCHMITT), the Senator from Oklahoma (Mr. BOREN), the Senator from Arkansas (Mr. PRYOR), the Senator from Louisiana (Mr. JOHNSTON), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Nebraska (Mr. EXON), the Senator from Mississippi (Mr. STENNIS), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Georgia (Mr. MATTINGLY), and the Senator from Arizona (Mr. DECONCINI) were added as cosponsors of amendment No. 492 proposed to House Joint Resolution 266, a bill to provide for a temporary increase in the public debt limit.

AMENDMENT NO. 521

At the request of Mr. KENNEDY, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of amendment No. 521 proposed to House Joint Resolution 266, a bill to provide for a temporary increase in the public debt limit.

At the request of Mr. MITCHELL, his name was added as a cosponsor of amendment No. 521 proposed to House Joint Resolution 266, supra.

At the request of Mr. DODD, his name was added as a cosponsor of amendment No. 521 proposed to House Joint Resolution 266, supra.

AMENDMENT NO. 522

At the request of Mr. EXON, the Senator from Oklahoma (Mr. BOREN) was added as a cosponsor of amendment No. 522 proposed to House Joint Resolution 266, a bill to provide for a temporary increase in the public debt limit.

AMENDMENTS SUBMITTED FOR PRINTING

FARM PRODUCE STORAGE FACILITIES

AMENDMENT NO. 523

(Ordered to be printed and to lie on the table.)

Mr. DOLE submitted an amendment intended to be proposed by him to the bill (S. 1365) to amend the Bankruptcy Act regarding farm produce storage facilities, and for other purposes.

CLARIFICATION OF CERTAIN AMBIGUITIES

● Mr. DOLE. Mr. President, today the Senator from Kansas is pleased to file with the Senate the Judiciary Committee report on S. 1365, his bill providing

for expedited abandonment procedures in farm produce storage facility bankruptcies. Accompanying the report, the Senator from Kansas is also filing today with the Senate an amendment which is designed to address two points of concern which were raised after the Judiciary Committee vote ordering the bill reported favorably which was taken on June 25, 1981.

After the committee vote, the views of the administration were received by letter from Secretary Block of the Department of Agriculture. The text of Secretary Block's letter is reprinted in the committee report. Secretary Block affirmed the Department's position endorsing passage of the bill, with two reservations.

The first involved the question of what law should be applied to the determination of the status of warehouse receipts and scale tickets as evidence of ownership of grain assets; and this issue has been dealt with in the comment accompanying the sectional analysis of the bill which is contained in the report. In sum, that comment makes clear the intent of the committee that the question of whether or not a storage facility receipt—as defined in the bill—is held by a party as evidence of ownership of farm produce is to be resolved by reference to State or Federal law—whichever is applicable—usages of trade, and the nature of the contract between the parties.

The second matter raised by the Department—which is addressed in the amendment being filed by the Senator from Kansas—concerns an ambiguous cross-referencing cite contained in the bill. The amendment offered today corrects that ambiguity.

Mr. President, the other problem addressed in the amendment is one about which the Senator from Kansas has been concerned from the first day hearings were commenced before the Judiciary Committee's Subcommittee on the Courts on the problem of produce storage facility bankruptcies. That concern is the Senator from Kansas' desire that his bill not be viewed as "class legislation" designed to benefit the farmer at the expense of other creditors in bankruptcy. The heart of this bill is the provisions which establish an expedited procedure to govern abandonment of farm produce which is either stored in a crop elevator on a bailment contract, or which is secured to the extent of its market value. The bill also creates a new priority for farm producers who—even after distribution of the proceeds of farm produce liquidated by the trustee under the bill—nevertheless suffer a loss due to a shortage of grain in the bankrupt elevator.

The bill as written, however does not contain any dollar or time limitation upon that priority, unlike other priorities for unsecured creditors under section 507 of the Bankruptcy Code. To correct this imbalance, the amendment being offered by the Senator from Kansas today places a 1-year/$5,000 limitation upon that priority, thus affording greater equity between farm producers and other creditors in the bankruptcy proceedings.

Mr. President, with the changes incorporated in the committee amendment, the Senator from Kansas believes that S. 1365 provides a sound, well reasoned and fair solution to the problem posed by elevator insolvencies for farm producers. The Senator from Kansas urges the adoption of the amendment and passage of the bill, as amended, by the full Senate.●

NOTICES OF HEARINGS

COMMITTEE ON THE BUDGET

Mr. DOMENICI. Mr. President, the hearings scheduled by the Senate Budget Committee for Tuesday and Wednesday, July 28 and 29, at 10 a.m. in room 6202 of the Dirksen Senate Office Building have been canceled. Witnesses to appear were David Stockman and Alice Rivlin.

SUBCOMMITTEE ON LABOR

Mr. NICKLES. This is to inform the general public that the Labor Subcommittee, of the Committee on Labor and Human Resources, has canceled the hearing scheduled in Moab, Utah, on August 12, 1981, regarding S. 1423, a bill to revise provisions of the Federal Mine Safety and Health Act of 1977, and for other purposes.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, as chairman of the Senate Committee on Agriculture, Nutrition, and Forestry, I wish to announce that nomination hearings have been scheduled on Charles Shuman and Harold Hunter for positions at the U.S. Department of Agriculture. Mr. Shuman has been nominated to be Administrator of the Farmers Home Administration, and Mr. Hunter to be Administrator of the Rural Electrification Administration.

The hearing will be held on Wednesday, July 29, beginning at 9:30 a.m. in room 324, Russell Building.

Anyone wishing further information should contact Denise Alexander of the Agriculture Committee staff at 224–0014.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Monday, July 27, to hold confirmation hearings on the following nominations:

Julia Chang Bloch, of the District of Columbia, to be Assistant Administrator, Bureau for Food for Peace and Voluntary Assistance, AID;

Elise R. W. du Pont, of Delaware, to be Assistant Administrator for Private Enterprise, AID;

Jay F. Morris, of Maryland, to be Assistant Administrator for External Relations, AID;

W. Antoinette Ford, of Michigan, to be Assistant Administrator, Bureau for Near East, AID;

Jon D. Holstine, of Virginia, to be Assistant Administrator, Bureau for Asia, AID;

Francis Stephen Ruddy, of Texas, to be Assistant Administrator, Bureau for Africa, AID;

Jose M. Casanova, of Florida, to be Executive Director of the Inter-American Development Bank for a term of 3 years;

Abraham Katz, of Florida, to be U.S. Representative to Organization for Economic Cooperation and Development, with the rank of Ambassador; and

Frederick L. Chapin to be Ambassador to Guatemala; and

To receive testimony from Richard N Perle, Assistant Secretary-designate for International Security Policy, and hear Philip Habib discuss the Israeli-Lebanon border issue.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, July 28, to hold a business meeting to vote on pending nominations and to hear testimony on conventional arms sales.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Tuesday, July 28, at 9 a.m., to receive a preliminary report on the status of the William Casey inquiry.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommitte on Intergovernmental Affairs be authorized to meet during the session of the Senate on Tuesday, July 28, to hold oversight hearings on alternative service delivery.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

PRODUCTIVITY, R. & D., AND SAVINGS

● Mr. BENTSEN. Mr. President, I believe both the Congress and the administration are united in their belief that declining productivity is at the heart of our sluggish economic performance over the past decade. Other factors, such as the rise in OPEC oil prices, have magnified the economic impact of our productivity collapse. But these external events could have been absorbed and their debilitating effects reduced had we enjoyed rising productivity and the beneficial impact that bestows on any economy: robust real growth, stable prices, rising savings and investment, and falling unemployment.

Many factors influence productivity growth. Government redtape and poorly drawn regulations sap managerial and financial resources, diverting then from productivity-enhancing tasks. A growing labor force has the same impact as training costs soar to convert unskilled employees to skilled ones. The need to train and equip new workers reveals the most fundamental factors influencing productivity: the rate of capital investment and of R. & D. activity supporting

that investment. Despite the growing and welcome focus here on the role of labor/management practices in raising productivity, the role of investment and savings remains paramount, I believe.

Productivity gains are won through improvements in the experience of workers and their capability to apply new techniques and technology to the workplace. Fundamental to this process is the availability of resources, especially capital, needed to increase such experience and capabilities. Consequently, the rates of savings and investments and the amount of capital formation are all indicators of a nation's capability to increase productivity. And the poor productivity performance of the United States can be read in the gloomy statistics on these key indicators.

In the past decade, our country has had the lowest rates of both personal savings and private, nonmilitary investment of all industrialized nations. For example, growth of the capital-labor ratio, the amount of plant and equipment per worker, in the United States has fallen from an average annual increase of 3.30 percent between 1948 and 1958 to an increase of only 1.28 percent during the years 1970 to 1979. The ratio has actually fallen every year since 1976. Mr. President, I ask that a table entitled, "The Capital-Labor Ratio, 1947–1979," to be printed in the RECORD.

The table follows:

TABLE I.—THE CAPITAL-LABOR RATIO: 1947–79
[1972=1.00000]

Year	Capital-labor ratio [1]	Rate of change
1947	0.50337	
1948	.53022	5.33
1949	.55375	4.44
1950	.57361	3.59
1951	.58463	1.92
1952	.60131	2.85
1953	.61013	1.47
1954	.64062	5.00
1955	.63930	−.21
1956	.65062	1.77
1957	.67807	4.22
1958	.71797	5.88
1959	.70843	−1.33
1960	.72451	2.27
1961	.75066	3.61
1962	.76186	1.49
1963	.78316	2.80
1964	.80107	2.29
1965	.81727	2.02
1966	.84517	3.41
1967	.88358	4.55
1968	.90555	2.49
1969	.92168	1.78
1970	.96642	4.85
1971	.99870	3.34
1972	1.00000	.13
1973	1.00562	.56
1974	1.03146	2.57
1975	1.08788	5.47
1976	1.07754	−.95
1977	1.06216	−1.43
1978	1.04711	−1.42
1979	1.04411	−.29
1948–58		3.30
1959–69		2.31
1970–79		1.28

[1] Private business sector net capital stock data.

Source: Bureau of Labor Statistics, U.S. Department of Labor.

Mr. BENTSEN. The decline in our capital-labor ratio reflects the failure of growth in investment to keep pace with labor force growth. While labor force size and participation has risen since 1974 at a high rate—hours worked has risen an average 2.8 percent annually since then, for example—the growth in net capital investment has sagged. Since 1974, net capital nonresidential investment averaged an increase of 3 percent annually, versus 4.1 percent for the previous 4 years. For the entire decade of the 1970's, it grew an average 3.6 percent, well below the 4.5 percent and 4.4 percent attained in the previous two decades.

Mr. President, I ask that a table entitled, "Growth Rate of the Real Net Capital Stock: 1948–1979," be printed in the RECORD.

The table follows:

TABLE II.—GROWTH RATE OF THE REAL NET CAPITAL STOCK: 1948–79

[Net stock of fixed nonresidential private capital in 1972 dollars]

Year	Growth rate	Year	Growth rate	Year	Growth rate
1948	8.0	1959	2.8	1970	4.2
1949	4.5	1960	3.2	1971	3.3
1950	5.0	1961	2.8	1972	3.9
1951	5.0	1962	3.5	1973	5.2
1952	3.9	1963	3.5	1974	4.3
1953	4.3	1964	4.4	1975	2.1
1954	3.4	1965	6.0	1976	2.2
1955	4.3	1966	6.7	1977	3.1
1956	4.5	1967	5.4	1978	3.7
1957	4.1	1968	5.1	1979	4.0
1958	2.3	1969	5.4		
1948–59	4.5	1959–69	4.4	1970–79	3.6

Source: U.S. Department of Commerce, Survey of Current Business, February 1981.

Mr. BENTSEN. Mr. President, research and development spending also influences productivity by raising capital efficiency and labor proficiency. Its stagnation in the United States must bear part of the responsibility for our lagging productivity growth. Federal nondefense and private R. & D. spending has remained at about 1.5 percent of GNP since the late 1960's. This trend brought to a halt the sharp rise in such R. &. D. spending which saw its share of GNP double from 1953 to 1967. It takes a number of years for the full impact of R. & D. spending to be reflected in productivity numbers. Yet, the stagnation of R. &. D. spending as a share of GNP began to influence our productivity growth rate many years ago, with the debilitating impact growing especially strong in recent years.

Mr. President, I ask that a table, entitled, "U.S. Spending on Research and Development: 1953–1979," be printed in the RECORD.

The table follows:

TABLE III.—U.S. SPENDING ON RESEARCH AND DEVELOPMENT: 1953–79

[As a percent of GNP]

Year	Total civilian, defense, and Federal nondefense	Total civilian	Industry	Federal nondefense	Universities and others
1953	1.40	0.72	0.61	0.07	0.04
1954	1.54	.77	.64	.09	.04
1955	1.55	.78	.63	.12	.03
1956	1.99	1.00	.79	.16	.05
1957	2.20	1.00	.78	.18	.04
1958	2.39	1.10	.83	.22	.05
1959	2.54	1.09	.84	.20	.05
1960	2.67	1.21	.89	.27	.05
1961	2.74	1.22	.91	.25	.06
1962	2.73	1.22	.91	.25	.06
1963	2.87	1.30	.92	.31	.07
1964	2.97	1.30	.93	.30	.07
1965	2.91	1.34	.95	.32	.07
1966	2.90	1.42	.97	.38	.07
1967	2.91	1.48	1.02	.39	.07
1968	2.83	1.50	1.04	.39	.07
1969	2.74	1.51	1.07	.36	.08
1970	2.64	1.52	1.06	.37	.09
1971	2.50	1.48	1.02	.38	.08
1972	2.43	1.44	1.00	.36	.08
1973	2.34	1.44	1.02	.35	.07
1974	2.32	1.50	1.05	.37	.08
1975	2.30	1.50	1.03	.39	.08
1976	2.28	1.51	1.05	.38	.08
1977	2.26	1.50	1.04	.39	.07
1978	2.27	1.52	1.05	.38	.09
1979	2.29	1.54	1.08	.38	.08

Mr. BENTSEN. The time horizon or, indeed, even the explicit impact of R. & D. spending on productivity is not known with precision. We do know, however, that we are being out-researched by the two nations who have scored the highest productivity gains over the past decade. Both Germany and Japan devote almost a third larger share of their GNP to nondefense R. & D. than we do. That disparity has not always existed. Until the late 1960's, we kept pace with them, as noted in the following table, entitled, "Civilian and Federal Nondefense Research and Development Spending: 1961–1976." I ask unanimous consent for this table to appear as table IV in my remarks at this point.

Mr. President, my point in presenting these data on investment and R. & D. trends is to emphasize the need to encourage savings, investment, and R. & D. in the tax bill before the Senate, and also in the bill before the House Ways and Means Committee. The Finance Committee gave priority attention to these issues in recommending reduced personal tax rates on investment income, in rationalizing depreciation schedules, and in providing a targeted investment credit for some types of R. & D. spending by private firms. And it was to the full Senate's credit that it has agreed to

these steps while adding a carefully targeted savings incentive with a link to the hard-pressed housing sector. The House Ways and Means Committee is seeking to craft effective savings, investment, and R. & D. incentives, as well. So the indications are good that the tax bill before us will become a landmark law, marking the beginning of a national resurgence in investment, R. & D., and productivity. That resurgence is long overdue. And it is a resurgence that the entire Congress can view as a major accomplishment.

TABLE IV.—CIVILIAN AND FEDERAL NONDEFENSE RESEARCH AND DEVELOPMENT SPENDING: 1961–76

[As a percent of GNP]

Year	United States	West Germany	Japan
1961	1.22	NA	1.37
1962	1.22	1.14	1.46

A TRIBUTE TO DR. THOMAS F. JONES

● Mr. THURMOND. Mr. President, it was with a deep sense of personal loss that I learned of the death last week of Dr. Thomas F. Jones, a respected South Carolina educator who served ably as president of the University of South Carolina from 1962 to 1974.

I join the entire South Carolina academic community in expressing sadness over the death of this fine man. I must also express admiration, too, for his deep and abiding faith in God as he struggled with a long battle against cancer.

Dr. Jones was a popular figure among University of South Carolina students through the years. He was an effective administrator over both students and faculty and he also served as a patient listener to faculty and student desires. He had outstanding credentials—and one high point of his university presidential tenure was his success in helping to raise faculty salaries and upgrading the quality of the faculty in general. Furthermore, it was highly significant that Dr. Jones was awarded honorary doctorates from Purdue University, The Citadel, and the University of South Carolina at Spartanburg.

It also may be noted that the University of South Carolina student enrollment and physical plant grew tremendously under his leadership.

In conclusion, I extend heartfelt condolences to his lovely and devoted wife Mary and their five children.

A recent editorial in the Columbia, S.C., State, as well as a recent news story in the same newspaper, expresses many of my sentiments regarding Dr. Jones. Additionally, a news release from the Massachusetts Institute of Technology at Cambridge, Mass., is included.

Mr. President, in order to share these excellent articles with my colleagues, I ask that the articles appear in the RECORD at the conclusion of my remarks.

The articles follow:

SOFT-SPOKEN ADMINISTRATOR RECALLED

Former University of South Carolina President Thomas F. Jones was remembered by friends and colleagues Wednesday as a soft-spoken administrator who kept a firm hand on the school's rudder during some turbulent times.

"I always thought Dr. Jones had an exceptionally brilliant mind," said Dr. William H. Patterson, who served as USC president following the retirement of Jones. "He had a great grasp of the presidency at the University of South Carolina.

"We owe much to him for the present development of the campus, as many people know. This represents a considerable loss for the university community."

Similar words of praise came from USC President James B. Holderman.

"The entire university community is deeply saddened by Dr. Jones's death," Holderman said. "The groundwork for much of what the university regularly is praised for today was laid by Dr. Jones during his highly distinguished term as USC president, and I continue to feel his presence every day as I walk in his footsteps.

"He was a loyal friend of the university, an outstanding leader in the national academic community, and his accomplishments will be long remembered," Holderman said.

T. Eston Marchant, chairman of the USC board of trustees during Jones's presidency, said, "I am quite distressed to learn about Dr. Jones's death." Marchant, who now is adjutant general of the S.C. National Guard, said, "I'm sure he will be sorely missed by his many friends and university alumni as well.

"During my service with him as chairman of the board, I enjoyed working with him very much. He contributed in many ways to the fine reputation that Carolina has today," Marchant said.

Dr. John J. Duffy, system vice president for two-year campuses and continuing education, said, "Tom Jones's vision and enthusiasm were infectious. His achievements were even more remarkable when one considers the tempestuous period in which he governed the university—the unparalleled growth due to the baby boom, student and faculty unrest during the Vietnam War, the student riots and the protracted fight over the second medical school.

"Throughout it all, he remained optimistic and true to his vision and thus served the longest term of any modern University of South Carolina president in a period where major college presidents were forced out of office after short intervals of service," Duffy said.

Dr. Robert E. Alexander, associate vice president for two-year campuses and continuing education, said, "Because of his visions of what Carolina could be and his enthusiasm about the future, many of the quality faculty currently at USC threw in their lot with Tom Jones at a time when a higher education market was highly competitive, and they could have easily gone elsewhere.

"Dr. Jones constantly promoted a university in the 'mainstream' to students, faculty and the citizenry of South Carolina."

J. Robert Peters Jr., a Hampton County lawyer who served on the USC board of trustees during Jones' presidency, said Jones was "a very capable, able administrator."

"He put forth tremendous effort for the best interest of the University of South Carolina during a period of tremendous growth, achievement and success. Dr. Jones was loyal and easy-going, and he was sorely missed when he retired from the university. I am quite distressed to hear of his passing," Peters said.

"It always takes a catalyst to get you started on the high road," said Michael J. Mungo, a Columbia real estate developer and a trustee during Jones' tenure.

"Tom Jones should be thanked for generations to come for what he started at the university," he said.

"He made the great move USC needed to get it on the road to excellence," Mungo said. "Generations will benefit from what he did. We've lost a great innovator, a great thinker, besides a great educator.

"He made so much change. He took us from the 18th century," said Mungo. "He brought in bright stars, the new ideas, the intellectual."

Mungo said it was Jones's efforts that changed USC "from an ordinary institution and set us on a course of excellence."

Besides bringing in scholars, Jones was not afraid to develop new programs, such as the University 101 course, which is an introduction to the university and its academic atmosphere, which Mungo said has become a model in higher education.

"He was always willing to listen to innovation," he said. "He let us dream. He said we could do things. And we did them."

DR. THOMAS F. JONES

Dr. Thomas F. Jones guided the University of South Carolina through the dynamic '60s, a period marked not only by dramatic growth but by turbulence spawned by a restless generation.

And while the rotund, jovial engineer-physicist built edifices, he earned the respect of academicians who appreciated his energetic support of liberal arts, the university and its faculty. Yet, his convictions, and what some considered a permissive attitude, inevitably catapulted him into controversy and he resigned in 1974 after 12 years as president, always denying that political pressures forced him out.

Dr. Jones became vice president for research at Massachusetts Institute of Technology, where he received his doctorate, and remained in that area after illness struck in 1979. He died Tuesday night at age 65 after a long battle with cancer, leaving a solid legacy in USC's history.

Few university presidents faced the challenges of Tom Jones. Good-naturedly, the Tennessee native weathered waves of change. He presided over the peaceful integration of USC in 1963 while university campuses in Alabama and Mississippi were scenes of rioting. A favorite of students, with omnipresent bow tie and cigar, the genial educator rode out the anti-war student riots of the late 1960s and early 1970s.

Dr. Jones made friends and enemies in displaying racial sensitivity. He hired a full-time black student recruiter, required campus police to take human relations courses and required non-discriminatory statements from fraternities and sororities.

As student enrollment mushroomed from 7,000 in 1952 to 26,000 in 1974, and the faculty increased to 1,200. Dr. Jones directed expansion of a mammoth physical plant that often astounded returning old grads.

Dr. Jones' inventive programs, attention to the faculty and recruitment of high-powered professors launched USC on a course of excellence. President James B. Holderman called it "the groundwork for much of what the university regularly is praised for today."

One former trustee said aptly, "We've lost a great innovator, a great thinker, besides a great educator . . . He brought in bright stars, the new ideas, the intellectual."

THOMAS F. JONES DIES AT 65

Dr. Thomas F. Jones, Jr., one of the nation's leading engineering educators and administrators, vice president for research at the Massachusetts Institute of Technology since July 1975 and former president of the University of South Carolina, died Tuesday, July 14, after a long illness. He was 65 years old and a resident of Arlington.

Despite being terminally ill for several months, Dr. Jones worked almost daily. He was at his desk Friday. Dr. Jones died at the Sidney Farber Cancer Institute Tuesday night.

As vice president for research, Dr. Jones had administrative responsibility for sponsored research at major laboratories and centers at M.I.T., including the Francis Bitter National Magnet Laboratory, the Research Laboratory of Electronics, the Center for Materials Science and Engineering, the Energy Laboratory, the Plasma Fusion Center and the Nuclear Reactor Laboratory.

In his last annual report summarizing the activities of those centers and laboratories, Dr. Jones, in a comment that reflected the affection and concern he displayed for people in every walk of life, said: "In reading the reports, one should not lose sight of the ubiquitous and essential contributions of undergraduates and graduate students who work side by side with faculty and staff to generate the kinds of research results which characterize M.I.T."

In 1980, as the University of South Carolina honored Dr. Jones with the honorary degree of Doctor of Laws, he was praised by the university for having "brought Carolina into the mainstream of educational innovation and development." Dr. Jones' contributions to the state of South Carolina were recognized in 1966 when he was acclaimed "South Carolinian of the Year."

Dr. James B. Holderman, president of the University of South Carolina, in a statement issued Wednesday, July 15, said:

"The entire University of South Carolina community is deeply saddened by Dr. Jones' death. The groundwork for much of what the university regularly receives praise for today was laid by Dr. Jones during his highly distinguished term as U.S.C. president and I continue to feel his presence every day as I walk in his footsteps. He was a loyal friend of the University of South Carolina, an outstanding leader in the national academic community, and his accomplishments will be long remembered."●

NATIONAL ENDOWMENT FOR THE ARTS

● Mr. KENNEDY. Mr. President, the National Endowment for the Arts has led the arts community in a time of exciting and important growth. The endowment has brought the arts to countless individuals and families and, in turn, Americans across the country have responded warmly and enthusiastically.

In view of the progress we have seen under the guidance of the endowment, I feel that it is unconscionable to slash the Federal arts budget in half, as the administration has recommended.

In recent articles, Mr. Harold Prince and Mr. Arthur Schlesinger have addressed this serious issue. They have eloquently expressed their support for maintaining a strong and healthy arts community. And both have stressed the need for a continued Federal commitment to the arts.

I would like to share with my colleagues these articles from the New York Times, and request that they be printed at this point in the RECORD.

The articles follow:

[From the New York Times, July 18, 1981]

SO, WHO NEEDS THEM? THE NATION

(By Harold Prince)

When I recently spoke to corporate executives about the importance of increasing private-sector support of the arts, because of the Administration's proposed 50 percent reduction in the National Endowment for the Arts' 1982 budget, someone said: "It isn't just the arts; we've been getting the same plea from education, health, welfare—from all areas of social concern. What would you do if you had to make a choice between educating a poor black child, feeding an elderly couple, or supporting an artist?"

While I did not want to present the continued support of artists as a greater priority than that of welfare mothers, I resist equating priorities in terms of immediate results. Of course I would not deny education to a child, nor food stamps and Social Security to an aged couple, nor health care. But the presence of art is never immediately measurable; it's a spiritual contribution to the quality of life, and state mind, the dignity of man in his community. Harmony.

The cost of this harmony is relatively cheap. Prior to the suggested budget cut, the total arts budget came to $159 million—less than a dollar per person per year. A 1980 Harris poll of taxpayers found that 70 percent were willing to add $5 to their annual tax for the arts.

I have empathy for my corporate friend's dilemma. The Government should not force such a choice. I will not be thrown into life-and-death combat with the poor and the aged.

Just after the election, Ronald Reagan re-emphasized his support for the arts. Then the Office of Management and Budget "black book" hit the streets. David A. Stockman had declared flat out that the arts were not a priority. At a meeting of the National Council on the Arts, Robert Carter, from the Reagan transition team, told us that the 50 percent cut represented a 100 percent improvement in the Administration's original budget plans.

What reasons has the Administration offered for the cut? Government funds, they tell us, have replaced private-sector funds and have become the first resort for arts organizations. They are incorrect and uninformed. No! That would be bad enough—what is worse, they are informed. They know the facts to be the opposite. They have chosen to misrepresent them. One of the Endowment's unchallenged successes is that it has nourished the growth in private giving for the arts, primarily in matching grants, from $205 million to $2.7 billion in the 15 years of its existence.

This speaks to a uniqueness of the Endowment and a rightness in the Government's role. When it's working right, Government is the people. It makes proprietors of the audience, for the use of their tax dollars gives them certain title to the work they enjoy. Moreover, the Endowment's peer-panel system takes decision-making away from bureaucrats. I cannot say I agree with every decision, every policy, every program. But ours is a Government agency open and democratic, where virtually any arts organization or individual artist can receive a fair review by his peers, accepting that the odds are heavily against him in all the disciplines.

This addresses another criticism of the Endowment—that its standards have been lowered in order to make grants on regional or political bases. Actually, Endowment funds, in concert with those of state and local art agencies, allow thousands of artists to stay and work with dignity and respect in their own communities.

Historically, too many artists have been discovered posthumously. It's a credit to our times that that has changed. Not always, of course. A minimal grant of $3,500 enabled the Louisiana State University Press to publish a manuscript by an unknown author who killed himself soon after completing it. This was "A Confederacy of Dunces," by John Kennedy Toole, this year's Pulitzer Prize winner for fiction. The Pulitzer Prize-winning play "Crimes of the Heart," by Beth Henley, was produced originally by The Actors Theater in Louisville, an Endowment-funded theater, and then in New York by the Manhattan Theater Club, another recipient.

What would happen if the Endowment were shackled, its powers diluted? Can we expect big business to assume its responsibilities, to structure an effective arts council checked and balanced by peer assessment?

The Endowment is uniquely capable of identifying problems and solving them. For example, it recognized the difficulty of training qualified producers, directors, and writers in the musical theater, and created a master-apprentice program using both private-sector and Endowment funds.

Consider the dramatic accomplishments. The number of symphony orchestras in our country has grown from 25 in 1965 to 150 in 1980, dance companies from 30 to 400, professional theaters from 15 to 147, opera companies from 27 to 109. Not all of this is directly attributable to the Endowment, of course. State arts agencies and private giving have a lot to do with it. But an Endowment grant is a catalyst; the imprimatur of a panel review encourages private giving.

So, it's a bit ironic that we are subject to an enormous budgetary cut and the establishment of a task force, which implies a crisis of confidence. From where I sit, the Endowment is an amazingly effective instrument of public policy.

THE ARTS ARE IN ECONOMIC TROUBLE

(By Arthur Schlesinger, Jr.)

During most of the 20th century, the state of literature and the fine arts in America has not caused undue worry. Artistic endeavor flowed exuberantly along on the tide of economic expansion.

As the nation's population and wealth multiplied, so did the instrumentalities of national culture: more books, more libraries, more museums and galleries, more symphony orchestras and opera companies and dance troupes, more writers and painters and musicians and architects and film-makers, more amateurs of letters and the arts than ever before. It was only a moment ago that we used to talk rather complacently about the great cultural explosion. We regarded the future of the arts as a consummation that would take care of itself.

Alas, the gaudy days have passed. Inflation, now chronic in the economy, is driving cultural organizations to the wall. Everything costs too much. Private patrons are disappearing. Corporations have failed to take up the slack. Institutions vital to the quality of our civilization find no alternative but retrenchment and retreat. The great New York Public Library, one of the glories of this city, was open 87 hours a week only a dozen years ago; now its doors open each week for 49 hours. In California, more than a fifth of the state's county libraries have shut down.

Over the last 20 years, Federal and state Governments have played an increasingly vital role in reinforcing our culture against economic depredation. But today, at the very time when inflation is dangerously undermining our artistic institutions, we now con-

front a drastic reduction in public support for the arts. The budgets of the National Endowments for the Arts and the Humanities are to be cut in half; each Endowment is to receive less money than the amount allocated in the defense budget for military bands. The Corporation for Public Broadcasting is to lose a quarter of its funds. The National Historical Publications Commission, which has superbly enlarged our understanding of the past by publishing the papers of our great national leaders, is to be abolished altogether. Nor can we expect corporate philanthropy to offset the budget cuts, especially when the challenge grant, that great public stimulus to private giving, is itself to be a major casualty of budgetary retrenchment.

There are those—including Milton Friedman, a Nobel Prize winner in economics—who applaud this result because they regard Federal subsidies for the arts as "indefensible." If a cultural institution cannot pay its way in the market, they contend, then it has no economic justification and, if no economic justification, no social justification.

This argument implies that only those activities that pass the boxoffice test are worth pursuing. But one can almost argue the reverse more persuasively; that the most precious institutions in our society—our schools, universities, libraries, museums, opera houses, hospitals, churches—are precisely those that do not pay their way. Surely a society as rich as ours can afford to divert some of its abundance to activities that enrich our culture even if they fail the boxoffice test.

There are manifest limits to the role of Government. Creativity cannot be institutionalized. Art flourishes in conditions of individuality and diversity, even of doubt and estrangement. The National Endowments themselves have often fallen below the highest standards of excellence.

But overweening Government is not the issue today. The issue is the curtailment of support at a time when the arts are in a state of economic crisis and Government has been providing a margin of survival. This is surely a withdrawal by Government from its own responsibilities. As John Quincy Adams told the Congress a century and a half ago: "Moral, political, intellectual improvement are duties assigned by the Author of Our Existence to social no less than to individual man. For the fulfillment of those duties governments are invested with power, and to the attainment of the end—the progressive improvements of the condition of the governed—the exercise of delegated powers is a duty as sacred and indispensable as the usurpation of powers not granted is criminal and odious."

The old vision of our artistic future as a consummation that would take care of itself, plausible enough in an age of expansion, is less persuasive in our age of retrenchment. The question surely arises whether organizations like the American Academy and Institute of Arts and Letters must not now take a more active role in fulfilling its chartered obligation to "the furtherance of the interests of literature and the fine arts."

At home, the arts are in acute economic jeopardy. They are also in civic jeopardy. Blue-nosed busybodies invade libraries and schools in search of writing they convict of the crime of "secular humanism." In other lands, artists and writers who refuse to surrender their creative integrity suffer censorship, imprisonment, torture, and exile. In a sadly changed world, passivity may no longer be the fitting stance.●

S. 1394—THE SECRET SERVICE REFORM ACT OF 1981: A CLARIFICATION

● Mr. DECONCINI. Mr. President, on June 18 I introduced S. 1394—the Secret Service Reform Act of 1981—a bill to improve the ability of the Secret Service to protect the President and other designated protectees. The cornerstone of this legislation is an amendment to the Freedom of Information Act and would exempt from disclosure matters related to the protective functions of the U.S. Secret Service.

There is one provision in the bill, Mr. President, that I believe needs clarification at this point and should be further clarified during Judiciary Committee consideration of the bill. My legislation proposes amending section 552 of title V of the United States Code by adding a new subsection as follows:

(f) A law enforcement agency shall exempt any record maintained for a law enforcement purpose including the protective functions of the United States Secret Service for a period of ten years from the date of the document, from the termination of the investigation, or in the case of judicial action, from the termination of the probation, the term of imprisonment, or the imposition of the fine, as the case may be, whichever date is most recent.

Concerns have been expressed to me that this particular provision may be too broad and include law enforcement agencies other than the U.S. Secret Service. There is no question that my intent was to grant Freedom of Information Act exemption status only to the U.S. Secret Service—the law enforcement agency that is the target of this entire piece of legislation. I want to assure Senators and the administration of my intentions in this regard and to further assure them that this clarification and modification in the bill will be recommended by me during Judiciary Committee review of S. 1394.

With those assurances, Mr. President, I am pleased to ask unanimous consent that the distinguished Senator from Washington, Senator JACKSON, be added as a cosponsor of S. 1394.●

TRIBUTE TO SOUTH CAROLINA STATE SENATOR HARRIS PAGE SMITH OF EASLEY, S.C.

● Mr. THURMOND. Mr. President, the death of South Carolina State Senator Harris Page Smith was an untimely loss to his family, his friends, his legislative district, and his State. To his wife and four children, I express my deepest sympathy. His character and service are worthy of emulation by all public servants.

Senator Smith, who was a practicing attorney, a major in the U.S. Army Reserve, and an active member in church, civic, and professional organizations and affairs, devoted himself to helping his fellow man on every level, both personal and public.

Two recent editorials, one written by Mr. Jerry Vickery in the Easley Progress and one appearing in the State newspaper, accurately portray the exemplary life and service of Senator Smith.

Mr. President, in order to share these excellent editorials with my colleagues, I ask that these viewpoints appear in the RECORD at the conclusion of my remarks.

The editorials follow:

[From the Easley (S.C.) Progress, July 15, 1981]

THAT KIND OF MAN

The untimely death of Senator Harris Page Smith on Sunday of this week is certainly a loss to this community, to Pickens County, and the state of South Carolina.

Senator Smith was the kind of man you could always call upon, have confidence in, receive help from and truly be proud that he was representing your interest in State politics.

He was also very personable, and could always find time in his busy schedule to stop and talk with friends.

A few weeks ago Joe Young, president of the Easley Chamber of Commerce, and I went to Columbia to extend a personal invitation to Governor Riley to speak at the Chamber's annual picnic.

After a short meeting with the Governor, Senator Smith took us on a tour of the State House. One of the most interesting areas he showed us was the huge dome of the Capitol.

The Senator took us up into the dome, a place not often seen by visitors. As we walked up the narrow steps leading to the top, Senator Smith called our attention to various points of interest.

You could tell by his comments that he was extremely proud of the State House and all it represents, and that he was proud to serve his State and have a part in helping make it a great place to live.

This little tour might not have meant much to some people, but for the two of us, businessmen who understand busy schedules, it certainly made an impression that Senator Smith would graciously give us so much time when he had more important matters to attend to.

But what else would you expect from Harris Page Smith? After all, he was that kind of man.

[From the Columbia (S.C.) State, July 15, 1981]

SENATOR HARRIS P. SMITH

One might expect the tributes to State Sen. Harris Page Smith—gentleman, wit and public servant. They are the kinds of things usually said when a prominent government leader dies. But of Senator Smith, these words in eulogy are as applicable as they can be.

Few, if any, members of the S.C. Legislature are more respected or more revered than was the senator from Pickens.

His spirit of cooperation and his ever-present good nature might even have hampered his effectiveness at times. But he was not given to boisterous bulldozing in his legislative work, which was prolific.

Senator Smith's good humor was often at its best in defeat. Just weeks ago one of his priority projects, a local option sales tax bill, was ruled out of order in the Senate. Mr. Smith could have ranted and raved and even appealed the presiding officer's ruling to the full Senate. Instead, in a response embracing his typical subtle humor, Senator Smith said, "I disagree with your ruling, but I'm not going to argue with the judge."

It would be difficult to assess Senator Smith's qualities better than a friend, Gov. Dick Riley, who said:

"He had a sense of humor that set him aside from the rest. It made him capable of getting things done in a pleasant way. He was a deep thinker, and when he cast his vote I would assure you it was absolutely cast with the interest of the state above any other interest."

Senator Smith was a fine public servant and his death is grievous to South Carolina as well as his family and friends.●

TRIBUTE TO ANNE KOLB, CHAIRMAN OF THE BROWARD COUNTY COMMISSION

● Mr. CHILES. Mr. President, this past weekend the State of Florida lost one of its outstanding citizens, a valuable spokesman for the needs and concerns of her community, and an important political figure who was unafraid to speak out on difficult issues such as growth management and environmental protection.

Anne Kolb, chairman of the Broward County Commission, died Sunday at the age of 48, ending the hard-fought battle with cancer she has been waging since 1979. Even while facing personal illness, Anne continued to press hard for those projects and interests in which she believed, gaining the respect of those she worked with, and those she served. County Commissioner Howard Forman summed up the role Anne Kolb has played:

She was truly the conscience of the Broward County Commission. Broward County lost a lady who was always battling for the interest of the people with every ounce of breath she had up until the very end.

Anne was outspoken on the issue of unchecked growth in Broward County. She was actively involved in the formulation and implementation of important water policy management and sewage treatment projects. Early this year, Anne was in my office representing the needs of Broward County by voicing concern about the administration's plan to cut back funds which have been going to the county to help build wastewater treatment plants.

Anne has never been afraid to tackle tough issues. Aware of the delicate ecological system supporting the Broward County environment, she has fostered throughout her 12-year political career a strong coalition of grassroots support for a variety of activities aimed at preserving and protecting the county's natural resources:

County Commissioner Howard Craft said:

She wasn't just part of government; she was part of the people. She was never a politician, but was the best politician I've ever met.

Her rise to the chairmanship of the county's commission in 1980 not only signaled the success of her own political career but more importantly to Anne, also demonstrated the overriding support she has marshaled for environmental concerns. One of the many accomplishments of her term in office was the preservation of a 15,000-acre West Lake area in Hollywood, Fla. The county commission in June renamed a portion of this area in her honor, the Anne Kolb Nature Park.

I have been fortunate in having had the opportunity to work with Anne Kolb over the years she has been in public service. Her commitment to preserving the natural beauty and wildlife of south Florida and her dedication to the diverse needs of Broward County will not be forgotten. Although she is now gone, Broward County and the State of Florida will continue to benefit from, and be inspired by, the life and many accomplishments of Anne Kolb.●

PRELIMINARY NOTIFICATION OF PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million, or in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that nine such notifications have been received.

Interested Senators may inquire as to the details of these preliminary notifications at the offices of the Committee on Foreign Relations, room 4229, Dirksen Building.

The notification follows:

DEFENSE SECURITY
ASSISTANCE AGENCY,
Washington, D.C., July 17, 1981.

In reply refer to: I-2053/81ct.
Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country tentatively estimated to be $25 million.

Sincerely,

ERNEST GRAVES,
Director.

DEFENSE SECURITY
ASSISTANCE AGENCY,
Washington, D.C., July 17, 1981.

In reply refer to: I-2054/81ct.
Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
Director.

DEFENSE SECURITY
ASSISTANCE AGENCY,
Washington, D.C., July 17, 1981.

In reply refer to: I-02451/81ct.
Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to an Eastern Asian country for major defense equipment tentatively estimated to cost in excess of $7 million.

Sincerely,

ERNEST GRAVES,
Director.

MAINE'S BATH IRON WORKS

● Mr. COHEN. Mr. President, a strange thing is happening on the banks of the Kennebec River in Bath, Maine. In a radical departure for the shipbuilding industry, which is nearly always awash in the red ink of budget excesses and long building delays, the Bath Iron Works has established a solid reputation for building first-class naval vessels on time and within budget.

Last Friday, I was privileged to attend the launching of BIW's most recently completed Navy frigate, the U.S.S. *John L. Hall.* On the way to Maine, I ran across an article from the July 24 issue of the Christian Science Monitor describing Bath Iron Work's success, and I would like to share this excellent article with my colleagues.

I ask that it be printed in the RECORD. The article follows:

BUILDING NAVY SHIPS FASTER—AND FOR LESS—MAINE'S BATH IRON WORKS

(By Rushworth M. Kidder)

BATH, MAINE.—Can a small town in Maine help revitalize a creaking worldwide industry?

If the industry is shipbuilding, and the town contains the Bath Iron Works (BIW), the answer is "yes"—against all odds.

Stuck out on the end of the nation's supply line, facing high costs for energy and steel, BIW also faces a grim international market:

In Japan, the world's leader in shipbuilding, shipyard capacity has been reduced by 35 percent in the past two years.

In England, the nationalized British Shipbuilders is slowly sinking under high interest rates and labor costs.

In the United States, two yards have closed recently and the rest of the industry operates at 55 to 60 percent of capacity.

But here on the Kennebec River, a shipyard with an old-fashioned name and a 97-year history refuses to slow down. BIW, in fact, is expanding—with a $46.7 million facility, announced July 16, which will help revitalize the ailing waterfront area in nearby Portland.

The reason: BIW simply can't keep up with the flood of orders for new ships and overhaul work.

Company spokesman Frank Kerr, his hardhat glinting in the sushine beneath the massive prow of a soon-to-be-launched guided missile frigate, has no trouble measuring BIW's success:

Since delivering the prototype of this class of frigate to the US Navy in 1977, the yard has produced six more of the ships. Each was delivered early, and each was below cost. The program is now more than 80 weeks ahead of schedule, and enjoying "cost underruns"—a rare word in this military circle—totaling $37 million. (By contrast, another New England shipyard—the Electric Boat Division of General Dynamics Corporation in Groton, Conn.—has recently made news by coming in more than two years late and $280 million over budget on its Trident submarine program.)

BIW also succeeds in commercial work. It now has a backlog of more than $900 million in orders—for everything from a 643-foot sugar-barge for the California & Hawaiian Sugar Company to bridge girders for highway construction and rock-crushing equipment for the mining industry.

The largest employer in Maine (except for state government), it now has 6,500 employees—up from 2,500 in 1975. So popular are its jobs that the names of another 14,000 people are on file in the personnel office. The pay is low by nationwide shipyard standards, but the cost of living here is also low. So attractive is the firm, in fact, that the yard now employs former bankers and college professors who have joined the trades.

Figures for income, earnings, and profitability—confidential since the company (a division of the floor-covering manufacturer Congoleum) returned to private ownership in 1978—show astonishing increases since the $10 million losses of 1975.

Many see in BIW the virtues of private enterprise and hard work preached by the Reagan administration. How does it do it?

In his small, comfortable office, hung with pictures of naval vessels boiling along through blue water, chairman John F. Sullivan cites several causes. Brought aboard in 1975 to turn around an ailing firm, Mr. Sullivan himself is often listed as the central reason for BIW's success. But he gives top credit to the local work force.

"It's mental," he says, trying to account for what has often been called the "Maine work ethic" that still produces, even under union conditions, an hour's work for an hour's pay. Such work, he says, is partly a matter of pride—the kind of deep feeling for the ships that bring tears to the eyes of welders and pipe-fitters at each launching. The town has been making ships for 374 years—since 1607, when a 50-foot pinnance built by English settlers at the mouth of the river sailed back across the Atlantic.

But unlike many one-industry towns, Bath breeds workers who actively encourage their children to go into the plant. And BIW responds. "We encourage nepotism," laughs Mr. Kerr, noting that young workers excel because of peer pressure and "because Uncle Fred and Aunt May are watching you."

That willingness to work hard also springs from plant conditions. "If a man's working in a junk shop, with stuff all over and the ships are late," says Mr. Sullivan, "that affects his philosophy." His emphasis on what he calls "housekeeping and safety" produces a yard which, by heavy industry standards, is very clean. The result: higher productivity, low turnover of personnel, and what company officials describe as one of the best safety records in the industry. And, says Mr. Sullivan, absenteeism has dropped to below 5 percent in the past few years—in an industry with an average absenteeism of 20 percent.

Also figuring into the success is the management structure—monthly (not quarterly) meetings where key managers review their progress, an apprentice program which has now trained 80 percent of the plant's supervisors, and a relation with the parent company that has allowed substantial investment at opportune times. One example: the towering red-and-white, 220-ton crane, a landmark familiar to tourists along Route 1.

But crucial to BIW's success, say many observers, is a program of "preoutfitting." The ships are built in modules of up to 200 tons each. Seventeen of them make up a naval frigate, while 100 may be brought together for larger ships. When ready, they are swung into place by the crane. Before they are joined, however, their walls, floors, and ceilings are outfitted with pipes and wires—in contrast to most shipbuilding practices, in which the entire hull is assembled before the wires and pipes are installed.

The result: higher productivity, since the typically cramped areas below decks are more

easily accessible while the ship is still in pieces. The challenge: making the pieces fit. That requires extremely precise planning—and a work force capable of working to close tolerances. Quips Mr. Kerr: "Schedule and planning is a religion here." The planning, however, produces ships that are 75 percent complete at launch—rather than the more customary 20 to 30 percent complete.

All of this translates into an American shipbuilding industry that is competitive in a world market—so much so that firms from around the globe have sent representatives to Bath to see how it is done. One official recalled that a team from British Shipbuilders, on being told that a guided missile frigate required 1.6 million man-hours of work, responded that the same ship built in Britain would require 5 million man-hours.

Where will this success take them? BIW officials remain optimistic, foreseeing an upsurge in all types of marine work in the next decade. Edwin Hood, chairman of the Shipbuilders' Council of America, notes that the world market is still depressed. "I personally don't think it will begin to accelerate before 1984–85," he told the Monitor. Even new defense spending will not be felt by the nation's shipyards and their 160,000 employees for another three years.

As for commercial building, that is being taken over by Japan, with South Korea, Taiwan, and Brazil in hot pursuit. Some of these governments, Mr. Hood notes, offer subsidies that allow yards to build ships at 40 percent below cost.

But the often-blamed bugbear of the industry—militant unionism—does not seem to be a factor in this quiet town. The last strike was in 1976. Union president Jim Harrington has his complaints about the management, pointing to some unsettled grievances. But as he looks ahead to contract talks in 1982, he notes that "it's an exciting time."

And with what sounds like common-sense Maine wisdom, he summarizes his position: "They've got to make money so that we can."●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36 (b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that Act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received. The classified annex referred to in one of the covering letters is available to Senators in the office of the Foreign Relations Committee, room 4229, Dirksen Building.

The notifications follow:

DEFENSE SECURITY,
ASSISTANCE AGENCY,
Washington, D.C., July 20, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81–74, concerning the Department of the Air Force's proposed Letter of Offer to Saudi Arabia for defense articles and services estimated to cost $48 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
Director.

TRANSMITTAL NO. 81–74

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Saudi Arabia.

(ii) Total estimated value:

	Million
Major defense equipment *	$ 0
Other	48
Total	48

* As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of articles or services offered: Flight training services during fiscal year 1982 in the United States to include undergraduate pilot training; advanced pilot training in helicopters, F–5, and C–130 aircraft; and Fighter Weapons Instructor training for the F–5 aircraft.

(iv) Military department: Air Force (TDE).

(v) Sales commission, fee, etc. paid, offered or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: Included in report for quarter ending June 30, 1981.

(viii) Date report delivered to Congress: July 20, 1981.

POLICY JUSTIFICATION

SAUDI ARABIA—FLIGHT TRAINING

The Government of Saudi Arabia has requested the purchase of flight training services during fiscal year 1982 in the United States to include undergraduate flight training; advanced flight training in helicopters, F–5, and C–130 aircraft; and Fighter Weapons Instructor training for the F–5 aircraft at an estimated cost of $48 million.

This sale is consistent with the stated U.S. policy of assisting friendly nations to provide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the United States to support the Saudi Arabian effort to improve the security of the country through the modernization and training of the Royal Saudi Air Force (RSAF).

The proposed sale will provide for the continued training of RSAF personnel at established U.S. military training facilities to ensure the RSAF has the requisite numbers of trained personnel to operate the aircraft and aircraft weapon systems purchased previously from the United States.

The sale of this training will not affect the basic military balance in the region.

The training purchased under this agreement will be provided at established U.S. military training facilities in the United States. Contracts with the commercial sector are not anticipated under this sale.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY
ASSISTANCE AGENCY,
Washington, D.C., July 20, 1981.

In reply refer to: I–01848/81ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81–76 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Navy's proposed Letter of Offer to Japan for defense articles and services estimated to cost $63 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

ERNEST CRAVES,
Director.

TRANSMITTAL NO. 81–76

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective Purchaser: Japan

(ii) Total Estimated Value:

	Million
Major Defense Equipment*	$60
Other	3
Total	63

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Four PHALANX close-in weapon systems and associated support.

(iv) Military Department: Navy (LHU, LHS, and LGG).

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Included in report for quarter ending 30 June 1981.

(viii) Date Report Delivered to Congress: 20 July 1981.

POLICY JUSTIFICATION

JAPAN—PHALANX CLOSE-IN WEAPON SYSTEMS

The Government of Japan has requested the purchase of four PHALANX close-in weapon systems with associated spare and repair parts at an estimated cost of $63 million.

Japan is one of the major political and economic powers in East Asia and the Western Pacific and a key partner of the United States in ensuring the peace and stability of that region. It is vital to the U.S. national interests to assist Japan in developing and maintaining a strong and ready self-defense capability which will contribute to an acceptable military balance in the area. This sale is consistent with these U.S. objectives and with the 1960 Treaty of Mutual Cooperation and Security.

These weapon systems are being purchased as defensive weapons to be used on two new construction destroyers, one new construction guided missile destroyer, and one retrofit destroyer built in Japan. Acquisition of these weapons systems is crucial to the improvement of the Japanese Maritime Self Defense Forces' tactical capability.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the General Dynamics Corporation of Pomona, California.

Implementation of this sale will not require the assignment of any additional U.S.

Government or contractor personnel to Japan.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., July 22, 1981.

In reply refer to: I–02478/81ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81–83, concerning the Department of the Air Force's proposed Letter of Offer to the United Kingdom for defense articles and services estimated to cost $32 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
Director.

TRANSMITTAL NO. 81–83

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: United Kingdom.

(ii) Total estimated value:

	Million
Major defense equipment*	$0
Other	32
Total	32

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of articles or services offered: Cooperative logistics supply support arrangement, requisition case (FMSO II), for follow-on spares and supplies to support aircraft and other systems and subsystems of U.S. origin.

(iv) Military department: Air Force (KBU and KBV).

(v) Sales commission, fee, etc. paid, offered or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: Included in report for quarter ending June 30, 1981.

(viii) Date report delivered to Congress: July 22, 1981.

POLICY JUSTIFICATION

UNITED KINGDOM—COOPERATIVE LOGISTICS SUPPORT ARRANGEMENT

The Government of the United Kingdom has requested the purchase of a cooperative logistics supply support arrangement, requisition case (FMSO II), for follow-on spares and supplies to support aircraft and other systems and subsystems of U.S. origin at an estimated cost of $30 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of the United Kingdom; furthering NATO rationalization, standardization, and interoperability; and enhancing the defenses of the western Alliance.

This cooperative logistics supply support arrangement is necessary to ensure an uninterrupted flow of spare parts to support 136 F–4 aircraft, 62 C–130 aircraft, and other systems and subsystems of U.S. origin. The United Kingdom will have no difficulty in absorbing the articles.

The sale of this equipment and support will not affect the basic military balance in the region.

Procurement of these items and services will be from the many contractors who provide similar items and services to the U.S. forces.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to the United Kingdom.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

ORDERS FOR TUESDAY

SENATE TO CONVENE AT 8:15 A.M.

Mr. BAKER. Mr. President, is there an order for the convening of the Senate tomorrow?

The PRESIDING OFFICER. There is an order. It provides that the Senate will convene at 8:15 a.m.

Mr. BAKER. I thank the Chair.

Are there special orders for tomorrow for the Senator from South Carolina and the Senator from Connecticut for 15 minutes each?

The PRESIDING OFFICER. The Senator is correct.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that after the expiration of the time allocated to the two leaders under the standing order, and the execution of the special orders as identified, there be a brief period for the transaction of routine morning business to extend not beyond the hour of 9 a.m. in which Senators may speak for not more than 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE PROCEDURE TOMORROW

Mr. BAKER. I believe, Mr. President, there is already an order for the Senate to resume consideration of the tax bill at 9 o'clock?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. That the vote on the motion to reconsider on the Metzenbaum amendment will occur at 9 without further debate?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I thank the Chair.

Mr. President, the first rollcall vote will occur tomorrow shortly after 9 a.m. I believe it has been agreed to by the managers of the bill on both sides and the minority leader, that following the disposition of the motion to reconsider the Metzenbaum-Durenberger day-care center amendment is disposed of, that we would proceed then to the consideration of the Melcher amendment as listed on the list of qualified amendments, to be followed by the Matsunaga amendment, which is an amendment also on that list dealing with energy investments, each for not more than 30 minutes.

I ask unanimous consent, Mr. President, that those two amendments be scheduled in that order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, other amendments will be scheduled as they become available. Especially I would advise the Senate that the Senator from Florida (Mr. CHILES) and the Senator from Iowa (Mr. JEPSEN) have indicated a desire to call up amendments early in the day tomorrow, and the Senator from Pennsylvania (Mr. HEINZ) as well.

Mr. President, there will be votes during the day tomorrow, all day. I would not abandon the hope that we can finish this bill tomorrow. If we do perhaps it will be very late, but I think it would be a wise investment of our time. So Senators should be on notice of a strong possibility of a late session on Tuesday.

RECESS UNTIL 8:15 A.M. TOMORROW

Mr. BAKER. Now, Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 8:15 a.m.

The motion was agreed to; and at 7:55 p.m., the Senate recessed until July 28, 1981, at 8:15 a.m.

NOMINATIONS

Executive nominations received by the Senate July 27, 1981:

IN THE ARMY

The following-named Army Medical Department officers for temporary appointment in the Army of the United States, to the grade indicated, under the provisions of title 10, United States Code, sections 3442 and 3447.

MEDICAL CORPS

To be major general

Brig. Gen. Garrison Rapmund, xxx-xx-xx... xxx-... Medical Corps, Army of the United States (colonel, U.S. Army).

To be brigadier general

Col. Tracy Elmer Strevey, Jr. xxx-xx-xxxx, Medical Corps, U.S. Army.

Col. Robert Hutchinson Buker, xxx-xx-x... xxx... Medical Corps, U.S. Army.

MEDICAL SERVICE CORPS

To be brigadier general

Col. France Felton Jordan xxx-xx-xxxx, Medical Corps, U.S. Army.

IN THE AIR FORCE

The following-named officers for promotion in the Regular Air Force, under the appropriate provisions of chapter 835, title 10, United States Code, as amended. All officers are subject to physical examination required by law:

LINE OF THE AIR FORCE

Major to lieutenant colonel

Abram, Max L., xxx-xx-xxxx
Acheson, Densel K., xxx-xx-xxxx
Ackerman, Charles T., xxx-xx-xxxx
Adams, William W., Jr., xxx-xx-xxxx

MEDICAL CORPS

Major to lieutenant colonel

Dean, Linda O. xxx-xx-xxxx
Gerber, William R. xxx-xx-xxxx

CONFIRMATIONS

Executive nominations confirmed by the Senate July 27, 1981:

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

Edward L. Rowny, of Virginia, to be Special Representative for Arms Control and Disarmament Negotiations, and to have the rank of Ambassador while so serving, vice Ralph Earle II, resigned.

DEPARTMENT OF ENERGY

Anthony G. Sousa of Hawaii, to be a member of the Federal Energy Regulatory Commission for a term expiring October 20, 1984, vice George R. Hall, term expired.

DEPARTMENT OF THE INTERIOR

J. Robinson West, of Pennsylvania, to be an Assistant Secretary of the Interior, vice Larry E. Meierotto.

DEPARTMENT OF ENERGY

Jan W. Mares, of Connecticut, to be an Assistant Secretary of Energy (Fossil Energy), vice George Fumich, Jr., resigned.

Alvin W. Trivelpiece, of California, to be Director of the Office of Energy Research, vice Edward Allan Frieman, resigned.

CONSUMER PRODUCT SAFETY COMMISSION

Nancy Harvey Steorts, of Maryland, to be a Member of the Consumer Product Safety Commission for the remainder of the term expiring October 26, 1984, vice Susan B. King.

Nancy Harvey Steorts, of Maryland, to be Chairman of the Ccnsumer Product Safety Commission (new position).

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

William C. Lee, of Indiana, to be U.S. district judge for the northern district of Indiana vice a new position created by Public Law 95–486, approved October 20, 1978.

IN THE ARMY

Maj. Gen. Hugh Joseph Clausen, xxx-xx-... for appointment as The Judge Advocate General, U.S. Army, under the provisions of title 10, United States Code, section 3037.

Brig. Gen. Hugh Robert Overholt, xxx-xx-... Army of the United States (colonel, Judge Advocate General's Corps, U.S. Army), for appointment as the Assistant Judge Advocate General, as major general, Judge Advocate General's Corps, in the Regular Army of the United States and as major general, Army of the United States, under the provisions of title 10, United States Code, sections 3037, 3442, and 3447.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration nominations beginning Eric S. Devis, to be lieutenant, and ending Amy E. Orris, to be ensign, which nominations were received by the Senate on July 6, 1981, and appeared in the CONGRESSIONAL RECORD of July 8, 1981.

IN THE NAVY

Navy nominations beginning Phillip T. Angelini, to be ensign, and ending Louis W. Arny III, to be commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on July 15, 1981.

HOUSE OF REPRESENTATIVES—*Monday, July 27, 1981*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

The Lord is faithful in all His words, and gracious in all His deeds. The Lord upholds all who are falling, and raises up all who are bowed down.—Psalms 145: 13b, 14.

O Lord, our hearts lift their voices in praise for all Your blessings, for You have been faithful to us wherever we have been. Gracious Lord, we thank You that Your presence remains near us when we are strong or when we are weak, when we have stood with courage and when we have failed. Help make us faithful in our commitments to those about us who are in need of our support and love, that together we can do those good deeds that glorify Your holy name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

SUNDRY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Saunders, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment joint resolutions of the House of the following titles:

H.J. Res. 84. Joint resolution designating the week of October 4 through October 10, 1981, as "National Diabetes Week"; and

H.J. Res. 191. Joint resolution designating August 8, 1982, as "National Children's Day."

The message also announced that the Senate agrees to the amendments of the House to the joint resolution of the Senate of the following title:

S.J. Res. 28. Joint resolution designating the week beginning March 8, 1981, as "Women's History Week."

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 1098) entitled "An act to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. PACKWOOD, Mr. GOLDWATER, Mr. SCHMITT, Mr. CANNON, and Mr. HEFLIN to be the conferees on the part of the Senate.

The message also announced that the Senate had passed joint resolutions of the following titles, in which the concurrence of the House is requested:

S.J. Res. 84. Joint resolution to proclaim March 19, 1982, "National Energy Education Day"; and

S.J. Res. 94. Joint resolution to designate October 10, 1981, as "National Jogging Day."

OVERSELL CAN BE OVERKILL

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, prior to being elected to Congress in 1970, I spent 20 years as a reasonably successful salesman. One of the things I learned during that time was, when you had a good product, and it was an honest one and performed well, you should not oversell, because when you oversold the public immediately became suspicious, and not without justification.

I think what we are seeing right now in the President's handling of the tax program, and the catering to different groups and different people, is a real oversell. I think that the public is already becoming aware of this, and I hope that my Democratic colleagues and those on the Republican side will also take a hard look. The oversell in this case can be a real overkill to the American people.

I trust that we on the Democratic side will stand together on the tax vote and vote for the Democratic alternative.

PERMISSION TO FILE CONFERENCE REPORT ON S. 694, DEPARTMENT OF DEFENSE SUPPLEMENTAL AUTHORIZATION ACT, 1981

Mr. PRICE. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight, July 27, 1981, to file a conference report on the Senate bill (S. 694), the fiscal year 1981 Department of Defense supplemental authorization.

The SPEAKER pro tempore (Mr. ALEXANDER). Is there objection to the request of the gentleman from Illinois?

There was no objection.

RETIREMENT OF LT. GEN. ERNEST GRAVES

(Mr. PRICE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PRICE. Mr. Speaker, on July 31, Lt. Gen. Ernest Graves will conclude a long and distinguished career as a soldier-scientist-diplomat. A 1944 graduate of the U.S. Military Academy at West Point, he holds a Ph. D. in physics from MIT and attended the advance management program at Harvard Business School. The third of four generations of West Pointers, General Graves has served his Nation in the finest tradition of the Academy. As a military leader, he commanded a combat engineer platoon in Europe during World War II, an engineer battalion in Korea, and an engineer group in Vietnam.

His assignments over 37 years of active service are too numerous to mention, but to illustrate the wide scope of his expertise, I would like to highlight a few for special recognition. He was Executive Assistant to the Secretary of the Army, Deputy Director of Military Construction for the Army Chief of Engineers, and president of the Air Defense Evaluation Board. He was division engineer for the Great Lakes and Mississippi River where he was responsible for water resource development, management, and conservation for a 12-State region. As Director of Civil Works, he defended before the Congress a $2½ billion program for water resources and development. As Director of Military Applications for the U.S. Atomic Energy Commission, he was responsible for the direction of the entire nuclear weapons program to include research, development, testing, and production, delivering to the military on a time scale compatible with military weapons systems development safe, reliable weapons which met the characteristics specified by the U.S. Department of Defense.

He is now completing 3½ years as Director, Defense Security Assistance Agency, during which he proved himself to be a skilled negotiator, articulate congressional witness, expeditious manager, and brilliant innovator—a

man of the highest integrity. He directed the planning and execution of a complex and politically sensitive multibillion-dollar security assistance program with vigorous devotion to duty while at the same time dedicating himself constantly to protecting and expanding the statutory flexibility of the President to conduct security assistance programs in the national security interest.

Mr. Speaker, I wish to take this opportunity to congratulate General Graves on his outstanding service to his country and to wish him well in his retirement. His achievements will have a lasting effect upon the national security and foreign policy of the United States.

AMERICAN PEOPLE WANT TAX FAIRNESS AND REAL TAX CUTS

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, I worked in the field of taxation for 10 years prior to coming to Congress. I just want to say that I can hardly believe the spectacle I am seeing in this tax debate. I can hardly believe the nonsense that is being passed around as serious tax policy discussion in this House.

There ought to be a tax cut, and we know there ought to be a tax cut because of bracket creep. People are being thrown into higher tax brackets because of inflation. But the fact is, the middle-income people have experienced six times the amount of tax increase in the 1970's than have those with incomes of over $200,000 a year. What is being proposed? An across-the-board tax cut which is fundamentally unfair to the middle-income people.

There ought to be a tax cut for business for capital formation. Small business creates most of the new jobs and provides about half the private sector gross national product in this country; yet, big businesses with $200 million or more in assets will get 75 percent of the business tax cuts. This is capital formation to allow Mobil to buy Conoco. I do not see that type of capital formation as constructive. I think the spectacle of opening the Internal Revenue Service Code for bids in this country is disgusting. I would like to see some very serious discussion about tax policy that makes sense in our future.

I saw a bumper sticker once that said, "The majority in America is not silent; the Government is deaf."

I think that describes what is happening on the issue of tax policy. People want tax fairness and they want real tax cuts, and I am afraid they are not going to get them this week. That is disappointing.

CONGRESS SHOULD MOVE AT ONCE TOWARD A BALANCED BUDGET

(Mr. SABO asked and was given permission to address the House for 1 minute.)

Mr. SABO. Mr. Speaker, in the June 14 Washington Post, one of our Nation's most respected economists, Joseph Pechman, wrote about the misdirection of excessive tax cuts.

If we are serious about increasing total national saving and not merely private saving, the most direct way would be to move toward a surplus in the Federal budget. For each extra dollar the government reduces its borrowing, a dollar more of lendable funds is available for private investment. In contrast, each extra dollar of Federal deficit drains a dollar from private lending, while only a small part of the tax-cut dollar received by individuals is saved.

The views of Mr. Pechman point out the way to improving our Nation's economy through prudent Government action. The solution is not through excessive tax cuts. The answer is immediate action toward balancing the budget in 1982. Mr. Speaker, we should heed the advice of Mr. Pechman. We should move at once toward a balanced budget by adopting the anti-inflation, anti-high-interest-rates, balance-the-budget tax substitute.

UPDATE ON THE RECONCILIATION CONFERENCE

(Mr. PANETTA asked and was given permission to revise and extend his remarks, and to include extraneous matter.)

Mr. PANETTA. Mr. Speaker, this is the update of the reconciliation conference. We still have outstanding conferences. We suspect that nine conferences to date can be resolved as soon as the key Members return to town today and are able to sit down with their counterparts to resolve minor differences.

Fourteen conferences are still outstanding, 10 of which are the energy-related issues. Energy and Commerce did meet over the weekend, on both Friday evening and Saturday, as well as Sunday. The key issues outstanding involve funding for Amtrak, Conrail, and the deregulation of the communications area, as well as the health block grant issue and as well as the medicaid cap.

Mr. Speaker, this afternoon the leadership, along with the Budget Committee, will be meeting with the various chairmen who still have outstanding issues, and we are still hopeful that we will resolve those issues by the close of the business day.

Mr. Speaker, I include at this point our daily report on the conference activity on the reconciliation bill, as follows:

DAILY REPORT ON CONFERENCE ACTIVITY—JULY 24, 1981, 6 P.M.

FLOOD INSURANCE FOR EAST BARRIER ISLANDS

(Mr. ROSE asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. ROSE. Mr. Speaker, many of us who represent the barrier islands section of the east coast are very disappointed that the conferees on our reconciliation package have decided to retain certain language that phases out Federal flood insurance in the barrier islands over the period of the next 2 years.

We hope that the 2-year period will give the House an opportunity to take a closer look at the role that Federal flood insurance has played in the barrier islands and take another look at the basic inequity we feel exists when we say that flood insurance is OK in inland rivers and harbors and inland waterway areas but is not OK in the barrier island situation.

Mr. Speaker, we think that more heat than light has probably been generated on the issue at this point, and we hope that the House will seriously consider a new perspective and a new look at Federal flood insurance in the ensuing 2 years.

HIGH INTEREST RATES

(Ms. OAKAR asked and was given permission to address the House for 1 minute.)

Ms. OAKAR. Mr. Speaker, when we observe the present state of the American economy, it is clear that we have reached a state of emergency. High interest rates are crippling productivity and investment. Thrift institutions are caught with a shrinking credit base. The bond market is paralyzed. Local and State governments find their financial resources drying up. Long-term productive investments are declining as short-term, quick-profit ventures proliferate.

The housing industry is at a virtual standstill because so many first-home buyers have been eliminated from the market by the escalating rates on loans and payments. Likewise, potential new car buyers postpone their purchases indefinitely and the automotive industry counts its losses. Capital reinvestment declines because small businesses are locked out of the credit market by the above-prime rates they must pay—while giant corporations infected with merger mania secure enormous lines of credit at bargain rates. And the costs of all borrowing are inevitably passed on to the consumer in higher and higher prices.

On the international scene, our allies are increasingly weakened by our chief export: High interest rates, which inflate the value of the dollar, thus eroding the purchasing power of foreign as well as domestic markets—and the demand for American goods goes down.

At the national level, interest paid on public debt has outstripped growth in the debt itself. Since 1954 the public debt has tripled and interest paid on it has risen astronomically. The anticipated massive increase in defense spending authorized by the new budget will send interest rates and inflation soaring even higher.

The American people will soon be beyond the help of any safety net that might be devised to save them. The cancer that is eating away at the vital organs of our society demands radical and immediate treatment. Administrative aspirins will not do.

Let us look at the effects of tight money and high interest rates on Great Britain, where the British economy has been slowed to a standstill. Unemployment does not go away, or go on welfare; it goes into the streets. Let us address our national emergency now. In the Credit Control Act of 1969 we had the courage to provide a mechanism to restore equilibrium to our economy. Let us make use of it now.

PRESIDENT'S MONETARY POLICY UNVEILED AT OTTAWA

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks, and to include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, high interest rates continue to plague the farm, factory, and family in America.

The Reagan administration has heretofore been blaming its high interest rate policy on the Federal Reserve, and the previous adminstration. Nevertheless, Reagan revealed himself at the economic summit conference last week in Ottawa where the President came out of the closet with his monetary policy. The President's position was stated at the Ottawa summit, clearly underscoring the fact that the present administration places the entire burden of controlling inflation on a shrinkage of the money supply. Tight credit produced from high interest rates is the monetary policy of the Reagan administration.

NIC-PAC BRIBE OFFER REPORTED

(Mr. NEAL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NEAL. Mr. Speaker, I want to alert my colleagues to a bribe offer that I received late Friday afternoon. The bribe was offered by the National Conservative Political Action Committee—Nic-Pac as it is known. It came in the form of a letter signed by Mr. John T. (Terry) Dolan which was hand delivered to my office about 3 p.m. on last Friday. In the letter Mr. Dolan says in part—

If you will make a public statement in support of the President's tax cut package and state that you intend to vote for it, we will withdraw all radio and newspaper ads planned in your district. In addition, we will be glad to run radio and newspaper ads applauding you for your vote to lower taxes.

Shortly after receiving the letter I called the Attorney General, the Honorable William French Smith, and told him about the bribe attempt and asked for an investigation to which he agreed.

Mr. Speaker, the Criminal Code is very clear on this subject. Title 18, section 201, paragraph (B) says:

Whoever, directly or indirectly, corruptly gives, offers or promises anything of value to any public official . . . to influence any official act . . . shall be fined not more than $20,000 . . . or imprisoned for not more than fifteen years.

And there are other references in the Criminal Code concerning attempts to illegally influence the behavior of duly elected officials.

Mr. Speaker, any attempt to influence public officials with money is a serious offense against our constitutional system, and I wanted my colleagues to be aware of this bribery attempt on the part of the National Conservative Political Action Committee.

CONGRESS GOES TO THE BALL GAME

(Mr. CONTE asked and was given permission to address the House for 1 minute.)

Mr. CONTE. Mr. Speaker, on Wednesday night next, Congress goes to the ball game—again.

And we Republicans intend to use a few plays we have worked on during this session to keep our winning ways alive. Based on our experience with the reconciliation bill we have designed these plays:

First of all, we have asked the Democratic Study Committee to edit the Democratic lineup before it is sent to the printers. Based on their work on the Latta amendment, we are confident it will definitely be out of order.

We have also arranged to have CBO and Ms. Rita Seymour do the scorekeeping for the game. Her phone number is available from the Speaker's Office.

Next we have let two dozen boll weevils loose in the Democrats' cotton uniform closet. This we realize will be part of an "unholey" coalition.

Next we have signed up a young fastballer from New York (Mr. LEBOUTILLIER) to throw a few high, hard ones at the Speaker.

Next we have enlisted Max Friedersdorf to invite the big Ohio righthander (Mr. MOTTL) to sit in the President's box at the opera next Wednesday night.

Finally we have not bought any Democrats for this particular game, but we have acquired a scenic easement on a few sweet swingers.

Seriously, the game is part of a doubleheader at the Alexandria Dukes home field at Four-Mile Run Park. Tickets are available through the Congressional Staff Club and various other outlets on the Hill.

TIGHT MONEY POLICY DEVASTATING TO ECONOMY

(Mr. DOWDY asked and was given permission to address the House for 1 minute.)

Mr. DOWDY. Mr. Speaker, I rise to question our use of a tight money policy as a weapon against inflation.

While the current situation is most desirable for investors, the effect of such a severe monetarist policy has been devastating for interest-sensitive industries—small business, housing, and agriculture. Yet the administration has announced its intention to cut the rate of growth in the money supply in half by 1986.

The harmful effects of this policy cannot be ignored. Small businessmen and farmers cannot afford 20-percent interest rates. Business bankruptcies increased from 7,016 business failures in the fourth quarter of 1979 to 11,229 1 year later.

Mr. Speaker, there has been ample time in my opinion to demonstrate that the tight money policy is not working.

THE "DEPRESSED INDUSTRY" BAILOUT: UNNOTICED BUT STILL EXPENSIVE

(Mr. MOORE asked and was given permission to address the House for 1 minute.)

Mr. MOORE. Mr. Speaker, the two most controversial parts of the Ways and Means tax bill are the changes in oil and inheritance taxes. These two provisions have received a great deal of attention and they are on every critic's list as being of questionable need and too expensive. There is, however, another provision in the Speaker's tax bill which is just as expensive, actually more, but which has gone practically unnoticed.

That provision is the "depressed industry" bailout. It will funnel up to $3.3 billion to a handful of big corporations that have been anointed as recipients and almost no one has bothered to ask why.

Despite its low visibility, the bailout will be more expensive than any single year of the oil tax changes and not until 1985 will the changes in the inheritance tax cost the Treasury more.

In fact, through 1984, the bailout will be twice as expensive as any single year of the bill's oil tax changes. Further, the bailout has far more questions about its need, as well as more expense, than the oil or inheritance tax provisions.

This bailout is so large and ill advised that it, by itself, is reason enough to vote against Speaker O'NEILL's tax bill.

□ 1220

CONGRESS SHOULD ADOPT THE ANTI-INFLATION, ANTI-HIGH INTEREST RATES, BALANCE-THE-BUDGET TAX CUT ALTERNATIVE

(Mr. FAZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAZIO. Mr. Speaker, I call the attention of my colleagues to the concise and cogent editorial in the New York Times last Sunday, which makes a strong case against the tax cut bills proposed by the administration and the Ways and Means Committee, and, without knowing it, in favor of the anti-inflation, anti-high interest rates, balance-the-budget tax cut alternative:

Indeed, the President himself has virtually abandoned the rationale he once offered for large tax cuts: a bold "supply side" stimulus for savings and investment. What now impends is a fat and floppy Christmas tree of tax reductions that will surely enlarge the Federal deficit, stimulate consumption and leave inflation untamed.

It is this confused fiscal strategy that leaves the Federal Reserve Board with an essentially impossible task, as its chairman, Paul Volcker, has begun to complain. He is left to battle alone against inflation by tightening the money supply without provoking a lengthy recession. It would be quite a trick.

What the United States needs to defeat inflation and to raise productivity is tighter controls on the budget and a looser rein on the money supply, not the reverse. That way, the economic restraint that's needed to squeeze out inflation would fall more evenly over industry and interest rates would be less of an impediment to new investment.

Mr. Speaker, the Congress should heed the wisdom of the Times editorial board and adopt the anti-inflation, anti-high interest rates, balance-the-budget tax cut alternative, included in the Udall-Obey-Reuss bill.

Since we are rejected economists and embraced entomologists lately, let me say we have the bait here to attract the boll weevils, the gypsy moths and even the med flies and the beekeepers like the gentleman from Massachusetts (Mr. CONTE).

FISCAL POLICY ALONE NOT ENOUGH WITHOUT ADEQUATE ATTENTION TO MONETARY POLICY

(Mr. ECKART asked and was given permission to address the House for 1 minute and revise and extend his remarks.)

Mr. ECKART. Mr. Speaker, I think we all can quickly realize as we come to grips this week with the conclusion

of the budgetary process and the tax cut proposals now pending before us that fiscal policy does, indeed, play an important part in whatever we are going to do to engage in the economic recovery of this country; but fiscal policy alone will not address the situation without adequate attention to monetary policy as well.

This administration refuses to deal with the exorbitantly high interest rates that are plaguing people who wish to buy cars, who wish to buy homes, or who wish to send their sons and daughters to college; yet some of the most expensive and wealthiest oil conglomerates in America can continue their drive to buy Conoco and raise $5 or $5½ billion on 2 or 3 days' notice.

Mr. Speaker, I am deeply concerned. I am concerned that there is no money for loans for students, no money for loans for cars; but yet there is money to buy one of the most wealthy oil companies of America.

No interest rate is too high to pay to buy Conoco.

And while this administration stands idly by, their high interest rate policy spells the ruin for small businessmen and the workingmen and workingwomen of America.

THE TAX BILL

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, this week we will begin consideration of the tax bill. And, before us are two alternatives, the President's bipartisan bill and the Democratic alternative as reported by the Ways and Means Committee.

Is it not ironic that the majority party, responsible for two decades of expanded spending and expanded taxation, is now advocating a tax cut? Is it not ironic that this same party a few months ago claimed such a tax cut to be irresponsible? Can the American people really trust a party that has the personality of Dr. Jekyll and Mr. Hyde?

Recent polls have shown that the vast majority of the American people trust the party of the President to deliver a program of reduced taxes and reduced spending, a program that promises to restore America's economic growth by strengthening incentives to work, save, and invest, by stimulating growth in supply of goods, and by promoting increased investments to create jobs.

I ask my colleagues to review these two alternatives and place your trust in the program that promises a better future for America.

ANOTHER ALTERNATIVE SUBSTITUTE

(Mr. LOWRY of Washington asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOWRY of Washington. Mr. Speaker, both the Hance-Conable and the Ways and Means bill are too inflationary to be acceptable. There is another tax alternative that I hope will be available for our consideration Wednesday. The substitute to be offered by the gentleman from Arizona (Mr. UDALL) goes right to the problem of interest rates in this country. It simply says that balancing the budget, getting rid of the deficit, is more important than the Christmas tree tax versions that are now before us.

Last week before the Banking Committee a panel representing labor, farmers, public power, mayors, and housing all said they believed an amendment to this week's tax bill that would balance the budget at the earliest possible date would have an immediate positive effect on interest rates. That is critical to our economy.

They say, "We would rather see the budget balanced and lower interest rates."

I hope the Members of the House this Wednesday will vote for the Udall commonsense tax proposal. That will send an immediate signal to the Federal Reserve and financial markets. A signal that almost all experts tell us would lower interest rates. We have an opportunity to do just that this week. Let us set aside both the inflationary Reagan-Hance-Conable tax bill and the inflationary House Ways and Means bill and adopt the Udall deficit-eliminating tax alternative.

HOW DO THE PEOPLE FEEL ABOUT THE PRESIDENT'S TAX PROGRAM?

(Mr. CARMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARMAN. Mr. Speaker, this week I was on Long Island, in Huntington, Oyster Bay, Glen Cove, and Babylon, and asked the people how they felt about the President's tax program. A gentleman from Northport put it to me very, very well. He said "You know, I am in favor of having a 25-percent decrease as opposed to a 15-percent decrease." That certainly made sense to me.

He said, "Besides, the President's tax package makes provision for permanent tax relief. Now, how in the world can you argue against that?"

In short, he said, "I want to have tax relief that is going to expand our economy instead of shrinking it. I want a real tax package as opposed to a phony one."

I hope that everybody this Wednesday will vote to support the President's tax package, not because it is good for the Republicans, not because it is good for the Democrats, but because it is for the good of the people.

"I PLAN TO LIVE"

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, I am wearing a button today which says, "I Plan To Live." This button was made up over the weekend in response to President Reagan's comment that even if you give the O'Neill-Rostenkowski tax package every possible benefit of the doubt, even if you assume all their assumptions are correct, that the only grounds for voting for it would be, "Do you plan to die in the next 2 years?"

Clearly, in the third year, a 25-percent reduction is more than 15 and, from that point on out, indexing makes our tax cut permanent, while theirs becomes a tax increase.

We do plan to live. We do think it is time to get away from gimmicks and to get down to some serious long-range commitments: To economic recovery for America, to fighting inflation, to bringing down higher interest rates, creating new jobs; that is why we created the "I Plan To Live" button.

CONGRESS SHOULD ADOPT THE ANTI-INFLATION, ANTI-HIGH INTEREST RATES, BALANCE-THE-BUDGET TAX ALTERNATIVE

(Mr. OBERSTAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OBERSTAR. Mr. Speaker, as the House takes up tax legislation this week, I think it is useful to keep in mind an article published in the June 14, 1981, New York Times by Yale professor and former member of the Council of Economic Advisers, William Nordhaus, which warns against making a commitment now to large multiyear tax reductions, such as those proposed both by the administration and by the Ways and Means Committee.

Professor Nordhaus said:

> The major economic concern with the administration's proposal lies in its inflexibility and inability to adjust to an uncertain future. Giving away all the tax cuts today is like planning the first 10 moves in a chess game before your opponent has revealed his strategy. Bold, but poor strategy.

Mr. Speaker, the Congress should not let today's tax policy become hostage to the uncertain fortunes of the future. We should, instead, take the more cautious, responsible course, and

move toward a balanced budget in 1982, and adopt the anti-inflation, anti-high interest rates, balance-the-budget tax alternative.

If the Members of this body believe the rhetoric of last fall's campaign and the so-called mandate, they will vote to balance the budget with the Reuss-Udall-Obey tax bill rather than create future instability in the money markets, with the alternative tax bills.

THE REAL OPPONENTS OF TAX RELIEF

(Mr. FIELDS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FIELDS. Mr. Speaker, with the day of reckoning quickly approaching, the Democratic leadership in this body has been frantically lobbying Members to adopt the Ways and Means Committee tax bill.

Yet, I believe it is ironic to note that these same individuals are largely responsible for our past misguided economic policies which have resulted in our Government taxing all forms of risk taking so heavily that the risks are no longer worth taking. In the last 10 years, the Democratic leadership gave the American people five "tax cuts," yet over the same 10 years, taxes increased by more than $400 billion.

As a result, we now have the lowest savings rate of any industrialized nation and we rank seventh in productivity, capital investment, and economic growth, after Japan, West Germany, Italy, France, Canada, and Great Britain.

In short, because of these policies, our financially starving industries have been denied the necessary capital to expand or modernize their facilities, to increase their productivity, and to gainfully employ thousands of Americans.

VOTE FOR REPUBLICAN TAX PACKAGE

(Mr. DUNN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DUNN. Mr. Speaker, this week we will be voting on two alternatives for a tax package. As a speaker a moment ago said, we have had five tax packages offered by the Democrats in the last 10 years, resulting in $400 billion in increased taxes. That is not what we from Michigan call a cut.

When we have 30 percent unemployment in the automobile industry, 50 percent unemployment in the housing industry, that is what we call a cut.

We have to choose this week between a 15- and 25-percent cut. Taxes are already set to increase 22 percent. We will not even have a cut under the Democratic package.

But the best reason to vote for the Reagan package is permanent indexing which will leave more power, more control, back where it belongs, in the hands of the American public.

I urge my colleagues to vote for the Republican bipartisan tax package.

REPUBLICAN TAX PACKAGE FOR THE FUTURE

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, as we approach the tax cut battle later this week, what we are really talking about is whether we believe in the future, because that is what the argument is all about.

If my colleagues believe in only a 2-year tax cut, which just happens to get by the next election, then they are going to be for the Democrats' package. But if they really are looking to the future, not just what benefits this generation, but future generations as well, they will support the Republican package because we promise not only a 25-percent tax cut, but a permanent tax cut over the long term, which means to the American people that we are voting for the future.

I think it is about time that this Congress begins to address tomorrow. We have addressed the past for too long. We had a whole string of Democratic Congressmen only today before this body talking about the legacy of the past, their failed economic policies which produced high interest rates. That is a past we do not want to repeat. It is time to enact the President's economic program which rejects that past in favor of the future.

It is time to think what the next generation expects us to do. It is their future we are deciding.

PERSONAL EXPLANATION

(Mr. ROBERTS of South Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROBERTS of South Dakota. Mr. Speaker, I was unavoidably absent from the proceedings of the House last week due to a death in the family. I ask unanimous consent to revise and extend my remarks to explain how I would have voted had I been here.

Rollcall No. 145, "yea"; rollcall No. 146, "yea"; rollcall No. 147, "yea"; rollcall No. 148, "yea"; rollcall No. 149, "yea"; rollcall No. 150, "yea"; rollcall No. 151, "yea"; rollcall No. 152, "yea"; rollcall No. 153, "nay"; rollcall No. 154, "nay"; rollcall No. 155, "yea"; rollcall No. 156, "yea"; rollcall No. 158, "yea"; rollcall No. 159, "nay"; rollcall No. 161, "nay"; rollcall No. 162, "nay"; rollcall No. 163, "yea."

INTERNATIONAL INVESTMENT SURVEY ACT AUTHORIZATION

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1104) to amend the International Investment Survey Act of 1976 to provide an authorization for further appropriations, to avoid unnecessary duplication of certain surveys, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. LAGOMARSINO. Mr. Speaker, reserving the right to object, and I do not intend to object, I make this reservation so that the chairman might explain what the legislation does.

Mr. BINGHAM. Mr. Speaker, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Speaker, this bill is the Senate version of action the House has already taken when it passed on June 8 amendments to the Export Administration Act of 1979.

S. 1104 authorizes appropriations of $4 million in fiscal year 1982 and such sums as may be necessary in future years to carry out the programs of the International Investment Survey Act. The International Investment Survey Act authorizes and directs the Commerce and Treasury Departments to collect and analyze data on the extent and the exact character of foreign investment in the United States. The current authorization expires on September 30, and this bill would permit continued collection and analysis of data on foreign investment in the United States, as well as on U.S. investment abroad. Up-to-date information of this kind is needed on a continuing basis, particularly when we are facing some significant foreign takeover attempts directed at both industrial facilities and natural resources. The information assembled under this act is critical to maintaining vigilance over our economic resources.

As I said at the outset, the House authorized further appropriations to carry out the International Investment Survey Act on June 8, as part of H.R. 3567, a bill authorizing further appropriations for the Export Administration Act of 1979. Due to differing committee jurisdictions in the Senate, that body has passed the International Investment Survey Act authorization as separate legislation, S. 1104.

The Senate included in its bill certain provisions suggested by the administration: Rescheduling certain of the studies to coincide with the economic census, attempting to reduce the cost to the Government and the

burden on the private sector of foreign investment monitoring.

The Senate bill also calls for a feasibility report to the Congress by the Secretary of Commerce on monitoring other countries' restrictions on foreign investment. Such a report would be useful to the Congress as it considers various pending proposals that might restrict investment in this country.

Mr. Speaker, I believe these added Senate measures, which are not in the House-passed bill, are noncontroversial. I am prepared to accept them on behalf of the Committee on Foreign Affairs. Accordingly, I urge the House to pass S. 1104, which would clear the measure for the President's signature.

Mr. LAGOMARSINO. Mr. Speaker, further reserving the right to object, I want to compliment the gentleman from New York for bringing to the floor S. 1104, the authorization for the International Investment Survey Act.

As you will recall, the House passed H.R. 3567 on June 8, which had included a section providing for the International Investment Survey Act authorization. This separate Senate bill is an improvement, in many ways, on our earlier action.

Enactment of S. 1104, as reported, would significantly reduce the paperwork requirements, infringements on personal privacy, the number of individuals affected, and the economic impact of the surveys. The bill would eliminate existing duplicative surveying programs and it would eliminate an expensive survey estimated at approximately $30 million, which might not have produced the information it was designed to yield. In its place, the Treasury Department is required to compile and publish data which currently exists and is readily available, a considerable savings to the taxpayer.

Again, I compliment the gentleman from New York and urge adoption of this legislation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1104

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4(b) of the International Investment Survey Act of 1976 (22 U.S.C. 3103(b)) is amended by striking all of such section before the words "among other things and to the extent he determines necessary and feasible—" and substituting the following:

"(b) With respect to foreign direct investment in the United States, the President shall conduct a benchmark survey covering calendar year 1980, a benchmark survey covering calendar year 1987, and benchmark surveys covering every fifth calendar year thereafter. With respect to United States direct investment abroad, the President shall conduct a benchmark survey covering calendar year 1982, a benchmark survey covering calendar year 1989, and benchmark surveys covering every fifth year thereafter. In conducting surveys pursuant to this subsection, the President shall,".

SEC. 2. Section 4(c)(2) of the International Investment Survey Act of 1976 (22 U.S.C. 3103(c)(2)) is amended to read as follows:

"(2) In addition to the benchmark surveys conducted pursuant to paragraph (1), the President shall annually compile currently available data on United States portfolio investment abroad including items such as data on the magnitude and aggregate value of portfolio investment, form of investments, types of investors, nationality of investors and recorded residence of private holders, diversification of holdings by economic sector, and holders of record. The President shall submit an analysis of such data to the Congress not later than the first day of July of each year.".

SEC. 3. Section 4 of the International Investment Survey Act of 1976 (22 U.S.C. 3103) is amended by redesignating subsections (e) and (f), and all references thereto, as subsections (f) and (g), respectively, and by inserting the following new subsection after subsection (d):

"(e) The Secretary of Commerce shall prepare a report on the estimated cost of monitoring and compiling data on legislation enacted by the major trading partners of the United States, and such other foreign nations as the Secretary deems appropriate, which regulates or restricts foreign inward investment in such foreign nations.".

SEC. 4. Section 8 of the International Investment Survey Act of 1976 (22 U.S.C. 3107) is amended by striking "AND REVIEWS" in the section heading, by striking "(a)" immediately after "SEC. 8.", and by striking subsection (b).

SEC. 5. Section 9 of the International Investment Survey Act of 1976 (22 U.S.C. 3108) is amended by striking "and" immediately after "1980," and by inserting immediately before the period at the end thereof the following: ", $4,000,000 for the fiscal year ending September 30, 1982, and such sums as may be necessary for any subsequent fiscal years".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

ST. LAWRENCE SEAWAY DEVELOPMENT CORPORATION'S ANNUAL REPORT FOR 1980—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Public Works and Transportation:

To the Congress of the United States:

Pursuant to the requirements of Section 10 of the Saint Lawrence Seaway Act of May 13, 1954, I hereby transmit the Saint Lawrence Seaway Development Corporation's Annual Report for 1980. The period covered by this report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *July 27, 1981.*

EAST-WEST TRADE REPORT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Ways and Means:

To the Congress of the United States:

In accordance with Section 411(c) of the Trade Act of 1974, as amended (19 U.S.C. 2441), I herewith transmit the report on East-West Trade.

The report discusses United States trade relations with the Soviet Union, the People's Republic of China and the Eastern European countries.

RONALD REAGAN.

THE WHITE HOUSE, *July 27, 1981.*

□ 1240

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas or nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken on Tuesday, July 28.

ATMOSPHERIC, CLIMATIC, AND OCEAN POLLUTION ACT OF 1982

Mr. SCHEUER. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2803) to authorize appropriations for atmospheric, climatic, and ocean pollution activities of the National Oceanic and Atmospheric Administration for the fiscal year 1982, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2803

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Atmospheric, Climatic, and Ocean Pollution Act of 1982".

PROGRAM AUTHORIZATIONS

SEC. 2. (a) There are authorized to be appropriated to the National Oceanic and Atmospheric Administration of the Department of Commerce for atmospheric, climatic, and ocean pollution programs for the fiscal year 1982 for the following activities:

(1) Marine Ecosystems and Ocean Dumping Research, $18,324,000.

(2) Basic Environmental Services, $159,830,000.

(3) Environmental Satellite Services, $122,236,000.

(4) Public Forecast and Warning Services, $98,856,000.

(5) Specialized Environmental Services, $44,543,000.

(6) Environmental Data and Information Services, $25,041,000.

(7) Global Monitoring of Climatic Change, $4,141,000.

(8) Weather Modification, $9,245,000.

(9) International Projects, $9,027,000.

(b) Funds may be transferred between categories listed in subsection (a), except that no funds may be transferred from any particular category or categories listed in such subsection if the total of the funds so transferred from that particular category would exceed 10 per centum thereof, and no funds may be transferred to any particular category or categories listed in subsection (a) from any other category or categories listed in subsection (a) if the total of the funds so transferred to that particular category would exceed 10 per centum thereof, unless—

(1) a period of thirty legislative days has passed after the Administrator of the National Oceanic and Atmospheric Administration or his designee has transmitted to the Speaker of the House of Representatives and to the President of the Senate a written report containing a full and complete statement concerning the nature of the transfer involved and the reason therefor; or

(2) each committee of the House of Representatives and the Senate having jurisdiction over the subject matter involved, before the expiration of such period, has transmitted to the Administrator written notice to the effect that each committee has no objection to the proposed action.

(c) Of the Weather Service offices authorized under section 2(a), (3), (4), or (5), the station at Williamsport, Pennsylvania shall be accorded priority status within this group.

OTHER AUTHORIZATIONS

SEC. 3. (a) There are authorized to be appropriated to the Secretary of Commerce for the fiscal year 1982 for use by the National Climate Program Office—

(1) $1,200,000, in addition to any other funds authorized to be appropriated for the purpose of conducting climate-related programs, for the purpose of administering the National Climate Program Office;

(2) $700,000 to carry out intergovernmental climate program activities authorized in section 6 of the National Climate Program Act; and

(3) $300,000 to establish experimental climate forecast centers as authorized in section 5(d)(8) of the National Climate Program Act.

CIVILIAN LAND OBSERVING SYSTEM

SEC. 4. (a) The National Oceanic and Atmospheric Administration of the Department of Commerce is hereby authorized to plan for, develop, and operate a civilian land observing system.

(b) The Administrator of the National Oceanic and Atmospheric Administration shall report through the Secretary of Commerce to the President and the Congress not later than January 15, 1982, on all activities undertaken pursuant to this subsection during the preceding calendar year, together with such recommendations for additional legislation as the Administrator deems necessary or desirable.

(c) In addition to any other funds authorized to be appropriated for the purpose of planning for, developing, and operating a civilian land observing system, there are authorized to be appropriated to the National Oceanic and Atmospheric Administration, for the fiscal year 1982, $5,100,000 for the purpose of carrying out the provisions of this section.

REPORTING

SEC. 5. (a) The Administrator of the National Oceanic and Atmospheric Administration shall keep the appropriate committees of the House of Representatives and the Senate fully and currently informed about all aspects of the atmospheric, climatic, and ocean pollution activities for such Administration.

(b) Each year, at the time of the submission of the President's annual budget request, the Administrator shall make available to the appropriate committees of Congress sufficient copies of a report fully describing the funds requested and the atmospheric, climatic, and ocean pollution activities to be carried out with these funds.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from New York (Mr. SCHEUER) will be recognized for 20 minutes, and the gentleman from New York (Mr. CARNEY) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York (Mr. SCHEUER).

Mr. SCHEUER. Mr. Speaker, H.R. 2803, the Atmospheric, Climatic, and Ocean Pollution Act of 1982, provides a 1-year authorization of $498 million for the National Oceanic and Atmospheric Administration. It was reported from the subcommittee and from the full committee with overwhelming bipartisan support, and it strikes that delicate balance between fiscal restraint and adequate support for the necessary and worthwhile research and service activities of NOAA.

Mr. Speaker, I want to note my admiration for the strong leadership of the gentleman from Florida (Mr. FUQUA), the chairman of the Science and Technology Committee. I would also like to commend the gentleman from Kansas (Mr. WINN), the ranking minority member of the committee, for his support of our efforts.

I also am particularly indebted not only to my Democratic colleagues on the subcommittee but also to the gentleman from New York (Mr. CARNEY) for his tireless work in effecting a responsible and workable authorization bill for NOAA in a truly bipartisan way. We could not have had a more diligent and cooperative colleague as the ranking minority member of the subcommittee.

Mr. Speaker, the Atmospheric, Climatic, and Ocean Pollution Act authorizes $498,543,000 for the National Oceanic and Atmospheric Administration (NOAA) to conduct essential research and service activities in a wide variety of areas, including weather forecasting, climatic services, tornado and hurricane warnings, aviation weather, ocean dumping research, and atmospheric research. Included in this authorization figure are $2.2 million for reauthorization of the National Climate Program Act and $5.1 million for NOAA to operate a land remote sensing system from space (Landsat). This is a bill which is responsive to our recognition of this Nation's budgetary problems—the authorization figure in the bill is $4,000 below the administration's request.

H.R. 2803 marks the beginning of a new relationship between Congress and the National Oceanic and Atmospheric Administration. NOAA was established by executive reorganization in 1970 with the mission of providing services and research in the sea and in the air. Over the past 11 years, numerous environmental statutes have given NOAA additional duties, so that the agency is now responsible for weather forecasting, acid rain research, fisheries conservation, the national sea grant program, the National Ocean Pollution Office, the National Climate Office, conservation of marine mammals and sensitive marine habitats, and many more programs which the Congress and the American people have regarded as legitimate and important Government services. Throughout these 11 years, the Congress has voted on numerous occasions to authorize NOAA to carry out a prescribed environmental responsibility. However, we in the Congress have never reviewed and evaluated the missions and programs of this important agency as a whole, with the view of understanding how its components ought to relate to each other and to the needs of the people. We on the Committee on Science and Technology, for instance, feel strongly that the primary mission of NOAA's weather arm ought to be protection of the public health and safety, through timely and accurate weather forecasts and warnings. However, in the heat of the appropriations process, it is easy for Members, for those evaluating these services, and for the Weather Service itself to lose sight of the absolute primacy of the public's health and safety in setting priorities for the Weather Service.

I am confident that consideration of a comprehensive authorization bill for NOAA will provide Members with a good opportunity to review and if necessary reorder the agency's priorities, and that this process will help NOAA

to keep its programs in tune with the needs of the public.

H.R. 2803 is the first step in a process which I hope will culminate in an authorization bill for the entire agency. The bill authorizes funding for approximately $500 million of the agency's $800 million budget, including all of its weather, climatic, and ocean-pollution activities. The NOAA activities not included in this bill—fisheries, sea grant, ocean thermal energy, and hard minerals development—are under the jurisdiction of the Committee on Merchant Marine and Fisheries, and we on the Committee on Science and Technology are confident that in future years the two committees will report to the House a comprehensive authorization bill for the National Oceanic and Atmospheric Administration.

In reporting H.R. 2803, the Committee on Science and Technology increased funding above the administration's request for a limited number of NOAA activities. Funding for these programs was increased either because:

They promise to provide needed informational services to policymakers or the public; and

They embody a critical transfer of research technology which will greatly enhance the usefulness of the service provided.

With respect to information services. H.R. 2803 contains $500,000 for NOAA to begin a comparative study of the environmental effects of waste disposal in various media—land, sea, and air. There is increasing pressure to open up the ocean once again for disposal of wastes. However, because of the shortsighted approach of Federal agencies in the past, crucial cross-media comparisons of environmental impact have never been made, so that the Environmental Protection Agency must regulate waste disposal without an adequate understanding of what the relative impact of various disposal options might be. The committee feels that the most appropriate target for a pioneering study of this sort is the sewage sludge disposal problem in the New York City metropolitan area.

The bill also contains funding above the administration's request for upgrading the climatological data base at the National Climatic Center and for enhanced funding of the National Climate Program Office. Both of these increases are based on the recommendations of the National Academy of Sciences, the National Climate Office's 5-year plan, and our own committee that the greatest near-term improvement that can be made in our national climate effort would be to improve the accessibility and use of the data already available in Government archives. Effective use of climatic data is an essential element in agricultural productivity and water management.

With regard to technology transfer, H.R. 2803 includes enhanced funding for several projects which are expected to greatly improve the Weather Service's ability to warn the public of severe weather. The committee feels that the greatest challenge facing the Weather Service in the coming years will be in providing services, particularly severe-weather warnings, in the face of stable, or shrinking, personnel levels. Thus, in H.R. 2903, our committee strongly supported those projects which showed either promise for improving detection of severe weather or promise of automating routine functions. A modest investment in capital equipment can produce substantial savings in labor and free up the time of skilled personnel in the Weather Service to perform important forecasting tasks. We supported Automation of Field Operations and Services (AFOS) but agree with the Committee on Appropriations that a successful test of the system is needed before increased expenditures are warranted at this time. Funding was provided to accelerate design of the next generation radar (NEXRAD) system. The Weather Service currently uses the outmoded and rapidly failing WSR-57 radars built in the 1950's. Delay of NEXRAD would be a false savings in that it would lead to severely reduced service and to greatly increased maintenance costs. Additional funds were provided for testing and installing automated observing systems, which will eventually be placed at over 500 airports to form the backbone of the ground-based observational network. This program has the potential to free personnel to perform more critical forecast and service functions, and any delay in this program would result in greatly reduced productivity. Finally, the bill recommends enhanced funding for the National Severe Storms Center in Kansas City for its Centralized Storm Information System (CSIS). CSIS allows the forecaster to integrate data from satellites, radar, and other observing systems at a finer scale than is presently possible and is recognized to be the most promising development in the detection of severe storms since the refinement of Doppler radar.

In this bill, the committee also strongly supported the administration's request of $1,876,000 for research in the sources and transport of acid rain. This is a substantial increase from the 1981 appropriation for acid rain research, which was under $100,000. Acid rain is responsible for the biological sterility of hundreds of lakes in the Northeastern United States and in Canada and may, at the present time or in the near future, be responsible for literally billions of dollars of damage to forests and to crops, to metal and stone structures of all sorts, and to human health.

In our hearings this year, we had testimony that not only will the Northeast and Canada continue to be severely afflicted with the problems of acid rain, absent a major intervention on our part, but that also the west coast and the upper Middle West are threatened with the poisonous problem of acid rain on their croplands, on their forestlands, on their waters, and on their structures, in the near future.

The administration's request for acid rain research was timely for several reasons, including the importance of this issue to the Clean Air Act reauthorization and the designation of NOAA as a lead agency in acid rain research by the Energy Security Act of 1980.

We have all observed from the newspapers that when President Reagan visited Canada shortly after he took office, it was made very clear to him that acid rain was a matter of urgent concern to our Canadian friends. More recently, I was a member of a group of American Congressmen and Senators who met with our Canadian colleagues, Members of Parliament and their Environment Minister, in Halifax and again it was made clear to us beyond peradventure that the problem of acid rain and our contribution to their problem was a matter of most urgent concern to them.

So I congratulate President Reagan and the administration for having requested a significant and timely increase in the budget to look into the question of acid rain in a comprehensive and holistic fashion. I fully agree with the administration that we ought to know far more than we do now what will be the costs and benefits of our efforts to use inexpensive sources of fuel in terms of our environment and natural resources. We should have information as to whether a given expenditure in scrubbing coal, for instance, will lead to a linear reduction of emissions and to improvements in the atmosphere. And the fact is that today we do not know. We need far more accurate information to make intelligent decisions from the point of view of cost and benefits when we pass legislation imposing major expenditures upon our utilities and upon our manufacturing industries.

This increase in the budget for acid rain research is totally consistent with this administration's concern that we make more thoughtful decisions affecting the regulatory process and it reflects also the President's own experience in meeting with Canadian leaders and the experience of this Congress reflecting the very high priority that we put on a thoughtful, logical, and workable approach to reducing the problems of acid rain.

So I do congratulate the administration and the President, and I congratulate my colleague, the gentleman

from New York (Mr. CARNEY) for the role that he played in bringing them to this very intelligent and useful decision.

Let me say a few words about section 4 of H.R. 2803, which provides NOAA with $5.1 million to plan for, develop, and operate a civilian land observing system (Landsat). In an era of resource scarcity our committee believes that the ability to obtain and interpret space remote sensing data, and thus to locate and manage natural resources, is of major importance. Our committee believes that a finite period of operation by the Federal Government would greatly minimize the technical, financial, and institutional risks involved in developing Landsat, would preserve our national leadership, and ultimately would enable the private sector to operate a sound land remote sensing system.

Mr. Speaker, in closing, H.R. 2803 provides money for a large number of essential atmospheric and oceanic activities. I urge my colleagues to support these programs, and I recommend H.R. 2803 for immediate passage from the full House, and again I commend my colleague, the gentleman from New York (Mr. CARNEY) for his highly professional and nonpartisan and thoughtful approach to this legislation and his support for it.

Mr. CARNEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise to join with my distinguished colleagues on the Committee on Science and Technology in support of H.R. 2803, the Atmospheric, Climatic, and Ocean Pollution Act of 1982. This bill provides authorization for a wide variety of needed services, forecasting and pollution control activities of the National Oceanic and Atmospheric Administration.

As is the case with many pieces of legislation, H.R. 2803 is a compromise between the desire of some members of our committee to substantially strengthen the programs in the bill through additional funding, and the urgency as seen by others to reduce spending to the maximum extent possible. The resulting bill, I am happy to report, represents a reduction of $4,000 from the President's request, and also modifies several program elements and alters certain priorities in such a manner, in my opinion, as to substantially improve the overall NOAA effort. I am very pleased with this result.

Before describing some of the provisions of the bill, I would like to express my appreciation to Congressman JIM SCHEUER, the chairman of the subcommittee, for his very effective efforts in modifying this bill and improving its overall approach. I know that he would have preferred to expand some programs and funding in some areas, and it is to his credit that, when the committee expressed its desire to reduce spending, he cooperated in formulating the best possible program at the available funding level.

I also want to thank Congressman DON FUQUA, our full committee chairman, and Congressman LARRY WINN, our ranking minority member, for their assistance and leadership in developing an effective NOAA program.

Mr. Speaker, it is usual at this time to discuss some of the specific areas in which the committee has increased funds, and to explain the benefits resulting from these actions. I will, indeed, do so, but first would like to describe several activities for which we reduced the funding, and tell why we thought those decisions were proper.

In the basic environmental services area, we reduced the request for the prototype regional observing and forecasting system (PROFS) from $5 million to $3 million, due to the dependency of the system on various technologies that are not yet fully developed. PROFS will not be implemented until the 1990's, and we felt that, despite its eventual advantages, it could be slowed by several years, with resulting savings applied to more pressing needs.

In the area of environmental satellite services, the committee directed a general reduction of $2 million to defer some of the "insurance" that NOAA had requested in the event of future launch failures. This can be accomplished without leaving a gap in meteorological satellite coverage.

In the weather modification program, we have decreased funding for hurricane modification and associated flight services by $1 million. Over $7 million has been spent since the last attempt to modify a hurricane in 1971, and there is little to show for it. Until various obstacles to hurricane modification are resolved, the committee felt that NOAA's resources in this area would be better directed toward other research.

These are some of the major areas in which we reduced funds. Now let me say a few words about those programs for which we provided additional funding. In one area about which I am particularly concerned, the committee added $500,000 for ocean dumping research, specifically to allow NOAA to immediately commence, in conjunction with other Federal agencies, a cross-media comparison of the environmental effects of waste disposal. As noted by Congressman SCHEUER, there is increasing pressure to again open up the ocean for disposal of certain wastes. We were concerned, however, that increased disposal of a variety of wastes will occur in the ocean without an adequate understanding of the comparative environmental effects of waste disposal by ocean dumping, incineration, landfill disposal, and other options. I believe that our addition of funding in this area will pay good dividends.

Another area in which we provided additional funds is for work of the centralized storm information system at the National Severe Storms Center in Kansas City. CSIS allows the forecaster to integrate data from satellites, radar, and other systems at a finer scale than is presently possible and is recognized to be the most promising development in the detection of severe storms since the refinement of Doppler radar. NOAA requested $620,000 for accelerating development of CSIS in fiscal year 1982, but OMB rejected the request. In light of CSIS's great potential for detection of severe storms, the committee recommended increasing the base funding for this project by $320,000. Again, I believe this is an action that will pay ample dividends.

Finally, one area in which we did not make any funding adjustments but which I nevertheless believe merits special attention is that of acid rain. This remains a vexing subject with some disagreement over the nature of the problem and the proper means to remedy it. What there can be little disagreement about, however, is the extensive damage that has been occurring to lakes, forests, crops, and even building surfaces and human health. Our committee has encouraged NOAA to take a strong leadership role in the Federal acid rain research program, and I want to emphasize that at this time. Much remains to be done on this subject.

Mr. Speaker, in summary, H.R. 2308 is an effective bill providing, for the first time, authorization for a number of needed services and environmental control activities. I support this bill, and urge its passage.

□ 1300

Mr. SCHEUER. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. BROWN).

Mr. BROWN of California. Mr. Speaker, when the full Science and Technology Committee reported the bill H.R. 2803, authorizing appropriations for atmospheric, climatic, and ocean pollution activities of the National Oceanic and Atmospheric Administration for fiscal year 1982, I opposed the arbitrary and unnecessary actions of the full committee. At the last minute, the Science and Technology Committee reduced the authorization recommendations of the Subcommittee on Natural Resources, Agricultural Research, and the Environment and of the Subcommittee on Space Science and Applications. The actual dollar differences are small, and yet I cannot support this bill because, although NOAA will in all probability survive these cuts, I doubt that long-term savings will be gained by them.

For the base National Oceanic and Atmospheric Administration budget, the subcommittee had recommended a 1.6-percent increase over the Reagan budget, for a total of $7,809,000. Instead, the full committee approved a new budget distribution which actually decreased the base program by $3,004,000, or 0.6 percent. The difference between what the subcommittee recommended and what the full committee approved was $10,813,000 for all base NOAA programs. This full committee recommendation is $29,221,000 below the January request by the Carter administration for NOAA's base programs, which I believed was a minimal number at the time.

The second major item in this bill is far more significant in terms of its budgetary impact, and the policy differences between the Carter administration and the Reagan administration. I refer to the civilian land observing system, or Landsat. In this category, the recommendations of the Reagan administration could not be further from the Carter administration. The actions at the subcommittee level indicated support by the committee for proceeding with Landsat, although at a greatly reduced pace. The reductions made by the full committee to the subcommittee recommendations, when compared to what is really needed to proceed, are not of great significance. However, this retreat by the committee is not one I can endorse.

The facts are as follows: The Carter administration requested $123,800,000 to proceed with the development of an operational Landsat system. The Reagan administration disagreed with this decision, and cut the request to $2,100,000—a $121,700,000 reduction. The subcommittee recommended $12,100,000 as the bottom line for NOAA to do the necessary planning for the eventual implementation of an operational Landsat, as well as to proceed with essential long leadtime procurement. The full committee cut this bottom line to $5,100,000 which, while $3 million above the Reagan administration request, is not sufficient for the program needs.

My reasons for opposing this legislation are fairly simple. The Congress, through its authorizing committees, should exercise its independent judgment when reviewing requests by the administration. The committee had before it two differing requests by two separate administrations. We did not, however, have the benefit of any explanation by the Reagan administration as to the reasons for its requests, other than general economic conditions. This is an important consideration, but it is not the overriding consideration when one examines research and development programs which cannot easily withstand sudden stops and starts in authorization. If the work planned is important, the costs associated with dramatic fluctuations in research and development programs will be far greater than the temporary, but imaginary, savings one may find in a single fiscal year. As one who believes the planned work of the National Oceanic and Atmospheric Administration to be important, I cannot support this bill which cuts the recommendations by the subcommittees simply because they were higher than the Reagan administration request.

The substance of the cuts is important, although it is fairly clear that the decision was made in the absence of considering the merits of the cuts. Mr. Speaker, I cannot support this legislation.

Mr. SCHEUER. May I say to my dear friend and colleague from California that I sympathize greatly with his expressions of concern. However, I note that within the spending environment in which we are now functioning an increase in the NOAA appropriation from a 1981 level of $436 million to a 1982 level of $498 million—an increase of $62 million—maintains that agency's level of funding in terms of real dollars.

I fully agree with the gentleman that many of the programs that are going to be terminated or reduced in funding should not be cut.

Mr. CARNEY. Mr. Speaker, I yield as much time as he may consume to the ranking minority member of the full Committee on Science and Technology, the gentleman from Kansas (Mr. WINN).

Mr. WINN. Mr. Speaker, I want to take this opportunity to commend those involved in this program in following through with the normal authorization process.

I would like to recall for some of my friends on the other side of the aisle the fact that just about 10 days ago, or 2 weeks ago, we heard voices from the wilderness crying about the fact that under the reconciliation bill we were leaving out NOAA and the National Science Foundation, FEMA, and FAA. It seems an interesting process to point out that we are now going through the normal procedure and we are beginning to authorize and appropriate on those various bills.

□ 1310

So, their cries here are a little out of line. But, I am pleased to add my voice in support of H.R. 2803, which provides funding of $498,543,000 for atmospheric, climatic, and ocean pollution activities of the National Oceanic and Atmospheric Administration for fiscal year 1982. This bill authorizes for the first time NOAA's important programs in marine ecosystems, ocean-dumping research, basic environmental sciences, environmental satellite services, forecast and warning services, weather modification, and related activities.

While the continuation of these efforts is important, an equally significant feature is the fact that this bill funds these programs at a level slightly below that requested by the President's budget. The members of our committee, especially the minority, worked particularly hard to modify and improve on the NOAA research and development activities in these areas so that the funding provided would not exceed the budget request. I am very proud of the results.

I must note, however, that this achievement would not have been possible without the cooperation of the chairman of the full committee, DON FUQUA, who continues to provide strong leadership and guidance in developing our NOAA legislation. I also want to commend the gentleman from New York (Mr. SCHEUER), chairman of the subcommittee, for his outstanding work. Also contributing to the success of this effort was the committee's ranking minority member, Congressman BILL CARNEY of New York, who proposed a number of specific changes finally adopted by our committee.

As a final note, I want to express my support of the committee's action in providing funding for the centralized storm information system at the National Severe Storms Center. The CSIS allows forecasters to integrate data from satellities, radar, and other systems on a finer scale than is presently possible. In view of the system's great potential for detection of severe storms, I believe its funding is of substantial benefit to the entire Nation.

Mr. Speaker, I believe that H.R. 2803 provides a well-balanced program of atmospheric, climatic, and ocean pollution research and development activities for NOAA. It is a good bill, and I urge its passage.

Mr. CARNEY. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey (Mr. FORSYTHE), a member of the committee.

Mr. FORSYTHE. Mr. Speaker, I rise in support of H.R. 2803, the Atmospheric, Climatic and Ocean Pollution Act of 1982. I am pleased that an authorization bill for a group of activities of the National Oceanic and Atmospheric Administration has reached the floor for the first time, as this represents a milestone in congressional oversight of and guidance to this agency.

The activities of NOAA authorized by this bill are perhaps not as sensitive or as much on the front pages as many others that come before this body, but they are every bit as essential for the public welfare. I am referring to areas such as weather forecasting, tornado and hurricane warning, ocean dumping research, and atmospheric research. Many of these activi-

ties are important to our daily lives, and yet, as in so many other subjects, there are several different approaches and different ways to go about them. This bill, then, not only authorizes the funding for much of NOAA's services and research, but provides firm policy guidance in several areas to assure that the congressional intent is well understood.

One part of NOAA's program that is of particular interest to me as a representative from a coastal State is that on ocean dumping research. In fact, one does not have to be from a coastal State to be concerned about the impacts of continued dumping of sewage sludge into the ocean, a practice still conducted in several parts of the country. I am hopeful that NOAA's research programs may identify useful solutions to this problem.

Mr. Speaker, I support passage of H.R. 2803, and urge that my colleagues support the bill as well.

Mr. CARNEY. Mr. Speaker, I yield 2 minutes to the gentlewoman from Nebraska (Mrs. SMITH).

Mrs. SMITH of Nebraska. Mr. Speaker, I rise to express my concern about some of the priorities in this legislation.

Accurate and timely weather forecasting is of utmost importance to my district. Farmers, ranchers, and pilots all stake their lives and their livelihoods on information from our National Weather Service offices. This desperately needed information about the weather may no longer be available to my constituents and to the constituents of many of my colleagues if the funding priorities in this bill are not altered.

The committee recommends an increase of $7 million for improvements to the automation of field operations and services systems and a decrease of $737,000 for Weather Service offices—a decrease that could cause the closing of 38 part-time Weather Service offices and a reduction of 85 positions.

These part-time Weather Service offices are vital to rural areas. Since this is true, I think several important factors need to be addressed by the committee in the future.

I am concerned that in our year to reduce Federal spending that we risk cutting in haste without the luxury of being able to repent with any effect at leisure. Since I feel so strongly about the proposed cuts for the National Weather Service, I am urging the President to reconsider and review his proposal to close these small stations. I believe we can reorder our priorities without increasing spending because it should be our primary goal to insure that life and property are adequately protected before funding expensive and esoteric programs such as weather modification.

I would like to point out more specifically why our station in the Third District of Nebraska is important.

At present, Nebraska's station in Valentine covers an area north of Pierre, S. Dak., east to Lake Andes, south to North Platte, Nebr., west to Gordon, Nebr., and up to Mount Rushmore in S. Dak. It makes reports to other regional stations, to farmers and ranchers, and to pilots. If the Valentine station is closed, the radar coverage will no longer encompass the area once served by the local station. This is true because the station in Alliance, Nebr., will soon be moved to Scottsbluff, Nebr. This action will move the radar coverage that much further away from Valentine. The circular radar coverage from the new Scottsbluff station will miss Valentine by 25 nautical miles.

It is of great concern to me that just because this station only employs one Federal employee that it is labeled as unimportant. First of all, in addition to the Federal part-time person, Valentine employs three contract observers who take over from 2 p.m. to 8 p.m. each day and work all day Saturdays, Sundays, and holidays. Second, they take care of three observations each day and split up the tour of duty of 17 to 18 hours per day.

NOAA felt that Valentine's closing would be inevitable after August 1, 1981, since the current Federal employee is retiring. But, since this person does have a replacement to man the station after August, this is not a problem.

Valentine's staff also gives weather reports to area AM and FM radio stations. This includes reports for the Merit Dam area which is located 25 miles southwest of Valentine. It is possible that 6,000 people are vacationing at this dam on a long weekend or holiday. No other station in the area can adequately serve this location with weather forecasts.

The Valentine weather station also provides aircraft briefs. The staff takes about 100 calls each month from pilots. This is the only station that gives complete reports for pilots including fog reports and sudden changes in the weather. The regional stations only provide hourly and sometimes incomplete reports for this area which would be inadequate if a severe storm developed within the hour. Finally, regional stations could not give enough advanced notice to the area the Valentine station already covers. Consequently, if a tornado should arise, this disaster could wipe out an entire area without enough advanced notice.

My views are shared by most of the 36 colleagues whose districts are adversely affected and who are joining me in seeking a change in priorities to protect the lives and property of those Americans.

My own Appropriations Committee has attempted to address this personnel problem in a bill that will be considered by the House later this week.

I commend my good friend and colleague, Chairman NEAL SMITH of the Appropriations Subcommittee for handling this matter. The subcommittee has given our stations a 6-month reprieve. This has given us time to seek reconsideration, but the issue remains a live one that is continuing to cause many Members grave concern.

Mr. CARNEY. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. GOLDWATER), a member of our committee.

Mr. GOLDWATER. Mr. Speaker, I rise in support of H.R. 2803. This is the first authorizing effort to get a better handle on what NOAA is doing, and I commend my colleagues on the Science and Technology Committee for making this effort.

I would like to discuss just briefly a matter which my friend and colleague from Nebraska (Mrs. SMITH) was discussing, and that involves NOAA's program concerning the National Weather Service fruit frost forecast and advisory program. The committee has urged NOAA to enter into a cooperative agreement with program users regarding the meteorological equipment which generates data upon which the fruit frost forecasts are based. It is our recommendation, and I want to emphasize this quite clearly, that the equipment be left in place so that the program's users, who are well versed in the operation of the equipment, will continue to receive fruit frost advisories without a break in service with the assistance of private contractors.

Mr. Speaker, I believe that program has made a very good contribution to our agricultural programs, enabling farmers and agriculture experts to better predict and ward off the devastating effect of frost.

I would ask my colleague and chairman of the subcommittee, Mr. SCHEUER, if the report language on page 25 clearly reflects the intent of the committee in recognizing the importance of this program and in fact a phasing out of Government's participation, with the responsibility being picked up by the contractors, and in fact the importance of leaving as much equipment and related kinds of activities in place so that the service can be continued.

Mr. SCHEUER. Yes; I am happy to answer my colleague that that statement on page 25 of our report is a very clear statement of our absolute intent that there will be no break in the service of fruit frost forecasting advisories. We expect the transition to take place, but we are insistent that it be done without any break in the continuity of that highly important advisory service.

Mr. GOLDWATER. I thank the chairman for his contribution. I would also like to recognize the deep concerns and efforts of my colleague from California, BOB LAGOMARSINO, who has been following this program with a great deal of interest and concern.

□ 1320

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. GOLDWATER. I am glad to yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Speaker, I thank the gentleman from California (Mr. GOLDWATER) for yielding, I want to associate myself with his remarks, and I want to commend the committee for dealing with a very difficult problem in a very realistic and responsible way.

I think the recommendation of the committee is workable. While it will not be easy to put this together, I think it can be done. As I say, I think it is a responsible and workable arrangement.

The fruit frost forecast service is very important, especially in California, especially with the specialty crop areas, citrus fruits, and so on.

Mr. Speaker, I thank the gentleman again and commend him for his efforts.

Mr. GOLDWATER. Mr. Speaker, I thank the gentleman from California (Mr. LAGOMARSINO).

I believe that the fruit frost forecast advisory program is important. Although I would personally like to see it retained in its entirety, I recognize the budgetary urgencies that led to its cutback, and I think this phasing out to private contractors and industry participation is a responsible approach to the budgetary matters.

Mr. CARNEY. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, I have no further requests for time, and I would like to close by thanking the committee and the committee staff for their yeoman service. I want to commend the ranking minority member, Mr. WINN, and I thank the chairmen of both the subcommittee and full committee for their cooperation and the help they have given to the minority.

● Mr. DERWINSKI. Mr. Speaker, this bill is a progressive step toward providing for a more intelligent and comprehensive overview of programs under the jurisdiction of the National Oceanic and Atmospheric Administration (NOAA). Up until now, NOAA, for the most part, has been funded primarily through direct appropriations. Under the bill before us, more than half of NOAA's programs will be authorized.

The administration supports this bill since it meshes with its program to provide an effective and efficient bureaucracy.

It is a basic fact of life that changes occur in top-level positions in government when a new administration takes office. That was clearly recognized by the landmark Civil Service Reform Act which laid down special ground rules to govern changes in top executive positions during the early stages of a new transition.

From all the indications, I think the Civil Service Reform Act is working as intended, and certainly has not created obstacles for agencies such as NOAA. I hope NOAA, in turn, will abstain from any empire building and put its emphasis on the quality of performance by its executives already on board.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. SCHEUER) that the House suspend the rules and pass the bill, H.R. 2803, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SCHEUER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

OFFICE OF RESEARCH AND DEVELOPMENT, ENVIRONMENTAL PROTECTION AGENCY AUTHORIZATIONS, 1982

Mr. SCHEUER. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3115) to authorize appropriations for environmental research, development, and demonstrations for the fiscal year 1982, and for other purposes, as amended.

The Clerk read as follows:

H.R. 3115

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Environmental Research, Development, and Demonstration Act of 1982".

PROGRAM AUTHORIZATIONS

SEC. 2. (a) There are authorized to be appropriated to the Environmental Protection Agency for environmental research, development, and demonstration activities for the fiscal year 1982 for the following activities:

(1) for air quality activities authorized under the Clean Air Act—

(A) in the Oxidants research program, $19,076,000;

(B) in the Hazardous Air Pollutants research program, $10,768,000;

(C) in the Mobile Sources research program, $6,253,000;

(D) in the Gases and Particles research program, $29,332,000;

(2) for water quality activities authorized under the Clean Water Act—

(A) in the Water Quality research program, $20,906,000, of which $2,000,000 is authorized for the Great Lakes research program through the Environmental Protection Agency's Large Lakes Research Station, Grosse Ile, Michigan and $1,000,000 is authorized for research to develop environmentally sound methods to control aquatic weeds;

(B) in the Municipal Wastewater research program, $19,585,000, of which $3,200,000 is authorized for the Sludge Management research program;

(C) in the Industrial Wastewater research program, $10,598,000;

(3) for water supply activities authorized under the Safe Drinking Water Act, $29,713,000, of which $5,000,000 is authorized for the Groundwater research program through the Robert S. Kerr Laboratory in Ada, Oklahoma and $500,000 is authorized for a study of ground water protection and quality enhancement in the Long Island Pine Barrens in Suffolk County, New York;

(4) for solid and hazardous waste activities authorized under the Resource Conservation and Recovery Act, $27,046,000, of which $1,200,000 is authorized for environmental studies and a demonstration project for cleanup of hazardous wastes at one or more of the following sites: Coventry, Rhode Island; North Smithfield, Rhode Island; and Wood River Junction, Rhode Island;

(5) for pesticide activities authorized under the Federal Insecticide, Fungicide, and Rodenticide Act, $6,876,000;

(6) for radiation activities authorized under the Public Health Service Act, $2,982,000;

(7) for interdisciplinary activities, $6,484,000;

(8) for toxic substances activities authorized under the Toxic Substances Control Act, $34,008,000;

(9) for energy activities—

(A) in the Energy Control Technology program, $40,987,000;

(B) in the Energy Health Effects program, $7,057,000;

(C) in the Energy Ecological Effects program, $16,335,000;

(D) in the Energy Monitoring Systems program, $480,000;

(E) in the Acid Rain program, $9,037,000.

(b) There are authorized to be appropriated to the Environmental Protection Agency, Office of Research and Development, for fiscal year 1982, for program management and support, $8,712,000.

(c) When he finds it in the public interest, the Administrator of the Environmental Protection Agency is authorized to utilize funds authorized in subsection (a) or (b) for appropriate scientific and professional review of research and development grant, contract, and cooperative agreement applications.

(d) Funds may be transferred between the categories listed in subsections (a) and (b) except that no funds may be transferred from any particular category listed in subsection (a) or (b) to any other category or categories listed in any such subsection if the total of the funds so transferred from that particular category would exceed 10 per centum thereof, and no funds may be transferred to any particular category listed in subsection (a) or (b) from any other category or categories listed in any such subsection if the total of the funds so transferred

to that particular category would exceed 10 per centum thereof, unless—

(1) a period of thirty legislative days has passed after the Administrator of the Environmental Protection Agency or his designee has transmitted to the Speaker of the House of Representatives and to the President of the Senate a written report containing a full and complete statement concerning the nature of the transfer involved and the reason therefor; or

(2) each committee of the House of Representatives and the Senate having jurisdiction over the subject matter involved, before the expiration of such period, has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

(e) The Administrator shall establish a separately identified program of continuing, long-term environmental research and development for each activity listed in subsection (a) of this section. Unless otherwise specified by law, at least 15 per centum of funds appropriated to the Administrator for environmental research and development for each activity listed in subsection (a) of this section shall be obligated and expended for such long-term environmental research and development under this subsection.

SEC. 3. Appropriations made pursuant to the authority provided in section 2 of this Act shall remain available for obligation for expenditures, or for obligation and expenditure, for such period or periods as may be specified in the Acts making such appropriations.

ENCOURAGING HIGH QUALITY RESEARCH

SEC. 4. (a) PEER REVIEW IN PLANNING.—(1) The Administrator of the Environmental Protection Agency shall conduct a study of the use of peer review in research planning by means of a pilot project.

(2)(A) The pilot project shall involve peer review of research planning documents for one or two areas of research at an appropriate time in the Agency planning cycle.

(B) Peer review panels shall be selected by the principal research official of the Agency in accordance with general criteria which shall be developed by the Science Advisory Board (established in section 8 of Public Law 95-155). Members of the panels shall be outstanding members of the scientific or engineering community in areas related to the research plan being reviewed.

(C) The peer review panels shall comment on the technical and scientific quality of the research plans and shall assign relative priorities on the components constituting the research plans in accordance with general criteria established by the Agency and the Science Advisory Board.

(D) The Administrator is authorized to pay to non-Federal members of the peer review panels reasonable and justified expenses incurred by them in carrying out the provisions of this subsection.

(3) The Administrator shall report to the Congress and inform the Science Advisory Board on the results of this study within one year after the date of the enactment of this Act. The report shall include recommendations for future use of peer review in Agency research planning.

(b) REVIEWS OF THE SCIENTIFIC LITERATURE.—(1) Based upon recommendations made pursuant to paragraph (2) of this subsection, the principal research official of the Agency shall commission annually several critical reviews of the scientific, technical, or engineering literature in various fields of importance to the Agency's mission.

(2) The Science Advisory Board shall establish and publish general criteria for use by the principal research official of the Agency in (A) selecting technical areas for review; (B) defining the scope of the review; (C) selecting review processes or reviewers; and (D) determining when a review should be updated.

(3) The principal research official of the Agency shall solicit advice from relevant non-Federal scientific and technical groups in arranging for these critical reviews.

(4) The reviews shall be prepared with the intent of publication in high quality technical journals or as monographs.

(c) ASSURANCE OF DATA QUALITY.—(1) Within one hundred and eighty days after the enactment of this Act the Administrator shall develop and promulgate straightforward procedures, which are accurate and understandable to the nonprofessional for assuring that Agency research programs (whether in-house or by contract or cooperative agreement) produce data that are of verifiable accuracy. Such procedures shall contain data quality assurance protocols including provisions for (A) appropriate, scientifically dependable (and where appropriate standardized), well-characterized sampling plans; (B) well characterized (and where available, standardized) measurement methods including measurement assurance methods; (C) clearly defined data-reduction schemes; and (D) description of the experiment in sufficient detail to permit replication.

(2) Reports of research work supported by the Agency shall state plainly and prominently whether or not the work was performed and reported in accordance with the procedures promulgated pursuant to paragraph (1) of this subsection.

(d) EFFECTIVE DATE.—This section shall take effect on October 1, 1981.

INTEGRATION OF RESEARCH AND DISSEMINATION OF INFORMATION

SEC. 5. (a) The Administrator of the Environmental Protection Agency shall conduct a study on (1) coordination of the Federal government's efforts in environmental research, development, and demonstration, (2) the application of the results of such efforts to environmental problems, and (3) opportunities for improved dissemination of information generated from such efforts and for better cost effectiveness of environmentally related research integration of environmental, health, and other data systems operated by various Federal agencies.

(b) The study shall (1) be developed and managed by the Science Advisory Board in consultation with the program offices of the Environmental Protection Agency and with an interagency advisory committee whose membership includes representatives of the Office of Management and Budget and of all agencies conducting, collecting, or using the results of environmental research, and (2) provide for an oversight and review role by the National Academy of Sciences.

(c) The study shall conclude with a report to be submitted to the President and the Congress eighteen months after the date of the enactment of this Act. The report shall include recommendations for action by the President, the Administrator, other agencies, or the Congress, as may be appropriate.

SEC. 6. No funds authorized to be appropriated under this Act may be used for the purpose of furthering or facilitating an intentional release of radioactive contaminated water from the Three Mile Island Reactor Number Two into the Susquehanna River or its watershed.

The SPEAKER pro tempore (Mr. BENNETT). Is a second demanded?

Mr. CARNEY. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York (Mr. SCHEUER) will be recognized for 20 minutes, and the gentleman from New York (Mr. CARNEY) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York (Mr. SCHEUER).

Mr. SCHEUER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3115 authorizes fiscal year 1982 appropriations of $306 million for the research program of the EPA. This is an authorization equal to the President's request and $60 million below the fiscal year 1981 appropriation.

This funding will support environmental research on air and water quality, drinking water, hazardous waste, pesticides, radiation, toxic substances, and energy.

Mr. Speaker, the bill is essentially the same legislation as reported by the Committee on Science and Technology with overwhelming bipartisan support on May 19. It is, however, brought up as an amendment in order to address two concerns. First, the amendment modifies language in the reported bill that would have directed the EPA to spend specific amounts of appropriations on specified research projects. The Appropriations Committee raised objections to this language, and the amendment is the product of a compromise worked out by our two committees that resolves this particular matter.

Second, Mr. Speaker, the amendment also includes language offered by the gentleman from Pennsylvania (Mr. WALKER) that would prevent the use of any funds authorized to be appropriated under this bill for facilitating the release of radioactive waters from the damaged Three Mile Island reactor into the Susquehanna River.

Mr. Speaker, before I get further into the specifics of this legislation, I would like to thank the chairman of the full committee, the distinguished gentleman from Florida (Mr. FUQUA), as well as the ranking minority member, the gentleman from Kansas (Mr. WINN), for their efforts and outstanding leadership in support of this bill. I would like to express my appreciation to the ranking minority member of the subcommittee, my colleague, the gentleman from New York (Mr. CARNEY), for his exceptionally fine work, professionalism, and cooperation in preparing this legislation.

Mr. Speaker, it is axiomatic that the soundness of our environmental policy decisions depend greatly on the quality of the information considered. In-

formation adequate to the challenge of making some of these very tough and potentially very expensive decisions is vitally important, and can only come from a high-quality research program.

This bill contributes to the goal of insuring development of a high-quality EPA research program by promoting better research planning, improved research coordination, greater distribution and accessibility of the scientific information and generation of more accurate and more reliable data on the environment.

As we discussed a few minutes ago on the NOAA bill, this is an age where obligations that, under the regulatory process, we would impose on industry for cleaning up the air that we breathe, the water that we drink, and the land that we use, are coming under increasingly skeptical and hostile scrutiny as to whether we have considered adequately enough the costs and benefits of these regulatory decisions. We must consider the costs that these decisions would produce for industry, which, of course, Mr. Speaker, inevitably gets passed on to the consumer, and we must also consider the benefits they produce for our society. Without an accurate and reliable data base, without an actual basis for making these decisions, they simply are not going to get the public support they need in our communities across the country nor the support that is essential for their acceptance by this Congress.

In addition to assuring development of a higher quality of EPA research, the bill provides guidance to the agency on the funding and direction of its research that we believe is necessary for dealing with the environmental problems facing our Nation.

The bill authorizes $306.2 million for the research programs of EPA. These authorizations include: $65.4 million for air, $51.1 million for water quality, $29.7 million for drinking water, $27.1 million for hazardous waste, $6.9 million for pesticides, $3 million for radiation, $6.5 million for interdisciplinary, $34 million for toxic substances, $73.9 million for energy, and $8.7 million for program management and support.

While the overall authorization equals the administration's request, the Committee on Science and Technology reported H.R. 3115 with increased funding levels for certain subprograms considered by the bill. I would like to describe briefly these differences.

In the air research program, a $1,000,000 increase is provided for research on the formation and movement of air pollutants in the atmosphere. The National Commission on Air Quality, in its recent report to the Congress, pointed out alarming deficiencies in our knowledge about air pollutants and this increase should help to overcome this weakness.

In water quality research, there is an increase of $3,050,000 which will restore, in part, research programs related to the Great Lakes, aquatic weeds, and toxic pollutants in the water. A small portion of this increase, $200,000, is for the EPA research program on sewage sludge management that they will engage in cooperatively with NOAA. This will be a cross-media study on the comparative costs and benefits of different methods of disposing of ocean sludge. Since we have to make very important decisions about sludge disposal involving billions of dollars of expenditures, this modest increase for EPA and NOAA is critically needed.

The largest increase provided in the bill is for the energy research program, $3,750,000.

□ 1330

Now, Mr. Speaker, we are engaged in a crash program in this country of freeing ourselves of dependence on Persian Gulf oil. This dependence has a devastating effect on our economy. We are recycling over $100 billion a year to oil producers and this has a critical effect on the freedom with which we can make political decisions and diplomatic decisions as well.

So as we move toward exploitation of our own coal deposits, some of which is high-sulfur coal, as we move toward exploiting oil shale, and as we move toward any number of creative alternative sources of producing energy as alternatives to Persian Gulf oil, we will face some serious environmental problems. Thus, the committee places a high priority on insuring that these activities proceed in an acceptable manner which does not degrade either our environment or our health. Responding to this concern, the committee reported the bill with increases in the following energy research areas: $1 million for control technology; $1.25 million for health effects; $1.25 million for ecological effects; and $0.25 million for monitoring systems.

A research effort in the energy program that I wish to note especially is acid rain research. Over $9 million, the administration's request, is provided in the bill for acid rain studies, which is an increase of $1.9 million from the $7.1 million spent on acid rain research by EPA in 1981. This is a critical problem, especially in my own State, New York. I applaud the administration for their commitment to this program and I hope that in the near future, effective steps will be taken to solve this problem.

The final item which this bill provides an increase for is program management and support—$200,000. This increase is specifically for travel to contractor sites and for professional development opportunities and is intended to improve research quality and review of contracted work.

All these increases are offset by a decrease of $4 million in both the toxic substances program and the hazardous waste program. Both of these programs have experienced rapid growth in the past few years and are adequately funded in view of the total Federal effort in these areas.

In closing, it is my feeling that the Nation is confronted with serious environmental, as well as economic problems, that demand viable and effective solutions.

Part of the answer to these problems lies in a strong environmental research program. I think we should all come to the consensus that this is urgently needed. This bill will provide such strength and I urge its adoption.

Mr. CARNEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to rise in support of H.R. 3115, which authorizes environmental research, development, and demonstration activities by the Environmental Protection Agency for fiscal year 1982. There are several reasons why I believe it appropriate, if not essential, that the House pass this bill, and I will discuss each of them in turn.

First, however, I would like to congratulate the chairman of the subcommittee, Mr. SCHEUER, for the outstanding job he has down in shaping this bill and moving it to the floor. This job was made all the more difficult by the early desire of many of our subcommittee members to increase funding in a number of areas, so as to strengthen the environmental research and development program. Unfortunately, this very understandable approach conflicted with the increasingly evident need to reduce spending and maintain programs within the funding levels recommended by the President.

It was to our subcommittee chairman's credit that, recognizing the desire of our committee to put a lid on spending, he worked diligently to identify the best possible program elements within the reduced spending levels available to us. A stronger, more well balanced environmental research and development program has surely resulted from his efforts.

I would also like to thank the chairman of the full committee, Congressman DON FUQUA, and our ranking minority member, Congressman LARRY WINN, for their help and support in bringing this bill to the floor.

Mr. Speaker, before I describe some of the specific programs in this bill, I would like to explain what they do in a general sense. Specifically, these programs provide the information base needed to effectively implement the laws we have already passed to protect the environment, and to solve

a number of urgent environmental problems. The environmental research programs contained in this bill also provide the information foundation on which Congress and the executive branch must rely in order to make sound environmental policy decisions. I think it is essential that we continue the important work being done under these programs, and that full and complete guidance as to the intent of Congress be provided to the Environmental Protection Agency for its conduct of these programs. That is one of the main purposes of this bill.

There is another basic reason why we should provide detailed guidance at this time, and that is to reaffirm our environmental commitment and the sense of the Congress that an aggressive effort must be continued to protect the public health and welfare. I note this fact because there have been some disturbing signs of late, emanating from the Environmental Protection Agency itself, that this commitment may be wavering.

These signs include the decision not to spend an additional $100 million in fiscal year 1981 funding, most of which would come out of the research and development program. Also, EPA has recently undergone a major reorganization which, among other things, split up the Agency's enforcement office, possibly indicating a reduced emphasis on enforcing our environmental laws. Finally, some recent nominations to top positions at EPA indicate that a more proindustry stance will be taken than has been the case in the past. While the pendulum perhaps swung too far on previous occasions in the environmental direction, what we need now is a proper balance, rather than a swing in the opposite direction. The bill before us today is one mechanism for maintaining the needed balance.

Mr. Speaker, our subcommittee chairman has done a very thorough job today of outlining the major provisions of the bill, and I will not attempt to repeat them. However, I would like to mention a few topics in particular and describe why I believe they make worthwhile contributions to environmental research and development.

The bill includes an increase of $200,000 over the President's request, for a total $3.2 million, for sludge management research. The increase is for a cooperative effort with other Federal agencies, such as NOAA, to conduct a multimedia evaluation of the environmental effects of sewage sludge disposal. For several reasons there is increasing pressure to open up the ocean again for disposal of certain wastes. Before this may be permitted, we must have an adequate understanding of the comparative environmental effects of waste disposal by ocean dumping, landfill, incineration, and other available options. That is what this bill would provide, and I endorse this wholeheartedly.

Also in this bill is a provision providing $500,000 for a study of ground water protection and quality enhancement in the Long Island Pine Barrens. This study is considered necessary in that the population and industry of the surrounding area are entirely dependent on ground water as their only water source, and the aquifer underlying this area is the sole source aquifer for the vicinity. The need exists to preserve and enhance this resource, which has become partly contaminated due to intensive land use at the surface. Only by protecting the remaining section of the pine barrens overlying the deepest and purest portion of the aquifer can the natural cycle of pure rainwater replenishment of the aquifer continue, and this heavily populated region be assured safe and adequate drinking water. I am personally committed toward protecting the sole source aquifer underlying Long Island, and support this provision of the bill. Finally, the study will be applicable to other areas of the country that are also served by sole source aquifers, and for which real or potential contamination problems are of concern.

A third provision of note is that which directs $1.2 million for a demonstration project for cleanup of hazardous wastes at several locations in Rhode Island. This action was taken due to the committee's concern that these waste sites constitute a serious environmental problem, as well as a potential threat to public health. At each site the potential exists for ground water, soil, and air contamination by harmful substances known to have deleterious health effects. Given the lack of prior experience with cleanup of such sites, there is a lack of knowledge regarding the technology needed to develop and initiate measures to safeguard the public health and to prevent a potential environmental catastrophe. Consequently, the bill calls for an EPA-sponsored demonstration project which will help to provide the information necessary to safely and efficiently address the health and environmental problems associated with the dump sites. Such a demonstration project would also hopefully provide EPA with information for broader application and use in meeting its responsibilities under the Agency's toxic waste programs.

Finally, the bill includes over $9 million for EPA's research program on acid rain. I do not want to go into detail on the effects of acid rain on lakes and forests, crops, building surfaces, and human health. I will just say it is essential that we conduct research on the causes of acid rain, its impact, and the means to mitigate its effects. EPA conducts a major part of the Federal effort in this area, and the continuation and expansion of this effort, as called for by this bill, is necessary beyond any doubt.

Mr. Speaker, I will conclude my statement by noting that H.R. 3115 provides authorization for environmental research and development programs that are vital to the continued well being of the Nation. The bill also reaffirms our commitment to maintaining a safe and attractive environment for our people. I urge its passage.

Mr. Speaker, I yield such time as he may consume to the ranking minority member of the full committee, the gentleman from Kansas (Mr. WINN).

Mr. WINN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, the bill before us, H.R. 3115, provides funding of $306,236,000 for research and development activities of the Environmental Protection Agency for fiscal year 1982. It will permit the continuation of essential efforts in the control of hazardous wastes, pesticides, radiation, and toxic substances, and will also continue programs that maintain the quality of our air and drinking water.

Although I am pleased that our committee has reported a bill that provides the proper emphasis in each of these areas, and includes several new initiatives that will be described by the members of the subcommittee responsible for this subject, I am particularly pleased by the fact that we have stayed within the President's requested budget in doing so. I think it is important that spending levels be considered just as urgent as programmatic considerations in preparing bills such as the one before us now, and I would note that the minority members of our committee worked especially hard to achieve this result.

I would like to commend the chairman of our committee, Congressman DON FUQUA, for his leadership in recognizing the need to strike the proper balance, and to thank him for his cooperation and support in developing the best possible environmental research and development program. I would also like to recognize Congressman BILL CARNEY, the ranking minority member of the subcommittee, for his exceptionally hard work and several creative modifications to the original proposal, both factors which resulted in the committee's adoption of the bill.

Mr. Speaker, I support the adoption of H.R. 3115.

□ 1340

Mr. CARNEY. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey (Mr. FORSYTHE), a member of the committee.

Mr. FORSYTHE. Mr. Speaker, I rise in support of H.R. 3115, the Environmental Research, Development and Demonstration Act of 1982. This bill demonstrates our continuing commit-

ment to maintaining a clean environment, and lays the basis for obtaining information needed to improve our environment in the face of new threats and increasing sources of pollution.

Aside from its programmatic aspects. H.R. 3115 also demonstrates that it is possible to maintain sound Government policies without going overboard on spending. As other members of the Committee on Science and Technology have already noted, this bill is within the President's budget request. This is a fact of which our committee is justifiably proud, and a practice which I hope will continue on other bills, and in future years as well.

In this respect, I wish to offer my congratulations to the several members of our committee on both sides of the aisle who worked toward achieving a balanced budget on the EPA bill, Special credit is due to our ranking minority member, LARRY WINN, and to the ranking minority member of the responsible subcommittee, BILL CARNEY.

Mr. Speaker, this bill addresses problems of acid rain, ground water protection, sludge management, toxic dump sites, air pollution, and other matters that affect us not as individuals, not as representatives of particular areas or regions, but as citizens of the United States. These problems need to be faced up to, and that is what the research and development programs in this bill help us to do. I urge the passage of H.R. 3115.

Mr. CARNEY. Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania (Mr. WALKER), a member of the committee.

Mr. WALKER. Mr. Speaker, I rise in support of the legislation before the House. One of the longstanding complaints against the Environmental Protection Agency has been that it has far too frequently been in a rush to regulate. As a result, critics claim, too many of EPA's regulations have been impossible to meet. Over the years, many of those regulations have been found by the courts to be based on either flawed research, or insufficient research.

This bill authorizes the environmental research activities of EPA for the coming year. In 4 years of service as the ranking minority member on the subcommittee which oversees this program, I learned that we must have a first-class research capability in this area. Only through good research can we ever hope to get good regulations. Even those critics of the Agency must realize that good research can protect us from bad regulations. On the merits, this bill deserves the support of all Members.

Mr. Speaker, I want to commend the distinguished gentleman from New York, the chairman of the subcommittee, for the work he has done on this legislation, which I support enthusiastically. Could the gentleman tell me if the committee agrees with me that the intent of section 6 of the bill is to prevent the Administrator of EPA from doing anything to further any plan to dump the radioactive waste water resulting from the Three Mile Island nuclear accident into the Susquehanna River?

Mr. SCHEUER. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from New York (Mr. SCHEUER).

Mr. SCHEUER. The gentleman from Pennsylvania, the author of section 6, is exactly correct. The purpose of this particular section is aimed at preventing the intentional dumping of those radioactive waters from the crippled reactor into the river.

Mr. WALKER. And would the gentleman from New York also agree that this section only applies to the damaged reactor, and not to the other reactor at Three Mile Island?

Mr. SCHEUER. The gentleman from Pennsylvania is correct. The language specifically refers to reactor 2 and does not affect the undamaged unit which is reactor No. 1.

Mr. WALKER. Mr. Speaker, I would also like to ask my friend, the gentleman from New York who serves as the ranking minority member on the subcommittee, if he also agrees with the chairman of the subcommittee as to the effect of this section?

Mr. CARNEY. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from New York.

Mr. CARNEY. I would assure the gentleman from Pennsylvania that I fully agree with my colleague from New York that the chairman of our subcommittee has correctly stated the purpose and the effect of this section.

Mr. WALKER. Mr. Speaker, I want to thank both of the gentlemen from New York for their assurances. This is highly meritorious legislation which is the keystone of our efforts to protect the environment. In the last Congress, I was honored to serve as the ranking minority member of the subcommittee which developed this legislation and I can assure the House that without a strong program of research and development it is absolutely impossible to regulate with confidence. The committee has done an excellent job of examining the program and has made a number of excellent suggestions for establishing priorities. I fully support the bill and I urge my colleagues to join me in voting for its passage.

I would also like to point out that section 6 of the bill contains a prohibition against the Administrator of the Environmental Protection Agency doing anything to further or facilitate the intentional release of any radioactive water from the crippled Three Mile Island nuclear reactor. This provision is in response to those who have continually advocated that more than 600,000 gallons of radioactive water resulting from the accident at Three Mile Island can be safely dumped into the Susquehanna River.

Mr. Speaker, I represent tens of thousands of Pennsylvanians who live in the shadow of Three Mile Island and who draw their drinking water from the Susquehanna River. We lived through the disaster. We lived through the recovery. We lived with the fact that we were misled, and that we were not told the truth on many points. We were manipulated by the media and by petty bureaucrats, and we lived through that, too. But each time a new proposal surfaces to dump that radioactive water into our water supply, we rise up and say, "Enough is enough."

The issue here is simple. The proponents of dumping that radioactive water into our drinking water supply know that there are other ways of disposing of it that are safe, but they cost somewhat more. So they must think that the almighty dollar is more important than thousands of people whose only mistake is living downstream from Three Mile Island.

Americans are willing to spend millions of dollars to save the life of a single downed airman. This section, Mr. Speaker, is our way of sending a message to those bankers and lawyers and engineers who cannot seem to understand that people are more important than profits. Human life is a precious thing. We are telling them that they can not save a few dollars and risk thousands of lives and the fragile ecosystems of the Susquehanna River and Chesapeake Bay. The risks are just too great.

Mr. SCHEUER. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. BROWN).

Mr. BROWN of California. Mr. Speaker, the bill before the House today, H.R. 3115, authorizing fiscal year 1982 appropriations to the Office of Research and Development of the Environmental Protection Agency is one whose passage I opposed in the full Science and Technology Committee. The committee's actions would seriously jeopardize the effectiveness of environmental research and development programs, and reduce the Government's credibility in promulgation, implementation, and enforcement of environmental regulations. Major legislation will be reviewed during this Congress and significant policy changes are likely to be recommended by this administration in the environmental area. It is irresponsible to erode the R. & D. base by which Congress must make its environmental policy decisions. It is naive to believe that industry and the private sector will bear the major burden of research and produce the significant data by

which we make decisions to protect the public health and the environment. It is the very lack of an adequate data base that opponents of responsible regulation use to justify elimination of standards and regulations.

Over the past years EPA R. & D. programs have experienced serious and real cuts. I believe these cuts have gone too far and regret that I cannot support this legislation.

□ 1350

Mr. SCHEUER. Mr. Speaker, I yield 5 minutes to the distinguished chairman of the full committee, the gentleman from Florida (Mr. FUQUA), and I would like to thank him for his outstanding leadership in support of this bill.

Mr. FUQUA. Mr. Speaker, I want to commend the gentleman from New York (Mr. SCHEUER) and the distinguished gentleman from New York (Mr. CARNEY), the ranking minority member of the subcommittee, for the outstanding work they did in developing this bill under very difficult circumstances. In light of the budget constraints that we are faced with, I think they did a very good job within the limits of funds that were available, and I do want to commend them for that.

Mr. Speaker, H.R. 3115 authorizes fiscal year 1982 appropriations of $306.2 million for the research programs of the Environmental Protection Agency, equal to the President's request and $60 million below the fiscal year 1981 appropriation. This funding will support environmental research on air water quality, drinking water, hazardous waste, pesticides, radiation, toxic substances, and energy.

The research programs authorized by this bill will have a profound impact on the future health and well-being of the general public and our environment. These programs generate knowledge about the nature of environmental pollutants and the means by which these pollutants may be controlled and diminished.

Environmental contaminants such as hazardous waste, toxic substances, energy-related pollutants, and others present real dangers to our society. We must know what these dangers are and how they can be mitigated. With this knowledge, we can develop sound and reasonable strategies for protecting our environment while striking a proper balance between societal and economic goals.

The research programs of the Environmental Protection Agency serve an important service. They not only produce information needed to implement our environmental statutes, but information that the Nation needs to make environmental policy decisions. This legislation gives the necessary authorization and guidance for these efforts and I strongly urge its favorable consideration by my colleagues in the House.

In closing I would like to comment on one program authorized in the bill that is of special interest to me—aquatic weed research.

Aquatic weeds are a major environmental problem in my State and in the other Sun Belt States. These weeds adversely affect water quality and marine life and cause flooding. Research is needed to learn how to control these weeds in ways other than by chemical or mechanical means, which are potentially harmful to marine life and humans.

For the past 4 years, the Congress has directed EPA to conduct research in aquatic weed control. The Agency has been slow to carry out such a program. As a result, the bill again authorizes $1 million for the EPA to support an aquatic weed research program.

I hope that the new administration will see fit to carry out this effort since it is vitally important.

Mr. CARNEY. Mr. Speaker, I have no further requests for time.

Mr. SCHEUER. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore (Mr. BENNETT). The question is on the motion offered by the gentleman from New York (Mr. SCHEUER) that the House suspend the rules and pass the bill, H.R. 3115, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SCHEUER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill H.R. 3115, just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

TRANSFER OF MARITIME ADMINISTRATION TO DEPARTMENT OF TRANSPORTATION

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4074) to revise the laws pertaining to the Maritime Administration, as amended.

The Clerk read as follows:

H.R. 4074

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Maritime Act of 1981".

SEC. 2. The Maritime Administration of the Department of Commerce is transferred to the Department of Transportation.

SEC. 3. There are transferred to the Department of Transportation and vested in the Secretary of Transportation all functions, powers, and duties relating to the Maritime Administration of the Secretary of Commerce and of officers and offices of the Department of Commerce.

SEC. 4. There shall be at the head of the Maritime Administration an Administrator, who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall be compensated at the rate provided for level III of the Executive Schedule. The Maritime Administrator shall report directly to the Secretary of Transportation and shall perform such duties as the Secretary of Transportation shall prescribe.

SEC. 5. In carrying out any function transferred by this Act, the Secretary of Transportation may exercise any authority available by law to the Secretary of Commerce with respect to such function and the actions of the Secretary of Transportation in exercising such authority shall have the same force and effect as if exercised by the Secretary of Commerce on the day preceding the effective date of this Act.

SEC. 6. The personnel employed in connection with, and the assets, liabilities, contracts, property, facilities, records, and unexpended balance of appropriations, and other funds employed, held, used, arising from, available to, or to be made available in connection with the functions and offices, or portions thereof, transferred by this Act, including all Senior Executive Service positions, subject to section 202 of the Budget and Accounting Procedures Act of 1950, shall be transferred to the Secretary of Transportation for appropriate allocation. Personnel employed in connection with functions transferred by this Act shall be transferred in accordance with any applicable laws and regulations relating to transfer of functions. Unexpended funds transferred pursuant to this section shall be used only for the purposes for which the funds were originally authorized and appropriated, except that such funds may be used for the expenses associated with the transfer pursuant to this Act.

SEC. 7. The Director of the Office of Management and Budget shall make such determinations as may be necessary with regard to functions, offices, or portions thereof transferred by this Act, and shall make such additional incidental dispositions of personnel, assets, liabilities, grants, contracts, property, records, and unexpended balances of appropriations, authorizations, apportionments, allocations, and other funds held, used, arising from, available to, or to be made available in connection with such functions, offices, or portions thereof, as may be necessary to carry out the provisions of this Act.

SEC. 8. With the consent of the Secretary of Commerce, the Secretary of Transportation may use the services of such officers, employees, and other personnel of the Department of Commerce as needed to implement this Act.

SEC. 9. (a) All orders, determinations, rules, regulations, permits, grants, contracts, agreements, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective by the President, any Federal department or agency or official thereof, or by a court of

competent jurisdiction, in the performance of functions which are transferred under this Act to the Secretary of Transportation or the Department of Transportation, and

(2) which are in effect at the time this Act takes effect

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or revoked in accordance with law by the President, the Secretary of Transportation, or other authorized official, a court of competent jurisdiction, or by operation of law.

(b)(1) This Act does not affect any proceedings, including notices of proposed rulemaking, or any application for any license, permit, certificate, or financial assistance, pending on the effective date of this Act, but such proceedings and applications, to the extent that they relate to functions so transferred and except as provided in paragraph (2), shall be continued at the Department of Transportation. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this Act had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or revoked by the Secretary of Transportation, by a court of competent jurisdiction, or by operation of law. This subsection does not prohibit the discontinuance or modification of any such proceeding under the same terms and conditions and to the same extent that the proceeding could have been discontinued or modified if this Act had not been enacted.

(2) Actions of the Maritime Subsidy Board pending on review before the Secretary of Commerce on the day preceding the effective date of this Act shall remain with the Secretary of Commerce, unless otherwise agreed between the Secretary of Commerce and the Secretary of Transportation, for final administrative disposition as though this Act had not been enacted.

(3) The Secretary of Transportation may promulgate regulations providing for the orderly transfer of proceedings continued under paragraph (1).

(c) Except as provided in subsection (e)—

(1) the provisions of this Act shall not affect actions commenced prior to the effective date of this Act, and

(2) in all such actions, proceedings shall be had, appeals taken, and judgments rendered in the same manner and effect as if this Act had not been enacted.

(d) No action or other proceeding commenced by or against any officer of the Maritime Administration in his official capacity shall abate by reason of the enactment of this Act. No cause of action by or against the Maritime Administration or by or against any officer of the Maritime Administration in his official capacity shall abate by reason of the enactment of this Act.

(e) If, before the date on which this Act takes effect, the Secretary of Commerce is a party to an action, and under this Act any function of the Secretary of Commerce which is the subject of the action is transferred to the Secretary of Transportation, then such action shall be continued with the Secretary of Transportation substituted as a party.

(f) Orders and actions of the Secretary of Transportation in the exercise of functions transferred under this Act shall be subject to judicial review as if such orders and actions had been by the Secretary of Commerce exercising such functions immediately preceding their transfer. Any statutory requirements relating to notice, hearings, action upon the record, or administrative review that apply to any function transferred by this Act shall apply to the exercise of such function by the Secretary of Transportation.

SEC. 10. With respect to any function or office transferred by this Act and exercised on or after the effective date of this Act, reference in any other Federal laws to the Maritime Administration or any of its predecessor agencies or any officer or office the functions of which are so transferred shall be deemed to refer to the Secretary of Transportation, other official, or component of the Department of Transportation to which this Act transfers such functions.

SEC. 11. If any provisions of this Act or the application thereof to any person or circumstance is held invalid, neither the remainder of this Act nor the application of such provision to other persons or circumstances shall be affected thereby.

SEC. 12. CONFORMING AMENDMENTS.—(1) Title 5, United States Code, is amended as follows:

(A) Section 5314 is amended by inserting "Administrator, Maritime Administration", at the end thereof.

(B) Section 5315 is amended by striking "(8)" following the words "Assistant Secretaries of Commerce", and substituting "(7)".

(C) Section 5316 is amended by striking "Maritime Administration, Department of Commerce".

(2) Section 203 of the Act of August 14, 1946 (7 U.S.C. 1622), is amended by inserting ", or the Secretary of Transportation," after "regulatory body" in subsection (j).

(3) Title 10, United States Code, is amended as follows:

(A) Section 2664(a) is amended by—

(i) striking "Secretary of Commerce, and the Chairman of the Federal Maritime Board" in the introductory paragraph and substituting "Secretary of Transportation"; and

(ii) striking "Secretary of Commerce or the Federal Maritime Board by 1950 Reorganization Plan Numbered 21, effective May 24, 1950 (64 Stat. 1273)" in paragraph (3) and substituting "Secretary of Transportation".

(B) Section 2665 is amended by—

(i) striking "or the Federal Maritime Board" in subsections (a) and (b); and

(ii) striking "Federal Maritime Board" at the end of subsection (b) and substituting "Department of Transportation".

(C) Section 4745(a) is amended by striking "Secretary of Commerce" and substituting "Secretary of Transportation".

(D) Section 7361(b) is amended by—

(i) striking "Secretary of Commerce" and substituting "Secretary of Transportation"; and

(ii) striking "Department of Commerce" and substituting "Department of Transportation".

(4) Section 148 of title 14, United States Code, is amended by striking "United States Maritime Commission", and substituting "Maritime Administrator".

(5) Section 42(a) of Public Law 91-469 (15 U.S.C. 1507a) is repealed.

(6) The Act of February 14, 1903 (15 U.S.C. 1511), is amended by striking "(c) Maritime Administration;", and redesignating the paragraphs accordingly.

(7) Sections 3 and 8 of the Act of February 14, 1903 (15 U.S.C. 1512 and 1519), are amended by striking "shipping," and ", and the transportation facilities".

(8) Section 2 of Public Law 96-371 (15 U.S.C. 1519a) is amended by striking "Secretary of Commerce" and substituting "Secretary of Transportation".

(9) Section 500 of the Act of February 28, 1920 (15 U.S.C. 1528), is amended by striking "Secretary of Commerce" wherever it appears and substituting "Secretary of Transportation".

(10) Section 3 of the Act of July 19, 1940 (16 U.S.C. 18b), is amended by striking "United States Maritime Commission" and substituting "Department of Transportation".

(11) Section 1 of the Act of March 4, 1915 (31 U.S.C. 686), is amended by striking "Federal Maritime Commission" in subsection (a) and substituting "Maritime Administration".

(12) Section 2 of the Act of April 29, 1941 (40 U.S.C. 270f), is amended by striking "Secretary of Commerce" and substituting "Secretary of Transportation".

(13) Section 602 (c) and (d) of the Act of June 30, 1949 (40 U.S.C. 474), is amended in paragraph (16) by—

(A) striking "United States Maritime Commission" wherever it appears and substituting "Maritime Administration"; and

(B) striking "Commission" and substituting "Administration".

(14) Section 516 of Public Law 90-580 (40 U.S.C. 483a) is amended by inserting "the Department of Transportation," immediately after "the Department of Commerce,".

(15) Section 203 of the Act of June 30, 1949 (40 U.S.C. 484), is amended in subsection (i) by—

(A) striking "United States Maritime Commission" and substituting "Maritime Administration"; and

(B) striking "Commission" and substituting "Administration".

(16) Section 2 of the Act of June 22, 1942 (41 U.S.C. 50), is amended by striking "United States Maritime Commission" and substituting "Secretary of Transportation".

(17) Section 5 of the Act of July 1, 1944 (41 U.S.C. 105), is amended by striking "Chairman of the Maritime Commission" and substituting "Secretary of Transportation".

(18) Section 12 of the Act of July 1, 1944 (41 U.S.C. 112), is amended by striking "Maritime Commission" in subsection (h) and substituting "the Department of Transportation".

(19) Section 102 of the Act of August 9, 1955 (42 U.S.C. 1973cc-1), is amended by striking "Secretary of Commerce" in clause (10) and substituting "Secretary of Transportation".

(20) Section 1 of the Home Port Act (46 U.S.C. 18) is amended by striking "Director of the Bureau of Marine Inspection and Navigation of the Department of Commerce" and substituting "Secretary of Transportation or the Secretary of the Treasury".

(21) The Act of July 24, 1956, is amended by—

(A) striking "Secretary of Commerce" wherever it appears in sections 1, 2, and 3 (46 U.S.C. 249, 249a, and 249b) and substituting "Secretary of Transportation"; and

(B) striking "with the concurrence of the Secretary of the Treasury" in sections 1 and 3 (46 U.S.C. 249 and 249b).

(22) The Act of June 30, 1961 (46 U.S.C. 289b), is amended by striking "Secretary of Commerce" and substituting "Secretary of Transportation".

(23) The Act of October 25, 1919 (46 U.S.C. 363), is amended by striking "United

States Shipping Board" and substituting "Department of Commerce and the Maritime Administration".

(24) Section 6 of the Act of May 27, 1936 (46 U.S.C. 382b), is amended by striking "Secretary of Commerce" wherever it appears and substituting "Secretary of the Department in which the Coast Guard is operating or the Secretary of the Treasury".

(25) The Suits in Admiralty Act is amended by—

(A) striking the last sentence of section 3 (46 U.S.C. 743);

(B) striking "United States Shipping Board" in section 7 (46 U.S.C. 747) and substituting "Maritime Administration";

(C) striking "or the United States Shipping Board" in section 9 (46 U.S.C. 749);

(D) striking "or of the United States Shipping Board" in sections 10 and 11 (46 U.S.C. 750 and 751); and

(E) striking "and the United States Shipping Board" in section 12 (46 U.S.C. 752).

(26) Section 9 of the Shipping Act, 1916 (46 U.S.C. 808) is amended by striking "United States Maritime Commission", "Commission", and "Secretary of Commerce" wherever they appear and substituting "Secretary of Transportation".

(27) Section 12 of the Shipping Act, 1916 (46 U.S.C. 811) is amended by—

(A) striking "Commission" wherever it appears and substituting "Secretary of Transportation";

(B) striking "It" wherever it appears and substituting "The Secretary";

(C) striking "it" wherever it appears and substituting "the Secretary"; and

(D) striking "its" wherever it appears and substituting "his".

(28) Section 14a of the Shipping Act, 1916 (46 U.S.C. 813) is amended by—

(A) striking "Commission" wherever it appears and substituting "Federal Maritime Commission"; and

(B) striking "Secretary of Commerce" and substituting "Secretary of Transportation or the Secretary of the Treasury".

(29) Section 21 of the Shipping Act, 1916 (46 U.S.C. 820) is amended in subsection (a) by—

(A) striking "Commission" in the first sentence and substituting "Federal Maritime Commission and Secretary of Transportation";

(B) striking "it" in the first sentence and substituting "it or him"; and

(C) striking "Commission" wherever it appears in the second sentence and substituting "Commission or Secretary".

(30) Section 37 of the Shipping Act, 1916 (46 U.S.C. 835) is amended by striking "Commission" and "Secretary of Commerce" wherever they appear and substituting "Secretary of Transportation".

(31) Sections 40 and 42 of the Shipping Act, 1916 (46 U.S.C. 838 and 840) are amended by striking "Commission" wherever it appears and substituting "Secretary of Transportation".

(32) Section 41 of the Shipping Act, 1916 (46 U.S.C. 839) is amended by—

(A) striking "Commission" wherever it appears and substituting "Secretary of Transportation"; and

(B) striking "its" and substituting "his".

(33) Section 1 of the Merchant Marine Act, 1920 (46 U.S.C. 861) is amended by striking "United States Maritime Commission" and substituting "Secretary of Transportation".

(34) Section 5 of the Merchant Marine Act, 1920 (46 U.S.C. 864) is amended by striking "Commission" wherever it appears and substituting "Secretary of Transportation".

(35) Section 101 of the Act of June 30, 1948 (46 U.S.C. 864a) is amended by striking "Commission" and substituting "Secretary of Transportation".

(36) Section 1 of the Act of June 29, 1949 (46 U.S.C. 864b) is amended by—

(A) striking "Maritime Commission" and substituting "Maritime Administration of the Department of Transportation"; and

(B) striking "Commission" and substituting "Maritime Administration".

(37) Section 6 of the Merchant Marine Act, 1920 (46 U.S.C. 865) is amended by—

(A) striking "Commission" wherever it appears and substituting "Secretary of Transportation";

(B) striking "it" wherever it appears and substituting "he";

(C) striking ", upon an affirmative vote of not less than five of its members, spread upon the minutes of the board,"; and

(D) striking "its" wherever it appears and substituting "his".

(38) Section 1 of the Act of May 16, 1972 (46 U.S.C. 865a), is amended by striking "Secretary of Commerce" and substituting "Secretary of Transportation".

(39) Section 7 of the Merchant Marine Act, 1920 (46 U.S.C. 866) is amended by—

(A) other than in the second proviso, striking "Commission" wherever it appears and substituting "Secretary of Transportation"; and

(B) striking "its" and substituting "his".

(40) Section 8 of the Merchant Marine Act, 1920 (46 U.S.C. 867) is amended by—

(A) striking "Commission" wherever it appears and substituting "Secretary of Transportation";

(B) striking "it" and substituting "he"; and

(C) striking "its" and substituting "his".

(41) Section 9 of the Merchant Marine Act, 1920 (46 U.S.C. 868) is amended by—

(A) striking "Commission" wherever it appears and substituting "Secretary of Transportation"; and

(B) striking "it" in the last sentence and substituting "he".

(42) Section 10 of the Merchant Marine Act, 1920 (46 U.S.C. 869) is amended by—

(A) striking "Commission" wherever it appears and substituting "Secretary of Transportation"; and

(B) striking "it" wherever it appears and substituting "he".

(43) Section 12 of the Merchant Marine Act, 1920 (46 U.S.C. 871) is amended by—

(A) striking "Commission" wherever it appears and substituting "Secretary of Transportation";

(B) striking "it" the first two times it appears and substituting "him".

(C) striking "its" and substituting "his".

(44) Section 13 of the Merchant Marine Act, 1920 (46 U.S.C. 872) is amended by—

(A) striking "Commission" wherever it appears and substituting "Secretary of Transportation"; and

(B) striking "it" and substituting "him".

(45) Section 17 of the Merchant Marine Act, 1920 (46 U.S.C. 875) is amended by—

(A) striking the first paragraph; and

(B) striking "Commission" wherever it appears and substituting "Secretary of Transportation".

(46) Section 19 of the Merchant Marine Act, 1920, as amended, is amended by—

(A) striking "The Commission" the first time it appears and substituting "The Secretary of Transportation"; and

(B) inserting after subsection (a) the following undesignated paragraph:

"And the Federal Maritime Commission is authorized and directed in aid of the accomplishment of the purposes of this Act:".

(47) Section 21 of the Merchant Marine Act, 1920 (46 U.S.C. 877) is amended by striking "Commission" and substituting "Secretary of Transportation".

(48) Section 25 of the Merchant Marine Act, 1920 (46 U.S.C. 881) is amended by striking "Secretary of Commerce and the chairman of the Commission shall each appoint one representative" and substituting "Secretary of Transportation shall appoint one representative and the Secretary of the Department in which the Coast Guard is operating shall appoint one representative (except in a case where such Secretary is the Secretary of Transportation in which case he shall appoint both representatives)".

(49) Section 27 of the Merchant Marine Act, 1920 (46 U.S.C. 883) is amended by striking "Secretary of Commmerce" in the fourth proviso and substituting "Secretary of Transportation".

(50) Section 28 of the Merchant Marine Act, 1920 (46 U.S.C. 884) is amended by—

(A) striking "Commission" wherever it appears and substituting "Secretary of Transportation"; and

(B) striking "it" in the second sentence and substituting "he".

(51) Section 202 of the Merchant Marine Act, 1928 (46 U.S.C. 891b) is amended by—

(A) striking "Commission" and substituting "Secretary of Transportation"; and

(B) striking "its" wherever it appears and substituting "his".

(52) Section 203 of the Merchant Marine Act, 1928 (46 U.S.C. 891c) is amended by striking "Commission" wherever it appears and substituting "Secretary of Transportation".

(53) Section 705 of the Merchant Marine Act, 1928 (46 U.S.C. 891w) is amended by striking "Maritime Commission" and substituting "Secretary of Transportation".

(54) Subsection B of the Ship Mortgage Act, 1920 (46 U.S.C. 911) is amended by striking "Commission" in paragraph (4) and substituting "Secretary of Transportation".

(55) Subsection O of the Ship Mortgage Act, 1936 (46 U.S.C. 961) is amended by—

(A) inserting a period after the word "Commission" in subsection (a);

(B) inserting "The Secretary" at the beginning of the second sentence of subsection (a);

(C) striking "Board" wherever it appears in subsections (a) and (d) and substituting "Secretary of Transportation"; and

(D) striking "Secretary of Commerce" wherever it appears in subsection (e) and substituting "Secretary of Transportation".

(56) Subsection V of the Ship Mortgage Act, 1920 (46 U.S.C. 982) is amended by striking "Secretary of Commerce is" and substituting "Secretary of Transportation or the Secretary of the Treasury are".

(57) Subsection W of the Ship Mortgage Act, 1920 (46 U.S.C. 983) is amended by striking "Secretary of Commerce" and substituting "Secretary of Transportation or the Secretary of the Treasury".

(58) Section 201 of the Ship Mortgage Act, 1936 (46 U.S.C. 1111) is amended by—

(A) repealing subsection (a);

(B) in subsection (d)—

(i) inserting "and the Secretary of Transportation" after "The Commission";

(ii) striking "its" and substituting "their"; and

(iii) striking "it" and substituting "them";

(C) in subsection (e)—

(i) inserting "and the Secretary of Transportation" after "Commission" when it first appears and at the beginning of the second sentence;

(ii) striking "its" in the second sentence and substituting "their"; and

(E) striking "Secretary of Commerce" wherever it appears and substituting "Secretary of Transportation".

(156) Section 2 of the Act of June 29, 1949 (50 U.S.C. App. 1738a), is amended by striking "Commission" wherever it appears and substituting "Secretary of Transportation".

(157) Section 11 of the Merchant Ship Sales Act (50 U.S.C. App. 1744) is amended by—

(A) striking "Commission" wherever it appears and substituting "Secretary of Transportation";

(B) striking "it" the first time it appears in subsection (a)(1) and where it appears in subsection (a)(2) and substituting "the Department of Transportation";

(C) striking "it" where it appears for the second time in subsection (a)(1) and substituting "he"; and

(D) striking "Secretary of Commerce" and substituting "Secretary of Transportation".

(158) Section 12 of the Merchant Ship Sales Act (50 U.S.C. App. 1745) is amended by—

(A) striking "Commission" wherever it appears and substituting "Secretary"; and

(B) striking "Secretary of Commerce" and substituting "Secretary of Transportation".

(159) Section 26 of the Merchant Marine Act, 1920 (46 U.S.C. 882) is amended by striking the words "Secretary of Commerce", and substituting "Secretary of the

Department in which the Coast Guard is operating."

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes, and the gentleman from California (Mr. MCCLOSKEY) will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we do have one committee amendment which strikes section 7 of H.R. 4074, as reported, and inserts new language for that section. The purpose of section 7 is to give temporary authority to the Director of the Office of Management and Budget to take actions to resolve disagreements between the Secretaries of Commerce and Transportation which may arise in connection with the transfer of the Maritime Administration.

I understand that it is traditional to give such limited authority to the Director of OMB when an agency is shifted. Our committee became concerned, however, that the language of section 7, as reported, was too broad. Therefore, the committee is offering substitute language which perfects our intent. The new language makes clear that this authority granted to the Director of OMB is temporary, and that it will terminate 60 days after enactment.

This authority is quite limited in that it gives the OMB Director the ability to resolve certain questions relating to the transfer only when the Secretaries of Commerce and Transportation cannot mutually agree on the particular items in dispute. Finally, the language in no way gives the OMB Director any of the normal and substantive functions, powers, or duties of the Maritime Administration, the Secretary of Commerce, or the Secretary of Transportation.

This amendment does not alter the original intent of the committee when it adopted section 7 of H.R. 4074 but instead perfects that language to make clear that the authority of the OMB Director is limited and temporary.

Mr. Speaker, I rise to support H.R. 4074, the Maritime Act of 1981. This legislation transfers the Maritime Administration from the Department of Commerce, where it is now located, to the Department of Transportation.

The Merchant Marine and Fisheries Committee reported H.R. 4074 on July 9, 1981, by a unanimous voice vote. Previously, we held a hearing on the proposed transfer on June 22, 1981. All witnesses supported the idea. In fact, our committee has not heard of any opposition to the bill from a single individual or organization.

The Secretary of Transportation, Drew Lewis, speaking for the administration on June 4, 1981, announced its intent to shift the Maritime Administration (MarAd) from the Department of Commerce to the Department of Transportation (DOT). Subsequently, I joined with Vice Chairman BIAGGI, Mr. SNYDER, ranking minority member of our committee, and Mr. MCCLOSKEY, ranking minority member of the Merchant Marine Subcommittee, to introduce H.R. 4074 on July 8, 1981.

The Maritime Administration is the Federal agency responsible for programs aiding the development, promotion, and operation of the U.S. merchant marine. Its responsibilities include:

Administering the operating differential subsidy program, by which the Federal Government pays the difference between certain costs of operating ships under the U.S. flag and foreign competitive flags on essential services;

Administering the construction differential subsidy program, which reimburses U.S.-flag vessel operators for the higher costs incurred by having ships built in American shipyards;

Providing loan guarantees for the construction, reconstruction, and reconditioning of ships;

Entering into capital construction fund agreements which grant tax deferrals on moneys to be used for the acquisition, construction, or reconstruction of ships;

Administering a war risk insurance program which insures operators and seamen against losses caused by hostile action if domestic commercial insurance is not available;

Conducting research and development activities to improve the efficiency and economy of the merchant marine;

Requisitioning and allocating ships owned by U.S. citizens when national defense needs so require;

Maintaining a national defense reserve fleet of Government-owned ships which can be activated and operated when national defense needs so require; and

Encouraging the training of merchant seamen by operating the U.S. Merchant Marine Academy to train new merchant marine officers, providing grant-in-aid programs for State maritime academies, and providing various courses in marine specialties for merchant seamen.

Placing MarAd in DOT is a logical and desirable step. This action will allow one Department to be responsible for all aspects of transportation policy. While various transportation modes—air, rail, highway, ocean waterborne—all have problems special to themselves, they must be viewed as parts of an overall national transportation network. To deal with the concerns of one mode separately is to invite unintended, perhaps adverse, consequences for other modes. The advent of intermodalism—where freight packed in a container is shipped from one point to another via two or more different modes at a single quoted price—has further intertwined the individual parts of the transportation network. Having MarAd in the Department of Transportation will make it easier to see maritime issues as part of larger transportation issues.

It is advantageous for the executive branch of Government to have a primary spokesman for maritime issues. With the transfer of MarAd, the Secretary of Transportation will now assume that role. The Secretary's authority over other Government transportation functions should enhance his role and stature as maritime spokesman. H.R. 4074 directs that the Administrator of MarAd will report directly to the Secretary. The committee anticipates that both the Secretary and the Administrator will seek to consult extensively with persons representing all segments of the maritime industry, as well as with the appropriate committees of Congress.

The U.S. Coast Guard deals with many matters of concern to the Maritime Administration. When MarAd joins the U.S. Coast Guard as a part of DOT, the two will be able to coordinate even better their programs of mutual concern.

The cost of the transfer is estimated at $600,000 but this will not require new authorization or appropriations. The funds will be taken from the general budget of the Maritime Administration.

In summary, the committee concurs with the administration's desire to place MarAd in the Department of Transportation. This action will allow maritime questions to be addressed as part of a national transportation system. The Secretary of Transportation should be an effective spokesman on maritime issues for the executive branch. The committee looks forward to a close working relationship with the Secretary when the transfer is complete.

At this point, let me add my personal appreciation for the interest and support for the maritime industry already shown by Secretary Lewis. He played a key role in persuading the Senate to defer efforts to repeal statutes guaranteeing that American flagship operators carry a portion of Government-implied Public Law 480 cargoes. I feel confident that he will play a key and constructive role in developing policies which encourage our country's maritime enterprises.

I urge my colleagues to support me in voting for H.R. 4074, the Maritime Act of 1981.

□ 1400

Mr. McCLOSKEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I speak in favor of H.R. 4074. The bill is simple. It transfers the Maritime Administration from the Department of Commerce to the Department of Transportation.

The bill is supported by the administration, and I know of no opposition to the bill. It makes no substantive changes in the maritime laws but simply provides the necessary language to make the transfer.

The bill will bring together in one Cabinet office all of the major transportation agencies of the Government, and I think that this is helpful. When the Department of Transportation was created back in the 1960's, the Maritime Administration was retained in Commerce, and I think most people in industry today concede that because of the intermodal problems that the distinguished gentleman from North Carolina mentioned it is appropriate that all of these agencies be under a single Cabinet officer.

The second aspect of the bill which I think should make it attractive to the House is the fact that it creates a single Cabinet officer as the spokesman for the maritime policy of the Government.

We have had problems in the past because an Assistant Secretary of Commerce was quite often outweighed by either a Secretary of State or even the Attorney General of the United States on key matters of maritime policy. I think that under Secretary Lewis, the Department of Transportation will have both the authority and the clout to organize and propose the overall revisions in maritime policy which we have been working toward for the past several years.

Mr. JONES of North Carolina. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. BIAGGI).

Mr. BIAGGI. Mr. Speaker, as chairman of the Subcommittee on Merchant Marine and as one who has been closely involved in all aspects of maritime trade and policy issues, I rise in support of H.R. 4074—a bill to transfer the Maritime Administration of the Department of Commerce to the Department of Transportation. I urge my colleagues on both sides of the aisle to support this transfer—a transfer that is not opposed by any of the affected parties.

Testimony received during the hearing on this subject indicated a sincere administration desire to develop coherent policies for the revitalization of our seagoing transportation system—a system that continues to reduce the share of our exports that is carried on U.S.-flag vessels. Presently, U.S. flag-vessels carry less than 5 percent of our Nation's foreign trade. When World War II ended, we had the world's largest merchant marine. In 1947, U.S.-flag vessels transported nearly 60 percent of U.S. export and import cargoes.

In the early 1950's, our merchant vessel fleet stood No. 1 in both fleet size and capacity. Today the United States is 11th in fleet size and stands 8th in capacity—with less than 600 merchant vessels. The Soviet Union, on the other hand, has recognized the importance of a commercial maritime presence in the world and has been vigorously expanding its merchant fleet at a rate unprecedented during peacetime.

For example, on January 1, 1949, we had 3,560 merchant vessels of 1,000 gross tons and over—representing a deadweight capacity of 37.7 million tons, while the Soviets had 423 merchant vessels—representing a deadweight capacity of only 1.8 million tons. Thirty years later, on January 1, 1979, the United States had 584 vessels, while the Soviets had about 2,475 merchant vessels. Today, the United States has only about 578 vessels in the privately owned merchant fleet.

I have cited the above figures in an attempt to highlight the weakened status of our merchant marine in the hope that there will be a continuing recognition that we cannot permit our merchant marine to continue its precipitous decline. The President has often stated that there is a primary need to provide a unity of "direction for all government programs affecting maritime interests of the United States." I hope that this transfer will provide him and his administration with the necessary tools to develop and implement a national maritime policy that will insure a healthy U.S. merchant marine.

Mr. McCLOSKEY. Mr. Speaker, I yield such time as he may consume to the distinguished ranking minority member on the full committee, the gentleman from Kentucky (Mr. SNYDER).

Mr. SNYDER. Mr. Speaker, there is virtual unanimity of support for the initiative which we are considering today to transfer the Maritime Administration from the Department of Commerce to the Department of Transportation. During the committee's recent hearings all witnesses supported the transfer.

I would like to note for the record, five major reasons for the transfer which were presented by the administration witnesses. These were:

First, the increased opportunity to develop a viable maritime policy in the context of all overall transportation policy;

Second, to provide a central spokesman for maritime interests;

Third, to allow DOT to develop an intermodal national transportation system;

Fourth, to allow DOT to evaluate the entire national transportation system to improve export performance; and

Fifth, to manage and coordinate Federal maritime policy and programs by placing the primary maritime agencies (the Coast Guard and MarAd) in one department.

The Secretary of Transportation has assured the committee that the Maritime Administration will report directly to him as do all other modal administration heads. Further, he has said that MarAd would retain a major role in development of maritime policy.

Subsequent to the committee's hearings and markup it was brought to my attention that the Maritime Administrator will be compensated at level III of the executive pay schedule. Apparently two of the Department of Transportation's modal Administrators are compensated at level II of the executive pay schedule—the heads of the Federal Aviation Administration and the Federal Highway Administration. The concern that has been voiced to me is that the Maritime Administrator may not be on an equal footing with the other modes because of the difference in compensation. While most are confident that this fear will not be realized during the tenure of the current Secretary of Transportation, Drew Lewis, it could be justified in future administrations.

Therefore, I would hope that the Secretary of Transportation will review this problem and investigate whether a good case can be made for raising the Maritime Administrator to level II.

As the chairman noted, the bill today contains a simple authorization for the transfer of MarAd, accompanied by technical changes to reflect this transfer and a committee amendment. This amendment clarifies the role which the Director of the Office of Management and Budget will play in facilitating the transfer of the Maritime Administration from the Department of Commerce to the Department of Transportation. The committee amendment specifies that the power conferred upon the Director of the Office of Management and Budget pertains to resolving disputes between the Commerce Department and Transportation Department and shall terminate 60 days after enactment. The bill contains no substantive maritime policy.

I join the chairman in supporting this legislation and urge our colleagues to approve it.

□ 1410

Mr. Speaker, I might add in another vein that this is perhaps the last bill that one of our more influential staff members on the minority works on before departing the committee and going into private practice. Jack Sands came with our committee in 1975 and during that time he served 2 years as the chief counsel for the minority. He came with the Merchant Marine Subcommittee and he has given dedicated service to our committee basically in maritime matters.

I would like to take this opportunity to pay tribute to him for the contribution he has made to our committee work during that time.

Mr. Speaker, I yield back the balance of my time.

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore (Mr. BENNETT). The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the bill H.R. 4074, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 4074, just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

MINERAL LEASING ACT AMENDMENTS

Mr. SANTINI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4053) to amend section 21 of the act of February 25, 1920, commonly known as the Mineral Leasing Act.

The Clerk read as follows:

H.R. 4053

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 21 of the Act entitled "An Act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain", approved February 25, 1920 (41 Stat. 437), as amended (30 U.S.C. 241), is further amended as follows:

(1) In subsection (a)—

(A) delete "section" wherever it appears and substitute therefor "subsection"; and

(B) delete from the first sentence "so much of" and "or land adjacent thereto, as may be required for the extraction and reduction of the leased minerals,"; and

(C) delete from the second sentence "to" the first place it appears and substitute therefor "except when the Secretary determines that a larger area may be required to permit long-term commercial operations. Such lands shall", and delete "to" the second place it appears and substitute therefor "such lands shall"; and

(D) delete from the eighth sentence "one lease" and substitute therefor "two leases in any one State and more than four leases nationwide", and delete from the eighth sentence "except that" and substitute therefor: "*Provided,* That a lessee may acquire one additional lease in any State where it has achieved production in commercial quantities from both existing leases in that State and it is within ten years of exhausting the commercially recoverable reserves on one of the existing leases: *Provided further,* That the limitation on ownership of oil shale leases shall not apply with respect to leases issued to avoid bypass of small acreages of Federal oil shale resources which could not otherwise be mined economically. However,".

(2) In subsection (c)—

(A) redesignate the existing subsection (c) as paragraph (c)(1); and

(B) add thereafter the following new paragraph:

"(2) The Secretary is authorized to issue leases pursuant to subsection (a) allowing the mining, extraction and disposal of other mineral deposits, in addition to oil shale deposits, that are contained in the lands covered by the lease, subject to such terms, conditions, and restrictions as may be imposed by the Secretary consistent with subsection (a), notwithstanding other provisions of this Act with respect to the leasing of such mineral deposits.".

(3) At the end thereof add the following new subsection:

"(d) The Secretary may lease such additional lands as may be required in support of operations necessary for the recovery of oil shale. Such operations may include the disposal of oil shale waste and the materials removed from mined lands, and the building of plants, reduction works, and other facilities connected with oil shale operations, but shall exclude the removal of any mineral deposits contained in such additional lands. The Secretary may issue such leases after consideration of the need for such lands, impacts on the environment and other resource values, and upon a determination that the public interest will be served thereby. Any lease issued under this subsection for any lands the surface of which is under the jurisdiction of a Federal agency other than the Department of the Interior shall be issued only with the consent of that other Federal agency and shall be subject to such terms and conditions as it may prescribe. A lease issued under this subsection shall be for such periods of time and shall include such lands as the Secretary determines to be necessary to achieve the purposes for which the lease is issued, and shall contain such provisions as he determines are needed for protection of environmental and other resource values. Any lease issued under this subsection shall provide for the payment of an annual rental which shall reflect the fair market value of the rights granted and which shall be subject to such revisions as may be needed from time to time to continue to reflect the fair market value. Lands leased under this subsection shall remain subject to leasing under the other provisions of this Act where such leasing would not be incompatible with the lease issued under this subsection.".

(4) Subsection (b) of section 21 of such Act is amended by striking out "this section" and inserting in lieu thereof "subsection (a)".

SEC. 2. Section 27(e) of the Mineral Leasing Act of 1920 (41 Stat. 448; 30 U.S.C. 184(e)) is amended as follows:

(1) In paragraph (1) insert after the words "under this Act" the words "or, with respect to oil shale, exceeds in the aggregate the maximum number of leases allowed to any one person, association, or corporation under this Act,".

(2) In paragraph (2)—

(A) insert after the words "against the total acreage" in the first sentence the words "or the total number of oil shale leases";

(B) insert after the words "total acreage" in the second sentence the words "or number of oil shale leases"; and

(C) insert after the words "under this Act" in the second sentence the words, "or, in the case of oil shale, the maximum number of leases allowed to any one person, association, or corporation under this Act.".

The SPEAKER pro tempore. Is a second demanded?

Mr. LAGOMARSINO. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Nevada (Mr. SANTINI) will be recognized for 20 minutes, and the gentleman from California (Mr. LAGOMARSINO) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Nevada (Mr. SANTINI).

Mr. SANTINI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today we consider H.R. 4053, to assist the Nation's efforts to achieve energy independence. There exists 1.8 trillion barrels of shale oil in the three States of Colorado, Utah, and Wyoming. Of this, about one-third, or 600 billion barrels, is recoverable by known technology. This 600-billion-barrel figure equals about 90 percent of the world reserves of conventional oil. Overall, 72 percent of the oil shale lands in these three States is federally owned.

The best part about this bill, however, is that it will not cost the taxpayers any money. In fact, by removing statutory roadblocks to oil shale leasing on the public lands, we will bring into the Treasury much needed revenues that will result from competitive bidding for oil shale tracts. One such tract in Colorado brought $210 million to the Government.

Third, the bill resolves some long-standing bureaucratic barriers to oil shale leasing.

In 1974, the Interior Department embarked on a prototype oil shale leasing program offering for competitive bid two leases each in the States of Colorado, Utah, and Wyoming. The program has met with only limited success. One lease in Colorado is stymied by not having a tract for the disposal of spent shale. The two leases in

Utah had to be combined to provide enough shale to support one project and the leases offered in Wyoming received no bids because they were uneconomic. H.R. 4053 addresses these problems.

H.R. 4035 amends the Mineral Leasing Act of 1920 to allow responsible oil shale leasing to occur in Colorado, Utah, and Wyoming.

It adjusts lease sizes so that commercially viable leases can be issued in the poorer quality shale areas of Utah and Wyoming thereby lessening the impacts on the rich shale areas on the western slope of Colorado.

The bill limits to one the number of leases any company can own and prevents them from acquiring an additional lease until they have achieved both commercial production and are within 15 years of exhausting the recoverable resource on the existing lease.

The bill includes two provisions aimed at conservation of the resource. The first provision allows the Secretary of the Interior to lease minerals that are commingled with oil shale provided they cannot otherwise be mined economically. Second, there exists a provision to allow for maximum recovery by leasing small tracts which would be bypassed as uneconomic by themselves.

The bill solves the problem of disposing shale after the oil has been extracted by providing noncontiguous offsite leases for this purpose. No oil shale development may occur on these tracts and they are available only to Federal lessees.

H.R. 4053 assures the Governors of the affected States with a strong role in consulting with the Secretary prior to leasing. He is empowered to recommend specific stipulations to be included in the lease to protect the well-being of the residents of the State.

Finally, the bill allows for prepayments of lease rentals to be distributed by the Governor to the impacted communities.

I urge my colleagues to support H.R. 4053 and want to commend Congressman DAN MARRIOTT, Congressman RAY KOGOVSEK, and Congressman JIM HANSEN for their assistance in this measure.

The SPEAKER pro tempore. On this motion before the House, a second was not required.

The Chair recognizes the gentleman from Utah (Mr. MARRIOTT) for 20 minutes.

Mr. MARRIOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would just simply say that I would like to join those who are in line to thank the gentleman from Nevada (Mr. SANTINI) for helping us get this bill out in such an expeditious manner, holding hearings, and making this a priority item in the Interior Committee.

We are appreciative and we thank him for his cosponsorship of this legislation.

Mr. Speaker, the importance of H.R. 4053 lies in the fact that it will remove the institutional barriers which have hindered commercial development of oil shale on Federal lands to date. Since the first Federal oil shale tracts were leased in the mid-1970's, none has yet reached commercial production. This deplorable state of affairs is due in part to the fact that when the oil shale provision of the Mineral Leasing Act was written in 1920, no one knew what problems would attend the actual development of oil shale. Now since prototype leasing has occurred and experimentation has taken place, the shortsightedness of the original oil shale provision of the Mineral Leasing Act is becoming evident. I would like to point out two of the most significant institutional barriers to oil shale development that would be removed by this bill.

First, oil shale leasing in Wyoming and Utah is hindered by the fact that the deposits in those States are not rich enough to support a commercial operation within the confines of a 5,120-acre tract. Accordingly, the bill permits the acreage of a lease tract to be increased based on an assessment by the Secretary of the reserve potential of a tract and the reserves necessary to support a commercial operation. With this provision it will no longer be necessary for oil shale development to be concentrated in Colorado, where the richest reserves are found, thus limiting the impacts on that State while permitting other States to share in the development of the resource.

Second, commercial scale oil shale development is currently hindered by the restrictions on leasing of additional lands for the disposal of spent shale. The Federal lease tract currently held by Rio Blanco could proceed to commercial development if it were provided with lands for offsite disposal. This legislation would finally make that possible.

This oil shale bill is solid and sound because it specifically addresses the legal problems which are currently keeping oil shale development from achieving its commercial potential. Oil shale has a lot to offer us, for it is potentially the most attractive source of liquid fuels from a synthetic fuel source. It takes less energy to convert oil shale's kerogen to gasoline than it does to convert coal to gasoline and environmentally, it may be more desirable. Now no one is going to claim at this stage that we know all the environmental impacts of oil shale development or, on the other hand, that water availability is not a problem. The technology for commercial development is still untried. But it is in part because we have failed to give American enterprise the backing necessary to their operations that we do not yet have a proven technology or answers to our environmental questions.

We must remove institutional barriers to full-scale development while retaining reasonable safeguards and regulations if we want to permit responsible development of oil shale to go forward. It is important that America know what the real potential of its oil shale resources is, and this legislation, H.R. 4053, is designed to lead us toward that understanding. I am convinced H.R. 4053 offers the soundest solution to responsible development of our oil shale potential and I urge my colleagues to join me in voting for this legislation today.

Mr. Speaker, I would like to thank the gentleman from Utah (Mr. HANSEN) for his contribution to this legislation. He also is a cosponsor, as well as the gentleman from Colorado (Mr. KOGOVSEK), who offered some very timely amendments in the committee.

The question has been asked on many occasions what are the barriers to oil shale development. And as far as I am concerned, most of those barriers are institutional barriers posed by the Federal Government.

We think we can solve the technological problems of developing oil from oil shale. We have tremendous reserves of oil shale in Utah, Wyoming, and Colorado. We think we can solve the environmental problems of developing oil from oil shale. The only thing we really have to do that is of any concern to this Congress is removing the institutional barriers.

Deposits in Utah and Wyoming are not rich enough to support a commercial operation under the confines of 5,120 acres, which is currently the law under the Mineral Leasing Act of 1920.

Therefore, what this legislation does is extend that figure and allows the Secretary to lease additional lands for oil shale development if he thinks it is necessary for commercial production to a figure of 15,460 acres.

□ 1420

The second barrier is one that makes a commercial development unprofitable at this point. Commercial-scale operations are hindered by restrictions on leasing additional lands for offsite disposal. This legislation also gives the Secretary the discretion to issue additional leases for the building of plants, the storing of waste disposal, and that type of thing; anything other than mining.

So this bill, H.R. 4053, simply gives the Secretary discretion to increase the amount of land necessary to make production economically feasible. It allows additional lands for production

if a company has achieved production and is within 15 years of exhausting its reserves. It allows for multimineral development, and it allows for the leasing of additional lands to avoid the bypass of small acreage that cannot be mined economically.

This bill is not a Federal land giveaway, as some might claim. It is simply facing up to the realities of our time, that in some States, primarily Utah and Wyoming, we cannot establish a viable oil shale operation on 5,120 acres of land. We need more land because of the poorer quality of the reserve in order to make oil shale profitable.

I would urge that all of our colleagues support this legislation. As the chairman has said, it has passed many times before. It has the support of the administration; it has the support of the Senate; it has the support of, I am sure, this House, and I would urge that we get on with developing oil shale and, hopefully, becoming energy independent within the next 20 years.

Mr. Speaker, I reserve the balance of my time.

Mr. SANTINI. Mr. Speaker, I withdraw the pending motion, because the amendment was not at the desk, and resubmit the motion.

The SPEAKER pro tempore. Since the original motion did not require a second, it may be withdrawn at this time.

The Clerk read the bill as follows:

H.R. 4053

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act to promote the mining of coal phosphate, oil, oil shale, gas, and sodium on the public domain", approved February 25, 1920 (41 Stat. 437), as amended (30 U.S.C. 241), is further amended as follows:

(1) Amend section 21 to read as follows:

"SEC. 21. (a) That the Secretary of the Interior is hereby authorized to lease to any person or corporation qualified under this Act any deposits of oil shale, native asphalt, solid and semisolid bitumen, and bituminous rock (including oil-impregnated rock or sands from which oil is recoverable only by special treatment after the deposit is mined or quarried) belonging to the United States and the surface of the public lands containing such deposits, under such rules and regulations, not inconsistent with this Act, as he may prescribe. No lease hereunder shall exceed five thousand one hundred twenty acres of land, but if the Secretary determines that a 5,120-acre tract contains deposits of insufficient thickness and grade to support economically viable, commercial-scale operations, he may increase the acreage to be contained in the lease not to exceed 15,360 acres after (1) considering the reserve potential of the tract and other relevant factors, (2) determining that such additional acreage is necessary to permit the development of deposits contained therein under economically viable, commercial-scale operations and (3) documenting the basis for his decision. Such land shall be described by the legal subdivisions of the public-land surveys, or if unsurveyed, such lands shall be surveyed by the United States, at the expense of the applicant, in accordance with regulations to be prescribed by the Secretary of the Interior. Leases may be for indeterminate periods, upon such conditions as may be imposed by the Secretary of the Interior, including covenants relative to methods of mining, prevention of waste, and productive development. For the privilege of mining, extracting, and disposing of the oil or other minerals covered by a lease under this section the lessee shall pay to the United States such royalties as shall be specified in the lease and an annual rental, payable at the beginning of each year, at the rate of 50 cents per acre per annum, for the lands included in the lease, the rental paid for any one year to be credited against the royalties accruing for that year; such royalties to be subject to readjustment at the end of each twenty-year period by the Secretary of the Interior: *Provided,* That for the purpose of encouraging the production of petroleum products from shales the Secretary may, in his discretion, waive the payment of any royalty and rental during the first five years of any lease: *Provided,* That any person having a valid claim to such minerals under existing laws on January 1, 1919, shall, upon the relinquishment of such claim, be entitled to a lease under the provisions of this section for such area of the land relinquished as shall not exceed the maximum area authorized by this section to be leased to an individual or corporation: *Provided, however,* That no claimant for a lease who has been guilty of any fraud or who had knowledge or reasonable grounds to know of any fraud, or who has not acted honestly and in good faith, shall be entitled to any of the benefits of this section: *Provided further,* That not more than one lease shall be granted under this section to any one person, association, or corporation: *Provided,* That a lessee may acquire one additional lease in any State when it has achieved production in commercial quantities from an existing lease and it is within 15 years of exhausting the commercially recoverable reserves on the existing lease; *Provided further,* That the limitation on ownership of oil shale leases shall not apply with respect to leases issued to avoid bypass of small acreages of Federal oil shale resources which could not otherwise be mined economically. However, with respect to leases for native asphalt, solid and semisolid bitumen, and bituminous rock (including oil-impregnated rock or sands from which oil is recoverable only by special treatment after the deposit in mined or quarried) no person, association, or corporation shall acquire or hold more than seven thousand six hundred and eighty acres in any one State without respect to the number of leases.

(b) If an offer for a lease under the provisions of subsection (a) for deposits other than oil shale is based upon a mineral location, the validity of which might be questioned because the claim was based on a placer location rather than on a lode location, or vice versa, the offeror shall have a preference right to a lease if the offer is filed not more than one year after the enactment of the Mineral Leasing Act Revision of 1960.

(c)(1) With respect to native asphalt, solid and semisolid bitumen, and bituminous rock (including oil-impregnated rock or sands from which oil is recoverable only by special treatment after the deposit is mined or quarried) a lease under the multiple use principle may issue notwithstanding the existence of an outstanding lease issued under any other provision of this Act.

(2) Under a lease issued pursuant to subsection (a), the Secretary is authorized to allow the mining, extraction and disposal of other mineral deposits which may be leased under the Mineral Leasing Act of 1920, and which are either (1) intermingled with or (2) unlikely to be economically recoverable except in conjunction with the oil shale deposits that are contained in the lands covered by the lease, subject to such terms, conditions, and restrictions as may be imposed by the Secretary consistent with subsection (a), notwithstanding other provisions of this Act with respect to the leasing of such mineral deposits.

"(d) The Secretary may lease such additional lands as may be required in support of operations necessary for the recovery of oil shale. Such operations may include the disposal of oil shale waste and the materials removed from mined lands, and the building of plants, reduction works, and other facilities connected with oil shale operations, but shall exclude the removal of any mineral deposits contained in such additional lands. The Secretary may issue such leases after consideration of the need for such lands, impacts on the environment and other resource values, and upon a determination that the public interest will be served thereby. Any lease issued under this subsection for any lands the surface of which is under the jurisdiction of a Federal agency other than the Department of the Interior shall be issued only with the consent of that other Federal agency and shall be subject to such terms and conditions as it may prescribe. A lease issued under this subsection shall be for such periods of time and shall include such lands as the Secretary determines to be necessary to achieve the purposes for which the lease is issued, and shall contain such provisions as he determines are needed for protection of environmental and other resource values. Any lease issued under this subsection shall provide for the payment of an annual rental which shall reflect the fair market value of the rights granted and which shall be subject to such revisions as may be needed from time to time to continue to reflect the fair market value. Lands leased under this subsection shall remain subject to leasing under the other provisions of this Act where such leasing would not be incompatible with the lease issued under this subsection.

"(e) The Secretary may issue a lease under subsection (a) upon a determination that the public interest will be served thereby and after consideration of (i) the need for such leases, (ii) impacts on the environment and other resource value, (iii) socioeconomic factors, and (iv) information from consultations with the Governor of the State in which the lands to be leased are located. Such consultations shall occur during the land use planning as required by the Federal Land Policy and Management Act of 1976 (90 Stat. 2743) and prior to lease issuance. The Secretary shall consult with the Governor on stipulations in the lease to provide a reasonable balance between the national interest and the well-being of the citizens of the State. If the Secretary decides to issue the lease contrary to the Governor's recommendation, the Secretary shall notify the Governor in writing of the decision and state clearly the reasons for that decision.

"(f) Any lease issued under subsection (a) or (d) may at the option of the lessee, include provisions for payments in any year

which payments shall be credited against any portion of the annual rental for a subsequent year to the extent that such payment is payable by the Secretary of the Treasury under section 35 to the Governor of the State within the boundaries of which the leased lands are located. Such funds shall be distributed by the Governor of the State only to those counties, municipalities, or jurisdictional subdivisions impacted by oil shale development and/or where the lease is sited.".

(2) Amend subsection 27(e) to read as follows:

"(e)(1) No person, association, or corporation shall take, hold, own or control at one time any interest as a member of an association or as a stockholder in a corporation holding a lease, option, or permit under the provisions of this Act or, with respect to oil shale, exceeds in the aggregate the maximum number of leases allowed to any one person, association, or corporation under this Act, which, together with the area embraced in any direct holding, ownership or control by him of such a lease, option, or permit or any other interest which he may have as a member of other associations or as a stockholder in other corporations holding, owning or controlling such leases, options, or permits for any kind of minerals, exceeds in the aggregate an amount equivalent to the maximum number of acres of the respective kinds of minerals allowed to any one lessee, optionee, or permittee under this Act, except that no person shall be charged with his pro rata share of any acreage holdings of any association or corporation unless he is the beneficial owner of more than 10 per centum of the stock or other instruments of ownership or control of such association or corporation, and except that within three years after the enactment of the Mineral Leasing Act Revision of 1960 no valid option in existence prior to the enactment of said Act held by a corporation or association at the time of enactment of said Act shall be chargeable to any stockholder of such corporation or to a member of such association so long as said option shall be so held by such corporation or association under the provisions of this Act.

(2) No contract for development and operation of any lands leased under this Act, whether or not coupled with an interest in such lease, and no lease held, owned, or controlled in common by two or more persons, associations, or corporations shall be deemed to create a separate association under the preceding paragraph of this subsection between or among the contracting parties or those who hold, own or control the lease in common, but the proportionate interest of each such party shall be charged against the total acreage, or the total number of oil shale leases permitted to be held, owned or controlled by such party under this Act. The total acreage or number of oil shale leases so held, owned, or controlled in common by two or more parties shall not exceed, in the aggregate, an amount equivalent to the maximum number of acres of the respective kinds of minerals allowed to any one lessee, optionee, or permittee under this Act or, in the case of oil shale, the maximum number of leases allowed to any one person, association, or corporation under this Act.".

The SPEAKER pro tempore (Mr. SABO). Is a second demanded?

Mr. MARRIOTT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Nevada (Mr. SANTINI) will be recognized for 20 minutes and the gentleman from Utah (Mr. MARRIOTT) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Nevada (Mr. SANTINI).

Mr. SANTINI. Mr. Speaker, I yield 1 minute of my remaining time to the distinguished chairman of the House Interior Committee (Mr. UDALL), who has joined in both cosponsorship and in support of this legislation. I am sure the gentleman from Utah (Mr. MARRIOTT), and I know that the chairman of the Mines and Mining Subcommittee, are pleased to have such distinguished companionship.

Mr. UDALL. Mr. Speaker, I rise in support of H.R. 4053, as amended, by the Committee on Interior and Insular Affairs.

I want to be very frank about this bill. H.R. 4053 as originally drafted and introduced would not have received my support. I will not go into great detail, but let me merely say that the bill, as introduced, had the potential of permitting astronomical amounts of shale oil to be controlled by one company. Specifically, the possibility of granting two leases per individual on the richest and thickest oil shale area of Colorado was not acceptable to me. This provision had the potential of permitting one company to control shale oil reserves amounting to approximately 10 billion barrels—the equivalent of the entire Prudhoe Bay Field. I could not, and would not, have voted for H.R. 4053 in that form.

However, H.R. 4053, as amended, is an entirely different vehicle. It is a bill I can support.

H.R. 4053, as amended, while still generous in its provisions, eliminates the most objectionable feature, that is, the more or less automatic provision of granting two leases per State or four leases nationwide to one individual or company.

The present proposal limits an individual to one lease per State until it can be shown commercial production has been achieved and present reserves will be exhausted in 15 years. It also permits leases in the poorer quality shale areas, such as Utah and Wyoming, to be increased in size to achieve economic recovery.

H.R. 4053 also permits minerals that are commingled with oil shale to be mined in conjunction with the shale. This is a conservation measure and will prevent unnecessary waste.

Of major importance, H.R. 4053 also eliminates the longstanding problem of disposing of shale after the oil has been extracted by providing offsite disposal areas.

H.R. 4053 grants to the Governors of the respective States a strong role in consulting with the Secretary of the Interior prior to leasing. This participation is very important to the Western Governors and is something they have long sought.

And last, but certainly not least, the bill permits prepayment of lease rentals to alleviate the serious socioeconomic impacts caused by rapid development in these largely rural communities.

In conclusion, H.R. 4053 now before us is a vastly improved bill and in its present form is acceptable to me.

I urge your support. We need to develop these resources, and with the built-in safeguards in this proposal, I am confident development can go forward without unnecessary disruption to local communities or to the environment.

Mr. SANTINI. Mr. Speaker, at this time I yield such time as he may consume to the gentleman from Colorado (Mr. KOGOVSEK), who has contributed to this legislation.

Mr. KOGOVSEK. Mr. Speaker, I thank the gentleman. I would like to commend the gentleman from Nevada and the gentleman from Utah for the tremendous amount of work that they put into this very important bill.

I think all too many times we have sent mixed signals to the people trying to develop synthetic fuels in this country, especially in the West when we are talking about oil shale. The past administration wanted to go forward with a very large and expensive synthetic fuels program, only to find out just a couple of weeks ago from this administration that they wanted to hold back. These kinds of mixed signals make it very difficult for the people trying to develop oil shale in Colorado, Wyoming, and Utah. I think a couple of key provisions we have in this bill now make it possible to do this in a very orderly fashion.

All too often, we have been concerned in the West that the Federal Government, when they start leasing their Federal lands to the different companies, are not contacting the State or communicating with the local counties and cities. I think, under the leadership of Mr. SANTINI and with the help of Mr. MARRIOTT, we have language in there that is going to allow the Federal Government to make sure that they consult and have the input of the State governments that we think is so important.

I once again thank the chairman of the full committee, the chairman of the subcommittee, the gentleman from Nevada (Mr. SANTINI) and the gentleman from Utah (Mr. MARRIOTT) for a fine piece of work.

Mr. SANTINI. Mr. Speaker, with great trepidation I yield 2 minutes to my good friend from Minnesota (Mr.

VENTO), with the expectation that his characteristic expansive and enlightened views on other matters of energy will infiltrate his diagnosis of this bill.

Mr. VENTO. Mr. Speaker, I rise in opposition to the legislation. I think that the legislation is much improved over when it came from the subcommittee. I do not doubt the intentions or the enthusiasm with which the ranking minority member on the subcommittee and the subcommittee chairman support the development of synthetic fuels. I also would like to see synthetic fuels produced and be on line. I do not think that synthetic fuels are any panacea in terms of meeting energy needs, but I do think they are important in terms of the total mix of fossil fuels that we have.

Serving on the conference committee myself, on the Energy Security Act, of course we dealt with many subjects. We did provide, I think, significant incentives for the development of synthetic fuels and hoped that would be in place and implemented to help foster what is, I think, today an infant industry. The problem, however, with the present proposed legislation is that it purports to solve a problem that does not exist; that is, one in which the leased plots of land, over 5,000-acre sections, are not adequate in size, so-called adequate, for the oil companies to actually get in and develop them. They are asking to increase that up to three times that size in order to make it economically viable over 15,000-acre leases.

This measure would leave the decision to increase the lease completely up to the Secretary's discretion, and I think it gives rise to a problem in which a relatively few companies will control vast tracts of land where we could have limited competition and development of these energy sources.

So, I am constrained to oppose this for that reason. I think that if indeed it does become apparent that they need larger sections, larger leases, we at least ought to wait until there is some production on line. That is not the case today, so I think it purports, as I said, to solve a problem which does not exist. It may very well create a problem in which competition is limited and I am very concerned about the absence of competition in fossil energy that exists today.

I want to commend the gentleman from Colorado. I think he substantially improved the legislation by virtue of his amendments in full committee.

Second, I have no objection to some of the technical amendments that might be necessary in the legislation. I think they are probably positive.

● Mr. SEIBERLING. Mr. Speaker, I intend to support the motion to suspend the rules and pass the bill H.R. 4053, to amend section 21 of the Mineral Leasing Act so as to further facilitate the development of oil from the oil shale resources of the United States.

This bill comes to the floor upon a favorable report from the Committee on Interior and Insular Affairs. When our committee was considering the bill, I raised with its proponents a number of points about which I was concerned. On the basis of those discussions, and in recognition of the committee's actions in adopting a number of amendments which I believe have improved the bill, I joined in voting to order that it be favorably reported.

While I intend to support the motion to pass the bill under suspension of the rules, I think it should be made clear for the record that I will do so on the basis of my understanding of the purpose and intention of the committee in reporting the bill, and to set forth what those understandings are.

The bill adds to section 21 of the Mineral Leasing Act a new subsection (d) which would authorize the Secretary to issue leases for additional lands required for support activities necessary to the recovery of oil shale from Federal leases. The committee amendments preclude use of this authority to make land available for such support operations for oil shale mining not occurring on Federal leases.

Before the Secretary can issue a lease under the new subsection (d), he must consider the need for the lands proposed to be leased and the impacts on the environment and other resource values which may result from the proposed uses of the lands, and he must make a determination that the public interest will be served by issuance of the lease. Nothing in this bill is intended to waive, modify, or supplant the requirements of the National Environmental Policy Act; and it may well be that in many instances that act will require that an environmental impact statement be prepared prior to a decision concerning issuance of a lease under the new subsection (d). In such cases, the Secretary's decision on issuance of a lease must be premised on an objective analysis of alternatives, such as alternative waste-management options, which may be preferable to use of leased public lands for the particular purposes proposed. In all cases, the Secretary's consideration of environmental and resource impacts should be site specific with regard to the area proposed for leasing under the new subsection (d); and while unnecessarily protracted procedures should not be employed, the consideration must be careful and thorough. In many instances, already available baseline data developed in connection with the primary lease can be utilized in making such evaluations, which will reduce the time involved.

While the new subsection (d) of section 21 does not impose a precise limit on the size of the tracts which can be leased for off-site support activities, I believe it is clear that the Secretary should confine each such lease to the minimum area necessary for the purposes for which it is issued, and that the Secretary must take care that each such lease contains conditions which will hold to the minimum any possible adverse impacts on environmental and resource values which may result from use of the leased area. In particular, the Secretary must impose all conditions necessary in order to assure that issuance of the lease will not result in adverse impacts on the air, water, scenic, or other values of any unit of the national park system or the national wilderness preservation system, and that issuance of the lease will not be inconsistent with the requirements of the Federal Land Policy and Management Act as regards areas identified or under consideration for possible wilderness designation.●

● Mr. HANSEN of Utah. Mr. Speaker, it is with great pleasure that I speak today on the oil shale bill before the House. I am a cosponsor of both of these important pieces of legislation of which I ask the House's favorable consideration.

Underlying Utah, Colorado, and Wyoming, there are an estimated 1.8 trillion barrels of shale oil scattered throughout 17,000 square miles of land, according to the Department of the Interior. Overall, 72 percent of U.S. oil shale lands, containing nearly 80 percent of the total quantity of shale oil, is federally owned. Although only one-third of this resource is thought to be recoverable with known technology, the recoverable reserves still equal about 90 percent of the known world reserves of conventional oil; that is, greater than the conventional oil reserves of the Middle East and Africa combined.

Utah shares a good deal of this country's potential for oil shale development, along with Colorado and Wyoming. Yet, because its occurrence is less rich geologically than in the Piceance Creek Basin in Colorado, the constraints of the Mineral Leasing Act of 1920 on tract size make oil shale development in Utah economically infeasible.

Oil shale deposits may represent the most economically and environmentally favorable alternative source to oil for gasoline supply in the long term. Yet, under current economic and policy conditions, shale oil production may only reach 20,000 to 65,000 barrels per day by 1987, instead of the favorable condition projection of 100,000 to 250,000 barrels per day by 1990.

Specifically, the bill before the House would:

First. Expand the acreage limitation on oil shale leases.

By providing for lease expansion in low-quality shale areas, the bills would promote greater development of shale oil in Utah and Wyoming, where, unlike the Colorado shale, the thickness of the resource zone and quality of the resource are generally not sufficient to make development of 5,120-acre tracts economical. By providing true leasing opportunities in all three of the States of Utah, Colorado, and Wyoming, we can expand our knowledge of different shale technologies, of the environmental impacts these different technologies have in each of the areas, and can gain experience with the emerging shale industry under different conditions, all of which were major objectives of the prototype oil shale leasing program.

Second. Increase the number of leases an entity is permitted to hold.

This provision would also help to promote development in Utah and Wyoming. In addition, granting additional leases would give benefits to those who have taken the initiative to develop a technology by allowing them the opportunity to apply that technology again. Otherwise, if a company knows it will only be able to obtain one lease, chances are they will only purchase an existing technology instead of experimenting. If we want innovation and development of a wide range of technologies, we should offer industry incentive to do so. The provision for the granting of an additional lease would further this objective.

Third. Allow the leasing of fringe acreage to avoid bypass of oil shale deposits during mining.

It is commonsense to have a provision whereby small tracts that would not be economically viable to mine separately may be leased and not included in the ceiling on lease ownership. In those cases, efficiency rather than the exact number of leases is the major concern.

Fourth. Allow leasing of minerals other than oil shale within an oil shale lease tract.

The Secretary of the Interior should be allowed to issue leases for multimineral development of resources found along with oil shale. This would clear up any question of the Secretary's authority to do what practical economics would dictate: Assuring full utilization of natural resources on leased land. The General Accounting Office, in its January 1981 report on "Possible Ways To Streamline Existing Federal Energy Minerals Leasing Rules," agreed that any oil shale leasing legislation should contain such a provision.

Fifth. Allow the leasing of additional nonshale lands for operations connected with oil shale mining.

It only makes sense to not preclude the mining of lands containing oil shale by covering them with spent shale or operation facilities. Furthermore, as reported by the GAO, projected costs for developing an oil shale industry will be very high and industry will need some economics of scale to make the venture attractive. Under this legislation, the lessee would have to demonstrate that an additional tract is necessary and appropriate for its operation. The legislation would also require that the fair market value be paid for any lease to be used for off-tract disposal.

Testimony received by the subcommittee in Vernal, Utah, indicated the need for these provisions if projects of a meaningful size are to be initiated and sustained.

This country has no greater need than to reduce its dependence on imported oil. Utah is fortunate to contain many renewable and nonrenewable resources whose development could greatly aid in reducing this dependence. Today's bill supporting increased leasing of oil shale deposits is a very important step in attaining energy independence.●

Mr. SANTINI. Mr. Speaker, I have no further requests for time.

Mr. MARRIOTT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. SANTINI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Nevada (Mr. SANTINI) that the House suspend the rules and pass the bill, H.R. 4053, as amended.

The question was taken.

Mr. VENTO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of order of no quorum is withdrawn.

□ 1430

GENERAL LEAVE

Mr. SANTINI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nevada?

There was no objection.

GOLD MEDAL FOR FRED WARING

Mr. ANNUNZIO. Mr. Speaker, I move to suspend the rules and pass the joint resolution (H.J. Res. 223) to provide for the awarding of a special gold medal to Fred Waring, as amended.

The Clerk read as follows:

H.J. RES. 223

Whereas Fred Waring has felt and given voice to the spirit of America for sixty-five years in times of hardship, challenge, or joy with heart stirring choral music; and

Whereas Fred Waring has made, and will continue to make, seminal contributions to American music of the present and future through his workshops, encouragement of talented young persons, and unique professional style; and

Whereas Fred Waring is a living pioneer in the development of modern entertainment, including recording, radio, talking movies, and television; and

Whereas Fred Waring has contributed to the convenience of modern life by perfecting and marketing devices such as the Waring Blendor;

Whereas Fred Waring rediscovered and gave the Nation a second anthem in his most popular recording, "The Battle Hymm of the Republic"; and

Whereas Fred Waring and the Pennsylvanians have become synonymous with Christmas by standards that define the sentiment of the season, such as "Do You Hear What I Hear" and "T'was the Night Before Christmas"; and

Whereas the contributions of Fred Waring are numerous and unique, and Americans in the tens of millions have identified him as "The Man Who Taught America How To Sing" by purchasing his choral recordings: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the President of the United States is authorized to present, on behalf of the Congress, to Fred Waring, a gold medal of appropriate design in recognition of his contribution to enriching American life. For such purpose, the Secretary of the Treasury is authorized and directed to cause to be struck a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary of the Treasury. There is authorized to be appropriated not to exceed $20,000 after October 1, 1981, to carry out the provisions of this subsection.

(b) The Secretary of the Treasury may cause duplicates in bronze of such medal to be coined and sold under such regulations as he may prescribe, at a price sufficient to cover the cost thereof, including labor, materials, dies, use of machinery, overhead expenses, and the gold medal. The appropriation made to carry out the provisions of subsection (a) shall be reimbursed out of the proceeds of such sales.

(c) The medals provided for in this Act are national medals for the purpose of section 3551 of the Revised Statutes (31 U.S.C. 368).

The SPEAKER pro tempore. Is a second demanded?

Mr. WYLIE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ANNUNZIO) will be recognized for 20 minutes, and the gentleman from Ohio (Mr. WYLIE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ANNUNZIO).

Mr. ANNUNZIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Joint Resolution 223 provides for the award of a special congressional gold medal to Fred Waring. The resolution has attracted wide support among the Members of this House and has been cosponsored by 239 Members.

As the Members of this House know, the Coinage Subcommittee cannot come to the floor of the House with legislation unless it has 218 sponsors, and I am happy to state that this resolution has 239 cosponsors.

Fred Waring's contribution to America are well known. His musical achievements have not only brought joy to the hearts of countless listeners but have also contributed to stirring the patriotic feelings of his countrymen. He virtually rediscovered the "Battle Hymn of the Republic." In so doing, Mr. Waring gave the Nation a song that is nearly our second anthem.

He has earned the title of "Father of American Choral Music" for his more than 65 years of work in developing this musical format in America. His workshops have taught many young Americans so that they, too, can participate in the development of American music.

The bill provides for the minting and sale of bronze duplicates to defray the cost of the original gold medal. This will assure that the approximately $20,000 needed to design and mint the gold medal will be at no cost to the U.S. taxpayers.

I want to assure the Members of this House that we have struck these gold medals before, and each time that we have sold bronze medals in behalf of those people for whom we have struck a gold medal the U.S. Treasury has not only recovered the original investment but has made money. To give the Members an example, on the last gold medal we struck for John Wayne, the receipts show that we are about $350,000 ahead, and it is still going up.

House Joint Resolution 223 is cosponsored by the entire Pennsylvania delegation. Mr. Waring will be honored here at the Capitol on September 15 in observance of Pennsylvania Day. It is for that reason that we have acted as quickly as we could on this legislation. A hearing and markup were held by the Consumer Affairs and Coinage Subcommittee last Wednesday, and the Banking Committee reported the legislation on Thursday. Even so, it is impossible for the medal to be designed and minted in the next 7 weeks, between now and Pennsylvania Day. Prompt passage of this legislation will assure that a sketch or a facsimile or a model will be available for Pennsylvania Day on September 15.

Mr. Speaker, I urge the Members of this House to support House Joint Resolution 223, and at this time I want to yield to the distinguished dean of the Pennsylvania delegation, who has worked long and hard on this legislation. It was no easy task to go out and get 239 Members to sign the resolution. I want to congratulate the gentleman for a job well done, and I know that he has the respect of every Member of this House and the respect of the people of Pennsylvania, and when Fred Waring receives this gold medal that will be presented to him, the gentleman from Pennsylvania, Mr. JOE GAYDOS, will have the respect of all the music lovers of America.

Mr. GAYDOS. Mr. Speaker, I want to thank the subcommittee chairman, and I take this opportunity to thank him for his graciousness and for his prompt response to the needs of Pennsylvania.

Speaking on behalf of the Pennsylvania delegation, I particularly want to make reference to the secretary of the delegation, Adm. Van Zandt, a former Member of this House, who primarily is coordinating the upcoming September 15 Pennsylvania Day.

Mr. Speaker, I think this resolution is due and proper recognition to a great artist. I know that I speak on behalf of not only the delegation but on behalf of all Pennsylvanians in again thanking the gentleman from Illinois (Mr. ANNUNZIO), the chairman of the subcommittee.

Mr. Speaker, I rise in support of House Joint Resolution 223, which directs the striking of a gold medal recognizing the lifetime contributions of Fred Waring to his fellow citizens of the United States.

A Pennsylvanian, Mr. Waring contributed immeasurably to the spirit of the people and their feeling for the country with his stirring revival of the "Battle Hymn of the Republic."

For millions, the Christmas season is not marked by a snowfall but by the voices of Fred Waring's Pennsylvanians on their stereos and radios singing "Do You Hear What I Hear" and "T'was the Night Before Christmas."

American music of the present bears his mark, and that mark will carry into the future.

He has made lasting and significant contributions through the influence of the style he developed and his encouragement of talented young persons.

His impact has been across the field of entertainment.

He brought choral music to a golden age and pioneered in recording, radio, talking movies, and television.

On top of all that, he perfected and marketed the Waring Blendor.

Mr. Waring's career follows the outline for success in America.

He started small—just a band of hometown friends. He followed his head, perfected his product, and grew.

These days Fred Waring and the Pennsylvanians tour an average of 40,000 miles and play before hundreds of thousands of Americans in an average of 35 States each year.

But this year, the 65th on the road, is Mr. Waring's last tour.

In his career, Mr. Waring has even been called for a command performance before the Queen of England, and, if this were England, the occasion of his last tour probably would be marked by his being named Sir Fred Waring because that is how they recognize persons who have influenced their times for the better.

However, this is the United States.

Mr. Speaker, passage of House Joint Resolution 223 will properly and officially recognize Mr. Waring's contributions to, and influence on, our times.

It will fittingly cap the career of "The Man Who Taught America How To Sing."

And I sincerely urge its passage.

Mr. ANNUNZIO. Mr. Speaker, I reserve the balance of my time.

Mr. WYLIE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to speak in favor of this resolution honoring Fred Waring and to be a cosponsor of the resolution.

May I say to the subcommittee chairman, the gentleman from Illinois, Mr. FRANK ANNUNZIO, that he is to be complimented for acting on this legislation so expeditiously, and I am pleased to join with him again in bringing a very significant piece of legislation to the House floor. I might say that the Pennsylvania delegation, with the leadership of the gentleman from Pennsylvania (Mr. GAYDOS), is also to be commended for introducing this legislation.

Fred Waring was in Columbus last Thursday evening with his Young Pennsylvanians for a benefit for the Ohio Theater sponsored by Capa Colleagues, the Columbus Association for the Performing Arts, and I flew in to join my wife to be in attendance. We were treated with one of the most enjoyable evenings I have ever experienced. Mr. Speaker, "The Man Who Taught America How To Sing" was there leading his Young Pennsylvanians for a 2½-hour performance the like of which I have never seen. His talented and lovely wife, Virginia, herself a concert pianist, was magnificent in her supporting role as a coconductor and playing the piano. I was to meet and talk with both of them after the performance, which was a delightful experience in and of itself.

On March 15, 1981, Fred Waring began his 66th year in the entertainment business, a record unequaled in the entertainment field. At 81, let me assure you, this truly remarkable man remains "King of the Road."

His accomplishments, Mr. Speaker, are too numerous to mention in the time limitations we have here today,

but they are indeed amazing. I am at this point placing in the RECORD an extremely interesting biography of Fred Waring that was prepared for the Ohio Theater program, as follows:

FRED WARING—A BIOGRAPHY

Fred Waring is known to generations as the "Man Who Taught America How To Sing," "America's Singing Master," or the man who helped make the popular song a classic American Art Form. He is one of the most fascinating and interesting figures in the history of Show Business. Through over six decades of sharing his distinctive blend of beautiful music, he has always been up to date and, in actuality, ahead of his time. His fans, young and old, are awed by his contributions to the music industry via Vaudeville, movies, radio, recordings, Broadway, television and love of the concert stage.

It all began on June 9, 1900, in Tyrone, Penn., when Frederic Malcolm Waring was born, and from his first stage appearance, at age 5, to becoming leader of the Boy Scout Drum Corps in his home town of Tyrone, Fred Waring has been making music. As a teenager, he and Freddie Buck joined the "Waring-McClintock Snap Orchestra," composed of Fred's younger brother, Tom, and his partner/drummer, Poley McClintock. The quartet became "Waring's Banjo Orchestra," and toured colleges . . . playing fraternity parties, proms and local dances. The exciting and new band sang together, played faster rhythms, and the engagements poured in. Fred put aside his pursuit of a degree in architecture at Penn State and became leader of the band.

In the twenties the group adopted the name of "Fred Waring's Pennsylvanians" and played every major movie theatre from coast to coast, for weeks at a time. They became the rage in Hollywood, starring in the first musical motion picture, "Syncopation," then "Varsity Show," and were featured in the first "talkie" shorts.

In the thirties, Fred Waring's Pennsylvanians, as a 55-piece Jazz Orchestra, scored one of their greatest theatrical successes with an un-precedented six-month run at New York's famous Roxy Theatre. Their first network radio slot, "The Old Gold Show," was followed by the famous "Ford Show." Waring's award winning programs for Chesterfield and General Electric are remembered as classic chapters in the history of broadcasting.

During World War II the Pennsylvanians added, to their daily radio show, a steady stream of appearances at war bond rallies, their own New York Canteen, Army camps and Naval training stations. At the war's end, Fred's aggregation hit the road for their first concert tour in ten years. They drew tremendous crowds, and via "remotes" the Pennsylvanians were still being heard coast to coast on radio. April, 1949, was the start of the Pennsylvanians' TV performances when Fred Waring introduced "spectaculars" for General Electric. The television series captured numerous awards for Best Musical Show.

He pioneered, too, in the recording industry. One of his first auditions was for Thomas Edison in the 1920s, and his first recording was his first theme song, "Sleep," for Victor Talking Machine Company. They later made the first electronic recording and first vocal dance recordings. He was first to use a girl singer, to feature vocalists with an orchestra and to combine orchestra and glee club. The Pennsylvanians have recorded over 1500 songs and 100 albums.

He has written songs about every imaginable subject . . . from his own theme song, "I Hear Music," to college alma mater fight songs (over 90) to patriotic songs. During the war years, Mr. Waring was compelled to compose nearly 30 stirring songs for branches of our armed services. In addition, for our country, his compositions include dozens of patriotic songs, the latest contribution being his beautiful love song to America, called, simply, "My America."

Fred Waring has also been recognized as one of the nation's leading Music Educators. He has been honored by the Association of Professional Vocal Ensembles, the National Music Educators and the American Choral Directors Associations.

To foster better singing techniques, he organized the Fred Waring Choral Music Workshop in 1947. Today he teaches and supervises his staff of "working show business professionals." The summer workshop is now held on the campus of The Pennsylvania State University.

To share his wealth of choral arrangements, he established Shawnee Press, Inc., now one of the world's largest publishers and sellers of choral music.

During the 1960s and 70s, Fred Waring has become known as the "King of the Road," touring some 40,000 miles every year, mostly by bus. His musical innovations are countless, having recently added the contemporary sounds of the "Today's Pennsylvanians" and the close harmony and blend of the "Waring Blendors" to the road show. On March 15, 1980, Fred Waring began his 65th year in the entertainment business, a record unequaled in the entertainment field.

Music is not the sole interest in the life of this dynamic man. He is married to the lovely, former concert pianist, Virginia Morley, and has five children, fourteen grandchildren, and two great grandchildren. With his early background in architecture and engineering at Penn State, Mr. Waring became the developer of the famous Waring Blendor and the instant steam iron. His favorite sport is golf, and he plays as often as possible . . . still able to break his age—81.

□ 1440

I am afraid I let the cat out of the bag after the performance of Thursday evening when I told Fred Waring that the Banking Committee had just that day reported this resolution in his honor out of committee and that the resolution would be on the House floor today. I told him that when we had something really important to handle, we knew how to act quickly and that it would be passed on the House floor today.

Mr. Speaker, I urge adoption of the resolution.

Mr. GAYDOS. Mr. Speaker, will the gentleman yield?

Mr. WYLIE. Yes, I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. Mr. Speaker, since I heard the remarks, I would like to add that the House Members, all the special guests, the public at large, and all Washingtonians are going to be in for a treat on September 15, because Mr. Waring is going to perform for a minimum of an hour or an hour and a half and of course, we will have the world famous Tambouritzans from Duquesne University, which also will be performing on Pennsylvania Day.

I thank my very good friend and colleague, with whom I share many early moments in the morning on a regular schedule, for his interest in this matter and for the very, very fine remarks he has made and which are now a part of the formal record.

Mr. WYLIE. May I say to all those Members who have the time to go hear the Pennsylvanians that day to visit with Fred Waring, it will indeed be time well spent and a moment that they will enjoy and remember forever.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Virginia.

Mr. PARRIS. Mr. Speaker, I appreciate the gentleman yielding.

It is with great interest that I notice in the legislative digest that Fred Waring perfected and marketed the Waring Blendor, which has provided many of us with enjoyable culinary delights and "spiritual enjoyment" of one kind or another from time to time.

I join with my colleague in supporting this legislation.

Mr. WYLIE. I thank the gentleman from Virginia for his interesting contribution.

I was not aware of that until Thursday evening when I read that in his biography Fred Waring was, first, an engineering student when he was at Penn State University and upon his graduation was an engineer for a while. But we know how he got together his group of singers, called the Pennsylvanians. He was so talented in the field of music that engineering, I am afraid, went out the window. He did, indeed, perfect the Waring Blendor which has also given us much pleasure.

Mr. Speaker, I have no further requests for time, I yield back the balance of my time.

Mr. ANNUNZIO. Mr. Speaker, I yield back the balance of my time.

● Mr. McDADE. Mr. Speaker, it gives me great pride and pleasure to support the congressional medal for not only a great American; but also a great Pennsylvanian—Fred Waring.

The name of Fred Waring is synonymous throughout the country and the world with good music. Indeed he is the person most responsible for teaching America how to sing. It was his pioneering efforts during the thirties and forties which legitimitized chorale music. In the process America sang along, and we learned the joys of joining voices in not only patriotic songs but also popular tunes of the day.

I must point out also that the medal is of particular importance to me because Fred Waring is a constituent of mine. And it is an additional honor to reveal the activities of Mr. Waring regarding his musical workshop which

has been operating continuously since 1947, and which since its beginning has had over 35,000 students and teachers of music seeking and finding the Fred Waring secrets of singing.

Located at Pennsylvania State University, the workshop has a distinguished faculty of active show business pros who are teaching students from all over the world the professional touch and polish in the field of music.

While Mr. Waring has made his final tour, this master showman and teacher will continue to give and share his fortune of accumulated show business experience and knowledge with the youth and music educators via his summer workshop at Penn State.

Fred Waring will always be remembered as "The man who taught America to sing" and as the father of American chorale music; the medal is richly deserved.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ANNUNZIO) that the House suspend the rules and pass the joint resolution, House Joint Resolution 223, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the joint resolution, as amended, was passed.

A motion to reconsider was laid on the table.

FISCAL YEAR 1981 AIRPORT DEVELOPMENT AUTHORIZATION ACT

Mr. MINETA. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4182) to extend the airport development aid program through fiscal year 1981, as amended.

The Clerk read as follows:

H.R. 4182

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled, That this Act may be cited as the "Fiscal Year 1981 Airport Development Authorization Act".

SEC. 2. (a) Section 14(a)(3) of the Airport and Airway Development Act of 1970 (49 U.S.C. 1714(a)(3)) is amended by striking out "and" after "1979," and by striking out the period at the end thereof and inserting in lieu thereof ", and $387,000,000 for fiscal year 1981,".

(b) Section 14(a)(4) of the Airport and Airway Development Act of 1970 (49 U.S.C. 1714(a)(4)) is amended by striking out "and" after "1979," and by striking out the period at the end thereof and inserting in lieu thereof ", and $63,000,000 for fiscal year 1981.".

(c) In addition to the purposes otherwise authorized, amounts authorized under sections 14(a)(3) and 14(a)(4) of the Airport and Airway Development Act of 1970 for fiscal year 1981 shall also be authorized for airport system planning, airport master planning, and airport noise compatibility planning, all in accordance with section 13 of such Act, and for carrying out noise compatibility programs under section 104(c) of the Aviation Safety and Noise Abatement Act of 1979. The apportionment of such amounts under section 15 of the Airport and Airway Development Act of 1970 shall be made as soon as possible after the date of enactment of this Act and for purposes of sections 14(b), 15, and 19 of the Airport and Airway Development Act of 1970 relating to authority to incur obligations and to enter into project grant agreements all the purposes set forth in the preceding sentence shall be deemed to be airport development within the meaning of such Act. The Secretary shall obligate from funds available for fiscal year 1981 under section 14(a)(3) of the Airport and Airway Development Act of 1970 not less than $25,000,000 for carrying out noise compatibility programs under section 104(c) of the Aviation Safety and Noise Abatement Act of 1979.

(d) Section 14(b)(2) of the Airport and Airway Development Act of 1970 (49 U.S.C. 1714(b)(2)) is amended by striking out "1980" and inserting in lieu thereof "1981".

(e) Section 15(a)(3)(A)(I) of the Airport and Airway Development Act of 1970 (49 U.S.C. 1715(a)(3)(A)(I) is amended by striking out "1980" and inserting in lieu thereof "1981".

(f) Section 15(a)(3)(A)(II) of the Airport and Airway Development Act of 1970 (49 U.S.C. 1715(a)(3)(A)(II) is amended by striking out "1980" and inserting in lieu thereof "1981".

(g) Section 15(a)(3)(B)(i) of the Airport and Airway Development Act of 1970 (49 U.S.C. 1715(a)(3)(B)(i)) is amended by striking out "1980" and inserting in lieu thereof "1981".

(h) Section 15(a)(4) of the Airport and Airway Development Act of 1970 (49 U.S.C. 1715(a)(4)) is amended by striking out "fiscal year 1980" each place it appears and inserting in lieu thereof "fiscal years 1980 and 1981".

(i) Section 17(a)(2)(A) of the Airport and Airway Development Act of 1970 (49 U.S.C. 1717(a)(2)(A)) is amended by striking out "fiscal year 1980" and inserting in lieu thereof "fiscal years 1980 and 1981".

(j) Notwithstanding any other provision of the Airport and Airway Development Act of 1970, the Secretary of Transportation may approve an application under such Act before October 1, 1981, for a project which was begun after September 30, 1980, and before the date of the enactment of this Act. If such an application is approved, costs incurred under such project after September 30, 1980, and before the date of approval of such project shall be allowable costs to the extent they would be allowable costs under the provisions of such Act of 1970 (other than provisions making costs allowable only if incurred after the execution of the grant agreement) if incurred after the date of such project approval.

SEC. 3. (a) Section 208(f)(1) of the Airport and Airway Revenue Act of 1970 is amended by striking out "1980" and inserting in lieu thereof "1981".

(b) Subparagraph (A) of section 208(f)(1) of the Airport and Airway Revenue Act of 1970 is amended to read as follows:

"(A) incurred under title I of this Act or of the Airport and Airway Development Act Amendments of 1976 or of the Aviation Safety and Noise Abatement Act of 1979 or under the Fiscal Year 1981 Airport Development Authorization Act (as such Acts were in effect on the date of enactment of the Fiscal Year 1981 Airport Development Authorization Act);".

The SPEAKER pro tempore. Is a second demanded?

Mr. SNYDER. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California (Mr. MINETA) will be recognized for 20 minutes, and the gentleman from Kentucky (Mr. SNYDER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. MINETA).

Mr. MINETA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 4182 provides fiscal year 1981 authorization for the airport development aid program, better known as ADAP. ADAP provides grants to airports for airport development from trust funds contributed by the users of the aviation system.

The existing ADAP authorization expired on September 30, 1980, and efforts to reauthorize the program have bogged down in outyear issues, particularly the Senate proposal to declare a number of airports ineligible for ADAP assistance beginning in fiscal year 1982. As a result, there has been no ADAP authorization for fiscal year 1981.

In addition, our committee's multiyear ADAP bill, H.R. 2643, requires consideration of a revenue title by the Ways and Means Committee. That committee, due to its work on the tax cut bill, has been unable to schedule consideration of the multiyear ADAP bill in time to permit its enactment before the end of fiscal year 1981.

We are therefore faced with the prospect of losing all fiscal year ADAP funding. The committee has therefore reported H.R. 4182 to fill that gap in ADAP authorizations. The users have already contributed these funds in taxes to the trust fund; in fact, the trust fund surplus now stands at roughly $3.7 billion. The $450 million authorized by this bill is in complete agreement with the administration budget, the first budget resolution, and the obligation ceiling in the fiscal year 1981 Supplemental Appropriation Act. Furthermore defederalization is not at issue in fiscal year 1981, since the Senate does not propose defederalization until fiscal year 1982.

In short, Mr. Speaker, none of the controversies which surround the multiyear ADAP bills really apply to fiscal year 1981. The only issue here is whether the users, having already paid these taxes for airport development, will get any benefits from those taxes.

H.R. 4182 would simply extend the ADAP program which existed on September 30, 1980, for 1 additional year at the $450 million level. The bill

would not change the program in any way with respect to the existing set-aside levels, the various minimums and maximums provided for airports, or any formulas for the allocation of funds. The historic funding ratio between air carrier and commuter airports on the one hand and general aviation on the other has been retained in the authorization levels, and the planning and noise planning programs authorized in the old law have retained their eligibility in the new authorizations.

Furthermore, because of the unusual circumstance of the lapse in the authorization for this program, the bill would provide that projects begun in that period of lapse would not automatically be excluded from ADAP eligibility, although they would still have to meet all tests and conditions as if the program had been in effect continuously.

I would also add that our decision to seek this 1-year authorization in no way lessens our commitment to our multiyear ADAP bill, H.R. 2643. We anticipate that the Ways and Means Committee will be able to consider the revenue title during September, and that we will bring that bill to the House floor as soon after that as that is possible.

Finally, Mr. Speaker, the committee amendment we have offered to H.R. 4182 is strictly a technical conforming amendment, bringing our bill into technical conformance with the existing revenue title. The amendment would not in any way change any currently existing taxes or have any other effect on the revenue title. The amendment has been worked out in close cooperation with the Ways and Means Committee and has their support. I would ask unanimous consent that their letter to that effect be included in the RECORD at this point:

COMMITTEE ON WAYS AND MEANS,
Washington, D.C., July 24, 1981.

Hon. JAMES J. HOWARD,
Chairman, Committee on Public Works and Transportation, 2165 Rayburn Office Building.

Hon. NORMAN Y. MINETA,
Chairman, Subcommittee on Aviation, Committee on Public Works and Transportation, 2251 Rayburn Office Building.

DEAR MR. CHAIRMAN: Thank you for your letter of July 20, 1981, requesting the support of the Committee on Ways and Means in your efforts to advance H.R. 4182, legislation which authorizes an additional year (fiscal year 1981) of funding from the Airport and Airway Trust Fund for the ADAP and noise abatement programs.

Yesterday, when the Committee on Ways and Means met to order reported H.R. 4242, its tax reduction bill, I raised your request for the acquiescence of the Committee on Ways and Means in your efforts to bring H.R. 4182 to the House floor at the earliest possible date. It was the position of the Committee on Ways and Means that, since your legislation simply authorizes one additional year of funding for these programs and makes no substantive changes in the programs established by existing law, the Committee on Ways and Means would not object to that bill being considered under the suspension calendar. In addition, the Committee approved a conforming amendment to section 208(f) of the Airport and Airway Revenue Act of 1970 which we would authorize you to add to the bill when it is considered on the suspension calendar.

The Committee, of course, retains its jurisdiction over the Airport and Airway Revenue Act. We recognize your need to advance this legislation in an expedited manner, and we have taken this action as part of the continuing spirit of cooperation that has existed between our two committees with respect to the Airport and Airway Trust Fund. In addition, we look forward to working with you on developing the appropriate financing provisions for a multi-year authorization bill which I understand is currently under consideration by your Committee.

With warm regards I am,
Sincerely yours,
DAN ROSTENKOWSKI,
Chairman.

I would also like to extend to that committee and its chairman, the gentleman from Illinois (Mr. ROSTENKOWSKI), our appreciation for their support and cooperation in making it possible to move this bill quickly to avoid the loss of needed airport development.

Mr. Speaker, I urge my colleagues to support this needed and noncontroversial legislation.

Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from New Jersey (Mr. HOWARD), the chairman of the full Committee on Public Works and Transportation.

Mr. HOWARD. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in support of H.R. 4182.

This bill is needed to insure that there is no lapse in the highly successful program which funds development of the Nation's airports. The bill before us simply continues the existing program for another year, at funding levels which are consistent with the budget resolution.

The airport program is based on a trust fund, supported by payments from the users of the system. The surplus of more than $3 billion in the trust fund is more than adequate to fund the modest $450 million program established by this bill for fiscal 1981.

Airports are a critical part of our Nation's transportation infrastructure. The airport system is already straining to meet the demands placed upon it, and this results in aircraft delays, causing inconvenience to passengers, added expenses for the airlines, and a waste of our energy resources. We cannot afford any further delays in the airport development needed to remedy these problems. The bill now before us will enable this program to go forward while the House and Senate continue their work on a multiyear program for fiscal 1982 and beyond.

I urge my colleagues to join me in passing this important legislation.

□ 1450

Mr. MINETA. Mr. Speaker, I yield such time as he may consumer to my colleague from Texas (Mr. KAZEN).

Mr. KAZEN. Mr. Speaker, since this is an authorization bill, I am wondering if it is the bill that would authorize the installation of automated weather reporting systems in airports that are eligible for this help.

Mr. MINETA. Will the gentleman yield?

Mr. KAZEN. I yield to the gentleman.

Mr. MINETA. No; I believe that would come under the F. & E. portion of the bill, facilities and equipment, and that portion dealing with facilities and equipment is not in this bill. However, it is in our multiyear bill which will be brought up later in this session.

Mr. KAZEN. I appreciate that information. I am, of course, very interested in it because I do have a general aviation airport and one which also serves commercial airlines where this type of equipment is very badly needed since we do not have 24-hour tower service or a weather station.

We have talked to the FAA about this situation and they tell us that they must have the authorization. I did not know whether we might have had it in this bill, because I certainly want the FAA to consider installing this system at my airport in Laredo as soon as they possibly can.

Mr. MINETA. The gentleman, as chairman of the Aviation Subcommittee, is well aware of many of those problems and that is included in our multiyear bill.

Mr. SNYDER. Mr. Speaker, will the gentleman yield?

Mr. MINETA. I am pleased to yield to my colleague from Kentucky (Mr. SNYDER).

Mr. SNYDER. That was the point I wanted to make. This authorization just carries us for a couple of months, to October 1981. The multiyear bill, which has been reported by the committee and is awaiting action by the Ways and Means Committee, makes that an eligible item. Assuming we get that enacted by October, it would be eligible under the new bill at that time.

Mr. KAZEN. I thank both the gentlemen for the information. I commend you for the work you are doing for aviation in this country.

Mr. MINETA. I thank the gentleman from Texas.

I reserve the balance of my time.

Mr. SNYDER. Mr. Speaker, I yield myself such time as I may consume.

I support the gentleman's motion and urge my colleagues to adopt H.R. 4182.

The Public Works Committee amendment cited by the gentleman is necessary since section 208(f) of the Airport and Airway Revenue Act currently precludes ADAP money from being obligated beyond 1980. While this statute is within the jurisdiction of the Ways and Means Committee, they have agreed to waive jurisdiction for a 1981 ADAP bill and to allow these funds to be obligated. This amendment, therefore, would merely formalize that arrangement and allow H.R. 4182 to go forward without any further action by that committee.

I am pleased that the members of the Public Works Committee and the Ways and Means Committee realize the importance of the ADAP program to the aviation community and the traveling public. Hopefully, the spirit of cooperation which has thus far prevailed among all those seeking this authorization before the end of fiscal year 1981 will continue to exist as the bill continues to move through the Congress.

As my colleagues are aware, we have been without an ADAP program since October 1, 1980. Since that time, no airport has been able to receive Federal funds for airport construction despite the existence of a $3.7 billion surplus in the airport and airway trust fund.

This situation exists despite FAA studies which show that airport development needs in the next decade will exceed $12 billion, with nearly $9 billion needed for the next 5 years. These funds are necessary for the construction of new runways, the extension of old ones, runway lighting, terminal development, and countless other capital improvement projects designed to increase safety and airport capacity.

All of us realize that the needs of our air transportation system are substantial and that the release of these funds will only make a small contribution toward relieving some of the financial pressures being felt by airport operators throughout the country.

While many of us would have preferred to enact a higher authorization for this program, we realize the need to restrict Federal spending so that our economy will be able to recover in the years ahead. For this reason, and despite the huge $3.7 billion surplus in the trust fund, the committee decided on a funding level of only $450 million for fiscal year 1981, or two-thirds of the 1980 authorization. Although this is less than an optimum amount for the program, I believe it is absolutely critical that these funds are authorized before the end of the fiscal year so that many essential capital projects can be funded. This $450 million is the President's budgeted amount.

Obviously, all of us would have preferred to see the 3-year ADAP bill reported by the Public Works Committee enacted in time for its 1981 funding provisions to become effective but, due to other legislative priorities, the chances of doing that are remote. Moreover, failure to do so would in all probability mean that 1981 funds would be lost forever.

For these compelling reasons, I urge my colleagues to support H.R. 4182. By continuing the ADAP program under the old law, we will at least be assured that the program can continue until the House can consider the multiyear legislation previously reported by this committee.

Mr. Speaker, I reserve the balance of my time.

Mr. MINETA. Mr. Speaker, I yield such time as he may consume to the gentleman from the Virgin Islands (Mr. DE LUGO).

Mr. DE LUGO. I thank the gentleman for yielding. At the Harry S. Truman Airport on St. Thomas, Virgin Islands, there is a project underway that requires ADAP funding for completion. Completion of this project at the soonest possible time is vital to the economy of the Virgin Islands, the major industry of which is tourism.

Completion of the project is also imperative from a safety standpoint. The existing runway is marginal for jet operations, a fact tragically illustrated by the 38 lives lost in the three crashes at the airport. I would like to ask the chairman if the Harry S. Truman Airport project should receive priority attention from the FAA when it is deciding what airport projects should receive funding.

Mr. MINETA. Mr. Speaker, will the gentleman yield?

Mr. DE LUGO. I am pleased to yield to the gentleman.

Mr. MINETA. Our Subcomittee on Aviation has received information on the St. Thomas situation. There is no question that it is a worthy project. The FAA should take all possible action under the statutory criteria to see that this project is completed as soon as possible.

Mr. DE LUGO. I agree with my subcommittee chairman and I appreciate his concerns and insight into the situation at Harry S. Truman Airport.

Mr. MINETA. Mr. Speaker, I yield such time as he may consume to the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Speaker, I rise in support of H.R. 4182, legislation to extend the existing airport development aid program for 1 year.

The bill before the House would authorize $450 million in fiscal year 1982 for the ADAP program from existing trust funds contributed by users of this country's aviation system.

In reporting this legislation today, the House Subcommittee on Aviation, chaired by our distinguished colleague NORMAN MINETA, of California, has made it possible to continue the important airport development program.

H.R. 4182 offers the Nation's airports an opportunity to continue expansions and development of badly needed facilities.

Due to sharp increases in air traffic and a need for expanded facilities, Puerto Rico—dependent as our island is on air transportation for both tourism and goods and services—views the ADAP program as a critical one to help the overall development of the Puerto Rican economy.

H.R. 4182 simply retains existing safeguards for noise control and noise planning programs. More important, it continues the existing formula to carry over development of airports with ADAP funds until a major overhaul of existing programs, being considered in both the House and the Senate, can pass at some future date.

Finally, the legislation provides that projects begun in the interim of the ADAP termination would be eligible for ADAP funds as if the program had been in effect continuously.

This provision retains existing ADAP programs.

This legislation will assure vital airport development in Puerto Rico and throughout the Nation without any cost to the taxpayer since user fees go into the trust fund.

I am in strong support of H.R. 4182, and will be supporting Mr. MINETA's additional legislation to continue and reform the vital ADAP program. H.R. 4182 merits the support of all of us.

Mr. SNYDER. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Arkansas (Mr. HAMMERSCHMIDT).

Mr. HAMMERSCHMIDT. Mr. Speaker, I want to associate myself with the remarks of the distinguished chairman and ranking minority member of the Aviation Subcommittee. I support H.R. 4182 and believe it will result in a safer and more efficient airport system.

As my colleagues are aware, the ADAP program has been dormant since the end of fiscal year 1980 and as a result, airport operators throughout the country have been unable to secure essential funding for the improvement of our Nation's airports. This program, originally enacted in 1970, has gone a long way toward helping our airports fund those projects necessary to keep pace with the fantastic growth of aviation during the past decade.

As my colleagues have indicated, H.R. 4182 authorizes $450 million for this purpose in fiscal year 1981. Of this amount, $387 million is for air carrier airports and $63 million for general aviation airports. Commuter airports are guaranteed a minimum of

$15 million out of the air carrier discretionary fund while at least $20 million out of the general aviation category is guaranteed for reliever airports.

The Public Works Committee held hearings on H.R. 2643, the committee's 3-year ADAP bill, earlier in the year. Testimony elicited during those hearings amply demonstrated the substantial capital needs which will have to be met if we are to safely accommodate the growth of aviation in the coming years.

Obviously, the funds authorized by H.R. 4182 will only meet a small portion of those needs but the funds are nonetheless essential to assist our airports in meeting their obligations to serve the traveling public.

Mr. Speaker, as a member of the Aviation Subcommittee, I have been actively involved in both the multiyear ADAP bill (H.R. 2643) and the legislation before you today. While I agree with the gentleman from Kentucky that it is still imperative to adopt the multiyear ADAP bill, passage of H.R. 4182 will at least assure that this excellent program will be funded until the Ways and Means Committee has the opportunity to report out a corresponding tax title to go along with H.R. 2643. Hopefully, such action will occur as soon as possible after the August recess.

For the foregoing reasons, I urge my colleagues to adopt H.R. 4182. It will continue a valuable and worthwhile program and assure that our airports will be able to use some of the $3.7 billion surplus currently in the airport and airway trust fund.

Thank you.

Mr. SNYDER. Mr. Speaker, I yield such time as he may consume to the ranking member on our full committee, the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Speaker, I support the gentleman's motion to suspend the rules and to adopt H.R. 4182 along with the committee amendment which he has just described.

This amendment is necessary to allow us to enact a simple 1-year extension of the ADAP program without the necessity for any formal action by the Ways and Means Committee. Its adoption would have no effect on the current user tax levels but would merely permit trust fund dollars to be released for essential capital improvement purposes in fiscal year 1981.

Obviously, all of us are concerned about the fact that the user taxes currently being collected are, for the most part, going into the general fund. We are therefore hopeful that the Ways and Means Committee will adopt a tax title for H.R. 2643, the Public Works Committee's multiyear ADAP bill, so that the user taxes can once again flow into the aviation trust fund and be spent for their intended purpose.

However, for the interim, I am pleased that the Ways and Means Committee has agreed to let us proceed with this important legislation.

Most of my colleagues are aware of my longstanding involvement and deep commitment to aviation. Almost 14 years ago, I spoke to you in this body about the critical need for integrated airport systems in our metropolitan areas which would assure a coordinated approach to airport planning and one which would take into account the unique air transportation needs of each metropolitan area.

That was before passage of the Airport and Airway Development Act of 1970—a statute which in large measure is responsible for the fantastic growth of aviation during the past decade. By creating a reliable source of funding for the capital improvement needs of our air transportation system, the Congress took a significant step toward assuring that our aviation facilities would not only accommodate anticipated growth but that it would be accomplished with the highest degree of safety. I think the progress of aviation since the passage of that statute speaks for itself and underscores the importance of continuing this excellent program.

Passage of this legislation would allow the FAA to begin obligating these funds to airport sponsors for essential capital improvement. Unfortunately, no grants have been made since October 1, 1980, and it is time that we rectified that situation.

The funding level in the bill—$450 million for fiscal year 1981—is very modest indeed, especially when compared to the fiscal year 1980 authorization of almost $670 million. Nevertheless, it is absolutely essential that this money be authorized as soon as possible in order to prevent the possibility of losing all 1981 funds. I might add that this amount is also reflected in the budget resolution and in the fiscal year 1981 supplemental appropriations bill.

Accordingly, I would ask my colleagues to adopt H.R. 4182 and to continue the existing ADAP program at a level of $450 million for fiscal year 1981. It is a very small price to pay to assist our Nation's airports in meeting their immediate capital improvement needs. It is an investment which will reap substantial dividends for the traveling public and one which we cannot afford to forgo.

● Mr. DREIER. Mr. Speaker, I rise to voice my strong support of H.R. 4182, which authorizes continuation of the airport development aid program (ADAP) for fiscal year 1981. H.R. 4182 is a 1-year bill that establishes funding of $450 million in fiscal year 1981 for ADAP.

The current airport development program authorization ran out on September 30, 1980. This bill continues all provisions of the 1976 act governing the allocation of funds between various kinds of airports and the minimum funding levels for certain programs.

This bill will simply extend for 1 additional year the ADAP program and will permit the Federal Aviation Administration to obligate the $450 million before the end of the fiscal year.

In light of the contributions made by users of the airport and airways systems, who paid user charges into the airport and airways trust fund from 1970 to 1980, loss of fiscal 1981 funds due to lack of congressional action would be unjust and unmerited.

The bill does not include any so-called "defederalization" of larger airports; its sole function is just to continue the eligibility of all airports for funding. Under this bill, projects which began during the 1981 fiscal year, when there was no program in effect, will be eligible to apply for 1981 grants.

I believe this bill is fair and equitable and will help meet aviation needs and further national goals.

Thank you for allowing me this opportunity to address this most important matter.●

Mr. MINETA. Mr. Speaker, I have no further requests for time and yield back the balance of my time.

Mr. SNYDER. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. MINETA) that the House suspend the rules and pass the bill, H.R. 4182, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

□ 1500

GENERAL LEAVE

Mr. MINETA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 4182, just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

JAMES A. BURKE POST OFFICE

Mr. FARY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1898) to designate the building known as the Quincy Post Office in Quincy, Mass., as the "James A. Burke Post Office."

The Clerk read as follows:

H.R. 1898

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the building located at 47 Washington Street, Quincy, Massachusetts, known as the Quincy Post Office, shall hereafter be known and designated as the "James A. Burke Post Office". Any reference in a law, map, regulation, document, record, or other paper of the United States to that building shall be deemed to be a reference to the "James A. Burke Post Office".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Illinois (Mr. FARY) will be recognized for 20 minutes, and the gentleman from Minnesota (Mr. STANGELAND) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. FARY).

Mr. FARY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am greatly honored by the fact that the first bill I am bringing to the floor as chairman of the Subcommittee on Public Buildings and Grounds is a bill to name the Quincy, Mass., Post Office in honor of our very dear friend and former colleague, Jim Burke.

When I first came to Congress in 1975, Jim had already been here a long time but in his kind Irish way, he became my friend and helped me to become acquainted with the workings of the House he knew so well. He frequently joined me and my two colleagues from Illinois, MEL PRICE and FRANK ANNUNZIO, for lunch, and we spent quite a lot of time trading old war stories. Jim, being Irish and from the great State of Massachusetts, had a little bit of an edge on us, but I think that what really made the lunchtime banter was Jim's own exceptional sense of humor and personal warmth. It was hard not to love the guy once you knew him well.

The qualities that made him stand out as a person never faded, not even when he began to have problems with his health. His example of courage and faith in the face of bad times has always stayed in my mind. I hope that if bad times fall on me that I can weather them the way Jim did.

He was greatly respected by his colleagues in this House. He gave himself completely to the task of serving his constituents and serving the Democratic Party. He stood out when he was here but he would stand out even more in these days when party loyalty has gone out of style. He was a Democrat in the same tradition that our Speaker TIP O'NEILL is a part of.

I greatly admire Jim Burke and have missed him greatly since he retired. I hope that he will always be well and I hope that the House will pass this bill as a tribute to one of its most distinguished alumni.

I wish to thank Jim's successor, BRIAN DONNELLY, for bringing this bill to the committee's attention and doing the work of seeing it through to the floor. He and I have served on the Public Works Committee since he was elected to the House and from what I have seen of his work, I am sure Jim Burke would be proud of him.

Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. DONNELLY).

Mr. DONNELLY. Mr. Speaker, I rise in support of H.R. 1898. I join Chairman FARY in asking my colleagues to join me in honoring James A. Burke, a man whose record of devoted public service spanned five decades, including 20 years in this Chamber.

Jim Burke entered public life in the 1930's, first as a State representative from Boston then as the city's registrar of vital statistics.

In World War II, he was a decorated officer in Army intelligence including 2 years service in the South Pacific.

Following the war, Jim Burke returned to the legislature, where he became an assistant majority leader under the first Democratic Speaker of the Massachusetts House, TIP O'NEILL.

From 1959 to 1979, he gave the Nation an example of a true Representative in Congress.

For those 20 years, he worked diligently in Washington and at home for the best interests of the people of his district and of the Nation.

When he decided to retire in 1978, one local newspaper observed correctly:

> While other Members of Congress have involved themselves with *"Glamor Issues,"* Burke's record is one of dogged persistence on the bread and butter issues that affect his constituents: jobs, wages, and social security assistance.

He ended his career in Congress as chairman of the Social Security Subcommittee. As each day passes, he looks more and more like a prophet.

He fought his last fight here on behalf of genuine reform of the social security system. We continue to regret that Congress did not follow his sound advice.

The crisis that haunts the program today could have been solved years ago if we had listened to Jim Burke.

There is no question that Congressman Jim Burke listened to his constituents.

This was demonstrated to his colleagues when he championed the cause of the working man and woman in committee and on the floor.

It was also demonstrated at home. From the day he was sworn in in 1959 to the day he left office in 1979 Jim Burke's office at the Quincy, Mass., Post Office was always available to his constituents.

As his successor, I learned quickly that, to the residents of the district, that post office is synonymous with Congressman Jim Burke and with his crusade to keep Congress and the Federal Government in close touch with the people he represented.

I urge my colleagues to affirm that identification of the Quincy Post Office.

It will be a modest but lasting tribute to a modest and exemplary public servant, the Honorable James A. Burke.

Mr. STANGELAND. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as ranking Republican serving on the Public Buildings and Grounds Subcommittee, I rise today to express my full support for H.R. 1898, a bill designating the Quincy, Mass., Post Office as the "James A. Burke Post Office." This bill has passed the subcommittee and full Public Works and Transportation Committee with bipartisan support and is a fitting tribute to former Congressman Jim Burke for his many accomplishments while serving here in Congress. In addition to his distinguished career on the Hill, Jim Burke has also made significant contributions while serving the public on a local and statewide level in Massachusetts. For these reasons, I would strongly urge my colleagues to approve this legislation as an appropriate gesture of our appreciation for Mr. Burke's contributions.

Additionally, let me point out that the naming of this postal facility in honor of Congressman Burke meets the criteria that has been previously followed for the naming of Federal building, by the Public Works and Transportation Committee.

Mr. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. STANGELAND. I would be happy to yield to the distinguished gentleman from California (Mr. CLAUSEN), the ranking minority member of the committee.

Mr. CLAUSEN. I thank the gentleman for yielding.

Mr. Speaker, I would just like to add my support for H.R. 1898, a bill that would name the Quincy, Mass., Post Office in honor of our former colleague, and I want to add a very close personal friend, Jim Burke.

His distinguished career in Congress is well known by those of us who served with him. He represented not only the 11th District, but the entire State of Massachusetts ably and well.

Many of my colleagues who are on the floor now will remember Jimmy Burke sitting right over here in the middle of the aisle with that wide grin and extraordinary personality, always monitoring what was going on, and whenever Jim Burke rose to take the microphone in the well of the House, I can tell the Members, this Congress listened to him. He always had some-

thing very perceptive and very constructive to say. I considered Jim Burke one of my closest friends in this House during the time we served together. In addition to our legislative efforts, we shared a mutual love for baseball where he followed the annual congressional Democrat-Republican baseball game with great interest. Like the baseball we enjoyed, Jim Burke was a great team player for America.

I hope that the Massachusetts delegation will convey this message to him and we want to commend the distinguished chairman, the gentleman from Illinois (Mr. FARY), for bringing this bill, and the gentleman from Massachusetts (Mr. DONNELLY), for sponsoring and bringing it to the attention of the House.

On behalf of all the Republicans on the Public Works and Transportation Committee, I want to add my support to the bill.

Mr. FARY. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. MOAKLEY).

Mr. MOAKLEY. Mr. Speaker, I rise today in support of H.R. 1898, a bill which would rename the post office in Quincy, Mass., as the James A. Burke Post Office.

I feel qualified in speaking to Jim Burke's many sterling qualities for I have been fortunate enough to have known him over the years both as a personal friend and as an admiring colleague in two elective bodies. Jim and I served together in the Massachusetts House of Representatives for 6 years and I feel fortunate to have witnessed the sense of decency and commitment he brought to that position. He served as a State representative for 10 years, 4 of those years as majority leader. The people of the 11th District in Massachusetts demonstrated their recognition of Jim Burke's dedication to this country by electing him to Congress in 1958. Jim served 10 terms in this body and gained the unqualified respect of his colleagues on both sides of the aisle. Jim's insight into some of the problems besetting this Nation were so advanced that many of his ideas are only now being discussed by this body. An example of his insight can be found in the social security system. As chairman of the Subcommittee on Social Security, Jim recognized the fiscal problems confronting the social security system many years ago. As you know we are just now beginning to address those problems.

During his tenure as a U.S. Representative, the Quincy Post Office housed Congressman Burke's district office. Thus I think it is only appropriate that the building now be renamed in his honor as a small recognition of the high caliber of the service he has performed for this country. And I would like to thank my colleague, Mr. DONNELLY, for introducing this well-deserved honor for his predecessor from the 11th Congressional District in Massachusetts.

□ 1510

Mr. FARY. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. FRANK).

Mr. FRANK. I thank the gentleman for yielding.

Mr. Speaker, I want to add my strong support for this very well deserved legislation to honor James Burke.

I never had the privilege of serving with former Congressman Burke. I followed him to the Massachusetts Legislature and I followed him here. But I served in the Legislature of Massachusetts during the latter part of his congressional service, and his work on national issues and on local issues was outstanding. Particularly on social security, as the distinguished gentleman from Massachusetts (Mr. MOAKLEY) pointed out, James Burke was a prophet. His dedication to social security, his insistence that there were ways that we could continue to fund our obligations to older people without financial irresponsibility or in any way cutting back on those obligations were lessons a few years ago that we very much need to know now.

James Burke's public service to the people of Massachusetts and the people of the Nation was outstanding. It is wholly fitting and proper that we pay tribute to the great work that he has done by passing this bill.

Mr. STANGELAND. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Massachusetts (Mrs. HECKLER).

Mrs. HECKLER. Mr. Speaker, there are many occasions when we are called upon to make pro forma statements, or insert remarks in the RECORD, that honor this former colleague or that. But there are few that honestly provide the warm personal satisfaction that usually comes from complementing relatives, close friends, or other loved ones at times of celebration of accomplishment.

For me, this is such an occasion.

In paying tribute to the Honorable James Burke, Congressman from Massachusetts 11th District, as we consider this legislation to name the post office in Quincy in his honor, I am not only paying tribute to a revered former Member of the Bay State delegation, but I am also in truth saluting a treasured friend and favorite person. To know Jimmy Burke is to love him and I am sure that all my colleagues who served with him shared that view. No man or woman here worked harder and more faithfully and more diligently to serve his constitutents than Jimmy Burke did, and despite the great power that came to him by virtue of his seniority in the Congress he never changed, but always remained an utterly unpretentious, down-to-earth, approachable, and caring man. He is a real model to me, and I know to many others in this House, of what constituent service is all about.

His closeness to the people of his district, his ability to know and understand their needs and attitudes, are the stuff of legends—and over the years it paid Jimmy Burke great dividends, for he was a big winner from the very beginning. No opponent from either party was ever really able to make a dent in his strength at the polls. Jimmy Burke was a great Congressman for many reasons, but first and foremost because he was, is, and always will be a great person, and that is the most important part of this. It is a joy to salute former Congressman James Burke at this time, and to urge the speedy passage of H.R. 1898.

I feel that my colleague, BRIAN DONNELLY, who sponsored this legislation, deserves to be recognized as well, as he has brought to our attention a fitting tribute to a great man. He is following a great man in his role as Representative from the 11th District of Massachusetts.

I would like to add in my tribute a comment about Aileen Burke, who I think today shares this great triumph. Frankly, it is not often that a wife is recognized in the Halls of Congress, but today in paying this tribute to Congressman Burke I think that the contribution of his wife, Mrs. Aileen Burke, who is at his side today and who has provided so much love, affection, and support to him, is worthy of mention. It is a great day for the Irish to see Congressman Burke and his wife, who was the unofficial representative of the Irish Embassy in Washington for many years, recognized on this floor of Congress.

I am very proud to be a member of the delegation that offers this salute. No tribute was more deserved.

Mr. FARY. I thank the gentlewoman for her comments.

Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Speaker, I want to commend my distinguished colleague, the gentleman from Massachusetts, BRIAN DONNELLY, for filing this legislation, and for all of the reasons that have been enunciated here I support this legislation.

Jimmy Burke has been my friend for more than 40 years. I served with him in the Massachusetts Legislature and had the privilege of serving with him in Congress for 20 years. His tenure in the House of Representatives was characterized by a deep commitment to the needs of the elderly, the disabled, and the working men and women of this country. He believed

that a Member of Congress should not only represent his constituents through legislative activity but serve them as well by becoming their agent in matters affecting Federal departments and agencies. Jimmy Burke championed the cause of thousands of his Massachusetts constituents whose dealings with the Federal Government would have been a great deal more difficult without his intercession. His efforts were directed at insuring that government was responsive to the needs of the governed, and that it effectively met those needs. People came to Jimmy Burke with their problems because they knew that in him they had not only a sympathetic listener, but an experienced and resourceful advocate.

Mr. Speaker, it is indeed fitting that the Quincy Post Office will bear the name of Jimmy Burke. For many people, a post office represents their most direct contact with the services provided by the Federal Government. In furnishing those services, the men and women who work at the Quincy facility will bear a special responsibility to discharge their duties in a manner consistent with the model provided by Jimmy Burke—with dispatch, with equity, and with compassion.

Mr. FARY. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. EARLY).

Mr. EARLY. I thank the gentleman for yielding. Mr. Speaker, it is a pleasure to join with my fellow Members here in urging unanimous approval of this resolution to name the Quincy Post Office in the Boston area in honor of our former colleague from Massachusetts, Congressman James A. Burke.

Through the 20 years of his outstanding legislative service here, Jim Burke was widely recognized and deeply respected for his dedication to the national interest and his devotion to the fulfillment of the needs of his constituents and communities within the 11th Congressional District of our Commonwealth. He was and is particularly noted for his special knowledge of and intense concern for the financial integrity of our social security system. His authoritative voice and recommendations are being sorely missed in our current debate on this complex subject.

His constant availability to his constituents, his compassion, his encouragement, his prompt and effective response in trying to help them with their problems will always remain a legend in his district. No greater tribute can be given to a public officer than the practically universal esteem, admiration, and affection of the people in his home area who know him best and who repeatedly reviewed and approved his character and competence in representing their local and national legislative interests over many years. Jim Burke enjoyed that highest of tributes throughout his service in the Congress here, and he enjoys it at home today; he enjoys it because he has earned it. All of you who have served here with Jim Burke know he was a national Representative of immense courage, unwavering principle, unsurpassed patriotism, unfailing good humor, and stalwart conviction. When he felt he was right on an issue, no one from the President on down could move him. His knowledge was his strength, his conscience was his guide, and his stand was concrete. To all who know him Jim Burke is the personification of the highest and the best of human attributes.

His name will forever recall the finest qualities and best traditions of our American origin and progress. That is the true reason why this resolution should be adopted without delay.

Mr. FARY. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. SHANNON).

Mr. SHANNON. Mr. Speaker, I would like to thank the gentleman for yielding and join with my colleagues in support of this legislation.

As a member of the Ways and Means Committee, I deal with many of the same individuals in Massachusetts that Jim Burke dealt with over the years. I can tell the Members that he is missed very deeply by them in this body because of his great commitment to the needs of the elderly and, particularly, the fine work he did over the years in the social security system.

I think, particularly now when we have to face this question again of how we are going to treat our elderly citizens, what we are going to do with social security, how we are going to restructure the Nation's tax laws, it is fitting that we should honor him.

So, I join with my colleagues in saying that I think the time has come that we remember what Jim Burke did for his country and did for his constituents.

I would like to commend my colleague from Massachusetts (Mr. DONNELLY) for offering this legislation.

Mr. STUDDS. Mr. Speaker, there is certainly nothing more that can be said—or that needs to be said—about the nature and quality of Congressman Burke's service to his constituency and his country.

But I would like to add a personal note about Jimmy Burke, the human being. Jimmy Burke was elected to the State legislature the year before I was born, and—while he never told me this—I suspect he looked with some uneasiness on the rapid turnover in the Massachusetts delegation to this House with the election of a younger generation of Members beginning in 1969. Whatever reservations he may have entertained about the replacement over time of his contemporaries by an outspoken, occasionally disrespectful group of young turks seemingly hellbent on transforming the country and the world overnight, he treated this particular turk with the most extraordinary kindness and patience. Some of his advice I took, and some I did not—but always I listened, because he was wise and because he was funny.

"STUDDS," he would invariably bellow at me whenever I looked very worried or very angry—which was most of the time—"the trouble with you is you think this place is on the level!"

Again and again, Mr. Speaker, he reminded us not to take ourselves too seriously. We do well to remember this and to remember him.

● Mr. O'NEILL. Mr. Speaker, I am proud to join my colleagues in paying tribute to my close friend and colleague of more than 20 years in the U.S. House of Representatives, the Honorable Jimmy Burke. I can think of no more fitting a tribute to Jim than naming in his honor the building in which his district office was housed during his service in this body.

Jim Burke and I go back a long, long way. I have known and worked closely with Jim throughout my entire political career. Jim and I first served together in the Massachusetts State House where his support helped enable me to become the first Democratic speaker in the history of the Massachusetts General Court.

Jim was a welcomed supporter and a tough legislative and political opponent. I recall that as speaker of the Massachusetts State House of Representatives, I would ask Jim if he would support me on a particular issue—and if he thought it was right, he would be with me all the way, and when he felt it was wrong, he would say with a gleam in his eyes, "No, TIP, it's not on the level," and no one was a more formidable adversary.

When the chips were down, when I really needed his assistance, his vote, or his frienship, Jim Burke was always there, and often, before I even asked.

Jim diligently did his homework and was a real fighter for the causes in which he believed. No one represented his constituents more conscientiously than Jimmy Burke.

We all admire Jim for his strength of character, and dedicated devotion to duty throughout his distinguished political career. And for his efforts as a champion of the golden agers, Jim Burke is legion. Through his tenacious insistence we were able to pass legislation during the 95th Congress that insured the financial soundness of the social security trust funds.

Jimmy Burke was a prodigious legislator, a forceful politician who knew how to accomplish his many goals, and

a dear personal friend. It gives me great pleasure to join in honoring one of the most talented, diligent, and distinguished public servants in the history of Massachusetts.

I urge my colleagues to support H.R. 1898, in recognition of Jim Burke's dedicated service to his district, his State, and his Nation.●

● Mr. CONTE. Mr. Speaker, I would like to add my support to this bill, H.R. 1898, which would honor my former colleague from the Commonwealth of Massachusetts and good friend, James A. Burke, by naming the Quincy Post Office after him.

Most of Jim Burke's colleagues in the House knew him as a staunch advocate for our Nation's veterans, he himself having been an exemplary soldier, serving as a special counterintelligence agent in the South Pacific in World War II and receiving four battle stars. He was also a defender of our Nation's retirees, and his work as chairman of the Social Security Subcommittee exhibited his compassion for those in their later years.

Those of us who served with Jim Burke from Massachusetts, however, have a deeper understanding of what made this man such an extraordinary legislator and dedicated public servant. Having served with Jim for 18 of his 20 years in Congress, many of them as a neighbor in the Cannon Building, I know that Jim's interest, far above anything else, was always his people in the Commonwealth's 11th District.

For 20 years, Jim Burke's district office in the Quincy Post Office served as a clearinghouse for Federal information and as an ombudsman for his constituents experiencing trouble with the Federal bureacracy.

Constituent service was a hallmark of Jim Burke's tenure in this office, and it is only fitting that the building in which so much fastidious care was harbored be named for James A. Burke.●

● Mr. ANNUNZIO. Mr. Speaker, I rise in support of H.R. 1898, a bill to designate the building known as the Quincy Post Office in Quincy, Mass., as the "James A. Burke Post Office."

The Honorable James A. Burke retired in 1978 at the end of the 95th Congress after two decades of service to his constituents of the 11th District of Massachusetts and to the people of this Nation. Jim Burke has been my friend since I was elected to Congress in 1964, and the people of our Nation lost a fine, dedicated public servant when he retired because of illness.

I commend his successor, the Honorable BRIAN J. DONNELLY, for introducing H.R. 1898. Jim Burke is most deserving of this honor for he proved himself a capable legislator and fully worthy of the trust and confidence of his constituents.

Jim was first elected to the 86th Congress in 1958, after a career of outstanding service and leadership in the Massachusetts State House of Representatives and as a member of the Massachusetts General Court. He also has a fine record of gallant military service in World War II as a special agent in the counterintelligence, where he won four battle stars and other decorations.

Congressman Burke became a self-educated expert on the social security system during his service in Congress as chairman of the Social Security Subcommittee of the House Ways and Means Committee. His outstanding dedication to high standards is an inspiration to his friends and fellow citizens, and his record of excellence and creative accomplishment shall long be remembered by those of us who had the privilege to serve with him in the Congress of the United States.

Mr. Speaker, I was proud to have worked with James A. Burke in the House of Representatives, and I urge the support of my colleagues for H.R. 1898 as a tribute to this courageous and compassionate gentleman. An article from the April 10, 1978, edition of the Boston Herald entitled, "Burke: A Job Well Done," follows:

BURKE: A JOB WELL DONE

Since he lost his right foot a year ago in a battle with diabetes, U.S. Rep. James A. Burke has displayed courage and determination in performing his duties in the Congress.

Confined to a motorized wheelchair, the Milton Democrat answered roll calls every day and fought for legislative goals close to his heart, such as using general revenue to finance part of the Social Security System and for "just" tax revisions.

In the past he has fought for Medicare and Medicaid, and he saw both programs implemented. To the elderly, he was a champion, and he won consecutive elections in 20 years in the Massachusetts 11th Congressional District.

When he announced the other day that he will retire at the end of this year, the ailing 68-year-old former Boston city official and Massachusetts legislator chose the chambers of the U.S. House Ways and Means Committee to make the announcement.

In two decades Jimmy Burke rose to become the ranking Democrat on the powerful House Ways and Means Committee, Chairman of joint Internal Revenue Committee and Chairman of the House Social Security Committee. The man has done his job and deserves praise for his performance and his statesmanship.

House Speaker Thomas P. O'Neill, Jr. spoke for all members of Congress when he told Burke, "You stood up with courage regardless of what the issue was. I have known no man who is more popular and held in higher regard by your colleagues than you."●

● Mr. MARKEY. Mr. Speaker, I rise in support of H.R. 1898. I, along with my colleagues, would like to echo my strong support for this piece of legislation that would honor James Burke by renaming the post office in Quincy, Mass., after him. His renowned dedication to national and local issues coupled with the caring and concern that he expressed for all people will long be remembered. A post office provides a direct line between the public and the Government, and I can think of no better model for the post office to follow than that of Jimmy Burke. A model of patriotism and courage, Jimmy Burke did indeed represent the Federal Government at its best.●

Mr. STANGELAND. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. FARY. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. FARY) that the House suspend the rules and pass the bill, H.R. 1898.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FARY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

FORT POINT CHANNEL, BOSTON BRIDGE

Mr. ROE. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1855) to grant the consent of Congress to the city of Boston to construct, maintain, and operate a causeway and fixed-span bridge in and over Fort Point Channel, Boston, Mass., as amended.

The Clerk read as follows:

H.R. 1855

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the consent of Congress is hereby given to the city of Boston to construct, maintain, and operate a fixed-span bridge in and over the water of the Fort Point Channel, Boston, Massachusetts, lying between the northeasterly side of the existing Summer Street Bridge and the northeasterly side of the existing Northern Avenue Bridge.

SEC. 2. Work shall not be commenced on such bridge until the location and plans therefor are submitted to and approved by the Secretary of Transportation.

SEC. 3. Any project heretofore authorized by an Act of Congress, insofar as such project relates to the above described portions of Fort Point Channel, is hereby abandoned.

SEC. 4. In approving the location and plans of any bridge, the Secretary of Transporta-

tion may impose any specific conditions relating to the maintenance and operation of the structure which may be deemed necessary in the interest of public navigation.

□ 1520

The SPEAKER pro tempore. Is a second demanded?

Mr. HAMMERSCHMIDT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. ROE) will be recognized for 20 minutes, and the gentleman from Arkansas (Mr. HAMMERSCHMIDT) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. ROE).

Mr. ROE. Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey (Mr. HOWARD), the chairman of the Committee on Public Works.

Mr. HOWARD. Mr. Speaker, I rise in support of H.R. 1855, as amended to grant the consent of Congress to the city of Boston to construct, maintain, and operate a fixed-span bridge in and over Fort Point Channel. This bill would authorize no appropriation of Federal funds. It merely would allow the city of Boston to construct a new bridge at Northern Avenue, subject to approval of its plans by the Coast Guard, and would abandon that part of a Corps of Engineers dredging project which would no longer be necessary after construction of the new bridge.

Mr. Speaker, this bill is needed by the city of Boston so that it may proceed with its planning and construction activities. It is a good bill, and I urge my colleagues to support it.

Mr. Speaker, I wish to commend the gentleman from New Jersey (Mr. ROE), the chairman of the Subcommittee on Water Resources, as well as the gentleman from Arkansas (Mr. HAMMERSCHMIDT), and the Subcommittee on Water Resources for reporting this bill and urge its approval by the House.

Mr. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from California.

Mr. CLAUSEN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in support of our committee leadership's efforts to move H.R. 1855 to construct the bridge that will provide the congressional consent to Boston to build the bridge in and over Fort Point Channel.

We on the Public Works and Transportation Committee have always tried to be responsive to community infrastructure requirements that fall within our jurisdiction.

As the chairman, Mr. HOWARD, has stated, there are no requirements for Federal funds. It provides the consent of Congress to the city of Boston to build, maintain, and operate the bridge and we on the Republican side of the committee concur in this effort.

Mr. ROE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1855, as amended, would do three things. First, it would grant the consent of Congress for the city of Boston to construct a fixed-span bridge over Fort Point Channel in order to replace a deteriorating movable-span bridge at Northern Avenue. Second, it would require that before the new bridge could be constructed, its plans must first be approved by the Department of Transportation, subject to whatever conditions the Department might impose in the interest of public navigation. And, third, because the Corps of Engineers is presently authorized to maintain Fort Point Channel as part of the navigation project for Boston Harbor, the bill abandons that part of the Federal navigation project which relates to the proposed new bridge. Although the maintenance of Fort Point Channel has been authorized for many years, it has, in fact, not been maintained in the recent past.

Mr. Speaker, I urge passage of the bill.

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1855.

The bill is very straightforward. It permits construction of a bridge across the Fort Point Channel in Boston. Eleven years ago Congress acted in a similar fashion to allow another bridge to be constructed farther up the channel.

The city of Boston is most anxious to proceed, and I believe we should act expeditiously to permit them to go forward with their planning. Therefore, I urge the adoption of H.R. 1855.

Mr. ROE. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. MOAKLEY).

Mr. MOAKLEY. Mr. Speaker, I rise in support of H.R. 1855, which grants the consent of Congress to the city of Boston to construct, maintain and operate a fixed-span bridge in and over Fort Point Channel in Boston, Mass.

I would like to thank the distinguished chairman of the Water Resources Subcommittee (Mr. ROE) and the distinguished ranking minority member of the Water Resources Subcommittee (Mr. HAMMERSCHMIDT) for their consideration and efforts on this legislation.

I have introduced this legislation at the request of the city of Boston and since have received letters of support from the mayor of Boston, the Boston Redevelopment Authority, the Massachusetts Port Authority, the Boston Fisheries Association, the police, fire and traffic and parking departments of the city of Boston, the Economic Development and Industrial Corp. of Boston, the Massachusetts Executive Office of Transportation and Construction, and the Massachusetts Department of Public Works.

Mr. Speaker, the Fort Point Channel area is experiencing substantial development pressures. I recently read in a Boston periodical "nothing short of a crippling recession or an atomic war will stop development of the Fort Point Channel."

Much to the credit of the public officials and businesses involved we will see greatly expanded activity in the channel area with projects such as Massport's third containerport, the Boston Marine Industrial Park, the White Fuel Depot, the reuse of the Boston Army Base, and expansion at the existing containerport. It is estimated that with this increase in activity, the projected average daily traffic flow will grow from 17,000 vehicles at the present time to an estimated 33,000 in the year 2000.

To accommodate this increased commercial traffic and help trucks bypass the South Boston residential community, the city of Boston plans on building a new, wide roadway to connect directly with interstate highways. Crucial to any new connecting road is a new Northern Avenue Bridge.

The present bridge, built in 1907, is in a rapidly deteriorating state, and maintenance costs to the city of Boston run into the hundreds of thousands of dollars for temporary repairs, in addition to the cost of operating a movable span. I have also been informed that the bridge must be replaced because of basic engineering facts about the old structure.

A new fixed-span Northern Avenue Bridge is being requested because if a movable bridge were to be allowed to remain open much of the time, truckers and other commercial traffic, needing to move their cargo in a timely fashion, will continue to avoid the bridge, and to find alternative routes going by or through the residential community of South Boston.

The proposed new bridge would have a 15-foot clearance at high tide, and a 25-foot clearance at low tide. The great majority of motor boats, barges, and lobster boats will thus be able to navigate the bridge. Larger sailboats will not be able to go under at full mast.

One business, the McKie Lighter Co., will be displaced by a new bridge. I would like to state that I fully expect the city of Boston to accommodate this commercial concern in its effort to relocate. To build the bridge and accompanying new road, no other business will be displaced.

As presently proposed, the bridge will be constructed on the western shore of a currently unused parcel of land between the Hook Lobster Co. and the Harborplace Office Building, both of which will remain. On the eastern shore, the road will go between the Neptune Lobster Co. and the Victoria Station Restaurant—both structures will remain. The new road will be located on unused land formerly owned by the Penn Central Railroad. With this plan, both lobster companies, which are now located inside of the bridge, will be located on the seaside of the bridge.

I would like to address now how the rest of the channel will be affected. I can remember when I was growing up in South Boston that Fort Point Channel was active in commercial transportation but, as a history of Fort Point Channel by the Boston Redevelopment Authority shows, the last freighter to use the channel was when the large sugar refining plant located on its banks moved to Charlestown in the mid-1950's.

Some of the once busy Boston wharf company warehouses were razed and made into parking lots. And, as trucking and air freight outpaced rail and shipping, the Fort Point Channel's advantages as an intermodal distribution point was lost.

Locally, other factors contributed additionally to the channel's decline. The Mass Turnpike and Southeast Expressway made trucking cheaper in the Boston area than rail. The central artery (1959) cut off the Leather District, South Station, and Fort Point Channel area from central Boston.

The remaining South Bay was completely filled in by the 1960's, negating the previous need for the channel remaining open as a waterway. Dorchester Creek and the Roxbury Creek were culverted and emptied into the end of the channel. The reclaimed South Bay became the location of the Southeast Expressway (1959), the incinerator (1958), the new Boston Meat and Poultry Market (1969), maintenance facilities for the MBTA and city (1970's), and the railroad yards.

As the wharves became unused, much of the channel's shoreline was replaced by nonmaritime uses. The Gillette plant replaced the American Sugar Refinery operation on the east shore, and the U.S. Postal Service built a regional headquarters on the western shore.

In 1970, the U.S. Congress authorized the construction of a fixed-span bridge at Summer Street, just two blocks down the channel from the present Northern Avenue Bridge. The Congress Street Bridge, further down the channel, is currently nonoperable. Thus, the boats that enter the channel at Northern Avenue can only travel about 800 feet.

Let me state that I believe Fort Point Channel can and should be used for water-related purposes after the construction of a fixed-span bridge.

The channel between Northern Avenue and Congress Street can be used as a major marina for motor-powered pleasure boats. Smaller sailboats could go under the bridge at full mast. At present the pleasure boats which dock at Russia Wharf and other locations must face a long, laborious process just to go in and out of the channel, with later waits of a half hour. These same boats will be able to steam in and out at will—any time night or day.

For tall-mast sailboats and larger boats, I encourage the city to explore developing a second marina area outside the new bridge.

The *Calliope,* operated by the Museum of Transportation and a major user of the present movable-span bridge, must presently wait for the bridge to open. With the new fixed-span bridge, the boat will now be able to go in and out on a quicker schedule, which means more trips per day.

At present, the bridge's problems are causing the *Calliope* to move to a temporary dock away from the museum. With the new bridge, the tourist shuttle can go right to the museum, and Boston can work on a real, first-class tourist boat shuttle.

Mr. Speaker, I believe the Fort Point Channel is a great, usable urban resource and I also believe that in meeting the escalating transportation needs of this commercially active area, it can remain to be so. A fixed-span bridge will allow the city of Boston to replace the out-dated existing bridge to meet the new demands of the Fort Point Channel area while reducing commercial traffic in South Boston. I urge passage of H.R. 1855.

I include the following letters:

CITY OF BOSTON,
OFFICE OF THE MAYOR,
City Hall, Boston, January 23, 1981.

Hon. JOHN JOSEPH MOAKLEY,
John F. Kennedy Federal Building,
Boston, Mass,

DEAR CONGRESSMAN MOAKLEY: Since 1972, the City has spent considerable sums of money for temporary repairs to the Northern Avenue Bridge. The nature of the repair work was limited to the most critical structural defects and did not address the severe operational problems of the movable section. Our actions have always been predicated on the preliminary design work, started in 1971 by the Massachusetts Department of Public Works, for replacement of this structure with a new fixed span bridge proceeding in a timely fashion.

As I'm sure Commissioner Joseph F. Casazza of our Public Works Department has informed you, problems relating to environmental concerns have delayed the project from entering the final design stage for a number of years. It now appears however, that the environmental concerns have been resolved and the Coast Guard has expressed its approval for fixed span construction.

It is for this reason, that I am taking this opportunity to reiterate the City position that the replacement facility be designed as a fixed span structure. This proposed construction will result in a financial gain for not only the City of Boston but also for all of the varied industries located in this area that have suffered through costly inconvenience generated by the present movable span.

Your assistance in expediting the legislation needed to build a fixed span bridge, in order that final design and construction may occur, is urgently requested.

Sincerely,

KEVIN H. WHITE,
Mayor.

BOSTON REDEVELOPMENT AUTHORITY,
Boston, Mass., March 24, 1981.

Re Northern Avenue Bridge.
Congressman JOHN JOSEPH MOAKLEY,
J.F.K. Federal Building,
Boston, Mass.

DEAR CONGRESSMAN MOAKLEY: As Director of Boston's planning and development agency, I wish to express our support for the construction of a replacement Northern Avenue Bridge as a fixed span and to offer comments on the validity of our position. This will hopefully supplement other views you have received regarding the legislation necessary to allow the fixed span concept to be implemented.

The major issue in deciding whether or not the bridge replacement should have a fixed or movable span is of course the issue concerning the ease of passage of vessels into and out of the Fort Point Channel, versus the increased costs of a movable span operation and the adverse "shore side" impacts including the adverse impact that a movable span can have on financial institutions investing in the proposed developments served by Northern Avenue.

CHANNEL USE

Historically, the movable spans in all the Channel Crossings were provided primarily for the passage of vessels carrying goods and freight to Channel abutters and beyond via the Roxbury Canal. Now the Roxbury Canal has been filled in and the producers and receivers of goods and freight which spawned the maritime activity have disappeared. Land use and transportation modes and practices have changed. This is not to say that a reawakening of traditional or an introduction of new water transportation is not possible, under circumstances, but just to state an historical reality. Besides the filling in of the Roxbury Canal, the closing of the movable spans on Congress Street and Summer Street bear tangible witness to this fact.

At present, the chief users of the Channel are lobster boats, McKie Lighter vessels and equipment, recreational motor boats at a Russia Wharf Marina and the Museum of Transportation. In the future the proposed fixed span bridge with 16-foot clearance above mean high water would accommodate all present users, it would seem, except McKie Lighter activities.

From the outset of bridge replacement planning, the relocation of McKie Lighter has been assumed. In the greater Boston Harbor area there are other sites available and the present location in the Channel does not appear location-wise to be uniquely strategic. The bridge implementation work would, of course, have to compensate for land and fair relocation costs.

Recreational vessels of the type using the Russia Wharf Marina would in the main be accommodated by the proposed new fixed span bridge.

The two lobster companies on the Channel which are not inside the Northern Avenue Bridge will be located in the future to the seaside of the new bridge, due to the relocation over 200 feet southwards. Thus access for lobster boats would be facilitated. Layover locations inside of the new bridge may, however, be desirable. The new bridge will allow passage of the typical lobster boat for this purpose.

The Museum of Transportation has a steam boat associated with it which was designed, via a hinged smoke-stack, to pass under the proposed new fixed span bridge. If the Museum desires permanent or semi-permanent floating exhibits alongside, boats too large to pass under at low tide (25-foot clearance) would have to be demasted or have certain superstructures temporarily removed to gain access. Although not convenient, this is a feasible method.

A recent Boston Globe editorial favored the concept of a movable span on the grounds of high-tech air freight and fish transport. However, in the case of air freight, the editorial would have trucks from the Turnpike delivering cargo pods to the Channel (assumedly in the vicinity of the Postal Service) to be unloaded and taken to planes. This would be in lieu of door-to-door service by truck, on the grounds that Artery/Tunnel congestion would be avoided. Given the 20 hours per day that a truck can travel off-peak, this idea could only add to transportation costs. Even if it were desirable, it probably could be designed to work with a fixed Northern Avenue Bridge span. In the case of fish transport, it is difficult to see why a movable span would be needed, since the Fish Pier and the lobster companies are all located seaside of the proposed new bridge.

We realize there are some trade-offs between ground and water transport, and that we must recognize valid arguments, but it is not constructive to have invalid reasons put forward to try and prove a case.

In considering the possible array of future navigation desires in the Channel, the proposed new bridge as a fixed span limits most of the access of recreational sailing boats and larger tour or display vessels wishing to berth at the Museum of Transportation. This represents to us the major trade-off which the needs of ground access and the costs of operating and maintaining a movable span bridge require. What is apparent, however, is that a fixed span would still allow for significant boating activity.

LAND USE AND DEVELOPMENT

The Fort Point Channel area, indeed the whole northern commercial part of South Boston, is experiencing development pressures. In dealing with potential developers, one of the chief concerns with starting plans has been the uncertainty of when the existing deteriorated Northern Avenue Bridge will be replaced. Fixed span or movable, the need for a new bridge as soon as possible is clear, both from a functional point-of-view as well as the related development attitudes.

A number of developers have expressed objections to the traffic disruptions a movable span operation would cause and the uncertainty of access for proposed development which have, they believe, adversely affected the ability to proceed with financing of such development. The apparent consensus among major land owners is therefore for the establishment of a fixed span crossing, obviously as soon as possible.

Land use on much of the Channel is fixed, being occupied by users which are permanent in nature and which are not water-related. These include the U.S. Postal Service, the Gillette Company and the Federal Reserve Bank/Dorchester Avenue segment. Significant new development is likely on the former Penn Central land by Cabot, Cabot and Forbes, on the Athanas property, on the British Properties holdings inside of the Congress and Summer Street bridges, and in the Russia Wharf area. Further to the east significant expansion is planned for Massport holdings and for the Boston Marine Industrial Park.

MOVABLE SPAN BRIDGE COSTS

Both the construction cost and the operating and maintenance costs of a movable span bridge are more than for a fixed span. Detailed construction cost estimates have not been made, but a movable span bridge has been quoted as costing $3 to 5 million more than the almost $12 million estimated for the fixed span. Operating costs in excess of $200,000 per year, based on experience with the existing bridge would appear likely. These latter costs would have to be borne by the City. It would seem highly unlikely that the boats using the Channel would be willing or able to assume such costs, directly or indirectly.

TRAFFIC CONSIDERATIONS AND COMMUNITY CONCERNS

It would be significant by itself if a movable span operation periodically interrupted an average daily traffic of 17,000 vehicles (estimated to grow to 33,000 in the year 2000), but the Northern Avenue Bridge link is also of special significance in the total South Boston roadway access system.

Northern Avenue is the preferred access point for general traffic destined for the commercial and industrial area of South Boston. Other access points to the south (Congress, Summer, Broadway, E. Berkeley, Southampton, etc.) either lead to greater use of local downtown streets or, to the south, encourage the short-cutting of trucks and other non-local traffic through residential areas of South Boston. The South Boston community groups have been adamant about this point and have stressed their desire to see traffic confined to the north. At one point in time they even considered seeking legislation to guard against any possibility that trucks be barred from Northern Avenue in the future.

A movable span bridge operation would significantly detract from the attractiveness of Northern Avenue as the preferred traffic access point towards the east.

CONCLUSION

In assessing the matters brought up in this letter and in respect to the several years of planning work (including a 1977 design task force) related to the Northern Avenue Bridge and its setting, we have concluded that the fixed span proposal is most appropriate and should be implemented as soon as possible. Expressed in briefest terms, we feel that the uncertainty of financing development proposals served by Northern Avenue, the extra costs and traffic disruptions that would be caused by a movable span bridge outweigh the benefits that might accrue to the future introduction of significant recreational sailing boats into the Fort Point Channel and the total flexibility of access desires of the Museum of Transportation.

In the engineering and detailed design stage, we will encourage the design team to gain as much clearance as is feasible and will foster the inclusion of good urban design including desirable pedestrian connections, landscaping and aesthetics.

Your assistance in gaining the legislation necessary to implement the project as proposed will be most appreciated.

Very truly yours,

ROBERT J. RYAN.

MASSACHUSETTS PORT AUTHORITY,
Boston, Mass., February 24, 1981.

Hon. JOHN JOSEPH MOAKLEY,
Congressman for the Commonwealth of Massachusetts, J.F.K. Federal Building, Boston, Mass.

DEAR CONGRESSMAN MOAKLEY: I want to go on record as favoring as quickly as possible the replacement of the Northern Avenue Bridge. I think that the only way this will happen is with the fixed span, and, therefore, I support a fixed-span replacement. The Northern Avenue Bridge is absolutely critical to the long-term development of the Port of Boston. As you know, we have major construction projets underway, both at Castle Island and at the South Boston Naval Annex. In addition, the Fish Pier is under renovation and trucking to and from the Pier is increasing rapidly. Finally, there are other developments planned in the Commonwealth Pier area.

All of these projects will increase surface traffic, and the Bridge becomes critical to serve that traffic which is extraorindarily important to the region.

If there is anything that I can do to additionally support the project, please do not hesitate to call on me.

Very truly yours,

DAVID W. DAVIS.

BOSTON FISHERIES ASSOCIATION, INC.,
Boston, Mass., May 20, 1981.

Hon. JOHN J. MOAKLEY,
U.S. House of Representatives, Washington, D.C.

DEAR JOE: Enclosed is a statement relative to endorsing H.R. 1855 granting the City of Boston with consent of Congress to construct, maintain, and operate a fixed span bridge in and over Fort Point Channel, Boston, Massachusetts.

I do believe that building a new Northern Avenue Bridge would be of tremendous value to the Northern Avenue area which is one of the few Boston locations where there is opportunity for building and expansion. Obviously it would be of great value to the Boston Fishing Industry, restaurateurs, the Massachusetts Port Authority, and the South Boston Community as an access and egress of traffic from the South Boston area.

The Boston Fishing Industry heartily endorses your efforts and trust that the Water Resources Committee will approve H.R. 1855. If we in the Industry can be of further assistance, do not hesitate to contact me.

With kindest personal regards,

HUGH F. O'ROURKE,
Executive Secretary.

BOSTON FISHERIES ASSOCIATION, INC.,
Boston, Mass., May 20, 1981.

Hon. ROBERT A. ROE,
Chairman, House of Representatives, Subcommittee on Water Resources-Transportation Committee, Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN ROE: The Boston Fisheries Association representing the Boston Fishing Industry heartily endorses H.R. 1855 granting the City of Boston with the consent of Congress the opportunity to construct, maintain, and operate a causeway and fixed span bridge in and over the Fort Point Channel in Boston, Massachusetts.

The present Northern Avenue Bridge which was constructed in the late 1800's has from all intents and purposes outlived its practical and functional use. With the expansion of Northern Avenue with the increased Massachusetts Port Authority properties adjacent to the Boston Harbor, the three most prominent restaurants in Boston, Anthony's Pier 4, Jimmy's Harborside, and No Name, there has been a tremendous increase in vehicular traffic over the present Northern Avenue Bridge.

There is very limited building space in or adjacent to the main business arteries of Boston that afford the opportunity for growth and expansion. Northern Avenue is the exception that makes it one of the most desirable development locations in the City. Undoubtedly this area would have great growth potential if the new Northern Avenue Bridge was under construction.

Although the present Northern Avenue Bridge does a commendable job in taking care of the normal traffic flow, it also has to be opened by law when requested by boats using the Fort Point Channel. As an example, last summer an excursion boat required 151 openings in July and 118 in August which for the most part took place during the hours of 9:00 a.m. to 6:00 p.m. This caused a tremendous traffic jam which in many instances required considerable time to untangle. Before the excursion boat was located on the Fort Point Channel, the normal number of openings were between 25 to 28 during the course of one month.

It would appear that if a new fixed span bridge was created with sufficient water clearance for the average boat that would use the Channel then the flow of traffic would be much smoother and the boats would have access to docking without requiring Bridge openings. Many years ago the Fort Point Channel was used for freighters by companies that were located in the Channel which have since either moved or no longer exist.

Once the site for the new Northern Avenue Bridge is chosen and construction under way, a complete new renaissance will take place on Northern Avenue. A new Northern Avenue Bridge would indeed complement expansion of Northern Avenue properties. The future growth of the Fishing Industry depends on the Northern Avenue Bridge for access to all sections of Boston, particularly Logan Airport which air freights thousands of pounds of fresh seafood daily.

Sincerely,

HUGH F. O'ROURKE,
Executive Secretary.

MAY 5, 1981.

Hon. JOHN J. MOAKLEY,
John F. Kennedy Federal Building, Boston, Mass.

DEAR CONGRESSMAN MOAKLEY: As Director of the City's Industrial Development Agency, I am writing to express this agency's support for a new fixed-span Northern Avenue Bridge and to urge your continued efforts in favor of legislation (HR 1855) that will make this project possible.

The problems with the current bridge are long-standing and well-known. Its age, size and structural obsolescence have created safety issues, traffic problems and, equally damaging, have inhibited healthy development of the Fort Point Channel area.

In our view the limited recreational benefits associated with a moveable span bridge are minor when weighed against the need to solve these problems, as quickly and deliberately as possible. In fact, quite apart from the extra cost and time involved in constructing and operating a movable span bridge, studies indicate that it would aggravate existing traffic conditions, particularly for truck traffic seeking access to and from South Boston.

From the standpoint of industrial development at the Boston Marine Industrial Park and along Northern Avenue the replacement of this bridge is critical in two respects. First it will simply make it easier to promote new industrial growth by assuring adequate access to and from this district. Secondly, by preventing the congestion a movable span would cause, it will make it possible to divert truck traffic from the more sensitive local streets of South Boston.

We readily concede that sailboating in the Channel would be an attractive activity, one that the fixed-span bridge would for the most part preclude. In our judgement, however, other issues are simply more important to the future of the Fort Point Channel and to the City than this limited esthetic benefit. We urge you, therefore, to support the fixed-span replacement of the Northern Avenue Bridge.

If we can be of any assistance, please let me know.

Sincerely,

BRIAN F. DACEY,
Acting Director.

BOSTON TRAFFIC AND PARKING DEPARTMENT,
Boston, Mass., March 20, 1981.

Hon. JOHN JOSEPH MOAKLEY,
John F. Kennedy Federal Building, Boston, Mass.

DEAR CONGRESSMAN MOAKLEY: I am writing this letter to emphasize the importance of maintaining Northern Avenue open to traffic at all times and therefore the urgency of replacing the existing Northern Avenue Bridge, which is in structurally poor condition, with a new fixed span facility.

Today daily traffic volumes crossing Northern Avenue total approximately 17,000 vehicles (both directions). Based upon local and regional traffic growth and proposed land development within the South Boston container port and South Station areas, it appears that vehicular crossings over a relocated Northern Avenue may increase by approximately 40 percent to 24,000 vehicles daily by 1995.

From a traffic circulation viewpoint a moveable span bridge when opened would only further compound an already serious traffic management problem for this area. More specifically the following consequences would be incurred:

(1) Significant vehicle back up would result from heavy exiting traffic from the Central Artery Dewey Square Tunnel northbound destined to South Boston via Northern Avenue.

(2) The traffic operating capacity of the Atlantic Avenue/Northern Avenue/Central Artery on and off ramps would be reduced because of the above mentioned back up.

(3) Significant truck back up would result on the South Boston side of the bridge due to existing and additional projected truck activity generated by a combination of proposed private and Massport/City of Boston pier development in this area.

(4) An additional traffic burden would be placed on the Congress Street bridge, which is also in structurally poor condition, during Northern Avenue Bridge opening periods.

In conclusion, it is for all of the above reasons that I strongly support the rapid advancement of final design plans and construction of a new fixed span Northern Avenue bridge.

Very truly yours,

H. JOSEPH POWDERLY,
Commissioner.

BOSTON FIRE DEPARTMENT,
Boston, Mass., March 18, 1981.

Hon. JOHN JOSEPH MOAKLEY,
U.S. House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN MOAKLEY: Regarding the reconstruction of the Northern Avenue Draw Bridge as proposed in your legislation, I would like to add my endorsement for the "Fixed Type" bridge over Fort Point Channel.

The present draw bridge has over the years been in need of frequent repairs, and coupled with scheduled openings of the bridge, delays in Fire Department response have always been imminent.

A study by our Planning and Logistics Division has concluded that with the upgrading of the hydrant system, as agreed upon with the Department of Public Works, and the elimination of delays to this area because of the proposed changes, it is our opinion that this area will be better served for fire protection.

With warmest regards, I remain

Very truly yours,

GEORGE H. PAUL,
Fire Commissioner/Chief.

BOSTON POLICE DEPARTMENT,
Boston, Mass., March 20, 1981.

Hon. JOHN J. MOAKLEY,
J.F.K. Federal Building, Boston, Mass.

DEAR CONGRESSMAN MOAKLEY: The Northern Avenue drawbridge located on Northern Avenue near Atlantic Avenue has been a source of multiple problems over a long period of time. The traffic problems developed when it is opened has a serious and dangerous impact on public safety. I would urge and support assistance from the Federal Government in providing the resources to restructure the Northern Avenue drawbridge into a fixed span enabling the vehicle traffic to be continuous and at the same time allowing marine ships and boats to have access to the inner locations in Boston.

Thank you for your consideration and support in this matter.

Sincerely,

JOSEPH M. JORDAN,
Police Commissioner.

COMMONWEALTH OF MASSACHUSETTS,
Boston, Mass., July 20, 1981.

Hon. JOHN JOSEPH MOAKLEY,
U.S. House of Representatives,
Cannon House Office Building,
Washington, D.C.

DEAR CONGRESSMAN MOAKLEY: I am writing to encourage your support for the reconstruction of the Northern Avenue Bridge in Boston.

This bridge, which is badly in need of rehabilitation, spans a waterway currently classified by the U.S. Coast Guard as a "navigable" stream. In order to expedite the project, it is necessary that the waterway be reclassified as non-navigable.

As you are well aware, the Northern Avenue Bridge provides the principal link for many restaurants, fishing and other businesses located along Northern Avenue. Due to its age, a weight limitation has been placed on the bridge which has hindered the flow of truck traffic along this route.

The Massachusetts Department of Public Works, in conjunction with the Boston Redevelopment Authority, has recommended that a fixed-span bridge be constructed upstream from the current Northern Avenue Bridge.

I welcome your cooperation in this matter, and am prepared to respond to any questions or concerns you may have.

Sincerely,

JAMES F. CARLIN,
Secretary.

COMMONWEALTH OF MASSACHUSETTS,
Boston, Mass., July 21, 1981.

Re Boston—Northern Avenue Bridge.

Hon. JOHN J. MOAKLEY,
U.S. Congressman,
J.F.K. Federal Building,
Boston, Mass.

DEAR CONGRESSMAN MOAKLEY: Reference is made to H.R. 1855, a Bill to grant the consent of Congress to the city of Boston to construct, maintain and operate a fixed span bridge over the Fort Point Channel in Boston.

The following is a brief summary of why it is felt that a new fixed bridge should be built.

The existing Northern Avenue Bridge was constructed in 1907. The combined effects of age, active use, accidents, rammings, poor drainage, roadway salts and the salty and corrosive atmosphere have taken their toll. The bridge cannot realistically be repaired to extend its useful life for any significant length of time.

A replacement bridge has been under study since 1972. A Negative Declaration for the replacement bridge project was accepted by the Federal Highway Administration (FHWA) in 1974. This document was reviewed by the FHWA in 1978 and they found that there was no substantial change in the social, economic and environmental effects of the proposed project.

All previous studies have concluded that a fixed bridge with a vertical clearance of about 15 feet at high tide would be adequate for the site. Most of the water traffic is made up of small pleasure craft and lobster boats which can easily pass under the proposed bridge. It should be noted that there would be about 25 foot vertical clearance at low tide. The one major exception is McKie Lighter which would require a draw bridge. However, his property lies within the right of way for the proposed structure and will have to be relocated. The National Uniform Relocation Policy Act as well as State law list procedures to insure that businesses taken by eminent domain are relocated to a satisfactory site with full relocation expenses borne by the project's sponsor. It should be emphasized that whether a fixed bridge or a draw bridge is built the McKie Lighter property would have to be taken since their property lies along the only available new alignment. The existing bridge is eligible for listing on the National Register and therefore that corridor cannot be reused for the proposed bridge.

Therefore, the Massachusetts Department of Public Works endorses the passage of H.R. 1855 which will give the city the right to replace the existing Northern Avenue draw bridge with a fixed bridge and will allow this agency to respond to the city's request to construct the new bridge since we are the only agency with access to the available Federal Bridge Replacement funds.

Very truly yours,

JUSTIN L. RADLO,
Chief Engineer.

Mr. ROE. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. ROE) that the House suspend the rules and pass the bill, H.R. 1855, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to grant the consent of Congress to the city of Boston to construct, maintain, and operate a fixed-span bridge in and over Fort Point Channel, Boston, Massachusetts.".

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 1855, just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

DISTRICT OF COLUMBIA BUSINESS

The SPEAKER pro tempore. This is District of Columbia Day. The Chair recognizes the gentleman from California (Mr. DELLUMS), chairman of the Committee on the District of Columbia.

INCREASE AUTHORIZATION FOR THE ANNUAL FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA

Mr. DELLUMS. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 2819) to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia, and ask unanimous consent that it be considered in the House as in the Committee of the Whole.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California (Mr. DELLUMS)?

Mr. PARRIS. Mr. Speaker, reserving the right to object, I would inquire of the chairman of the committee, is this one of the two pieces of legislation that were previously reported to the House to which points of order were made and were therefore re-referred to the District of Columbia Committee?

Mr. DELLUMS. Mr. Speaker, will the gentleman yield?

Mr. PARRIS. I yield to the gentleman from California.

Mr. DELLUMS. That is correct.

Mr. PARRIS. Further reserving the right to object, Mr. Speaker, as I understand it, in the Budget Act, authorizing legislation that is not reported to the House before May 15 gives rise to some additional point of order that could be raised; is that correct?

Mr. DELLUMS. Not against this bill because it was reported in a timely fashion, I would say to my colleague.

Mr. PARRIS. Agreeing with that observation, for the sake of argument, I would simply express my position, Mr. Speaker, that I do not intend to object to this legislation. I would hope that none of the persons on our side of the aisle would see fit to do so, and I intend to support the legislation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California (Mr. DELLUMS)?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2819

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 502 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 2501d) is amended by striking out "for the fiscal year ending September 30, 1978, and for each fiscal year thereafter, the sum of $300,000,000" in the first sentence and inserting in lieu thereof "for each of the fiscal years ending September 30, 1978, September 30, 1979, September 30, 1980, and September 30, 1981, the sum of $300,000,000; and for the fiscal year ending

September 30, 1982, and for each fiscal year ending after September 30, 1982, the sum of $336,600,000".

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 2819, under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DELLUMS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, H.R. 2819, as reported by the full Committee on the District of Columbia, is being offered to amend section 502 of the District of Columbia Self-Government and Governmental Reorganization Act of 1973, to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia from $300 million to $336.6 million for the fiscal year ending September 30, 1982, and each fiscal year thereafter, as recommended in both the Carter and Reagan fiscal year 1982 budgets.

I would like to point out to my colleagues that his bill, H.R. 2819, was passed unanimously by the Committee on the District of Columbia on May 6, 1981. The Senate passed an identical bill, S. 1040, on June 2, 1981.

The purpose of the Federal payment is to compensate the District of Columbia, as the Nation's Capital, for services provided to the Federal Government, and for the extraordinary net costs and denied revenues related to the Federal presence such as revenues unobtainable because of the relative lack of taxable commercial and industrial property as well as the limitations on commercial building heights; revenues unobtainable because of the relative lack of taxable business income; and potential revenues that would be realized if certain exemptions from District taxes were eliminated.

I would like to further point out to my colleagues that the Federal payment comprises less than 20 percent of the District's operating budget, the balance being raised through local taxes and fees.

Under current law, the annual Federal payment ceiling is $300 million and has been this amount for the past 4 years, during which period the consumer price index has risen 45 percent.

This legislation simply changes the Federal payment ceiling from $300 million to $336.6 million.

Passage of H.R. 2819 will enable the Congress to appropriate the full amount requested by the Reagan administration for the Federal payment to the District of Columbia.

□ 1530

Mr. McKINNEY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, we have all faced some very hard decisions in casting the budget votes in this Chamber over the past few weeks. While we have been deciding the fiscal future of this Nation, we have all heard from our local constituents, especially the State, county, and city officials who are going to be hard pressed to make ends meet in the coming years. The District of Columbia shares the same problems confronting all of our cities, but unfortunately the Nation's Capital does not have a State delegation sitting in this Chamber looking out for its fiscal well-being. That is where the role of the House District Committee comes in and that is why we are before you today with this legislation aimed at increasing the Federal payment.

Fortunately for the District of Columbia, President Reagan decided very early in his administration to stand by the figure of $336 million proposed by former President Carter as the new Federal payment ceiling for the District. While I am sure that this decision was a difficult one considering the sacrifices being made all over the country, it was also a proper one. The $300 million figure which was set more than 4 years ago, long ago became outmoded considering the double-digit inflation which this country has experienced over the past few years. A new ceiling for the Federal payment was inevitable and President Reagan proposed, and I hope that this body will accept, one which enables the District to serve both its national and local constituencies in a manner befitting the Nation's Capital.

I want to make sure that my colleagues in this Chamber understand the Federal payment system. We are not giving anything to the District of Columbia that this city does not deserve. In fact, if we wanted to get down to compensating the city of Washington, D.C., dollar for dollar, for being the Nation's Capital, then I am sure the figure we would be discussing today would be much greater than $336 million. What we are doing here today is setting a ceiling on the amount of money which our colleagues on the Appropriations Committee can eventually pass on to the District government.

The fact that the District of Columbia government is experiencing some severe fiscal constraints these days should not be a factor in the debate on this legislation. Along with the Delegate from the District (Mr. FAUNTROY) and the chairman of the House District Committee, those members of the District of Columbia Appropriations Subcommittee, I share about as much knowledge on the state of fiscal affairs of the District of Columbia as anyone else in this Congress.

I know that the Mayor of this city is working overtime to make sure that this city keeps a sound financial footing as well as a balanced budget. I know that the Mayor and the City Council have a full understanding of the damage and impact a fiscal crisis can have on this city. I know that I will be before you again in coming weeks outlining the fiscal problems presently confronting the District of Columbia. But, nowhere, in any of the figures which illustrate the city's present fiscal crunch, are any facts or figures which will refute the argument that the money we authorize in this legislation today is overdue.

Mr. Speaker, the citizens of the District of Columbia have long endured the hardship of being second-class citizens when it comes to full home rule. During the past 8 years the Congress has gone a long way toward righting the wrongs of past decades. The increased authorization for a proper Federal payment is only one more step in that progression. I hope that my colleagues will join me in taking this step.

Mr. FAUNTROY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I rise in support of H.R. 4127, a bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia.

I am delighted to be able to support, through this legislation, President Reagan's proposal for a Federal payment level of $336,600,000, beginning in fiscal year 1982.

The annual Federal payment to the District of Columbia has been a matter of extensive debate in both Houses of Congress since the creation of the District in 1790. From the beginning of this debate, which spans nearly two centuries, the legitimacy of a Federal obligation to compensate the District for the extraordinary impact of the Federal presence has been generally accepted by both Houses. The dispute in the debate arises out of efforts to specify and quantify the basis for, and the amount of, the payment. Various approaches have been used over the years. From 1790 to 1878, the payment was tied to specific projects, such as paving Pennsylvania Avenue between the White House and Capitol. The amounts were uncertain and sporadic and ranged between 25 and 40 percent of the total District of Columbia budget. Under the Organic Act of 1878, the level was set at 50 percent of the District's operating costs and remained at that level until 1925. Beginning in 1925, a lump sum payment was used. This approach was made permanent under the District of Columbia Revenue Act of 1939 and was used until 1973, when the present multiyear, lump sum payment was established in the District of Columbia Home Rule Act. Under the

present approach, the payment was authorized at $230 million for fiscal year 1975 with yearly increases to $300 million for fiscal year 1978 and beyond.

While these amounts have been authorized, actual appropriations during most of the "home rule" years have fallen well under the authorization levels. Indeed, as a percentage of the District's total operating budget, the Federal payment has undergone steady decline from nearly 25 percent in fiscal year 1975, to well below 20 percent in fiscal year 1980.

The Federal payment provides compensation to the District for the unique costs and revenue losses associated with the role of the District as the Nation's Capital. In calculating the amount of the Federal payment, both the costs and benefits of the Federal presence are considered. Among other elements, the following factors are taken into consideration:

First, revenue foregone because of the lack of taxable commerical and industrial property utilized by the Federal Government.

Second, revenue foregone because of the lack of taxable business income.

Third, revenue foregone due to federally imposed exemptions from District taxes.

Fourth, the cost of providing services to tax-exempt nonprofit organizations and corporations doing business only with the Federal Government.

Fifth, the costs of services provided to the Federal Government.

Sixth, other unique expenditure requirements placed upon the District of Columbia by the Federal Government.

Seventh, the relative tax burden placed on District residents compared to their counterparts in other jurisdictions in this metropolitan area and in cities of similar size.

H.R. 4127 reflects the first increase in the authorization level since the enactment of the Home Rule Act and provides an amount of money sufficient to accommodate at least some of the impact of inflationary pressures and spiraling costs of operating a government. There is no doubt that the ultimate solution to the problem of fixing the Federal Government's contribution to the operation of the Nation's Capital lies in the establishment of an equitable and predictable formula-based Federal payment, and I anxiously await the committee's action in this regard.

For now, I would urge all Members of this House, Democrats and Republicans, to support President Reagan's proposal as reflected in H.R. 4127.

Mr. PORTER. Mr. Speaker, I move to strike the last word.

Mr. Speaker, this legislation should raise a number of questions concerning the District of Columbia's finances. The District government has amassed an accumulated deficit of $388 million, and this amount does not even include unfunded pension liabilities, raising the amount millions more.

As of April, the District faced a deficit of at least $60 million in this fiscal year, following a deficit for fiscal year 1980 of about $105 million. Although fiscal year 1981 looks much better, it is only so as the result of higher-than-anticipated revenues. In addition, the budget for fiscal year 1982 as presented to the House Appropriations Subcommittee for the District of Columbia, on which I serve, clearly is out of balance. Cutbacks in Federal payments, due to the Reagan administration's budget reductions, are not even taken into account.

□ 1540

Mr. Speaker, I want to emphasize to the Members my very serious concern about the state of the District of Columbia's finances. Plainly, this bill's proposed increase in the Federal payment will not solve the Capital's financial problems. An increase in the Federal payment from $300 million to $336 million represents only the figurative tip of the iceberg with respect to the resolution of either the city's past or present budget deficit problems. The Members should have no illusions about this. The District faces extreme financial problems that will probably only worsen if the District's own proposed solutions are adopted and if substantial changes are not made to budgetary controls in the future.

For example, the District of Columbia proposes to sell revenue bonds totaling $184 million to help finance the $388 million accumulated past deficits. Even if Congress should approve this proposed revenue bond sale—and it is one which violates the prime rule of municipal financing; namely, never to finance past operating deficits out of future bonding authority—the city's financial ills will not be cured. Only the short-term danger will have been averted, and then at a cost to District of Columbia taxpayers over the life of the bonds of almost $600 million.

No; a simple increase in the Federal payment will not solve the District's budgetary problems. In fact, it will hardly make a dent. Steps must be taken now to insure that each year's budgets are in fact balanced, as required by law, that the free flow of factually correct budgetary information is promptly and regularly presented to the Congress, and that spending restraints are put in place that assure fiscal responsibility in the present and prevent repetition of the mistakes of the past.

Meanwhile, the level of the District's services to its constitutents continues to suffer. The public education system, for example, faces serious deficits, and a crisis committee from the District's citizenry has begun contacting Members to seek the Congress help. The emergency ambulance and fire protection services have been cut to a dangerous point, jeopardizing the lives of potential victims, and emergency response times lag the national averages substantially. Furthermore, the District's police force is understaffed at a time when increases in the rate of violent crime in the District can accurately be termed a crime explosion. And the Mayor continues to refuse to increase the staff of the District police force up to the point authorized and funded by the Congress in the last fiscal year.

Further, despite some $38 million in Federal expenditures to put the District's financial systems in shape to where its internal accounting and auditing procedures can identify the scope of the District's financial problems, some $10 million additional are needed to put the city's books in working order.

Mr. Speaker, the District's financial picture is not a pretty one. The Congress, if it is going to avoid another Union Station-type Federal financial assistance fiasco in the Nation's Capital, will have to take its share of the planning responsibility to put the city's finances back into working order. Without some immediate steps being taken soon, one must expect that in one way or another the Congress will end up paying for the city's unaccounted for debts.

The Washington Post already rates the District of Columbia as having the third highest per capita State and local tax burden. The citizens of the District believe they are taxed near the upper limits. So it is doubtful that further tax increases will solve the problem and would more likely drive away the relatively strong tax base that presently exists in the District.

An increase in the Federal payment representing an amount in lieu of taxes for otherwise untaxable Federal properties is in my opinion justified because of inflation and will provide some help. But, Mr. Speaker, the Constitution makes the Congress ultimately responsible for the governance of the District of Columbia. Band-Aids such as these two bills that we are considering will not help a great deal. Major surgery is needed and needed soon.

We must find a way out of the current shameful financial chaos that overwhelms our Nation's Capital City.

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. PORTER) has expired.

(On request of Mr. MCKINNEY, and by unanimous consent, Mr. PORTER was allowed to proceed for 3 additional minutes.)

Mr. PORTER. Mr. Speaker, I would call upon the District's elected offi-

cials to work with the Congress candidly, cooperatively, and in a spirit of seeking workable and well-grounded solutions to these very, very serious problems.

Mr. McKINNEY. Mr. Speaker, will the gentleman yield?

Mr. PORTER. Yes; I yield to the gentleman from Connecticut.

Mr. McKINNEY. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I think the gentleman is well aware through the local press that I have for the last 6 months, not to mention the last 8 years, been the financial pointman. I have been called an obstructionist, and I have been said by some of my friends on this side of the aisle to be far too willing to give in to the city.

I could not agree with the gentleman more, having spent several long years on the Temporary Commission on Financial Oversight of the District of Columbia, that the city's finances are in a mess, and I will have a great deal to say about that in September when the bonding authorization bill come before the full House.

However, I would suggest to the gentleman that this particular bill is really essentially only housekeeping. It is an authorization for a Federal payment that was capped 4 years ago at $300 million, and with inflation, $336 million certainly is not an outrageous increase in 4 years. The Appropriations Committee has only once, in the history of this Member's being on the District Committee, appropriated what we authorized.

I would say this in addition: I have a problem, I would like to tell my good friend, the gentleman from Illinois (Mr. PORTER). I appealed to the administration to support me on the bond authorization bill. They refused to do so. I was willing to stop the world for the moment, and yet the administration has said no. If the White House says that they do not want it, they are anticity; if the Congress says they do not want it, Congress is interfering with the city's affairs; but in one way or another the city should be allowed to go out into the cruel, hard world and find out what the bond market says.

Again we will hear a lot more about that in September.

But, Mr. Speaker, I would hope that there would not be opposition to this general authorization bill, and I would hope that my good friends on the Appropriations Committee would have a good, long talk with the city administration, pointing out that as to the size of the appropriations under this authorization, a great deal of it will be based on the attitude of the city toward getting its fiscal affairs into shape.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Speaker, I thank my colleague for yielding.

Mr. Speaker, I think the gentleman has made a very interesting statement on the floor, and I tend to agree for the most part with virtually everything he has to say.

These measures that are before us this afternoon are indeed stop-gap measures. I think we do have a responsibility to go beyond these stop-gap measures. We are simply not in a situation where we have to go foward with the necessary authorization. What we have planned on our agenda is to try to go further into the structural problems of the District of Columbia.

I might also add for the benefit of the House that this particular Member may be in the minority, but I happen to believe that this Congress and successive administrations have plunged the District of Columbia into an economic disaster over many, many years. In 1973, when we granted home rule, integrity should have mandated that we look at the fiscal situation of the District of Columbia, evaluate those factors to which we contributed, and then provide the necessary resources to at least allow them to be even and then go forward on their own.

But we did not do that. We gave them the political authority to go forward, but we have seen them continuing to be allowed to be plunged into economic disaster.

I agree with my colleague that we have to go into the structural problem, and my hope is that when we come forward with proposals that would require a broad basis of support from the American people to solve the problems of the District of Columbia, my colleagues would support us in those efforts.

Mr. PORTER. Mr. Speaker, I do not have the long perspective of the distinguished chairman of the authorizing committee. I am merely coming in and seeing what some of the problems are, and we have seen them before our Appropriations Subcommittee.

I certainly do not oppose this increased authorization. I think it is necessary, and I hope that I have conveyed that thought. But again, we are going to have to do far more than this, far more than both of these bills do to solve these very long term, serious problems, and I hope that all of us in the Congress will work with the District officials to bring about workable solutions.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield further?

Mr. PORTER. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Speaker, before calling for a vote, just for the record I would like to enter the following information into the RECORD of these proceedings. With respect to the Federal payment, I would like to look, on the one hand, at the authorization and, on the other hand, at the appropriation.

□ 1550

In 1975, we authorized $230 million, $226.2 million was appropriated.

In 1976, we authorized $254 million. They appropriated $248.9 million.

In 1977, we authorized $280 million. They appropriated $276.6 million.

In 1978, we authorized $300 million. They appropriated $276 million.

In 1979, 1980, and 1981, we authorized $300 million for each of those years.

In 1979, the Appropriations Committee went down from $276 million to an appropriation of $235 million, in the height of inflation.

In 1978, while we offered authorization for $300 million, we appropriated $276.5 million.

So the authorization has attempted to follow the thrust of the Home Rule Act. The appropriation bill at various points has been substantially below that.

With that explanation, Mr. Speaker, I see no other persons seeking time on the floor.

● Mr. DIXON. Mr. Speaker, I rise in support of H.R. 2819, a bill to increase the authorization for the annual Federal payment to the District of Columbia government from $300 million to $336.6 million for fiscal year 1982 and each fiscal year thereafter.

As pointed out in the report accompanying the bill from the Committee on the District of Columbia, the Federal payment authorization has not been increased since 1978, even though the Consumer Price Index has risen 45 percent over that period of time. During the 4 years prior to 1978 the Federal payment authorization increased an average of 12.2 percent each year. Although the bill before you provides for that same percentage increase of 12.2 percent, the problem lies in the fact that this is the only increase the District will have received since 1978, and it will not go into effect until 1982. So what we have here is a government that has had to bear the brunt of double-digit inflation with no corresponding increase whatsoever, real or otherwise, in the Federal payment authorization. And after 4 years, the District of Columbia will finally receive an increase of 12.2 percent, while inflation has risen 45 percent.

Mr. Speaker, if the Federal payment to the District of Columbia had increased at the same rate as the Consumer Price Index, the bill now before you would authorize $435 million, an increase of $135 million instead of the $336.6 million or 12.2-percent increase provided in this bill for the entire 4-year period.

I realize it is difficult for the Congress to pass a bill every year authorizing an increase in the Federal contribution to the District of Columbia. I have heard discussions recently of perhaps basing the annual Federal payment on some sort of formula tied to local revenues. Such a plan seems to have some merit. It would remove the subjectiveness of congressional action on the Federal payment and would assist local officials in their fiscal planning and programing responsibilities. Congress would still retain oversight, and where differences arise in areas involving what is often referred to as the Federal interest, I am sure the Congress will exercise its constitutional authority and resolve the matter in such a way that the Federal interest will be protected.

Mr. Speaker, we are all aware of the impact of inflation on the costs of basic services such as police and fire protection, public education, health care, and other assistance for the needy as well as its effect on programs to help senior citizens who make up over 16 percent of the local population; and these increased costs have been borne to a greater degree over the last several years by those who live and work in Washington, D.C. In order for the Nation's Capital to continue to provide the services we expect, not only for its residents but for all the visitors who come here from throughout the world and our constituents who visit here either to conduct business or to simply enjoy the many theaters, museums, and other historical places of interest, it is essential that we provide the District of Columbia with a Federal payment authorization that is both fair and equitable.

I want to commend the Committee on the District of Columbia for bringing this bill to the floor. I believe it is a good bill and provides some measure of relief to local taxpayers who have had to pay an ever-increasing share of the District's budget over the past several years while the Federal share has declined. This bill attempts to restore some balance to the financial relationship between the Federal and District governments.

Mr. Speaker, I urge my colleagues to vote "yea" on this bill.●

Mr. DELLUMS. Mr. Speaker, I move the previous question on the bill.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. JOHNSTON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 209, nays 179, answered "present" 1, not voting 44, as follows:

□ 1610

The Clerk announced the following pairs:

On this vote:

Mr. Pepper for, with Mr. Rousselot against.

Mr. DeNardis for, with Mr. Paul against.

Mr. Horton for, with Mr. Hagedorn against.

Until further notice:

Mr. Zeferetti with Mrs. Fenwick.

Mr. Russo with Mr. Pritchard.

Mr. John L. Burton with Mr. Pursell.

Mr. D'Amours with Mr. Stangeland.

Mr. de la Garza with Mr. Gregg.
Mr. Brown of California with Mrs. Martin of Illinois.
Mr. Barnard with Mr. Grisham.
Mr. Whitley with Mr. Hansen of Utah.
Mr. Simon with Mr. Chappie.
Mr. Rosenthal with Mr. Evans of Iowa.
Ms. Mikulski with Mr. Brown of Ohio.
Mr. Lantos with Mr. Evans of Delaware.
Mr. Obey with Mr. Conable.
Mr. Minish with Mr. Frost.
Mrs. Bouquard with Mr. Bonker.
Mr. Dicks with Mr. Daschle.
Mr. Pickle with Mr. Williams of Ohio.

Mr. JENKINS, Mr. SHUMWAY, Mrs. ROUKEMA, and Mr. LOWERY of California changed their votes from "yea" to "nay."

Mr. LELAND and Mr. GOLDWATER changed their votes from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate bill (S. 1040) to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1040

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 502 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 2501d) is amended by striking out "for the fiscal year ending September 30, 1978, and for each fiscal year thereafter the sum of $300,000,000" in the first sentence and inserting in lieu thereof "for each of the fiscal years ending September 30, 1978, September 30, 1979, September 30, 1980, and September 30, 1981, the sum of $300,000,000; and for the fiscal year ending September 30, 1982, and for each fiscal year ending after September 30, 1982, the sum of $336,600,000".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill, H.R. 2819, was laid on the table.

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the Senate bill, S. 1040, just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

EXTEND BORROWING AUTHORITY FOR THE DISTRICT OF COLUMBIA

Mr. DELLUMS. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 2818) to amend the District Of Columbia Self-Government and Governmental Reorganization Act to extend the authority of the Mayor to accept certain interim loans from the United States and to extend the authority of the Secretary of the Treasury to make such loans, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. PARRIS. Reserving the right to object, Mr. Speaker, I would ask the chairman of the committee, is this the other piece of legislation brought before the House several weeks ago and re-referred to the Committee on the District of Columbia on which the point of order was raised?

Mr. DELLUMS. I say to my colleague that is correct.

Mr. PARRIS. Mr. Speaker, I withdraw my reservation of objection, and I support the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. WALKER. Reserving the right to object, Mr. Speaker, could the gentleman from California (Mr. DELLUMS) please restate the unanimous-consent request? I was not sure just exactly what the unanimous-consent request was.

Mr. DELLUMS. Mr. Speaker, it was that the bill be considered in the House as in the Committee of the Whole.

Mr. WALKER. I thank the gentleman.

I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2818

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 723(a) of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-241 note) is amended by striking out "October 1, 1980, or upon the enactment of the 1981 appropriation Act for the District of Columbia government, whichever is later" in the first sentence and inserting in lieu thereof "October 1, 1982, or the date of the enactment of the appropriation Act for the fiscal year ending September 30, 1983, for the government of the District of Columbia, whichever is later".

With the following committee amendment:

Page 2, line 6, strike out "the enactment of the" and insert in lieu thereof "enactment of the fiscal year".

The SPEAKER pro tempore. The gentleman from California (Mr. DELLUMS) is recognized for 5 minutes.

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 2818, presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

□ 1620

Mr. DELLUMS. Mr. Speaker, H.R. 2818, as reported by the full committee on the District of Columbia is being offered to provide the District of Columbia government with continued interim authority to borrow funds from the U.S. Treasury for capital improvement projects for which funding is appropriated in fiscal year 1982, or until the date of the enactment of the Appropriation Act for the fiscal year ending September 30, 1983, whichever is later. The bill is a 2-year extension of current law.

The authority of the District of Columbia to borrow funds from the Treasury is not new, it predates home rule. When Congress passed the District of Columbia's Self-Government Act, it authorized the District to finance its capital improvement projects by borrowing funds on the open market through the issuance of tax-exempt general obligation bonds rather than continue, indefinitely, its borrowing authority from the Treasury. The act terminated, effective January 2, 1975, the permanent authority of the District to borrow funds from the Treasury to finance capital improvement projects, however, it provided a 2-year interim loan authority which allowed the District to continue borrowing from the Treasury to finance capital improvement projects for which funds had been authorized or appropriated prior to January 2, 1975. Congress provided the interim borrowing authority to prevent undue disruption in the District's capital improvement programs during the transition from Treasury borrowing to entry into the municipal bond market.

Because of unexpected delays in the development and implementation of the District's bonding program, a 2-year extension of the interim borrowing authority was approved by the Congress in 1977. In 1979, the Congress approved a second extension, authorizing U.S. Treasury loans to finance capital improvement projects approved in the 1980 and 1981 Appro-

priations Act. This extension was necessary because the capital improvements program could not be halted without undue harm while waiting for complete implementation of the congressionally mandated new financial management system and for the first complete independent audit of the District's financial statements, a prerequisite for successful entry into the municipal bond market. Since the 1979 congressional hearings, circumstances have arisen which will delay, beyond fiscal year 1981, the District's entry into the municipal bond market in order to obtain financing for its capital improvement projects.

Without approval of the proposed extension of the District's interim borrowing authority, the District of Columbia government would be prevented from making urgently needed capital improvements, including major improvements to the water system, and would experience disruption of planned metro construction.

Passage of H.R. 2818 will permit the District to proceed with its capital improvement projects for at least another 2 years, by which time the District should be able to enter the municipal bond market.

The bill changes from October 1, 1980, to "October 1, 1982, or the date of enactment of the Apporpations Act for the fiscal year ending September 30, 1983, for the District of Columbia government, whichever is later."

A technical and conforming amendment to page 1, line 6 of the bill was made in committee in order to correctly quote section 723(a) of the Home Rule Act.

Mr. Speaker, the Senate has already passed a similar bill, S. 640.

Mr. Speaker, may I point out, at this time, that the District of Columbia Committee, in compliance with the committee's reconciliation instructions, has approved the limitation of $155 million on the amount of funds authorized to be borrowed from the Treasury in each of the fiscal years 1982, 1983, and 1984. As part of the budget reconciliation activity, last week, the House and Senate conferees agreed and recommended to their respective bodies that the $155 million cap on capital borrowing authority be included in the Omnibus Budget Reconciliation Act of 1981, H.R. 3982. Mr. Speaker, the committee fully supports this limitation. The District of Columbia government has also agreed to this provision and has no objection to its enactment.

Since the $155 million cap is included in the Omnibus Budget Reconciliation Act, which is now in conference and will soon be enacted into law, the committee has decided not to offer the cap as an amendment to H.R. 2818 because it would be redundant and legislatively confusing. The $155 million cap will, in fact, be a matter of law when we pass the Reconciliation Act.

Mr. Speaker, on behalf of the Committee on the District of Columbia, I recommend that the bill, H.R. 2818, do pass.

The SPEAKER pro tempore. The question is on the committee amendment.

The committee amendment was agreed to.

Mr. McKINNEY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I think we should clearly state to the Members present that this is not the deficit financing bill that they have read so much about in the newspapers and that will be before them in September.

When Congress passed the Home Rule Act in 1973, it authorized the District of Columbia to finance capital projects on the open market by issuing general obligation bonds. Recognizing the inevitable problems the city would experience in the transition from a Federal entity to a municipality, the Home Rule Act also provided 2-year interim borrowing authority with the U.S. Treasury. Since that time, we have been required to extend this interim authority twice. The bill being considered today will make the third, and hopefully, final extension.

I expect that most Members are aware, from the local press accounts, of the financial problems facing the city. There is another bill reported by the Committee on the District of Columbia, H.R. 1807, which would provide the city with the authority to issue bonds to eliminate a portion of its accumulated operating deficit. I would like to make it very clear that the measure being considered today, H.R. 2818, has nothing to do with bonds or borrowing to eliminate operating budget deficits. This bill simply addresses the need for the city to continue its capital improvement program uninterrupted.

This legislation would permit the Mayor of the District of Columbia to accept loans for capital improvement projects from the U.S. Treasury, and permit the Secretary of the Treasury to offer such loans. These loans would be available only for projects that are approved after review by the Appropriations Committees over the next 2 years. I am confident that the projects that do receive approval will be necessary, and not frivolous.

Mr. Speaker, there is no question that the city should be financing capital improvements through the private bond market. However, until the current budget problems and operating deficit are cleared up, the bond market is not a realistic option. In the time required for the city to overcome its financial difficulties, some means of borrowing must be provided so that vital projects can continue. While I have reservations about the manner in which the city chooses to deal with its financial problems, I recognize the absolute necessity of this legislation. I fully support this measure and urge the support of my colleagues.

Mr. Speaker, I would like to address my Republican colleagues on a serious question I have about the Digest in Brief which they have in front of them.

As a loyal supporter of this administration and also as ranking member of a committee, be it not all that important, I sometimes think it would be polite and courteous if the administration would consider addressing the ranking memer of a committee before the fact rather than after the fact.

The Digest's explanation of the administration's position fails to include the reasons why the committee has declined to amend the bill as requested by the OMB—reasons fully explained to OMB representatives.

The $155 million cap which the chairman discussed is in the omnibus reconciliation bill at the administration's request, so that this point is wrong. The chairman has already adequately explained the reasons for the committee's action.

I have a letter from a Mr. James M. Frey of the Office of Management and Budget who states that he wants us to eliminate short-term borrowing after fiscal year 1982.

Well, I would note that his letter further says that this action is being recommended in anticipation of the city moving out into the bond market, and the city is not yet at that point; it would therefore be premature for this House to act.

As to points Nos. 1 and 2, charging interest on short-term borrowing and a surcharge on capital borrowing, an Assistant Secretary of the Treasury, Roger Mehle, testified in front of the committee that the Secretary has the power to do that without any action on the part of Congress. So I would suggest that those objections be ignored.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from California.

Mr. DELLUMS. I thank my colleague for yielding.

Mr. Speaker, the gentleman from Connecticut (Mr. McKINNEY) is making a terribly important point. This administration suggested that we put a cap of $155 million on the ability of the District of Columbia to borrow from the Treasury funds to continue the capital improvements program. We considered offering an amendment on the floor of Congress to put that $155 million cap on the borrowing authority.

□ 1630

Mr. McKINNEY. I must apologize now. I have a later issue of the Digest where the original issue of the Digest has been corrected, and I quote:

When the Digest initially covered this bill, it was reported that the committee intended to offer an amendment setting authority and outlay ceilings for District borrowing in fiscal years 1982 and 1983 at $155 million and $145 million respectively. As conferees for the Omnibus Reconciliation Act (H.R. 3892) have already reached agreement on a similar provision, the committee will not offer its amendment to H.R. 2818.

Mr. DELLUMS. I appreciate that because that is precisely the point we chose to make, and that is in the reconciliation process the House conferees and the Senate conferees agreed to the $155 million cap. Therefore, when the House adopts the Omnibus Reconciliation Act, it will indeed be law.

Mr. SPEAKER pro tempore. The time of the gentleman from Connecticut (Mr. McKINNEY) has expired.

(By unanimous consent, Mr. McKINNEY was allowed to proceed for 2 additional minutes.)

Mr. DELLUMS. Mr. Speaker, if the gentleman will continue to yield, when the House passes the Omnibus Reconciliation Act, language in that act will call for a $155 million cap on the borrowing authority of the District's capacity to borrow from the Treasury for the purpose of capital improvement. We signed off on that conference; it is a matter of law.

When we checked with the legislative counsel they suggested that we not place the statements in two different pieces of legislation as it may indeed be confusing in interpreting the legislative history sometime down the road. So one statement will be made in the Omnibus Budget Reconciliation Act that will definitely include $155 million cap which then carries out our responsibility on the District of Columbia Committee to the reconciliation process.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

I thank the gentleman, first of all, for clarifying the $155 million issue. However, as I understand it, there are millions of dollars currently borrowed that are virtually interest free, that the District of Columbia has borrowed now.

Now the gentleman I think stated in his remarks that the Secretary of the Treasury right now has the power to do something about that on his own, it would not require legislative authority. What would have been the problem with putting that kind of legislative authority in here and directing the Department of Treasury to assure, as at least OMB has suggested here, that the Treasury rate be charged plus one-half of 2 percent for service charge on short-term borrowing?

Mr. McKINNEY. Short-term cash flow loans are interest free and I think the gentleman realizes that this entire process will be over after fiscal year 1982, and since we will still have this administration, which is fiscally conservative, I think the gentleman will see the city being charged for these loans. I do not see any point in encumbering a piece of legislation with a nongermane amendment.

The SPEAKER pro tempore. The time of the gentleman from Connecticut (Mr. McKINNEY) has again expired.

(At the request of Mr. WALKER and by unanimous consent, Mr. McKINNEY was allowed to proceed for 3 additional minutes.)

Mr. McKINNEY. I can simply say what the Assistant Secretary of Treasury said to me, that the Department did have the authority, and I would assume that they would do it should they feel that it is necessary; I think they will do it.

If we do not pass this bill—which the Senate has, by the way, passed overwhelmingly—it would cost the Federal Government and the District of Columbia millions of dollars, because it would bring a halt to capital improvements which we, the Congress, and others, such as Metro, have already stated that we wanted.

I think that we should realize that the city would be out of the Federal market in fiscal year 1982 and it will be out in the private bond market where it will be told to straighten up its ship.

Mr. WALKER. If the gentleman will yield further, I certainly understand that the Treasury Department does have the authority. I still do not understand why, even though it is a short-term bill, it goes to 1982, why Congress could not have provided that kind of positive direction to the Treasury Department.

What we are doing is leaving the onus on them. They have to go to the District government. Why could not the Congress take some fiscal responsibility of its own here and make that kind of direction to the Department of Treasury so we would share in any onus that might be connected with it?

Mr. McKINNEY. As I stated in my remarks earlier, I do not believe this bill is the appropriate vehicle for the administration's requested action, even should we decide it is necessary.

Mr. WALKER. I appreciate the gentleman's explanation on it, but it does give some of us a problem with the bill.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Virginia.

Mr. PARRIS. I thank the gentleman for yielding.

This point was made in the gentleman's original comments. I think it should be reiterated for the benefit of the House that the current District capital borrowings are repaid at interest equal to Treasury rates, approximately 12.4 percent.

The suggestion that these borrowings are at no interest is simply not correct.

Finally, and secondly, the addition of the one-half of 1 percent in the amendment would appear to be a profitmaking function of the Treasury Department, which I think in this case, in this legislation, is inappropriate.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from California.

Mr. DELLUMS. I thank the gentleman for yielding.

I would like to call attention to the gentleman who just raised the question. I would like to point out to my colleague that if the gentleman had taken the time to read the report accompanying the legislation, on page 5 of that report, we refer to an analysis.

The SPEAKER pro tempore. The time of the gentleman from Connecticut (Mr. McKINNEY) has again expired.

(At the request of Mr. DELLUMS and by unanimous consent, Mr. McKINNEY was allowed to proceed for 3 additional minutes.)

Mr. DELLUMS. Mr. Speaker, if the gentleman will yield further, on page 5 of the report, current District capital borrowings are repaid at an interest equal to Treasury rates, approximately 12.4 percent, while other municipalities borrow through the bond market at tax-exempt rates of approximately 10.5 percent.

The District of Columbia already is paying. The notion that in some way the District of Columbia is not paying an appropriate amount of interest is inappropriate.

Finally, I would say to my colleague that the bill before us deals with long-term borrowing of capital improvements, it has nothing to do with short-term, interest-free cash flow problems of the District of Columbia.

This legislation in no way addresses itself to that.

Finally, I would say to my colleague, that in testimony before the committee on May 20, 1981, we asked Mr. Mehle the following question, or my distinguished colleague from the District, "Does not the Secretary of Treasury now have the authority under current law to limit borrowing and to establish terms?"

The response, "Yes, he does."

So it is clearly within the prerogative of the Secretary of the Treasury to set the terms, to set the limit, and

to set the rate. It would seem to be rather redundant to place in the law power that the Secretary of the Treasury presently has.

Mr. FAUNTROY. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I rise in support of H.R. 4129, a bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to extend the authority of the Mayor to accept certain interim loans from the United States and to extend the authority of the Secretary of the Treasury to make such loans.

While this legislation provides for the third extension of borrowing authority since the Home Rule Act was passed, it is essential to insure that the capital improvements program of the District will remain on track.

The District of Columbia has had the authority to borrow funds from the Federal Treasury for many years, including years prior to home rule. It was the view of the Congress that by providing the authority in the Home Rule Act to issue tax-exempt, general obligation bonds, the need for the District to continue borrowing from the Federal Treasury would be eliminated. At the same time, however, Congress realized that an abrupt interruption in the flow of funds from the Treasury to the District could cause undue and unnecessary harm to the District's capital improvement program. The Home Rule Act thus eliminated the permanent borrowing authority, and at the same time, provided for 2-year interim borrowing authority. The interim borrowing authority was extended by the Congress in 1977 and again in 1979.

The wisdom which supported the need for enactment of the initial interim authority and the two previous extensions is still present. Without another extension, many of the District's critical capital improvement programs will be derailed. Programs such as improving the water system, Metro, and other major overhaul efforts now underway will be delayed, cost more, and may even be lost.

We have been working vigorously in the House District Committee to insure that the District will be able to enter the private bond market soon and thus relieve the need for continued borrowing from the Treasury. I am hopeful and optimistic that this will be the final extension needed. Indeed, it is my view that this extension will enhance the prospects of a successful entrance by the District into the private market.

I urge support of this measure by the House.

Thank you.

Mr. SOLOMON. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, if I could have the attention of the distinguished chairman of the District of Columbia Committee, there has been so much disarray going on here in the Chamber, I do not think I have really—maybe some of my questions have been answered.

I would like to say the reconciliation bill that passed the House at the end of June included in its title IV, a provision that capped capital borrowing for the District for the coming fiscal years 1982, 1983, and 1984.

□ 1640

I think the gentleman said that, is that right?

Mr. DELLUMS. Yes.

Mr. SOLOMON. Why are we now being asked to pass legislation that reauthorizes capital borrowing for the District of Columbia when the reconciliation bill that passed the House contained language authorizing funds for this same purpose? This is what I could not hear.

Mr. DELLUMS. First of all, the District of Columbia Committee is the authorizing committee. We have brought a piece of authorizing legislation that would authorize the District of Columbia to borrow funds from the Treasury for the purpose of financing capital improvement projects, such as completing Metro, water sewage, and a variety of different capital improvement projects. The language the gentleman from California spoke of in the Reconciliation Act is a recommendation from the Office of Management and Budget that suggested that we place a cap on the District's ability to borrow from the Treasury at a figure of $155 million. We have agreed to that in a House-Senate conference.

The point I was making was that in the Reconciliation Act there will indeed be language that sets the $155 million cap, but we have to pass authorizing legislation in order to allow the District of Columbia to continue to borrow from the Treasury. Without this legislation, the District of Columbia then is precluded from borrowing. It then disrupts their ability to go forward with capital improvement programs, and that would be devastating for all of us.

Mr. SOLOMON. If what the gentleman says is true, can the gentleman assure us in this body that this measure is in no way inconsistent with the reconciliation bill, and that passage of this bill will in no way neutralize the cap the House placed on the District of Columbia borrowing in the reconciliation bill?

Mr. DELLUMS. The gentleman can say that the gentleman is exactly correct, perfectly correct. There is no problem here whatsoever with any contradiction with the Reconciliation Act. If the gentleman has any other language that the gentleman from California could attest to in order to create credibility, we will be happy to do that.

Mr. SOLOMON. I thank the gentleman. I might add that the ranking minority member said that is 100-percent correct, for the record.

Mr. DELLUMS. Does the gentleman suggest that he does not trust this gentleman 100 percent?

Mr. SOLOMON. I was not sure I was interpreting the gentleman as being 1,000 percent.

If the distinguished chairman would just listen again, the administration raised two objections to this bill outside of the borrowing cap issue. The first is the imposition of one-half percent charge on District of Columbia borrowing. This, I understand, would bring the District of Columbia into line with all other borrowing from the Federal financing bank. Certainly, the District has a preferential status that no other borrowers have, and under section 723(b)—I think the gentleman was talking about section 723(a) of the District Home Rule Act—provides that loans to the District shall be at the rate of interest to be determined by the Secretary of the Treasury. I think we heard the gentleman say that the Secretary of the Treasury testified that he thought he had the right to set that rate.

Now, if that is the case, my question to the gentleman is, Do the distinguished chairman and ranking minority member concur with the Treasury view on this issue, or does the gentleman feel separate legislation will be necessary to allow the imposition of that one-half percent charge?

Mr. DELLUMS. Will my colleague yield?

Mr. SOLOMON. I yield.

Mr. DELLUMS. At the risk of being repetitive, I might indicate in answering a question brought by my distinguished colleague from the District of Columbia, which was as follows: "Do you * * *" meaning the Secretary of the Treasury—"now have the authority under current law to limit borrowing and to establish terms?"

The statement by Mr. Mehle in response to that question was, yes, he does. However, I would also add and quote section 723(b).

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

(At the request of Mr. DELLUMS and by unanimous consent, Mr. SOLOMON was allowed to proceed for 3 additional minutes.)

Mr. DELLUMS. Section 723(b) is as follows:

> Loans advanced pursuant to this section during any six-month period shall be at a rate of interest determined by the Secretary at the beginning of such period which in his judgment would reflect the cost of the money to the Treasury for borrowing at a maturity approximately equal to the period the loan is outstanding.

79-059 O - 85 - 37 (Vol. 127) Pt. 13

So, we are saying, not only do we have on the record testimony that the Secretary of the Treasury has the capacity to set the terms and to set the limits by the law, section 723(b) provides the Secretary with the capability.

Mr. SOLOMON. What the gentleman is saying is that he concurs with the Secretary of the Treasury's testimony.

Mr. DELLUMS. That is correct.

Mr. McKINNEY. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from Connecticut.

Mr. McKINNEY. I think for the Members, since it was so complicated, Mr. PARRIS of Virginia said it quite clearly. First of all, the city borrows short term for cash flow, what we call tax anticipation bonds in a State or municipality. They pay no interest. Treasury probably could charge them, but those loans must be paid back at the end of each fiscal year. Presently, for capital borrowing from the Treasury, they are paying the current Federal rate, Federal Treasury, and, as the gentleman from Virginia suggested, that is quite high, way over 12 percent. Now, since they cannot offer tax-free bonds they are in essence paying a surcharge of whatever—1¼ percent, 2¼ percent or more—for every dollar they borrow. That is more than any other municipality in the United States pays. The Treasury can add the surcharge if they want, but as Mr. PARRIS said, since the city is already paying 1¼ percent to 2¼ percent to the Treasury, it is unnecessary for the Treasury to make more money, particularly when we hope this whole process will stop after fiscal 1982.

Mr. SOLOMON. Let us hope so.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield further?

Mr. SOLOMON. I yield.

Mr. DELLUMS. I might just add one additional thing for my colleagues who are new to this body. The record of the District of Columbia in repaying the Treasury is exemplary. That is a matter of record. It has been attested to by the Secretary of the Treasury. The District of Columbia has been prompt and efficient in its payments, and it would seem to me there is no evidence whatsoever that the District of Columbia lacks the capacity or the desire or the will to properly repay its debts. I thank my colleague.

The SPEAKER pro tempore. The time of the gentleman from New York has again expired.

(At the request of Mr. KAZEN and by unanimous consent, Mr. SOLOMON was allowed to proceed for 1 additional minute.)

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I will be glad to yield to the gentleman from Texas.

Mr. KAZEN. I thank the gentleman for yielding.

I was under the impression that this bill would have authorized the District of Columbia to issue bonds. My understanding now is that all this bill does is extend the present authority to borrow money from the Treasury. Is that correct?

Mr. SOLOMON. I had the same concern as the gentleman and I think that has been clarified.

Mr. KAZEN. Well, is that correct? All this is is an extension of the borrowing authority from the Treasury, and not the issuance of bonds?

Mr. SOLOMON. That is correct as far as I am concerned, but I would yield to the chairman of the committee.

Mr. DELLUMS. I would say to my colleague from Texas it is absolutely correct. Again I repeat, all the legislation before us does is extend for 2 years the authority of the District of Columbia to go to the Treasury for the purposes of borrowing for capital improvement. The Reconciliation Act now includes a $155 million cap. That is all the legislation does.

Mr. PARRIS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, if I might, I think this time I will be extremely brief, and I will try to dispel what I think is some real confusion here, and perhaps particularly from my side of the aisle—not created, I might add, by my good friend from Connecticut.

Let me just make the point, if I might, that there has been considerable discussion around the Halls of this Congress and in the local media about H.R. 1807, which would adopt the principle of issuing municipal bonds authorized by this Congress to pay operating and cumulative deficits.

□ 1650

This is not that legislation. As has been recently pointed out just in the last minute or so by the gentleman from Texas, what we are doing is simply extending again for the third time the short-term borrowing capacity of the District of Columbia to take moneys which are repaid to the Treasury Department.

Let me just make one other point, and then I will sit down. If for any reason this legislation were not passed, if there were some in this Congress who are not enthusiastic about extending the right of the District of Columbia to issue bonds, and if that right is not subsequently granted, then we have eliminated the opportunity for the District of Columbia to provide any source for short-term financing.

Mr. Speaker, I think that would create an impossible situation for the orderly conduct of the District of Columbia government, and it is my hope that this legislation will pass.

Mr. DELLUMS. Mr. Speaker, will my colleague yield to me?

Mr. PARRIS. I yield to the chairman of the committee.

Mr. DELLUMS. Mr. Speaker, I appreciate the statement my colleague made, and I would simply say to my colleagues, reflecting particularly on the last vote where there was a substantial number of Members who voted against the capacity of the District of Columbia to receive a little bit in additional revenues, that in this conservative atmosphere I hope the Members will at least vote on the merits of this situation.

We are not asking for any additional funds. This is not busting the budget; it is not contributing to inflation. It is providing the capacity of revenues of the District of Columbia to go into the Treasury for the purpose of borrowing funds until they have the capacity to float bonds in the open market for the purposes of financing capital improvements.

It is my hope that my colleagues will pass this legislation. This is the crossroads of the world, and it would seem to me it is in our interest, as we reflect back out to the world, that the District of Columbia be a shining example of our capacity to address the human problem. To not do that would seem to me to be tragic.

Mr. JOHNSTON. Mr. Speaker, will the gentleman yield?

Mr. PARRIS. I am delighted to yield to the gentleman from North Carolina.

Mr. JOHNSTON. Mr. Speaker, am I to understand that at the present time the District of Columbia is allowed to borrow interest free from the Treasury on tax anticipation notes on a short-term basis as long as they are repaid within the year?

Mr. PARRIS. Mr. Speaker, I would respond to the gentleman by saying that that is not correct. The District of Columbia pays to the Treasury Department approximately 12.4 percent, which is the Treasury rate at the moment, as compared, I might add, to local municipalities which borrow through the bond markets at an average tax exempt rate of approximately 10.5 percent. So the District of Columbia is today carrying an inordinate burden in interest rates.

Mr. JOHNSTON. And in no instance does the Treasury lend money to the District of Columbia on an interest-free basis?

Mr. McKINNEY. Mr. Speaker, will the gentleman yield?

Mr. PARRIS. I yield to the gentleman from Connecticut.

Mr. McKINNEY. Mr. Speaker, in answer to the gentleman, on occasion, under short-term borrowing, they can borrow at no interest for cash flow purposes, and the principal has to be

paid back at the end of that fiscal year.

Mr. JOHNSTON. But they do borrow funds interest free; is that correct?

Mr. PARRIS. Mr. Speaker, I would submit to the gentleman from North Carolina that this is not one of those types of programs.

Mr. JOHNSTON. But in fact the Treasury is now lending funds to the District of Columbia interest free on a short-term basis?

Mr. PARRIS. On a short-term basis, yes, but not in this area of capital improvements.

Mr. JOHNSTON. Mr. Speaker, is the gentleman aware of any other municipality in the country that is allowed to borrow from the U.S. Treasury on an interest-free basis?

Mr. PARRIS. No; but I am not aware of any other situation where we are dealing with the Capital City.

Mr. DELLUMS. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. JOHNSTON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 239, nays 149, not voting 45, as follows:

□ 1710

The Clerk announced the following pairs:

On this vote:

Mr. DeNardis for, with Mr. Rousselot against.

Mrs. Schneider for, with Mr. Chappie against.

Mr. Evans of Delaware for, with Mr. Deckard against.

Mr. Williams of Ohio for, with Mr. Evans of Iowa against.

Until further notice:

Mr. Barnard with Mr. Pritchard.
Mr. Pepper with Mr. Dickinson.
Mr. Rosenthal with Mr. Horton.
Mr. Zeferetti with Mr. Hansen of Utah.
Mr. Minish with Mr. Brown of Ohio.
Mr. de la Garza with Mr. Conable.
Mr. John L. Burton with Mr. Grisham.
Mr. Solarz with Mr. Frenzel.
Mr. Whitley with Mr. Gregg.
Mr. Russo with Mrs. Fenwick.
Mr. Simon with Mr. Duncan.
Mr. Brown of California with Mr. Gephardt.
Mr. Obey with Ms. Mikulski.
Mr. Lantos with Mr. Frost.
Mr. D'Amours with Mr. Pickle.
Mr. Bonker with Mr. Bonior of Michigan.
Mr. Blanchard with Mr. Savage.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate bill (S. 640) to amend the District of Columbia Self-Government and Governmental Reorganization Act with respect to the borrowing authority of the District of Columbia, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 640

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 723(a) of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code. sec. 47-241 note) is amended by striking out "October 1, 1980, or upon enactment of the fiscal year 1981 appropriation Act for the District of Columbia government" in the first sentence and inserting in lieu thereof "October 1, 1982, or upon enactment of the fiscal year 1983 appropriation Act for the District of Columbia government.".

MOTION OFFERED BY MR. DELLUMS

Mr. DELLUMS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. DELLUMS moves to strike all after the enacting clause of the Senate bill (S. 640) and to insert in lieu thereof the text of the bill, H.R. 2818, as passed by the House, as follows:

That section 723(a) of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-241 note) is amended by striking out "October 1, 1980, or upon enactment of the fiscal year 1981 appropriation Act for the District of Columbia government, whichever is later" in the first sentence and inserting in lieu thereof "October 1, 1982, or the date of the enactment of the appropriation Act for the fiscal year ending September 30, 1983, for the government of the District of Columbia, whichever is later".

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "A bill to amend the District of Columbia Self-Government and Governmental reorganization Act to extend the authority of the Mayor to accept certain interim loans from the United States and to extend the authority of the Secretary of the Treasury to make such loans."

A similar House bill, H.R. 2818, was laid on the table.

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

REPORT ON CONCURRENT RESOLUTION PROVIDING FOR PRINTING OF BROCHURE ENTITLED "HOW OUR LAWS ARE MADE"

Mr. GAYDOS, from the Committee on House Administration, submitted a privileged report (Rept. No. 97-203) on the concurrent resolution (H. Con. Res. 106) to provide for the printing of the brochure entitled "How Our Laws Are Made," which was referred to the House Calendar and ordered to be printed.

REQUEST FOR PERMISSION FOR COMMITTEE ON GOVERNMENT OPERATIONS TO SIT THURSDAY, JULY 30, 1981, DURING 5-MINUTE RULE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that the Committee on Government Operations be permitted to sit during the 5-minute rule on Thursday, July 30, 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. WALKER. Mr. Speaker, reserving the right to object, I would ask the gentleman from Texas to explain what it is the committee will be taking up under his request for unanimous consent.

Mr. BROOKS. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Texas.

Mr. BROOKS. We have three reports which are scheduled, and the possibility of a contempt proceeding that has been pending for some time. I am hopeful it will be worked out, but we are not going to meet tomorrow because the ranking Republican was going to be out of town and asked me if I would put the meeting over to Thursday. I have agreed to do that. I think that it will be a very useful time to meet.

Mr. WALKER. Further reserving the right to object, is the contempt proceeding we are talking about the one that is issued against Secretary Edwards of the Department of Energy?

Mr. BROOKS. That is correct.

Mr. WALKER. That is a rather controversial matter; is that not correct?

Mr. BROOKS. It has been a little bit. Not particularly with me.

Mr. WALKER. Am I correct also that the one report that is to be taken up concerns the Community Services Administration, which is also a very controversial matter that was reported out of the committee with the Republicans unanimously in opposition to the report?

Mr. BROOKS. I believe that is correct. That is from the committee of the gentlewoman from Illinois (Mrs. COLLINS) on the Community Services, and that is last up for consideration in that meeting on Thursday.

Mr. WALKER. In other words, the problem I am having with this is we are having two extremely controversial items that we would be asking Members to be absent from the floor here to take up. That is the question I think that arises with the gentleman's unanimous-consent request.

Mr. BROOKS. We could probably meet during general debate tomorrow, on Wednesday, if that would suit the gentleman better, though I had hoped that we could wait until Thursday so that they could resolve one of these matters. During general debate on the tax bill would probably be a better time from the standpoint of Members since we are pretty familiar with the tax program. So it would be a matter which I would think Thursday would be a better time and we could get it resolved. We could come in around 9 or 9:30 and probably finish up.

But I guess we could come in during general debate under the rules.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. MICHEL. Reserving the right to object, Mr. Speaker, I wonder if the chairman of the Government Operations Committee has asked the ranking minority member of the committee or advised him he was going to make such a request today.

Mr. BROOKS. Will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Texas.

Mr. BROOKS. Yes; I have. The gentleman from New York (Mr. HORTON)—the gentleman I guess did not hear, he was talking to people, or some people were talking to him, but I explained to the gentleman from Pennsylvania (Mr. WALKER) that the reason the meeting is not being held tomorrow morning as regularly scheduled and as scheduled for a couple of weeks; it is because the ranking minority member, of necessity, is in his district and must be in his district tomorrow—today, and tomorrow. He asked me if I could put the meeting off until Thursday and I agreed that I would be perfectly willing to do that.

In view of that, and in view of the fact that the gentleman and I had both been working on the resolution of a matter to be considered, I had hoped we could do that.

Mr. MICHEL. What time would that meeting be?

Mr. BROOKS. We would probably meet at 9:30, but the House may come in at 10 o'clock.

Mr. MICHEL. Is it the gentleman's understanding that word would be received by that time as to whether or not an agreement was reached?

Mr. BROOKS. We are hopeful.

Mr. MICHEL. Is that the only request the gentleman is making for his committee to meet?

Mr. BROOKS. That is correct.

Mr. MICHEL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. HARTNETT. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard. The Chair will state that it requires 10 Members to object.

Messrs. PETRI, WEBER of Minnesota, ROGERS, MICHEL, ROTH, RITTER, MOLINARI, JOHNSTON, and COATS also objected.

The SPEAKER pro tempore. A sufficient number has objected.

Objection is heard.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may be permitted to revise and extend their remarks on consideration of the bill, H.R. 4119, and that I be permitted to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATION, 1982

Mr. WHITTEN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4119), making appropriations for agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1982, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1½ hours, the time to be equally divided and controlled by the gentlewoman from Nebraska (Mrs. SMITH) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

□ 1720

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 4119, with Mr. GORE in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from Mississippi (Mr. WHITTEN) will be recognized for 45 minutes, and the gentlewoman from Nebraska (Mrs. SMITH) will be recognized for 45 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. MICHEL. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Illinois.

Mr. MICHEL. Mr. Speaker, this is only for a brief moment before the gentleman begins his opening remarks on the debate.

I wonder if the gentleman might clarify for the other Members how we would proceed the balance of this day in view of the President's remarks scheduled for 8 o'clock? I know we had a colloquy with the majority leadership last week that we wanted to get as much as we possibly could accomplished, and I think Members ought to be expected to stick around.

Mr. WHITTEN. May I say to my colleague, all agree we will rise in time for the President's speech tonight. As the gentleman knows, for some 3 or 4 weeks we have had eight or nine appropriations bills ready to go to the floor of the House and we have had extreme difficulty in arranging for bringing them up.

May I say to my colleague that in the bill before us, so far as I know, there are no differences between the members of the subcommittee who worked with the bill. I do not mean each item suits everybody, but within the limits that we had and with the problems we had, we resolved our differences. I know of only two or three amendments, all of which can be accepted. One amendment will be withdrawn. So if we shorten our time in dealing with general debate and reserve our speeches for a more propitious time, I think we can get through the bill expeditiously.

So our colleagues being willing, we can move straight ahead. But under any circumstances, we will rise in plenty of time for the President's speech.

Mr. MICHEL. I thank the gentleman.

Mr. WHITTEN. Mr. Chairman, with that statement, may I say we do bring to the Members the Agriculture appropriations bill for the fiscal year 1982.

First, I would like to express my thanks to the members of the subcommittee for their hard work on the bill. Our ranking majority member, the gentleman from Michigan (Mr. TRAXLER) and our ranking minority member, the gentlelady from Nebraska (Mrs. SMITH) have devoted long hours to our hearings and the development of this bill. I would also like to thank the gentleman from Arkansas (Mr. ALEXANDER), the gentleman from New York (Mr. MCHUGH), our longtime member from Kentucky (Mr. NATCHER), the gentleman from Texas (Mr. HIGHTOWER), the gentleman from Virginia (Mr. ROBINSON), and the gentleman from Indiana (Mr. MYERS) a long-time member of the subcommittee.

I would also like to thank, Mr. Chairman, our new members on the subcommittee for their contributions, the gentleman from Hawaii (Mr. AKAKA), the gentleman from Oklahoma (Mr. WATKINS), and the gentleman from California (Mr. LEWIS).

Together with my good friend from Massachusetts (SILVIO CONTE), my counterpart on the minority side, we have all worked together to bring you this bill.

In addition, Mr. Chairman, I would like to say a word of thanks to the staff of our committee.

May I point out to the Members we had testimony before our committee from 259 witnesses on the bill this year. For over 2 months we held hearings 5 days a week. Our hearings are a total of 5,683 pages.

In this bill we recommend $22,730,534,000, which is $2.84 billion less than in 1981, $1.6 billion less than the budget request, and $1.88 billion less than the target in the first budget resolution.

We may have some problems with the tentative agreement on reconciliation, which I understand limits the total employment of the Department of Agriculture. Such action could turn over to the Office of Management and Budget the ability to use personnel ceilings on individual programs as a means of cutting back programs below the level approved by the Congress. Such authority could be used to effect the equivalent of a line item veto, which is not allowed by the Constitution.

Therefore, in order to protect the food supply of this country and maintain the economic viability of Agriculture which is the biggest market of industry and labor, the committee intends to require that all personnel ceilings set on individual programs be reported to the committee for review and approval. The committee feels that such action is essential in order for the Department to comply with section 612 of the bill which provides:

SEC. 612. Funds provided by this act for personnel compensation and benefits shall be available for obligation for that purpose only.

This section was added to the bill in order to assure that funds are used, and are used for the purposes requested.

There will be discussions here about the food stamp program. We have provided the full amount that is requested for food stamps at the present time.

In an effort to save money and enable those who deal with it to save money, we have called on them to come up with a better system of handling food stamps. No only that, but about $292 million is put in a reserve for possible savings. What that means is if they can save it, they will. The Members have probably read where in one of the cities in the country some $1 million has been stolen within 1

month. There is plenty of room to improve on the food stamp program. My colleague from New York will have something to say about not providing funds here for all of fiscal year 1982. We have, however, provided the full amount of the budget request. I do expect the committee to provide the remainder of the funds once we have received a budget request.

Again, we on this committee wish to protect the program and the best way to protect it is to see it is properly handled and goes to the people that deserve and need the help. We have provided the full amount of the request. We will need a supplemental which we will address later in the year. We have put $292 million in reserve for possible savings, if not, it is available to meet the needs required by law.

We have provided $1 million for WIC to full fund the program. We also allow the Secretary to distribute surplus commodities to the needy in cases of hardship. Today we have over $1.9 billion of dairy products in inventory. The reason we have them is we are not trying to sell them. The Secretary of Agriculture wants to sell them but somewhere along the line he has been blocked in doing so. So once again in this bill we provide the system for distributing agricultural surpluses to those that deserve and need them. Furthermore, we do not want to pay a whole lot of storage costs on something that could be sold in world trade or is badly needed at home.

We have restored the REA program to last year's level. We restored watershed and flood prevention funds. The Members may have read in Sunday's paper where the Secretary of Agriculture had pointed out just how serious soil erosion is in this country. Forty acres of top soil goes down the Mississippi River by the city of Memphis, it is estimated, each day in the year.

We have also restored water and sewer programs.

What I am saying to the Members is that within the limits and under the level prescribed for us, we have taken care of the basic things which are so essential to the country.

Mr. Chairman, I would now like to turn to the state of agriculture, an obvious primary concern of this committee.

THE STATE OF AGRICULTURE

Today, people in the business of agriculture face critical new problems. The resolution of these problems will go far in determining whether these businessmen succeed or fail, and the overall economic well-being of the business of agriculture will determine the supply and cost of the food and fiber upon which our Nation depends.

Mr. Chairman, the fruit of labor of less than 4 percent of our population sustains all of the rest of us. This level of our agricultural productivity is unmatched and indeed is unrivaled by any other nation in the world today, or by any civilization in the history of the world. But now the American farmer faces the specter of bankruptcy brought on by rapidly rising costs and declining prices, aggravated by the withholding of his products from world markets.

It is clear that the share of the consumer dollar which goes to industry and labor is growing with each passing year. Because the consumer dollar does not also grow, it is clear that the farmer's share of the dollar becomes less and less. As but one example of this phenomenon, the productivity of American agriculture has resulted, in large part, from the replacement of manual farm labor by sophisticated machinery—but the high cost of owning and operating this machinery reflects the increased share of the dollar which has already gone to industry and labor.

The farmer's price targets are being removed. The farmer's only protection from natural disasters which can destroy a year's labor with a 5-minute hailstorm is now an optimistic but untested insurance program. The artificially inflated price of the farmer's very land means that he must pay more and more taxes with no relief, because he cannot sell the land and farm it too. These large tax bills, coupled with crippling production costs, force the farmer to heavily mortgage his land in order to stay in business—mortgages which now carry the highest interest rates in 60 years. All of these factors combine to produce an economically unavoidable end result. The only young people who can enter farming are those who are fortunate enough to inherit land, and with each passing year there are fewer and fewer people who can afford to stay in the business of agriculture at all.

The American farmer is industry's and labor's biggest customer, the consumer's best supplier, the caretaker of the soil which constitutes our Nation's basic wealth for this and future generations.

Mr. Chairman, we believe that this is the time for all to take a close and careful look at just how dependent we are upon the continued economic well-being of those engaged in agriculture.

A BILL FOR FARMERS AND CONSUMERS

This annual appropriation bill for agriculture benefits both the American farmer—4 percent of the population of the United States—and the American consumer—the other 96 percent of U.S. population. It enables the American farmer to feed millions of people throughout the world—nearly half of the world's trade in agricultural commodities is in crops grown by U.S. farmers. It assures the American consumer of abundant supplies of wholesome, high-quality, and low-cost food and fiber.

This bill funds such programs as research and extension, pest control, marketing services, food safety and quality, rural electrification and rural development, soil and water conservation, school lunches, food stamps and other feeding programs, market and price stabilization, and export of food to needy people in foreign lands. It supports programs which affect the quality of life of all Americans, such as water and sewer loans and grants for rural communities, 4-H clubs for over 2 million rural and urban youth, improved wholesale food markets for consumers in major cities, urban gardening in many large cities, and nutrition education to urban dwellers.

FARM PROGRAMS ESSENTIAL

Mr. Chairman, agriculture is basic to the American economy and the American way of life. It is the foundation upon which all other segments of the economy depend. Agriculture is the principal source of new wealth. It is the main provider of basic raw materials which support all segments of business and industry. Reliable estimates indicate that each dollar of wealth taken from the soil generates $7 of income throughout the economy. It is the provider of the basic necessities of life—food, clothing, and shelter.

Agriculture is the Nation's largest industry. Its assets of over $1 trillion are equal to about three-fourths of the capital assets of all manufacturing corporations in the United States. It employs more workers than any other major industry. USDA estimates that between 14 and 17 million people work in some phase of agriculture from the farm to the supermarket.

Agriculture is one of the major markets for the products of labor and industry. It spends about $86 billion annually for goods and services to produce crops and livestock. This includes around $11 billion for farm tractors, vehicles, machinery, and equipment. It includes some $12 billion for fuel and lubricants, more than the amount used by any other single industry. Each year over $17 billion is spent for feed and seed, and about $7 billion is spent for fertilizers. Agriculture uses about 5 percent of all rubber products consumed in the United States, enough to put tires on 7 million cars. It consumes 33 billion kilowatt-hours of electricity annually—more than the combined residential use in New England, Maryland, Kentucky, and Washington, D.C. Farm use of steel totals 6.5 million tons each year for machinery, vehicles, fencing, and building materials.

American agriculture is both efficient and productive. It is a major anti-inflationary force in the Nation, both because of its productivity and because it generates new wealth to support the total economy. According to USDA data, a 6-percent increase in

farm inputs during the past 5 years resulted in a 10-percent increase in output. This data also shows that output per man-hour on the farm in 1980 was 155 percent of the 1967 level—compared with per-hour output of 115 percent for nonfarm workers.

But, most important of all, Mr. Chairman, American agriculture has made the United States the "breadbasket" of the world. It has not only provided ample food for American consumers but has also helped to feed hungry people in many other parts of the world. USDA estimates that in 1981, we will produce 45 percent of the world's wheat exports, 24 percent of all rice exports, 81 percent of soybean exports, and 72 percent of total exports of feed grains. Also, American agriculture is a major earner of foreign exchange to help offset the increasing cost of oil imports. It is estimated by USDA that agricultural exports will reach $47 to $49 billion in 1981, enough to cover over half the cost of petroleum imports into the United States in 1981.

The ingenuity, dedication, and even sacrifice of those engaged in food and fiber production in the United States, together with those who have devoted themselves to the improvement of farm equipment and other farm inputs, have resulted in the development of the most abundant agricultural supply system in history. USDA estimates indicate that one farmworker provides enough food and fiber for about 60 people today, compared with only 29 people 10 years ago.

American agriculture has not only provided food for the consumers of the world, but it has made possible extraordinary advancements in human endeavor. It has freed 96 percent of the American people from a subsistence existence. It has permitted the development of the most advanced implements of transportation, communication, medical science, and other essentials of life. It has enabled man to walk on the Moon and to explore the outer reaches of the universe. It has enabled medical and health experts to nearly double the average life span in the United States—from about 47 years at the turn of the century to over 72 years at present—through the development of X-rays, scanners, computers, and other sophisticated equipment important to the well-being and comfort of people.

But despite the tremendous contribution to the well-being of the world's consumer, Mr. Chairman, farming has become a less attractive occupation through the years. Unstable markets, undependable income, skyrocketing production costs, and constant risks from weather, pests, and insects have made farming an increasing gamble. This has been especially true in recent years when the amount of capital investment required for land, machinery, fuel, and other production inputs has become almost impossible for the average farmer to acquire.

Mr. Chairman, I would like to take this opportunity to present to my colleagues a number of statistics which indicate the current financial situation of those engaged in agriculture.

FARMERS RECEIVE DECLINING SHARE OF CONSUMER DOLLAR

Department of Agriculture figures show that the farmer's share of the consumer food dollar has declined through the years, as farm prices have failed to keep pace with the cost of producing food. They indicate that the 49 percent of the food dollar received by farmers in 1951 has declined to 37 percent today.

USDA figures show further that the marketing bill for food between the producer and the consumer increased from $61.7 billion in 1967 to $140.5 billion in 1978, an increase of 128 percent. In 1980, farm value went up only 1.7 percent, while marketing costs went up 4.3 percent. U.S. marketing firms tripled their profits during this period.

In 1980, the Consumer Price Index increased 13.5 percent as compared to 3.3 percent in 1972. Housing went up 15.7 percent, transportation went up 17.8 percent, medical care went up 10.9 percent, and food marketing and imported foods went up 9.2 percent. The farm value of food went up only 5.4 percent, from one-half to one-third of the increase for all other items.

USDA studies also show that prices paid by farmers for farm inputs have grown at about double the rate for prices received for farm crops and livestock products. Prices received by farmers in 1980 were 245 percent, using 1967 as base, compared with 179 percent in 1973. Prices paid by farmers in 1980 were 280 percent of 1967, compared with 144 percent in 1973. While prices received during this period went up 66 percentage points, prices paid increased 136 points. While prices received exceeded prices paid by a margin of 35 points in 1973, this relationship completely reversed itself by 1980.

FARMER BUYS AT RETAIL

As inflation spirals, agricultural producers are being forced to meet higher and higher costs for the things they need to produce food and fiber. Farm production expenses have tripled in 10 years, from $44.4 billion in 1970 to $131.6 billion in 1980. USDA forecasts a further increase in 1981 to between $145 and $149 billion. Fuels and oils, seed and fertilizer, and interest costs have been the principal contributors. The cost of fuels and oils have increased from $1.7 billion in 1970 to $8.4 billion in 1980—a fivefold increase. The cost of seed and fertilizer has increased from $3.2 billion in 1970 to $11.4 billion in 1980—nearly four times higher. Interest has increased nearly fivefold, from $3.4 billion in 1970 to $16.3 billion in 1980.

FARMER SELLS AT WHOLESALE

The American farmer continues to lose ground to inflation. While production expenses increased by 196.4 percent between 1970 and 1980, cash receipts from marketings went up only 177.6 percent during this same period—approximately 19 percent less.

The U.S. farm price of wheat is an example of the loss of farm income during the past decade. USDA figures show that the March 1973–74 price of wheat was $4.96 per bushel compared with the March 1980–81 price of $3.93 per bushel. The season's average price was $4.20 per bushel for 1973–74 and $3.95–$4.05 per bushel for 1980–81.

FARM PURCHASING POWER DOWN

The purchasing power of the average farmer has decreased through the years as production costs have increased and farm income has failed to keep pace. This has necessitated more and more dependence on off-farm income by many farmers, especially those with smaller farms. The nature and character of much American agriculture is changing to "part-time" farming, as a result.

Net farm income in 1980 dropped about 25 percent below 1979. Gross income went up less than 4 percent during the year while costs of production rose nearly 10 percent. Net income or purchasing power of $23.3 billion for 1980 was less than for 3 of the past 5 years, 1975, 1978, and 1979.

Per capita income for farmers has consistently been below that of nonfarm people. In 1980, it was 16.4 percent lower. In 7 of the past 9 years it has been less than for the nonfarm population.

Returns to equity on American farms are also much lower than for nonfarm enterprises. According to USDA data, returns from farming in 1980 were only 2.4 percent of investment, based on current value of land and other assets. This is obviously too low to encourage any but the most dedicated farmers to stay on the farm. Even the higher returns of 6.9 percent for 1980, based on acquisition value, is less than one-half the rate of return for all manufacturers, and less than one-third the return for petroleum and coal products.

Mr. Chairman, perhaps the most telling indicators of the agricultural economy are statistics regarding the farmer's investment in land and equipment.

FARM DEBT GROWING RAPIDLY

As of January 1, 1981, farm debt reached a total of $180.5 billion, an increase of $23.2 billion during 1980. Over half of this increase was for real estate, reflecting a demand for refinancing of long- and short-term debt. According to expert witnesses before the committee, much of this demand

was stress related, due to poor farm income, and was the largest rate of growth in 60 years.

I will provide for the RECORD figures provided by USDA which show the doubling of farm debt since 1976:

TOTAL U.S. FARM DEBT

[In billions of dollars]

	1976	1977	1978	1979	1980	1981
Farm debt outstanding on Jan. 1:						
Real estate	51.1	56.6	63.7	70.8	82.1	96.1
Nonreal estate (excluding CCC loans)	39.4	45.1	51.2	60.0	70.7	79.7
Commodity Credit Corporation loans	.3	1.0	4.5	5.3	4.5	4.7
Total farm debt	90.8	102.7	119.4	136.1	157.3	180.5

The Federal land banks have accounted for a growing share of farm real estate debt in recent years. While individuals and other private creditors formerly held most of the farm real estate, they are now holding a smaller share than the Federal land banks. Also, the share of credit for farm real estate provided by the insurance companies has been declining in recent years.

For nonreal estate lending, there has been a sharp decline in credit provided by the commercial banks, by individuals, and by other private lenders. This was a very serious problem last year, as farmers had difficulty in getting loans to plant their 1980 crops. They were faced with a lack of credit in some areas, together with very high interest rates as noted above. This made it necessary for the Production Credit Associations of the Farm Credit System and the Farmers Home Administration of USDA to greatly expand their loans to farm operators.

LARGE INVESTMENT REQUIRED

Today's farmer must invest as much as $350,000 to $500,000 to acquire the assets needed to begin farming. For example, a fully operational Corn Belt farm of 250 acres—estimated to be the minimum size required for a family to earn a living—would cost $900,000 to $1 million. Some $350,000 to $400,000 in cash would be needed to get started. The largest expense item would be the down payment of around $250,000—25 percent is needed to get a more favorable interest rate. In addition, $100,000 to $150,000 would be needed for items such as equipment and living expenses.

In addition, the average farmer must be prepared to continue to invest large amounts each year in farm labor, in fuel for tractors and other equipment, in equipment maintenance and replacement—as well as in seeds, fertilizers, pesticides, and other items necessary to plant and cultivate his crop. He must also have enough money to pay taxes on his greatly inflated land values, and to pay for his mortgage.

The total investment in farm assets on January 1, 1981, is estimated to be about $1 trillion. Ten years ago, farm assets were one-third of this amount. Even allowing for inflation, the investment in farm assets has grown nearly 200 percent in the past decade.

Today, it is virtually impossible for a young person to go into farming, unless he is fortunate enough to inherit the land and other assets needed. The younger farmers, those under 35, own only about 5 percent of the farmland today.

COST OF FARMLAND "OUT OF SIGHT"

A major part of the farmer's investment today is in highly inflated farmland. Figures before the committee indicate that investment in farm real estate today is about 73 percent of total asset values, a total investment in farmland and buildings of about $730 billion. The investment in farm real estate was about 69 percent of total assets 10 years ago.

Current USDA figures show that over half of farm debt estimated for 1981 is for real estate, much of which was purchased by individuals in recent years at highly inflated values to enter farming or to expand ongoing farm operations, or which represented new loans on land which the farmer previously owned free and clear but now must mortgage in order to maintain enough cash to stay in business.

The Farm Credit Administration estimates that land prices increased by 245 percent during the 1970's, an annual average gain of 13 percent, compared to inflation which averaged 7.5 percent annually. In 1980, the increase in real estate values was about 2½ times greater than farm income.

Rates of increase in farmland values have exceeded rates of returns from other types of investments and as noted above have generally exceeded inflation rates. This has stimulated interest in the purchase of farmland for investment purposes by both farmers and nonfarming interests. Efforts by farmers to expand the size of their operation to partially offset lower prices and higher costs have been one factor. Attempts of nonfarm people to hedge against inflation have been another. Foreign purchasers with large holdings of dollars to invest in the United States have also contributed. As a result, prices for farmland have risen far beyond the land's value in terms of income-producing potential.

High land costs and values have greatly aggravated the average farmer's financial problems. They have made it more expensive for a farmer to enter and remain in farming. They have increased his taxes on expanded land assessments which do not relate to actual returns from farming the land. They have tended to encourage increased borrowing on artificially increased land values. This increased financial pressure has encouraged many hard-pressed farmers to overextend their credit positions—beyond the point where loans can be repaid from farm earnings. Thus, farmers have had to look more and more to off-farm sources of income to service debt loads on mortgaged land.

Mr. Chairman, I would like to quote testimony on this point from a Department of Agriculture witness.

In recent years farms have earned much more from asset value appreciation than from current income. For many farmers, current income is often insufficient to meet mortgage payments. Those best able to purchase farmland have been wealthy farmers and non-farmers with income that can supplement that which is earned from the land. Beginning farmers and others who depend primarily on farm sources of income are at a competitive disadvantage in buying land.

It is important to recognize that this increase in value of real estate has not added to the true wealth of the farmer. Such wealth can only be realized by selling the land. As long as the farmer remains on the land, the only real income he can expect is his receipts from producing crops and livestock. As has been noted earlier, net farm earnings have declined rather than increased through the years.

COST OF EQUIPMENT AND EXPENSES INFLATED

Today farm investment in equipment, machinery, and other nonreal estate assets is estimated at around $300 billion.

The cost of farm equipment has increased dramatically in recent years as spiraling inflation has driven prices up. Farm wages increased 131 percent between 1973 and 1980. Fertilizer costs rose 141 percent and equipment costs rose 186 percent during this period. The most damaging increase of all was for fuel, the cost of which rose a total of 264 percent between 1973 and 1980. Since agriculture is a very large user of gas and oil, this large cost increase has had a most serious effect on net farm income.

FARMING—A RISKY BUSINESS

Mr. Chairman, the average farmer must risk his entire investment each time he plants a crop. He must try to meet rapidly expanding costs of production. He must gamble on the vagaries of weather and the ravages of pestilence—either of which can destroy his crop and wipe out his entire investment overnight—especially now that use of his proven controls against insects and disease has been greatly restricted by Government regulation.

If the farmer is fortunate enough to win these battles against factors largely beyond his control, he must still face the uncertainties of the marketplace—which is also beyond his control. He must gamble that market prices will be high enough at harvest time to cover his ever-increasing production costs and still leave him a small net profit to cover his investment, his managerial input, and the labor of himself and his family.

Farming is a great risk—far beyond that of nonfarm enterprises. It is more of a gamble than the farmer should be expected to take. Whereas, it formerly took as many as 7 consecutive years of bad crops to bankrupt the average producer, the greatly increased risks of farming today can wipe out the average farmer's investment in a single crop year.

Most farmers must live on a year-to-year basis. They must borrow funds each year to plant their crops and then must hope to receive enough income from such crops at the marketplace to repay the loan and preserve their credit eligibility for next year's crop. The only real protection farmers have is when stable markets and adequate prices are assured by income stabilization programs of the Commodity Credit Corporation.

The number of farms in the United States has decreased through the years, from 5.3 million in 1950 to 2.4 million in 1980, a drop of 2.9 million or 55 percent. Farm population as a percentage of total population has declined from 15.2 percent to 3.7 percent during the same period. Likewise, there has been a significant decrease in the number of medium-sized farms, those with gross incomes of between $20,000 and $100,000, due to the cost/price squeeze which has been particularly acute for medium-size farmers.

FOOD—CONSUMER'S BEST BUY

Food is still the American consumer's best buy. About 16 percent of total U.S. disposable income is spent for food—lower than in any other part of the world.

Despite the steady increase in costs between the producer and the consumer for transportation, processing, and marketing, the portion of the consumer dollar spent for food in the United States has remained relatively constant. This is due primarily to a continuous decrease in the producer's share of the dollar, which has offset in large part the increases that have gone to labor and industry.

The latest data from USDA shows that the percentage of income spent for food in various other developed countries of the world exceeds that of U.S. consumers—rather substantially in some instances. I will submit for the RECORD figures which demonstrate this point quite clearly.

Share of total private consumption expenditures for food, beverages, and tobacco, 1978

Country:	*Percent*[1]
United States	16.3
Canada	20.8
Japan	25.5
France	23.1
Netherlands	22.1
Belgium	25.4
West Germany	[2] 26.5
Sweden	26.5
Denmark	27.5
United Kingdom	24.4
Spain	34.0
Portugal	50.1
U.S.S.R.	45.0

[1] Excludes food, beverages and tobacco purchased in restaurants and hotels as well as most institutional purchases, unless otherwise indicated.

[2] Includes purchases of alcoholic beverages and tobacco in restaurants and hotels.

If an additional 8.1 percent of American income were spent for food in 1980 as in England, the U.S. economy would have had $22 billion less to use for other purposes. If we were to spend 45 percent of our income for food, as is required of Russian consumers, our economy would have generated $77 billion less in 1980 to purchase other goods and services from labor and industry.

Thus, through the efficiency and productivity of 4 percent of the people who are on farms, American agriculture adds billions of dollars to the strength of the U.S. economy. By working for less, and by receiving less for management and equity on investment than other segments of the economy, farm producers are "subsidizing" the other 96 percent of Americans who receive plentiful supplies of wholesome food at costs well below those paid by consumers in other parts of the world.

In 1977, Dr. Cortez F. Enlowe, Jr., described North American agriculture as the "eighth wonder of the world." He pointed out that abundant food supplies have been the most important factor in the advancement of the United States and Canada, giving their people the freedom to provide the central support for Western civilization. He summed up his conclusions as follows:

The most magnificent achievement of mankind is the creation in North America of the greatest land of nutritional abundance in the world. Not even the building of the Egyptian Pyramids, the writing of the Greek Classics, the painting of the masterpieces, the composition of the symphonies, the invention of steam power, or the splitting of the atom can fill the shadow of this towering triumph of the human spirit. It alone is the greatest thing man has ever done.

URBAN-RURAL PARTNERSHIP

URBAN 4-H CLUBS AND NUTRITION EDUCATION

Mr. Chairman, to strengthen the urban-rural partnership, this committee initiated a program to establish 4-H clubs in the cities and to provide nutrition aides to advise urban dwellers in dietary matters. In the 1970 appropriation bill, the committee earmarked $7.5 million for professional workers to promote 4-H type programs in the depressed areas of our cities and to provide educational assistance among low-income groups to improve dietary practices and reduce malnutrition. The committee recognized the success of the 4-H clubs in rural areas and felt that such clubs would help to provide similar interests and activities for youth in the cities.

As reported in previous years, the results of this effort have been increasingly rewarding. The 4-H clubs now have more than 5.5 million members, including 2.7 million in urban areas, an increase of 200,000 over a year ago. Today, less than 20 percent of 4-H club members live on farms. The remainder live in towns and cities, including around 9 percent in the inner cities of our large metropolitan areas.

It appears that much of the increased understanding of interrelated rural-urban problems is due to this involvement of urban people in agricultural-type activities, with increasing support of city Members of Congress and their constituents for agricultural programs.

URBAN GARDENING

The committee continues to receive evidence that the urban gardening movement, initiated 3 years ago as a joint effort with certain urban colleagues, has been enthusiastically accepted by people in the larger cities and other urban areas. It is estimated that about one-half of all families in this country are growing home gardens today.

The Department is expected to continue to give the same attention and support to this program as it has in the past several years. To this end, the Department of Agriculture is requested to use its facilities to make information on this subject available to as many groups and individuals as possible in the coming year.

The committee considers this to be an important program in terms of its value to urban people, both as a supplemental source of food and a wholesome and educational activity. Also, agriculture and rural people receive benefits from the better understanding that city dwellers develop of the problems involved in growing food for consumption.

WHOLESALE MARKETS

In addition, the modernization and improvement of antiquated, inefficient, and wasteful wholesale food markets in many of our larger cities has made an extremely valuable contribution to urban people. New wholesale markets have been built or are under construction in 40 of the 70 cities where studies have been made. The work in such cities as Boston, New Orleans, Los Angeles, New York, and Baltimore has made possible subsequent urban renewal developments of great economic benefit to the residents of those cities, in addition to a significant reduction in their food costs.

In New York City, for instance, agricultural products shipped by train from the Midwest and Far West had to be unloaded from boxcars onto barges for transport across the Hudson River. Then they had to be reloaded on trucks for delivery to the overcrowded wholesale district of lower Manhattan. Due to the very

high costs resulting from triple handling and wasted time in the congested narrow streets of this market area, it was estimated by USDA officials that about 50 percent of the retail cost of food consumed by New York residents was added after the product reached the Hudson—even for shipments from as far away as California.

The work of the Department in this instance resulted in the relocation of a significant portion of the lower Manhattan wholesale markets to Hunts Point in the Bronx, a less congested area with more convenient accessibility by rail and highway. This has not only reduced handling and transportation costs, but has added to the freshness and quality of products consumed in the New York markets.

Information from USDA shows that food distribution costs would have been about $6 per ton higher throughout the country had the wholesale operations still been carried out in the old way in the former facilities. Total savings due in large part to these Federal research studies are estimated to be over $85 million each year for the 40 cities in which new wholesale markets have been constructed.

According to testimony received from the head of USDA's research programs, many of the 281 standard metropolitan areas in the United States could benefit from a review of their wholesale food markets. Also, there are many smaller cities which could use such market studies. In addition, he points out, in many of the major cities where modern markets have been built, facilities are aging and review and update of the present studies are needed. In view of the value of this program to urban consumers, it is important that these wholesale markets studies be continued by USDA.

FARM PRICE SUPPORTS OFFSET INCREASES TO INDUSTRY AND LABOR

Mr. Chairman, to maintain a healthy agriculture, it is essential that a reasonable return be assured to the farm producer. A full parity income relationship between agriculture, industry, and labor must be maintained. The farmer must receive the same level of return for his investment, management, and labor as is assured to his counterparts in the nonfarm sector of the economy.

The 4 percent of the people who feed and clothe the other 96 percent cannot stay in business if they must accept lower prices for their crops, while paying ever-increasing production costs. The consumers of this and other nations of the world should not expect the producers of their food and fiber to exist under such an economic handicap.

As noted earlier in this report, an ever-increasing share of the consumer dollar is going to those between the producer and the consumer. Price stabilization provides the only real method of helping the farmer replace income which he has been losing to labor and industry. Labor can raise wages through collective bargaining. Industry can raise prices to the consumer. Those engaged in agriculture have no wages and cannot raise their prices, and therefore they are caught in a cost/price squeeze.

In view of his vulnerable position in the economic chain, the agricultural producer must have some degree of protection from the uncertainties of the marketplace. To produce a crop, the farmer must obtain credit at high interest rates; he must purchase farm inputs at inflationary prices; he must fight threats to his crops from insects and pests; and he must pray for good weather. The additional risks of market and price instability are often more than the farmer can carry.

In assessing the financial position of farmers, it is important to remember that farm income must cover return on equity, value of unpaid labor by the farm family, income and other taxes, and family living expenses. To the extent these cannot be provided by adequate prices at the marketplace, the farmer must obtain additional income from other sources: from nonfarm investment, from off-farm work, or from price supports. An increasing number of small and medium-sized farm producers in recent years, as their net income has suffered, have had to rely on nonfarm income to stay on the farm.

Without nonrecourse price support loans, producers would be required to send all their crops to market at harvest time, thereby saturating the market and driving down prices at the farm level. Under such a system, the producer would suffer at time of harvest and the traders and speculators would benefit from increased prices which may come later in the marketing year. This would not only hurt farm producers in the immediate crop year, it would threaten the Nation's source of food and fiber in future years.

FACTS ABOUT PRICE SUPPORTS

Mr. Chairman, price supports based on parity prices are intended to provide equality or equity to the farmer. They represent the return that the labor and capital used by the farmer in producing food and fiber might generate if employed in other segments of the economy. Price supports are designed to give farm producers the same purchasing power—in terms of goods and services used by them—as prevailed in the base period of 1910-14, a period when economic conditions for farm and nonfarm populations were considered to be equal or "in balance."

Price supports do not give the farmer any undue return for this investment, his farm managerial responsibilities, or the labor required from him and his family. They merely enable the farmer to support his family at a reasonable level and maintain his farming operation on a sound basis. They certainly do not represent a "subsidy" or "unearned" income.

The term "subsidy" is frequently used in reference to farm programs by those who do not understand such programs. It is used by those who ignore the increasing portion of the consumer dollar shifted by basic law to labor and industry and passed on as an unidentifiable part of the retail price—in effect a hidden "subsidy" guaranteed by law and the economic system.

So-called farm subsidies are often condemned by those who, themselves, receive tax benefits, tariff protection, production subsidies, reconversion payments, depletion allowances, or similar special financial advantages. They are often criticized in publications which are mailed out under tax-supported third- or fourth-class mailing privileges.

In the final analysis, however, farm price supports might be considered to be a consumer subsidy. They help to assure abundant supplies of wholesome food at reasonable prices, the lowest in the world. They provide economic benefits to the consumer through more stable markets and prices. An expert witness before the committee has testified:

> Any financial subsidies that go to farmers are, in essence, supporting or subsidizing the cost of food to all of us as consumers. It is a direct payment to farmers—true—but it is that mechanism through which you lower the cost of food.

The term "income stabilization" is a more accurate description of the farm price support system. For, under current nonrecourse loan programs, the farmer pledges his crop as collateral for a Government loan at harvest time if the market is glutted and prices are depressed, and surrenders title to the Government if he decides not to redeem the commodities at a later date. Selling at low prices when the market is flooded is thereby avoided, and the farmer is assured a reasonable return, either at the marketplace or through the CCC nonrecourse loan.

Many alternative programs to stabilize farm income and preserve a strong agricultural system have been tried, both in this country and abroad, through the years. None have been as effective as fixed price supports based on the parity concept, and the nonrecourse loan system.

PRODUCTION RATHER THAN SCARCITY

A review of the history of price supports shows conclusively that, in the final analysis, price supports through nonrecourse loans for storable commodities, together with the use of section 32 funds to protect prices of per-

ishables, is the most effective way to preserve a strong agricultural economy and to assure adequate supplies of food and fiber for all consumers. Such prices supports permit orderly marketing of crops at stable prices, which generally enables the farmer to meet his costs of production and earn a small profit to meet the living expenses of himself and his family.

When coupled with an aggressive export sales program, such a support system encourages a farm economy based on production rather than scarcity. It provides the best possible economic balance among the three major segments of the economy—agriculture, industry, and labor.

Mr. Chairman, I would like to turn now to the need to preserve our Nation's most precious resource, the land from which all else comes.

SOIL AND WATER CONSERVATION ESSENTIAL

About 60 percent of the Nation's land area is occupied by farms and ranches. Thus, our agricultural producers are the principal custodians of the country's soil and water resources. The Nation must rely on them to use these basic natural resources wisely in the production of food and fiber for present generations. It must assist them in the preservation of such resources for the benefit of present and future generations.

If we leave a fertile land for the future, our children and their descendants will be able to meet the challenges of their time. Money alone will not assure a good life for them, because money is only a medium of exchange. Our Nation's true wealth, an economy based on productive natural resources to generate food and fiber to support each successive generation, will assure the kind of future we should provide for our descendants.

The present generation can live prosperously, but we may waste our basic resources—as did previous civilizations in presently impoverished areas of the world that we help to feed and clothe today. In the long run, however, cashing in on the land and resources would reduce and eventually eliminate the means by which future citizens of this Nation would support themselves.

Despite efforts which may be made to reduce the Federal establishment and curtail expenditures, programs which provide protection for and conservation of our soil, water, and timber must be retained at a level sufficient to assure their continuation on an effective basis. The real wealth of the Nation is in its basic resources, not in its medium of exchange. It is this real wealth we must preserve—above all else.

LESSONS OF THE PAST

Mr. Chairman, the lessons of the past reveal what happened to the ancient civilizations of history, which failed to protect the land to meet not only their own current needs, but also those of future generations. All of the highly developed civilizations of the past disappeared from the Earth because of their irresponsible abuse of the soil, the water, and the forests over which they were only temporary stewards.

The highly sophisticated civilization of the Tigris and Euphrates Valleys of the Middle East during the period 2000 to 3500 B.C. eventually disappeared, even though those valleys were the granary of the great Babylonian Empire. Today, less than 20 percent of that area is cultivated, because the people of those earlier ages failed to protect and preserve the productive capacity of their land.

The prosperous civilization of the Valley of the Nile, which existed 2,000 years before Christ, became the granary for the Roman Empire. Intensive use of the land and failure to apply proper conservation measures, however, eventually resulted in salinization of the soil and water. Productivity was decreased to the point where the present population of this area is now dependent on food produced in other parts of the world.

Overcutting of the cedars of Lebanon of ancient Phoenicia for the markets of the Middle East, and failure to protect the seedlings from grazing animals, reduced the plentiful stands to only four small groves today.

For 4,000 years the people of China fought against the floods of the Yellow River. Silt was finally the victor. The dire poverty of the Chinese people may have been largely the result of the tremendous amount of cheap labor required through the centuries to carry on this endless battle. Here, silting and soil erosion—a consequence of poverty—became the cause of poverty.

Archeologists estimate that the population of Mesopotamia in the Middle East may have reached 25 million at the peak of its influence. At least 11 empires are thought to have risen and fallen in that tragic land over a period of 7,000 years. Today only 4 million people live in this area due to the damaging effects of silt and salt which were not properly treated by the people of those earlier empires.

The highly developed civilizations of ancient Guatamala and Yucatan are merely history today. Archeological studies indicate that intensive use of the land gradually reduced the fertility of the soil and eventually destroyed the food supply.

In the north of Syria, where erosion did its worst damage, hundreds of dead villages stand on the bare rocks as stark reminders of the failure of those societies to care for their soil and water resources. Most of those areas can never be rebuilt and repopulated—once the fertile soils are gone, all support for human life is gone.

While historians may have attributed these ancient calamities to acts of God, they were in fact due in large part of the failure of man to act wisely for the preservation of himself and future populations. Lack of knowledge and skills may have contributed. Human desire to get the most return possible from the land without reinvesting in the continued fertility of the soil was a major factor. The necessity for landless peasants to denude hillsides and destroy lands in a desperate effort to stay alive also contributed to the damage.

Throughout history, man has often failed to recognize that the cost of producing food, clothing, and shelter must be paid—either by the consumer of the products of such land or by the abuse of land from which they come. Man has ignored—due to lack of knowledge and responsible stewardship—that the land cannot be cultivated year after year, unless as much fertility is put back each year as is taken out.

WASTE OF RESOURCES IN NEW WORLD

Mr. Chairman, the United States is still a young country in relation to the ancient civilizations referred to above. During our short history, however, we have used up and destroyed vast amounts of the plentiful supply of natural resources which were here when the Pilgrims landed at Plymouth Rock. The continuation of such abuse could eventually reduce this country to a barren wasteland with the low standard of living found in much of Asia and the Middle East.

This country had 8,000 billion board feet of timber about 150 years ago. Today we have around 1,600 billion board feet left—only 20 percent of the original stand. This terrible waste of timber resources points up the extent to which our highly competitive economy can deplete a national asset in the generation of new wealth. It points up the need for continuing and expanding conservation efforts on a national basis.

Over 175 years ago we had 500 million acres of fertile soil in this Nation. We have already wasted 200 million acres—40 percent—and another 100 million acres—20 percent—is washing away today. It has been estimated that an average of 40 acres of top soil flows down the Mississippi River each day of the year. Also, estimates are that more than 1 million acres of arable land are lost to residential areas, highways, and other urban developments each year.

We in the United States have depleted our forests, our soil fertility, and our sources of water and other natural resources to support large public expenditures both at home and abroad. The pressures of the population explosion here in this country and elsewhere in the world have put a heavy strain on U.S. productive capacity.

The tremendous costs of national defense at home and military assistance on other parts of the world have been financed at the expense of our basic resources.

Today, despite the efforts of the various organizations and programs dedicated to resource conservation, many Americans are continuing to abuse the privilege of living off of the Nation's basic resources. Thus, full support for the Nation's conservation programs remain imperative.

PROBLEMS FOR THE FUTURE

The terrible dust bowls of the 1930's and those of subsequent decades have been dramatic examples of the consequences of converting grasslands into crop-producing acreage without properly protecting them from wind and weather damage. John Steinbeck's words in the "Grapes of Wrath" are as tragically apt today as in the 1930's. He wrote as follows:

Little by little the sky was darkened by the mixing dust, and the wind felt over the earth, loosened the dust and carried it away * * *. The finest dust did not settle back to earth now, but disappeared into the darkening sky * * *. The corn fought the wind with its weakened leaves until the roots were freed by the prying wind and then each stalk settled wearily sideways toward the earth.

Drought is threatening parts of the country again this year. Domestic water supplies are dangerously low in many areas. Moisture for crops and livestock production is inadequate in many areas.

During the past year, in addition to a very hot and dry summer, the fall and winter were also dry in much of the Nation. Severe to extreme drought conditions exist in parts of Texas and Oklahoma. In the central wheat areas, moderate to severe drought conditions are prevalent. In the southeastern and northeastern parts of the United States, very dry conditions are a source of concern.

It is generally recognized by soil experts that the highest permissible rate of soil loss is about 4 tons per acre per year. A recent survey by the Soil Conservation Service of USDA indicates that soil losses on class VI cropland in the United States are averaging nearly 15 tons per acre at present, and that the average annual loss of soil in America's Corn Belt is running 8 tons per acre—twice the permissible level. We are not losing 1 inch of topsoil to erosion every 8 to 10 years on the average, but new soil is created from bedrock at the rate of only 1 inch per century.

According to some studies, the Nation's farmland is beginning to show signs of severe strain. Three out of every five acres are in need of soil and fertility restoration. Such studies indicate that, unless conservation efforts are intensified and made more effective, it is just a matter of time until crop yields will suffer, food supplies will diminish, and the entire U.S. economy will be severely affected.

NEED TO CONTINUE CONSERVATION EFFORTS

Mr. Chairman, remarkable progress has been made since the initiation of the conservation programs of the Department of Agriculture in the early 1930's. The care and treatment of the Nation's soil and water resources has been transformed from careless exploitation to planned conservation. Between 1935 and World War II, conservation efforts were so effective that American agriculture was able to meet wartime production needs without undue damage to the land.

Since 1935, over 3,000 soil conservation districts covering 2.2 billion acres have been formed to assist farmers, ranchers, and rural communities to improve their land and water resources. The major river basins have been planned and many individual watersheds therein have been treated and equipped with water-retarding structures to protect land, streams, dams, reservoirs, rivers, and harbors below.

Since 1935, over 7 million trees have been planted, 2.5 million water impoundment reservoirs have been built, and hundreds of millions of acres of land have been treated. Today, millions of acres of once eroded lands are green and productive again due to these conservation measures.

It will be recalled that in 1954, this committee added $5 million to the appropriation bill to initiate the small watershed program—later established permanently by Public Law 566. This program has made a very valuable contribution to soil and water conservation throughout the United States since that time.

As inflation ravages our economy, and as the value of the dollar declines, the importance of our agricultural resource base—upon which the entire national economy depends—increases. It is our best hedge, against economic recession or worse. As long as we have fertile land and good water, we and our descendants can produce food and fiber to survive—regardless of what happens to our material wealth and our currency. The accomplishments of soil and water programs of the Nation during the past several generations have helped significantly to reduce the consequences of past and present conditions. The job is far from finished, however. One member of the Natural Resource Defense Council contends that, "Only 25 percent of the erosion control job is now being done." It is imperative therefore, that continued efforts be made to keep pace with the need for proper conservation and use of our basic resources.

THE AGRICULTURAL CONSERVATION PROGRAM

The ACP program established in 1936 has been a major contributor to the conservation programs of the Nation. Under this program, farmers put up their own money and their labor each year, supplemented by Federal funds, to carry out prescribed conservation practices on their land. The Federal share acts as seed money enabling and encouraging farmers to put part of their limited earnings back into the land. Since 1936, this program has stimulated twice as much conservation work as the amount of Federal funds spent.

The United States has spent billions of foreign aid dollars since World War II in assisting other countries of the world to improve their natural resources. At the same time less conservation work has been done at home than was actually needed and fully justified. In these times of financial distress, we must look again to the protection of our land and water resources. This must be one of our highest priorities among the programs funded by the Federal Government.

Mr. Chairman, I will provide for the record a table showing the conservation accomplishments of the ACP program since its inception:

Practice (unit)	Extent under 1980 program [1]	Total accomplishments, 1936–80
Water impoundment reservoirs constructed to reduce erosion, distribute grazing, conserve vegetative cover and wildlife, or provide fire protection and other agricultural uses (structures)	23,000	2,473,000
Terraces constructed to reduce erosion, conserve water, or prevent or abate pollution (acres)	491,000	36,843,000
Stripcropping systems established to reduce wind or water erosion or to prevent or abate pollution (acres)	112,000	115,282,000
Trees or shrubs planted for forestry purposes, erosion control, or environmental enhancement (acres)	257,000	7,233,000
Forest tree stands improved for forestry purposes or environmental enhancement (acres)	62,000	4,927,000
Wildlife conservation (acres)	52,000	[2] 14,591,000
Sediment pollution-abatement structures or runoff control measures (acres)	1,180,000	[3] 16,974,000

[1] Includes regular and long term agreements.
[2] From 1962 with certain data estimated.
[3] From 1970.

Mr. WHITTEN. Despite the valuable contribution to conservation made by this program, there have been frequent efforts to reduce its financial support and otherwise restrict its effectiveness. For 26 out of the past 28 years, this committee—with the backing of the entire Congress—has had to restore budget reductions in ACP funds. It is hard to understand the reason for such budget reductions each year by the executive branch. The value of the program to the resource base of the Nation and the tremendous amount of valuable and essential conservation work it has engendered should warrant full financial support by all.

The lessons of history must be reviewed frequently to remind the present generation of the constant necessity to protect and preserve the soil, the water, the trees, and other basic natural resources. Such review of history is also necessary to renew the Na-

tion's dedication to and support for today's conservation efforts. Any reduction in ACP, the backbone of the Nation's conservation efforts, would result in a serious weakening of our national programs to protect the real wealth of the country—the soil, water, and timber.

RURAL DEVELOPMENT

Mr. Chairman, a strong and productive agriculture requires the maintenance of healthy, happy, and productive people on the Nation's farms. In addition to programs to provide stability of income to farm producers, programs designed to improve the quality of life in rural areas are also important to the health, comfort, and happiness of rural people.

As noted earlier in this report, the number of farms has declined through the years and the farm population is down to 4 percent of the national population today. This decline is due in large part to reduced farm income and increased difficulties of keeping farms, especially smaller sized farms financially viable. It is also due to the fact that life in town is often more comfortable and appealing—particularly to younger people—than staying on the farm.

Recognizing the importance of rural America to all the people of the country, this committee has strongly supported through the years those agencies of Government which contribute to rural development, including such programs as rural electrification, rural telephones, water and sewer facilities, improved rural housing, community facilities, flood prevention, research and extension activities—all of which contribute so much to life in rural areas.

RURAL ELECTRIC AND TELEPHONE SYSTEMS

The Rural Electrification Administration was established by Executive Order 7037 of May 11, 1935, to make loans for the extension of central station electric service to unserved rural people. The Rural Electrification Act of May 20, 1936, made the program permanent. Public Law 423 amended the act in 1949 to authorize loans for furnishing and improving rural telephone service.

There are few programs which have contributed more to the well-being and productivity of people living and working in rural America. They have brought rural areas out of darkness into a way of life comparable to that previously found only in urban centers.

Rural electric and telephone systems have had a significant impact on the economic development of the areas in which they are located. Electricity and telephones have become indispensible to the operating efficiency of the Nation's farms. They are responsible, in part, for the remarkable achievement of American agriculture.

At the beginning of 1980, electric service was being provided to over 9 million rural consumers and telephone service was being provided to over 4 million subscribers—a remarkable achievement. Much of the equipment used to provide this service, however, was installed 10 or more years ago, and must gradually be replaced or upgraded to continue to provide adequate service. Nearly one-fourth of all telephone subscribers are still receiving multiparty service, in many cases four, five, eight, or more parties on a single line. Also, some areas still do not have any service. Many rural areas in Alaska are examples.

The committee is proud of the support it has given to the basic rural electrification legislation through the years. In addition, it has provided adequate funds through this annual appropriation bill to help these programs to meet the need. The committee has insisted through the years that the programs be expanded on an area coverage concept, to assure electricity and telephones at the end of the line in sparsely populated areas, as well as in the areas adjacent to more densely populated centers.

To assure such expansion, the committee has frequently added or restored loan funds for these purposes. While these have represented temporary increases in Government outlays, the repayment record of REA borrowers has been so good that the final cost to the taxpayer has been nil. Such expenditures have been an invaluable long-term investment in the development of rural areas, with benefits to both rural producers and urban consumers. Not only has life on the farm been made more livable, but the availability of electricity and telephones as farm production tools has modernized American agriculture and helped to make it the "Eighth Wonder of the World."

FARMERS HOME ASSISTANCE

Mr. Chairman, the programs of the Farmers Home Administration are also largely oriented toward rural development. Farm ownership and operating loans, together with emergency loans, water and sewer loans and grants, soil and water loans, housing loans and grants, and rural development loans and grants, enable farmers to remain on the land, plant and harvest their crops, and meet emergencies which often face them due to pestilence, bad weather, and adverse economic conditions.

Adequate housing was a scarcity in rural America until the late 1960's. With one-third of the national population, rural America had half of the Nation's substandard housing—a per capita ratio twice that of urban areas. Today, rural housing loans are available to farmers and rural residents in towns of less than 20,000 people to construct, improve, alter, or repair modest dwellings and farm buildings. Grants have been available to public or private nonprofit organizations for low-rent housing for domestic farm labor, and for mutual and self-help housing programs under which groups of families build their own homes by mutually exchanging labor. The results have been rewarding. As of September 1980, about 1.4 million borrowers have benefited from these housing programs. Despite this progress, however, some of the poorest housing in the Nation is still found in rural areas.

Loan and grant programs for water and waste disposal facilities, for community development, for watershed and flood prevention, and for resource conservation and development have resulted in significant improvements in the quality of life in rural areas. Water and sewer loans and grants have made an especially valuable contribution to the availability of water supplies and modernized sanitation systems throughout rural America. They have brought the health and well-being of rural people up close to the accepted standards of the 20th century.

The committee has taken an active part in establishing and expanding all of these FmHA programs through the years. Within the usual budget constraints, it has recommended adequate funds to permit these activities to reach the objectives set for them by law and the public need.

It has added funds when necessary for farm ownership and operating loans to enable farmers to remain on the farm and consumers to have necessary food and fiber products. It has felt that this was a far better investment than the use of funds to combat increased social problems in urban area resulting from population shifts from rural areas to crowded urban centers.

It has assured that funds for rural housing were available to meet housing needs. When the committee found that smaller rural communities were not being served by the urban-oriented housing programs, it took the lead in changing the definition of rural to make housing assistance available to small towns on the same basis as provided for large urban areas. This resulted in a rapid improvement in rural housing available to rural people.

The committee has given strong support to the water and sewer program of FmHA. It has taken great pride in helping to expand the number of such facilities throughout rural America. Through the years it has increased budget requests for this work when necessary to assure clean water and proper sanitation for rural people. This committee's action to make smaller towns eligible to share in this program has greatly accelerated the progress of construction of rural water

and sewer facilities. Some 10,500 water and sewer systems have been built since 1965.

RESEARCH AND EXTENSION

Mr. Chairman, for more than 100 years, Congress has endorsed the cooperative Federal/State research and extension programs. This unified national system has been so successful that it has become a model for similar programs adopted by many other countries of the world.

By long-term investment in agricultural research and extension, yields in every major area of crop production have been significantly increased and productivity of the land has been tripled. Also, a reliable, safe, and economical supply of meat products has been developed. The Nation's consumers have benefited greatly from the improved quality and wholesomeness of all food products.

It has been testified through the years that new strains of wheat, grains, and other farm crops are needed every 5 years to withstand new types of diseases and insects which nature develops through mutation. Only through constant research have new strains of crops been ready to be introduced when needed to prevent food shortages.

Experience indicates each dollar invested in agricultural research, extension, and teaching has returned over $4 to the American economy. All segments of society have benefited from such USDA research discoveries as penicillin. People in urban, as well as rural areas, have benefited from the 4-H club approach to problems of young people. The health of the entire population has been significantly improved by the nutritional programs of USDA now available to all segments of society.

Research and extension activities have added much to improved design and maintenance of rural homes and other buildings. They have also helped rural people with their economic problems and with the improved use of time, money, energy, and other family resources. Also, they have helped the rural family to apply improved techniques in making and caring for clothing and household furnishings. Such assistance at the farm level has become increasingly valuable as the number of small and part-time farmers grows.

As the price of energy increases, research and education related to inexpensive, lightweight, and energy-efficient farm equipment has become increasingly valuable to farm operations. Research on improved planting and harvesting techniques has also been important. Research and education related to protection against pests and diseases has been a most valuable contribution to food production and human health.

Without these agricultural research and extension programs over the past 25 years, it is estimated that our standard of living in the United States would be only half as high as it is today.

The research and extension programs of the Department have had the strong support of this committee through the years. The hearing records and reports indicate the extent to which the committee has provided financial support, as well as program direction, to make this area of USDA an effective and efficient contributor to the people of this Nation.

MUCH REMAINS TO BE DONE

Despite the efforts this committee and Congress have made, Mr. Chairman, a large need for housing and water and sewer systems continues to exist. Some parts of rural America still have no electric and telephone services—essentials to modern-day existence. The future of our water supplies becomes a more serious problem each year.

Nearly one-fourth of the people in the United States still face problems of water shortages and poor water quality. The rate of water use throughout the country in 1980 was nearly double that of 1955. Just a few years in the future, it is estimated that we will need double or triple the amount of water we use today.

AGRICULTURAL EXPORTS ESSENTIAL

Mr. Chairman, through the years, the committee has done everything possible to encourage exportation of U.S. agricultural commodities which are surplus to domestic needs. It has continued to insist that the United States be a consistent supplier of such commodities in world markets at competitive prices.

The Department's failure to sell abroad competitively in the 1950's—despite authority in basic law to do so—did great damage to American agriculture. Inventories of CCC-held stocks increased nearly tenfold from 1953 to 1960. This large accumulation of commodities was then used by the Secretary of Agriculture to reduce acreage and thereby force thousands of producers off their farm.

The Export Sales Act of 1956 required the Secretary of Agriculture to establish an export goal at the beginning of each year and to announce it to the world, to regain the historical U.S. share of world markets. It is essential that this course be followed consistently each year to retain U.S. markets abroad. It should be recalled that when the Secretary of Agriculture—at the insistence of this committee—finally offered the first cotton for sale overseas for dollars in 1955, 1 million bales were sold in a few weeks and 7 million bales were sold soon after the sale was announced.

Failure to export American farm products competitively has a number of adverse effects. It depresses prices at the farm level to the point of total national distress. It impairs our ability to earn much needed foreign exchange. It damages our image as a consistent supplier in world markets and it denies food to other countries to feed their hungry people.

Our rural and urban people both benefit from agricultural exports. It is estimated that as many as half a million American producers are able to stay on the farms due to production for export markets. It is estimated that an even larger number of urban dwellers are engaged in the processing, transportation, and marketing of farm products sold in export markets.

The mechanism established by law for the Commodity Credit Corporation, and the sales organization established in USDA by this committee and the Congress, offer the best possible means of maintaining farm exports at a level which will support a strong national economy.

WE MUST BE A NATION OF PLENTY

It is a far more sound national policy, Mr. Chairman, to produce abundant supplies of food and fiber—and sell or even donate domestic surpluses to hungry people in other parts of the world—than to limit production in an attempt to force reasonable prices at the marketplace. A national policy of agricultural abundance rather than scarcity is not only beneficial to the American economy, it is also a humane approach to helping to meet world food needs—an approach worthy of the American people. While the control of price through limiting of production may possibly be justified for the products of industry and labor, no such practice can ever be condoned for the production of food and fiber—the basic necessities of life.

Stability of market prices should be assured through a price support policy which provides fair prices to producers and adequate food for consumers at reasonable prices. The committee has supported this approach to farm programs through the years. It continues to do so.

The committee urges the President and Secretary of Agriculture to adopt this approach in dealing with farm programs of the future, so that a strong agriculture will be used to make a significant contribution to the goals of national financial recovery and economic stability.

Failure to produce and export in the 1950's was the most damaging policy ever followed by agricultural officials of this Nation. The large international agricultural traders of this country must never again be permitted to subjugate the welfare of American agriculture to their own international interests. The facilities of CCC are avail-

able when needed to serve as a central arm of the people to assure full production and fully competitive exportation of American farm products.

THE WORLD NEEDS OUR FOOD

Mr. Chairman, hunger continues to be one of the foremost problems of the world. Starvation accounts for thousands of deaths every day in food-deficient countries. Experts claim that half of the world's 4 billion people suffer from some form of malnutrition, due to inadequate diets and hunger.

Also, the world is faced with an ever-increasing number of mouths to feed, especially in underdeveloped countries. With extensive hunger at today's population levels, the frightening prospect of even greater starvation at increased population levels of the future hangs heavily over everyone living on this planet today.

It should be remembered that the population of the world, which reached the first billion by the year 1830, took only 100 additional years—1830 to 1930—to reach 2 billion. In only 30 more years—1930 to 1960—it reached 3 billion. Total world population is projected to double to 6 billion people by the turn of the century. Most of this increase will occur in the developing and food-deficient countries of Africa, Latin America, and Asia.

The world's population growth in the 21st century and beyond is inconceivable. The problems of feeding that many human beings are incomprehensible. The committee has previously quoted a former Member of the U.S. Senate who said:

> Two grim specters beckon mankind toward oblivion today. One offers instant and wholesale death by nuclear means. The alternative guarantees eventual starvation when the human population exceeds the food supply.

In view of the challenges facing the world today and in the future, a policy of food scarcity in any part of the world cannot be condoned. American agriculture must make its full contribution to the world's need for abundant supplies of food and fiber through full production and competitive exportation.

Last November, the director general of the Food and Agricultural Organization (FAO) warned that, "We are in a situation of global alert." Citing food production setbacks in several regions, including some of the larger food-producing countries, he predicted that, "World cereal crops will fall in 1980-81 for the second year in a row, and are likely to drop next year below the minimum level * * * necessary for world food security."

In March 1981, the director general of FAO reported that 28 African countries are severely afflicted by drought. He stated that cereal production in these countries was 12 percent lower in 1980 than in 1978, the last average year. While their food production has been falling steadily in the past decade, population growth has been among the highest in the world.

EXPORTS HELP OUR TRADE BALANCE

Exports of American farm commodities continue to make a major contribution to the Nation's financial position. The value of U.S. agricultural exports totaled $41 billion in 1980 and is expected to reach $49 billion in 1981—enough to finance better than half of total U.S. petroleum imports expected during the same periods.

Mr. Chairman, I will provide for the record figures showing the growing contribution made by agriculture to the U.S. trade balance during the past 50 years:

[By calendar years, in billions of dollars]

	1930	1940	1950	1960	1970	1975	1976	1977	1978	1979	1980
Agricultural:											
Exports	1.2	0.5	2.9	4.8	7.3	21.9	23.0	23.7	29.4	34.7	41.0
Imports	1.5	1.3	4.0	3.8	5.8	9.3	11.0	13.5	14.8	16.7	17.4
Balances:											
Agricultural	−.3	−.8	−1.1	+1.0	+1.5	+12.6	+12.0	+10.2	+14.6	+18.0	+23.6
Nonagricultural	+1.0	+2.1	+2.5	+4.4	+1.3	−2.8	−20.7	−40.0	−46.4	−46.7	−50.0

It is estimated that about one-third of our cultivated land is used for the production of food and fiber for export. Over half a million farmers and an even larger number of nonfarm people are employed in growing and handling U.S. agricultural products for export markets.

FOOD FOR PEACE—PUBLIC LAW 480

Mr. Chairman, the food for peace program was established by act of Congress in 1954 to help reduce the huge inventories of U.S. agricultural commodities, which had accumulated under an administration which would not offer them for sale in world markets. Also, it had an even greater humanitarian purpose to make our abundant supplies available to needy people abroad who were unable to buy them through normal commercial channels.

This was done through sales for foreign currencies, which the United States then used for market development, payment of U.S. obligations abroad, and the encouragement of economic development in the less developed countries involved. Public Law 480 also authorized sales on long-term credit terms to expand international trade and to make food available to needy people with short- and intermediate-term currency shortages. In addition, U.S. commodities were donated where urgently needed to feed hungry people suffering from such disasters as droughts, floods, crop failures, or other acts of God. A recent addition to the basic act authorizes the donation of U.S. commodities with no repayment obligation if the recipient country uses the funds from local sale to promote agricultural and rural development and to improve the lot of the poorest sectors of the population.

The benefits of this food-for-peace program have been great—both at home and abroad. First and foremost, millions of people are alive today who otherwise might have starved—U.S. food made available to them under the special terms of Public Law 480 made the difference. Second, the program helped to build international markets and good relations between the United States and other countries. It has been a very effective market development tool.

EMBARGOES UNWISE

From time to time through the years, Mr. Chairman, the United States has placed embargoes on U.S. farm commodities, usually for political reasons. While such embargoes may have adversely affected the target country temporarily, the long-range effect has been to hurt the American farmer—and thus the entire Nation.

To retain and expand our agricultural export markets, we must improve the reputation of the United States as a dependable supplier of farm products. Embargoes on sales to other countries—for whatever reason—have the opposite effect. They not only deny food and fiber to needy people, but they damage the image of the United States as a dependable supplier. This depresses market prices and farm income at home and encourages other nations to increase their production and enter world markets as permanent competitors. It causes foreign importers to look elsewhere for their supplies and thereby places the United States in the position of a perpetual residual supplier.

It will be recalled that in 1973 an embargo was placed on U.S. soybeans. As a result, Brazil immediately expanded its acreage of soybeans, which largely offset the intended punitive

effect of the U.S. embargo. Not only was the U.S. soybean producer hurt for that crop year, he was hurt permanently because Brazil has become a permanent competitor to the United States in world soybean markets. The Secretary of Agriculture at that time called this a bad experience.

In 1974, a hold was placed on 3.2 million tons of corn and wheat scheduled for export, requiring prior notification to USDA of sales to any country above 56,000 tons and approval of USDA of sales over 100,000 tons. In 1975, an embargo was placed on grain sales to the Soviet Union. These actions were claimed by one farm organization to have cost wheat producers a dollar a bushel.

The most dramatic recent example is the suspension of grain shipments to the Soviet Union on January 4, 1980—in response to the Soviet invasion of Afghanistan. This embargo involved 17 million metric tons of grain—13 million tons of corn and 4 million tons of wheat. In addition, seeds, soybeans, animal feeds, meat, poultry, dairy products, and some animal fats were also embargoed.

The effect on Soviet consumers does not appear to have justified the harm done to American farmers. Despite assurances from other grain-producing countries that they would not directly or indirectly replace the 17 million tons of grain denied to Russia by the United States, it now appears that virtually all of the embargoed amount was obtained by the U.S.S.R. from non-U.S. sources. In recent testimony before this committee, Secretary of Agriculture Block stated that the U.S.S.R. had made up all but 1 or 2 million tons of the 17 million tons of grain embargoed.

Department of Agriculture figures indicate that the real object of the embargo, a forced reduction of meat for consumers in the Soviet Union, was not accomplished.

Despite assurances from the former administration that U.S. farmers would be protected from any undue damage from the embargo, the actual effect on American farmers was severe. Corn prices weakened soon after January 1980, and USDA efforts to remove extra supplies from this market were ineffective. While gross farm income increased slightly in 1980, it was far below what it would have been if the embargo had not been adopted. It should be noted that net farm income in 1980—the actual return to the farmer—was nearly $8 billion less than in 1979 and $2.8 billion less than in 1978.

In the opinion of a majority of the committee, this country's international diplomatic objectives should be met by actions other than by cutting off farm products to other nations of the world. It is far better to sell food than to sell weapons to potential adversaries. If embargoes are found to be the only solution to U.S. international problems, a national embargo on all goods and services supplied by this country should be adopted. This would have a much stronger effect on the target country and would require more equal sharing of the adverse effects by all sectors of the U.S. economy.

The 1980 Soviet embargo placed an unequal penalty against the American farmer—one which he should not have been expected to suffer alone.

SUMMARY

Mr. Chairman, the United States is faced with very serious financial problems. Rampant inflation is reducing purchasing power, stagnating industrial activity, and weakening agriculture. It is rapidly eroding the economic strength of the Nation.

A way must be found to balance the Federal budget and to stabilize the Federal debt. However, this must be done at a high enough level of income and outgo to make such action possible and acceptable, and to prevent a possible collapse in the Nation's economy in the process.

Fortunately, we in the United States have a strong Nation, one which is endowed with rich natural resources and is blessed with strong and resourceful people. If we protect the real wealth of our country—the soil, the water, the timber, and the productive capacity of our agriculture—we will have the means to solve our money problems today and to assure a good life for our children and grandchildren in the future.

After all, our money is only a medium of exchange. It is what our money is based on—the physical assets and basic natural resources of the country—that must be preserved. Gold, precious stones, and other forms of material wealth can never feed present or future generations of people. Only the land and it productive capacity can do this. This truism must be the basis for all decisions and actions taken by our President and our Congress to meet the serious challenges facing our Nation today.

Mr. TRAXLER. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to my colleague, the gentleman from Michigan, the ranking member of the subcommittee.

May I take this time to say what a fine job the gentleman has done.

Mr. TRAXLER. I wish to thank the gentleman for those kind words, and I would like to cite for the record my appreciation of the gentleman's chairmanship of this committee over the many, many years which he has had it. Certainly there is no greater, finer person in this Congress who has more knowledge of the problems of rural America than the gentleman in the well and the chairman of the Subcommittee on Agriculture. I wish to commend him for his efforts on behalf of my constituents and all persons in rural America across this Nation.

I would like to also commend the gentlewoman from Nebraska (Mrs. SMITH), who is beginning her tenure as ranking minority member on the subcommittee. We welcome her to the committee. She has done an excellent job.

Mr. Chairman, I rise in complete support of H.R. 4119, a bill making appropriations for Agriculture, rural development, and related agencies for fiscal year 1982.

As a member of the Subcommittee on Agricultural Appropriations, I know the months of consideration that went into this spending measure, and while each member might personally prefer different funding levels for various individual programs, this bill is a very responsible one that recognizes the fiscal constraints under which this Congress is operating.

This has been a very trying year. Normally we would be before the House for consideration of this bill in mid-June. But the highly unusual reconciliation process that has been forced upon us this year has made us wait to bring this bill before you because of the vast uncertainties associated with trying to second-guess what the House might set as its budget priorities.

We bring you a bill that we believe is in the best interest of the American farmer and the American consumer. We held several weeks of hearings with officials from the Department of Agriculture as witnesses, who, quite frankly, were often unable to respond to many of our questions about the real needs of their programs because many of these very officials did not know what funding level the administration would allow them to request of this body. And even today we are hearing that the President may not like this bill because we did not abrogate our constitutional responsibility to the Office of Management and Budget, and just swallow what OMB presented to us.

Mr. Chairman, our subcommittee responds to the needs of the people of this Nation, especially when these people exercise their rights as citizens and testify before us regarding the needs they believe exist for the programs under our jurisdiction. We are also very proud that we are extremely frugal with the taxpayer's dollar. While some in the administration may not like our priorities within this bill, the fact is that this bill is more than a billion dollars below the total spending level requested by the President in his very austere budget.

Mr. Chairman, I would like to take my remaining time to describe various specifics of the fiscal 1982 Agricultural

appropriations bill which may be of interest to our colleagues.

Title I is where members will find the programs that are designed to help farmers in the production of food and fiber. These programs deal with matters ranging from insuring the wholesomeness of our food supply to providing an excellent research base which seeks to guarantee the ability of the American farmer to produce an abundant crop in the future.

This title provides funds for the Federal Grain Inspection Service. This is our Rube Goldberg contraption which is designed to assure foreign buyers of American grain that they are getting what they have paid for. I say this is our Rube Goldberg contraption because experience with this agency over the past several years has demonstrated that while meeting its goals, it in some instances has increased the costs of operations for our farmers and agribusiness, and in the opinion of many of the people I represent has caused delays and the higher costs associated with these delays while the grain elevator waits for the inspector to arrive.

I have been told by some of my constituents that FGIS appears to be a bit more cooperative in recent days, partly because the House had the wisdom to remove part of this Rube Goldberg machine last year when we approved the elimination of mandatory in-bound weighing and grading. I hope that this spirit of cooperation recently demonstrated by FGIS will continue, and I can assure you that this Member will do all that he can in order to help FGIS maintain this cooperative attitude.

Title I also provides funds for the various components of agricultural research. In the expected exercise of Presidential prerogative, what had previously been the Science and Education Administration has once again been restructured as several individual agencies, similar to the organization utilized in the Ford administration.

We have essentially accepted the President's recommendation for the Agricultural Research Service with relatively minor modifications. The bottom line on this agency is that we will be spending $26.9 million more on agricultural research conducted by USDA in fiscal 1982.

There are certain programs that are of particular interest to Michigan in the agricultural research budget. Once again the agency is providing nearly $190,000 for dry bean research, including work on disease control and breeding, and more than $430,000 for sugar beet research, with both of these projects being conducted at Michigan State University. These projects have been underway as an ongoing effort for a number of years in light of the importance of these two crops to Michigan agriculture. I have received assurances from the Administrator of the Agricultural Research Service, Dr. Terry Kinney, during the course of our hearings, that this research is likely to continue at these levels for at least the next 3 years.

We have also provided $200,000 in this section of the bill for the agency to conduct a feasibility study into the possibility of establishing a cooperative National Food Toxicology Research Center. This is the first installment of funds for a study that is likely to go well into fiscal 1983. Information provided to the subcommittee by Michigan State University has demonstrated the critical need that we have to develop such a center, and the very important concern that this center be able to offer a multidisciplinary approach to such a project, including the disciplines of pathology, toxicology, biochemistry, pesticide research, epidemiology, and clinical toxicology. Michigan State University is in an excellent position to offer such a multidiscipline approach with the establishment of its Center on Environmental Toxicology, and the committee expects that Michigan State will be a key contractor in this feasibility study.

This title of the bill also funds the Cooperative Research Service, the arm of the Department that has the mission of working in cooperation with the States and their land-grant institutions in responding to the critical research needs of farmers in each State. This year we will be providing a $19 million increase over fiscal 1981, targeting money toward those projects which are of immediate importance to our farmers.

This goal has meant that we have had to once again restore some programs which the administration believes to be not important enough to merit funding, but which have been demonstrated to be deserving of limited Federal dollars during the course of our hearings.

Again, looking at the programs of importance to Michigan's farmers, the subcommittee has restored funds for the Saginaw Valley Bean and Beet Research Farm, and provided a modest increase of $10,000, for a total funding level for this project of $85,000. This project has been supported for the past 4 years, and involves a cooperative effort between the Government and beet and bean producers who also provide funds for this research. The farm is expanding to meet the continuing research needs for these two important Michigan commodities, and the modest increase is in keeping with the cooperative effort that the Federal Government has demonstrated for these past few years.

We are also restoring $103,000 for bean flour research which is being conducted jointly by Michigan State University and Texas A. & M. This is the third year for this project which in the next few weeks will begin large-scale consumer testing of food products made with various levels of flour made from dry beans. These products hold the promise of making even the most basic and simple of foods like breads, cookies, snack items and others, far more nutritious than they are currently.

We are also restoring $35,000 for dairy photoperiod research at Michigan State University. This is the fourth year for this project which is helping to demonstrate methods of moderating the milk production of dairy animals on a short-term basis when changing the size of the herd might prove to be impractical.

The subcommittee has also restored $100,000 for the second year of work on the problems of blueberry shoestring virus in the State of Michigan, a problem that is of major significance to the blueberry producers of our State and other areas.

The subcommittee has also for the first time approved funds for the competitive grant program—$10 million. The program is also being modified this year by identifying $3 million of this amount for work on animal research projects, the first time that the program has been utilized in this fashion. While I still have my doubts regarding the administration of this research program, I continue to support the research projects that it has funded for the most part. The Department has yet to convince me that the competitive grant program is superior to contract grant programs.

While animal research is spread over various programs in this bill, it is important that animal producers recognize that this bill in total provides $14 million more for animal research than was provided for fiscal 1981. We recognize the importance of animal health research, and want to demonstrate our commitment to these efforts, although there may be some disagreement regarding the mechanisms that are being followed in order to provide these funds, with these differences centering around the funding levels for each individual program, with some preferring one program over another.

This title will also fund the Extension Service, the one agency of the Department that works constantly to provide farmers with the latest information on new farm techniques, crop varieties, and other general information helpful to farmers, while also sponsoring the 4-H program, a program that is designed to help young people understand the importance of agriculture while shaping them as leaders for the future.

We have restored again certain programs which are the favorite targets of well-meaning budget analysts, but are also essential to the further development of the understanding of the

needs of agriculture. Specifically, we have again restored $3 million for the urban gardening program, and $1.02 million for the farm safety program, two programs which pay for themselves in the value of crops produced and the number of serious farm-related agencies avoided.

But overall we are providing nearly a $20 million increase in the basic Smith-Lever program to fund the basic operations of the Extension Service. This is nearly a 10-percent increase over fiscal 1981, and provides the first significant increase to Extension to deal with the higher costs of operations over the past several years. It is important that this increase be recognized as a priority, and it is extremely fortunate that this program escaped the budget ax earlier this year because of its significance to all farmers.

The Food Safety and Inspection Service is responsible for operating the Federal meat inspection program. It has recently come to our attention that the State of Michigan will be turning over its program to FSIS effective October 1 of this year. Several States have recently opted to follow the provisions of law which require the Department of Agriculture to run the entire program when State support becomes too low to be considered effective.

The Department has currently divided Federal jurisdiction for various components of the meat inspection program in Michigan over three different USDA offices, and rumors persist that certain operations in the Lower Peninsula will be further divided, adding a fourth USDA office. This organizational structure would certainly entail excessive administrative and travel costs, as well as create various operating difficulties for meat processors and the meat industry in Michigan generally.

For this reason, our report to accompany this bill directs the agency to provide one single area office to administer the meat inspection program in Michigan, and further provides that this office should be located in the State of Michigan. I understand that the agency has had this and other options under consideration, but the matter is so important that the committee felt that it was necessary for this directive to be given with this legislation.

The Economic Research Service, formerly the Economics, Statistics and Cooperatives Service, had begun a dry bean acreage program in the State of Michigan in fiscal 1981 in order to respond to complaints about the tremendous problems caused by erroneous dry bean crop estimates published by the agency in previous years. The program is underway, and we have provided an additional $25,000 for it so that the data collection work associated with this project can be continued to increase the possibility of success with the program. This additional funding has the support of the agency.

Title II provides those programs that seek to improve the quality of life in rural areas. Primarily, this is the funding for the programs of the Farmers Home Administration.

There are some increases provided for those loan programs that provide operating assistance to farmers, but the levels proposed in the Reagan budget are often quite lower than those amounts that had been originally suggested in the Carter budget. This is significant because these loans are not a cost to the Federal Government because the farmer has traditionally had the best repayment record of any borrower. But the administration wants to control the flow of guaranteed assistance, so these programs were reduced between budget submissions.
